**CAUTIONARY STATEMENT FOR PURPOSES OF THE SAFE HARBOR
PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**

This Quarterly Report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 concerning, among other things, our prospects and business strategies. These forward-looking statements are included in various sections of this report, including the section entitled Outlook appearing in Item 2 of this report. The words may, will, believe, should, could, plan, expect, anticipate, estimate, and similar (and variations thereof), identify these forward-looking statements. Although we believe that the expectations reflected in these forward-looking statements are based on reasonable assumptions, these expectations may not prove to be correct. Because these forward-looking statements are also subject to risks and uncertainties, actual results may differ materially from the expectations expressed in the forward-looking statements. Important factors that could cause actual results to differ materially from the expectations reflected in the forward-looking statements include:

general economic, business and market conditions;

our ability to source and procure needed materials, components and other products and services in accordance with customer demand and at competitive prices;

changes in capital availability or costs, including increases in our cost of borrowing (i.e., interest rate increases), the amount of our debt, our ability to access capital markets at favorable rates, and the credit ratings of our debt;

changes in consumer demand, prices and our ability to have our products included on top selling vehicles, including any shifts in consumer preferences away from light trucks, which tend to be higher margin products for our customers and us, to other lower margin vehicles, for which we may or may not have supply contracts;

changes in automotive and commercial vehicle manufacturers' production rates and their actual and forecasted requirements for our products, such as the significant production cuts during 2008 and 2009 by automotive manufacturers in response to difficult economic conditions;

the overall highly competitive nature of the automobile and commercial vehicle parts industries, and any resultant inability to realize the sales represented by our awarded book of business (which is based on anticipated pricing and volumes for the applicable program over its life);

the loss of any of our large original equipment manufacturer (OEM) customers (on whom we depend for a substantial portion of our revenues), or the loss of market shares by these customers if we are unable to achieve increased sales to other OEMs;

industrywide strikes, labor disruptions at our facilities or any labor or other economic disruptions at any of our significant customers or suppliers or any of our customers' other suppliers (such as the 2008 strike at American Axle, which disrupted our supply of products for significant General Motors platforms);

increases in the costs of raw materials, including our ability to successfully reduce the impact of any such cost increases through materials substitutions, cost reduction initiatives, low cost country sourcing, and price recovery efforts with aftermarket and OE customers;

the negative impact of higher fuel prices on transportation and logistics costs, raw material costs and discretionary purchases of vehicles or aftermarket products;

Edgar Filing: TENNECO INC - Form 10-Q

the cyclical nature of the global vehicle industry, including the performance of the global aftermarket sector and the longer product lives of vehicle parts;

our ability to successfully execute cash management, restructuring and other cost reduction plans and to realize anticipated benefits from these plans;

costs related to product warranties and other customer satisfaction actions;

the impact of consolidation among vehicle parts suppliers and customers on our ability to compete;

Table of Contents

changes in distribution channels or competitive conditions in the markets and countries where we operate, including the impact of changes in distribution channels for aftermarket products on our ability to increase or maintain aftermarket sales;

the cost and outcome of existing and any future legal proceedings, including, but not limited to, proceedings against us or our customers relating to intellectual property rights;

economic, exchange rate and political conditions in the countries where we operate or sell our products;

customer acceptance of new products;

new technologies that reduce the demand for certain of our products or otherwise render them obsolete;

our ability to realize our business strategy of improving operating performance;

our ability to successfully integrate any acquisitions that we complete and effectively manage our joint ventures and other third-party partnerships;

changes by the Financial Accounting Standards Board or the Securities and Exchange Commission of authoritative generally accepted accounting principles or policies;

changes in accounting estimates and assumptions, including changes based on additional information;

any changes by International Standards Organization (ISO), Technical Specifications (TS) and other such committees in their certification processes for processes and products, which may have the effect of delaying or hindering our ability to bring new products to market;

the impact of changes in and compliance with laws and regulations, including environmental laws and regulations, which may result in our incurrence of environmental liabilities in excess of the amount reserved, the implementation of mandated timelines for worldwide emission regulation, which could impact the demand for certain of our products, and any changes to the timing of the funding requirements for our pension and other postretirement benefit liabilities;

decisions by federal, state and local governments to provide (or discontinue) incentive programs related to automobile or other vehicle purchases;

the potential impairment in the carrying value of our long-lived assets and goodwill or our deferred tax assets;

potential volatility in our effective tax rate;

natural disasters, such as the recent earthquake in Japan and flooding in Thailand, and any resultant disruptions in the supply of goods or services to us or in production or demand by our customers;

acts of war and/or terrorism, as well as actions taken or to be taken by the United States and other governments as a result of further acts or threats of terrorism, and the impact of these acts on economic, financial and social conditions in the countries where we operate; and

the timing and occurrence (or non-occurrence) of other transactions, events and circumstances which may be beyond our control.

The risks included here are not exhaustive. Refer to Part I, Item 1A Risk Factors in our annual report on Form 10-K for the year ended December 31, 2010, for further discussion regarding our exposure to risks. Additionally, new risk factors emerge from time to time and it is not possible for us to predict all such risk factors, nor to assess the impact such risk factors might have on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

PART I.

FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS (UNAUDITED)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Board of Directors and Shareholders of
Tenneco Inc.:**

We have reviewed the accompanying condensed consolidated balance sheet of Tenneco Inc. and consolidated subsidiaries as of September 30, 2011, and the related condensed consolidated statements of income (loss), of cash flows, and of comprehensive income for the three-month and nine-month periods ended September 30, 2011 and 2010, and of changes in shareholders' equity for the nine-month periods ended September 30, 2011 and 2010. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2010, and the related consolidated statements of income (loss), of cash flows, of changes in shareholders' equity and of comprehensive income (loss) for the year then ended (not presented herein), and in our report dated February 25, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2010, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

The accompanying notes to the condensed consolidated financial statements are in an integral part of these statements of comprehensive income.

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

(Unaudited)

(1) Consolidation and Presentation

As you read the accompanying financial statements you should also read our Annual Report on Form 10-K for the year ended December 31, 2010.

In our opinion, the accompanying unaudited financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly Tenneco Inc.'s financial position, results of operations, cash flows, changes in shareholders' equity, and comprehensive income (loss) for the periods indicated. We have prepared the unaudited condensed consolidated financial statements pursuant to the rules and regulations of the U.S. Securities and Exchange Commission for interim financial information. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America (U.S. GAAP) for annual financial statements.

Our condensed consolidated financial statements include all majority-owned subsidiaries. We carry investments in 20 percent to 50 percent owned companies in which the Company does not have a controlling interest, as equity method investments, at cost plus equity in undistributed earnings since the date of acquisition and cumulative translation adjustments. We have eliminated all intercompany transactions. We have evaluated all subsequent events through the date the financial statements were issued.

(2) Financial Instruments

The carrying and estimated fair values of our financial instruments by class at September 30, 2011 and December 31, 2010 were as follows:

	September 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt (including current maturities)	\$ 1,236	\$ 1,245	\$ 1,162	\$ 1,201
Instruments with off-balance sheet risk:				
Foreign exchange forward contracts:				
Asset derivative contracts			2	2
Liability derivative contracts	2	2		

Asset and Liability Instruments The fair value of cash and cash equivalents, short and long-term receivables, accounts payable, and short-term debt was considered to be the same as or was not determined to be materially different from the carrying amount.

Long-term Debt The fair value of our public fixed rate senior notes is based on quoted market prices. The fair value of our private borrowings under our senior credit facility and other long-term debt instruments is based on the market value of debt with similar maturities, interest rates and risk characteristics.

Foreign exchange forward contracts We use derivative financial instruments, principally foreign currency forward purchase and sales contracts with terms of less than one year, to hedge our exposure to changes in foreign currency exchange rates. Our primary exposure to changes in foreign currency rates results from intercompany loans made between affiliates to minimize the need for borrowings from third parties. Additionally, we enter into foreign currency forward purchase and sale contracts to mitigate our exposure to changes in exchange rates on certain intercompany and third-party trade receivables and payables. We manage counter-party credit risk by entering into derivative financial instruments with major financial institutions that can be expected to fully perform under the terms of such agreements. We do not enter into derivative financial instruments for speculative purposes. The fair value of our foreign currency forward contracts is based on an internally developed model which incorporates observable inputs including quoted spot rates, forward exchange rates and discounted future expected cash flows utilizing market interest rates with similar quality and maturity characteristics. We record the change in

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

fair value of these foreign exchange forward contracts as part of currency gains (losses) within cost of sales in the condensed consolidated statements of income. The fair value of foreign exchange forward contracts are recorded in prepayments and other current assets or other current liabilities in the condensed consolidated balance sheet. The fair value of our foreign exchange forward contracts, presented on a gross basis by derivative contract at September 30, 2011 and December 31, 2010, respectively, was as follows:

	Fair Value of Derivative Instruments					
	September 30, 2011			December 31, 2010		
	Asset	Liability	Total	Asset	Liability	Total
	Derivatives	Derivatives		(Millions)	Derivatives	
Foreign exchange forward contracts	\$	\$ 2	\$ 2	\$ 2	\$	\$ 2

The fair value of our recurring financial assets and liabilities at September 30, 2011 and December 31, 2010 are as follows:

	September 30, 2011			December 31, 2010		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
	(Millions)					
Financial Assets:						
Foreign exchange contracts	n/a	\$	n/a	n/a	\$ 2	n/a
Financial Liabilities:						
Foreign exchange contracts	n/a	\$ 2	n/a	n/a	\$	n/a

The fair value hierarchy definition prioritizes the inputs used in measuring fair value into the following levels:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs, other than quoted prices in active markets, that are observable either directly or indirectly.

Level 3 Unobservable inputs based on our own assumptions.

The following table summarizes by major currency the notional amounts for foreign currency forward purchase and sale contracts as of September 30, 2011 (all of which mature in 2011):

**Notional Amount
in Foreign Currency
(Millions)**

Australian dollars	Purchase	2
British pounds	Purchase	4
European euro	Sell	(9)
Japanese Yen	Purchase	442
South African rand	Purchase	162
U.S. dollars	Purchase	1
	Sell	(23)
Other	Sell	(1)

(3) Long-Term Debt and Financing Arrangements

Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of up to 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

On June 3, 2010, we completed an amendment and extension of our senior secured credit facility by extending the term of our revolving credit facility and replacing our \$128 million term loan A with a larger and longer maturity term loan B facility. As a result of the amendment and extension, as of September 30, 2011, the senior credit facility provides us with a total revolving credit facility size of \$622 million until March 16, 2012, when commitments of \$66 million will expire. After March 16, 2012, the extended revolving credit facility will provide \$556 million of revolving credit and will mature on May 31, 2014. The extended facility will mature earlier on December 15, 2013, if our \$130 million tranche B-1 letter of credit/revolving loan facility is not refinanced by that date. Prior to maturity, funds may be borrowed, repaid and re-borrowed under the two revolving credit facilities without premium or penalty.

As of September 30, 2011, the senior credit facility also provides a six-year, \$148 million term loan B maturing in June 2016, and a seven-year \$130 million tranche B-1 letter of credit/revolving loan facility maturing in March 2014. We are required to make quarterly principal payments of \$375 thousand on the term loan B, through March 31, 2016 with a final payment of \$141 million due June 3, 2016. The tranche B-1 letter of credit/revolving loan facility requires repayment by March 2014. We can enter into revolving loans and issue letters of credit under the \$130 million tranche B-1 letter of credit/revolving loan facility. The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. There is no additional cost to us for issuing letters of credit under the tranche B-1 letter of credit/revolving loan facility. However, outstanding letters of credit reduce our availability to enter into revolving loans under the facility. We pay the tranche B-1 lenders interest equal to the London Interbank Offered Rate (LIBOR) plus a margin on all borrowings under the facility. Funds deposited with the administrative agent by the lenders and not borrowed by the Company earn interest at an annual rate approximately equal to LIBOR less 25 basis points.

The financial ratios required under the senior credit facility for the remainder of 2011 and beyond are set forth below. As of September 30, 2011, we were in compliance with all the financial covenants and operational restrictions of the senior credit facility.

Period Ending	Leverage Ratio	Interest Coverage Ratio
December 31, 2011	3.50	2.55
Each quarter thereafter	3.50	2.75

Beginning June 3, 2010, our term loan B and revolving credit facility bear interest at an annual rate equal to, at our option, either (i) LIBOR plus a margin of 475 and 450 basis points, respectively, or (ii) a rate consisting of the greater of (a) the JPMorgan Chase prime rate plus a margin of 375 and 350 basis points, respectively, (b) the Federal Funds rate plus 50 basis points plus a margin of 375 and 350 basis points, respectively, and (c) the Eurodollar Rate plus 100 basis points plus a margin of 375 and 350 basis points, respectively. The margin we pay on these borrowings will be reduced by 25 basis points following each fiscal quarter for which our consolidated net leverage ratio is less than 2.25 for extending lenders and for the term loan B and will be further reduced by an additional 25 basis points following each fiscal quarter for which the consolidated net leverage ratio is less than 2.00 for extending lenders. Our consolidated net leverage ratio was 2.07 and 2.24 as of September 30, 2011 and December 31, 2010, respectively. As a result, the margin we pay on these borrowings was reduced in February 2011 by 25 basis points for extending

lenders. However, since the ratio increased during the first quarter to 2.32, the margin we pay on borrowings increased by 25 basis points beginning in May 2011 and remained at such level until August 2011 when it decreased again by 25 basis points.

The borrowings under our tranche B-1 letter of credit/revolving loan facility incur interest at an annual rate equal to, at our option, either (i) LIBOR plus a margin of 500 basis points, or (ii) a rate consisting of the greater of (a) the JPMorgan Chase prime rate plus a margin of 400 basis points, (b) the Federal Funds rate plus 50 basis points

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

plus a margin of 400 basis points, and (c) the Eurodollar Rate plus 100 basis points plus a margin of 400 basis points. The rate will increase by 50 basis points following each fiscal quarter for which our consolidated net leverage ratio is greater than or equal to 5.00.

At September 30, 2011, of the \$752 million available under the two revolving credit facilities within our senior secured credit facility, we had unused borrowing capacity of \$601 million with \$97 million in outstanding borrowings and \$54 million in letters of credit outstanding. As of September 30, 2011, our outstanding debt also included \$250 million of 81/8 percent senior notes due November 15, 2015, \$148 million term loan B due June 3, 2016, \$225 million of 73/4 percent senior notes due August 15, 2018, \$500 million of 67/8 percent senior notes due December 15, 2020, and \$84 million of other debt.

On December 9, 2010, we commenced a cash tender offer of our outstanding \$500 million 85/8 percent senior subordinated notes due in 2014 and a consent solicitation to amend the indenture governing these notes. The consent solicitation expired on December 22, 2010 and the cash tender offer expired on January 6, 2011. On December 23, 2010, we issued \$500 million of 67/8 percent senior notes due December 15, 2020 in a private offering. The net proceeds of this transaction, together with cash and available liquidity, were used to finance the purchase of our 85/8 percent senior subordinated notes pursuant to the tender offer at a price of 103.25 percent of the principal amount, plus accrued and unpaid interest for holders who tendered prior to the expiration of the consent solicitation, and 100.25 percent of the principal amount, plus accrued and unpaid interest, for other participants. On January 7, 2011, we redeemed all remaining outstanding \$20 million of senior subordinated notes that were not previously tendered, at a price of 102.875 percent of the principal amount, plus accrued and unpaid interest. To facilitate these transactions, we amended our senior credit agreement to permit us to refinance our senior subordinated notes with new senior unsecured notes. We did not incur any fee in connection with this amendment. The new notes are general senior obligations of Tenneco Inc. and are not secured by assets of Tenneco Inc. or any of our subsidiaries that guarantee the new notes. We recorded \$20 million of pre-tax charges in December 2010 and an additional \$1 million of pre-tax charges in the first quarter of 2011 related to our repurchase and redemption of our 85/8 percent senior subordinated notes. On March 14, 2011, we completed an offer to exchange the \$500 million of 67/8 percent senior notes due in 2020 which have been registered under the Securities Act of 1933, for and in replacement of all outstanding unregistered 67/8 percent senior notes due in 2020. We received tenders from holders of all \$500 million of the aggregate outstanding amount of the original notes. The terms of the new notes are substantially identical to the terms of the original notes for which they were exchanged, except that the transfer restrictions and the registration rights applicable to the original notes generally do not apply to the new notes.

On August 3, 2010, we issued \$225 million of 73/4 percent senior notes due August 15, 2018 in a private offering. The net proceeds of this transaction, together with cash and available liquidity, were used to finance the redemption of our 101/4 percent senior secured notes due in 2013. We called the senior secured notes for redemption on August 3, 2010, and completed the redemption on September 2, 2010 at a price of 101.708 percent of the principal amount, plus accrued and unpaid interest. We recorded \$5 million of expense related to our redemption of our 101/4 percent senior secured notes in the third quarter of 2010. The new notes are general senior obligations of Tenneco Inc. and are not secured by assets of Tenneco Inc. or any of our subsidiaries that guarantee the new notes. On February 14, 2011, we completed an offer to exchange the \$225 million of 73/4 percent senior notes due in 2018 which have been registered under the Securities Act of 1933, for and in replacement of all outstanding unregistered 73/4 percent senior notes due in 2018. We received tenders from holders of all \$225 million of the aggregate outstanding amount of the original notes. The terms of the new notes are substantially identical to the terms of the original notes for which they were

exchanged, except that the transfer restrictions and the registration rights applicable to the original notes generally do not apply to the new notes.

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

(4) Income Taxes

We evaluate our deferred income taxes quarterly to determine if valuation allowances are required or should be adjusted. U.S. GAAP requires that companies assess whether valuation allowances should be established against their deferred tax assets based on consideration of all available evidence, both positive and negative, using a more likely than not standard. This assessment considers, among other matters, the nature, frequency and amount of recent losses, the duration of statutory carryforward periods, and tax planning strategies. In making such judgments, significant weight is given to evidence that can be objectively verified.

Valuation allowances have been established for deferred tax assets based on a more likely than not threshold. The ability to realize deferred tax assets depends on our ability to generate sufficient taxable income within the carryforward periods provided for in the tax law for each tax jurisdiction. We have considered the following possible sources of taxable income when assessing the realization of our deferred tax assets:

Future reversals of existing taxable temporary differences;

Taxable income or loss, based on recent results, exclusive of reversing temporary differences and carryforwards; and

Tax-planning strategies.

We reported income tax expense of \$21 million and \$65 million in the three month and nine month periods ending September 30, 2011, respectively. The tax expense recorded for the first nine months of 2011 differs from the expense that would be recorded using a U.S. Federal statutory rate of 35 percent due to a net tax benefit of \$9 million primarily related to U.S. taxable income with no associated tax expense due to our net operating loss (NOL) carryforward and income generated in lower tax rate jurisdictions, partially offset by adjustments to prior year income tax estimates and the impact of recording a valuation allowance against the tax benefit for losses in certain foreign jurisdictions. Beginning in 2008, given our historical losses, we concluded that our ability to fully utilize our NOLs was limited due to projecting the continuation of the negative economic environment and the impact of the negative operating environment on our tax planning strategies. As a result of our tax planning strategies which have not yet been implemented and which do not depend upon generating future taxable income, we carry deferred tax assets in the U.S. of \$90 million relating to the expected utilization of those NOLs. The federal NOLs expire beginning in tax years ending in 2021 through 2029. The state NOLs expire in various tax years through 2029.

If our operating performance improves on a sustained basis, our conclusion regarding the need for a valuation allowance could change, resulting in the reversal of some or all of the valuation allowance in the future. The charge to establish the U.S. valuation allowance also includes items related to the losses allocable to certain state jurisdictions where it was determined that tax attributes related to those jurisdictions were potentially not realizable.

We are required to record a valuation allowance against deferred tax assets generated by taxable losses in each period in the U.S. as well as in other foreign jurisdictions. Our future provision for income taxes will include no tax benefit with respect to losses incurred and no tax expense with respect to income generated in these jurisdictions until the respective valuation allowance is eliminated. This will cause variability in our effective tax rate.

(5) Accounts Receivable Securitization

We securitize some of our accounts receivable on a limited recourse basis in North America and Europe. As servicer under these accounts receivable securitization programs, we are responsible for performing all accounts receivable administration functions for these securitized financial assets including collections and processing of customer invoice adjustments. In North America, we have an accounts receivable securitization program with three commercial banks comprised of a first priority facility and a second priority facility. We securitize original equipment and aftermarket receivables on a daily basis under the bank program. In March 2011, the North American program was amended and extended to March 23, 2012. The first priority facility continues to provide

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

financing of up to \$110 million and the second priority facility, which is subordinated to the first priority facility, continues to provide up to an additional \$40 million of financing. Both facilities monetize accounts receivable generated in the U.S. and Canada that meet certain eligibility requirements, and the second priority facility also monetizes certain accounts receivable generated in the U.S. or Canada that would otherwise be ineligible under the first priority securitization facility. The amendments to the North American program expand the trade receivables that are eligible for purchase under the program and decrease the margin we pay to our banks. We had no outstanding third party investments in our securitized accounts receivable under the North American program at September 30, 2011 and December 31, 2010, respectively.

Each facility contains customary covenants for financings of this type, including restrictions related to liens, payments, mergers or consolidation and amendments to the agreements underlying the receivables pool. Further, each facility may be terminated upon the occurrence of customary events (with customary grace periods, if applicable), including breaches of covenants, failure to maintain certain financial ratios, inaccuracies of representations and warranties, bankruptcy and insolvency events, certain changes in the rate of default or delinquency of the receivables, a change of control and the entry or other enforcement of material judgments. In addition, each facility contains cross-default provisions, where the facility could be terminated in the event of non-payment of other material indebtedness when due and any other event which permits the acceleration of the maturity of material indebtedness.

We also securitize receivables in our European operations with regional banks in Europe. The arrangements to securitize receivables in Europe are provided under seven separate facilities provided by various financial institutions in each of the foreign jurisdictions. The commitments for these arrangements are generally for one year, but some may be cancelled with notice 90 days prior to renewal. In some instances, the arrangement provides for cancellation by the applicable financial institution at any time upon 15 days, or less, notification. The amount of outstanding third party investments in our securitized accounts receivable in Europe was \$140 million and \$91 million at September 30, 2011 and December 31, 2010, respectively.

If we were not able to securitize receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreements might increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreements.

In our North American accounts receivable securitization programs, we transfer a partial interest in a pool of receivables and the interest that we retain is subordinate to the transferred interest. Accordingly, we account for our North American securitization program as a secured borrowing. In our European programs, we transfer accounts receivables in their entirety to the acquiring entities and satisfy all of the conditions established under ASC Topic 860, Transfers and Servicing, to report the transfer of financial assets in their entirety as a sale. The fair value of assets received as proceeds in exchange for the transfer of accounts receivable under our European securitization programs approximates the fair value of such receivables. We recognized interest expense of less than \$1 million in the three month period ending September 30, 2011 and \$1 million in the three month period ended September 30, 2010, and \$2 million and \$3 million for each of the nine month periods ended September 30, 2011 and 2010 respectively, relating to our North American securitization program. In addition, we recognized a loss of \$1 million in each of the three month periods ended September 30, 2011 and 2010, respectively, and \$4 million and \$3 million for the nine month periods ended September 30, 2011 and 2010, respectively, on the sale of trade accounts receivable in our European accounts receivable securitization programs, representing the discount from book values at which these

receivables were sold to our banks. The discount rate varies based on funding costs incurred by our banks, which averaged approximately three percent and four percent during the first nine months of 2011 and 2010, respectively.

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)**(6) Restructuring and Goodwill Impairment Charge**

Over the past several years, we have adopted plans to restructure portions of our operations. These plans were approved by our Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. In 2010, we incurred \$19 million in restructuring and related costs, of which \$14 million was recorded in cost of sales and \$5 million was recorded in depreciation and amortization expense. In the third quarter of 2011, we incurred \$4 million in restructuring and related costs, all of which was recorded in cost of sales. For the first nine months of 2011, we incurred \$7 million in restructuring and related costs, primarily related to headcount reductions in Europe and Australia and the closure of our ride control plant in Cozad, Nebraska, all of which was recorded in cost of sales.

Amounts related to activities that are part of our restructuring plans are as follows:

	December 31,			September 30,		
	2010	2011	2011	Impact	2011	
	Restructuring	Expenses	Cash	of	Restructuring	
	Reserve		Payments	Exchange	Reserve	
				Rates	Adjustments	
				(Millions)	Reserve	
Severance	\$ 7	7	(12)		(1)	\$ 1

Under the terms of our amended and extended senior credit agreement that took effect on June 3, 2010, we are allowed to exclude \$60 million of cash charges and expenses, before taxes, related to cost reduction initiatives incurred after June 3, 2010 from the calculation of the financial covenant ratios required under our senior credit facility. As of September 30, 2011, we have excluded \$17 million in cumulative allowable charges relating to restructuring initiatives against the \$60 million available under the terms of the senior credit facility.

On September 22, 2009, we announced that we were closing our original equipment ride control plant in Cozad, Nebraska. The closure of the Cozad plant will eliminate approximately 500 positions. We are hiring at other facilities as we move production from Cozad to those facilities, which will result in a net decrease of approximately 60 positions. Much of the production is being shifted from Cozad to our plant in Hartwell, Georgia.

During the transition of production from our Cozad facility to our Hartwell facility, several customer programs, which were planned to phase out, were reinstated and volumes increased beyond the amount in our original restructuring plan. To meet the higher volume requirements, we have taken a number of actions over the past few months to stabilize the production environment in Hartwell including reinforcing several core processes, realigning assembly lines, upgrading equipment to increase output and accelerating our Lean manufacturing activities. Based on the higher volumes, we are adjusting our consolidation plan. Our revised consolidation plan includes temporarily continuing some basic production operations in Cozad, and redirecting some programs from our Hartwell facility to our other North American facilities to better balance production. These actions will take place over the next several quarters. As of September 30, 2011, more than 95 percent of the positions at our Cozad facility have been eliminated.

During 2009 and 2010, we recorded \$11 million and \$10 million, respectively, of restructuring and related expenses related to this initiative, of which approximately \$16 million represents cash expenditures. For the first nine months of 2011, we have recorded an additional cash charge of \$1 million related to this initiative.

During the third quarter of 2011, we recorded \$3 million of restructuring and related expenses, all of which represented cash expenditures, related to the permanent elimination of 53 positions in our Australia operations as a result of the continued decline in industry production volumes in that region.

In addition, during the third quarter of 2011, we performed an impairment evaluation within the Asia Pacific segment, of our Australian reporting unit's goodwill balance as a result of continued deterioration of that reporting unit's financial performance driven primarily by significant declines in industry production volumes in that region. The goodwill impairment test consists of a two-step process. In step one, we compared the estimated fair value for

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

our Australian reporting unit to the carrying value of its assets and liabilities to determine if impairment exists. We estimated the fair value of our Australian reporting unit using the income approach which is based on the present value of estimated future cash flows. The income approach is dependent on a number of factors, including estimates of market trends, forecast revenues and expenses, capital expenditures, weighted average cost of capital and other variables. A separate discount rate derived by a combination of published sources, internal estimates and weighted based on our consolidated debt and equity structure, was used to calculate the discounted cash flows of our Australian reporting unit. These estimates are based on assumptions that we believe to be reasonable, but which are inherently uncertain and outside of the control of management. We identified in our step one test that the carrying value of our Australian reporting unit was higher than its fair value which is an indication that impairment may exist which required us to perform step two of the goodwill impairment test to measure the amount of the impairment loss.

Step two of the goodwill impairment evaluation required us to calculate the implied fair value of goodwill of our Australian reporting unit by allocating the estimated fair value to the assets and liabilities of this reporting unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the acquisition price. As a result of performing steps one and two of the goodwill impairment test, we concluded that the remaining amount of goodwill related to our Australian reporting unit was impaired and accordingly, we recorded a goodwill impairment charge of \$11 million during the third quarter of 2011.

(7) Environmental Matters, Litigation and Product Warranties

We are involved in environmental remediation matters, legal proceedings, claims, investigations and warranty obligations that are incidental to the conduct of our business and create the potential for contingent losses. We accrue for potential contingent losses when our review of available facts indicates that it is probable a loss has been incurred and the amount of the loss is reasonably estimable. Each quarter we assess our loss contingencies based on currently available facts, existing technology, and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors and record adjustments to these reserves as required. As an example, we consider all available evidence including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations when we evaluate our environmental remediation contingencies. Further, all of our loss contingency estimates are subject to revision in future periods based on actual costs or new information. With respect to our environmental liabilities, where future cash flows are fixed or reliably determinable, we have discounted those liabilities. All other environmental liabilities are recorded at their undiscounted amounts. We evaluate recoveries separately from the liability and, when they are assured, recoveries are recorded and reported separately from the associated liability in our condensed consolidated financial statements.

We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing condition caused by past operations that do not contribute to current or future revenue generation. As of September 30, 2011, we have the obligation to remediate or contribute towards the remediation of certain sites, including one Federal Superfund site. At September 30, 2011, our aggregated estimated share of environmental remediation costs for all these sites on a discounted basis was approximately \$18 million, of which \$5 million is recorded in other current liabilities and \$13 million is recorded in deferred credits and other liabilities in our condensed consolidated balance sheet. For those locations in which the liability was discounted, the weighted average discount rate used was 1.9 percent. The

undiscounted value of the estimated remediation costs was \$21 million. Based on information known to us, we have established reserves that we believe are adequate for these costs. Although we believe these estimates of remediation costs are reasonable and are based on the latest available information, the costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute towards the remediation costs. In addition, certain environmental

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

statutes provide that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other potentially responsible parties at these sites has been considered, where appropriate, in our determination of our estimated liability. We do not believe that any potential costs associated with our current status as a potentially responsible party in the Federal Superfund site, or as a liable party at the other locations referenced herein, will be material to our condensed consolidated results of operations, financial position or cash flows.

We also from time to time are involved in legal proceedings, claims or investigations. Some of these proceedings allege damages against us relating to environmental liabilities (including toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warning issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. For example, one of our Argentine subsidiaries is currently defending against a criminal complaint alleging the failure to comply with laws requiring the proceeds of export transactions to be collected, reported and/or converted to local currency within specified time periods. As another example, we are subject to an audit in 11 states of our practices with respect to the payment of unclaimed property to those states, which could cover over 30 years. We now have practices in place which we believe ensure that we pay unclaimed property as required. We vigorously defend ourselves against all of these claims. In future periods, we could be subject to cash costs or charges to earnings if any of these matters are resolved on unfavorable terms. However, although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, we do not expect that these legal proceedings or claims will have any material adverse impact on our future consolidated financial position, results of operations or cash flows.

In addition, we are subject to a number of lawsuits initiated by a significant number of claimants alleging health problems as a result of exposure to asbestos. In the early 2000 s we were named in nearly 20,000 complaints, most of which were filed in Mississippi state court and the vast majority of which made no allegations of exposure to asbestos from our product categories. Most of these claims have been dismissed and our current docket of active and inactive cases is less than 500 cases nationwide. A small number of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by The Pullman Company, one of our subsidiaries. The balance of the claims is related to alleged exposure to asbestos in our automotive products. Only a small percentage of the claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former products and that, in any event, they would not be at increased risk of asbestos-related disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number of each in some cases exceeding 100 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar amount for damages. As major asbestos manufacturers continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject to charges to earnings if any of these matters are resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have regularly achieved favorable resolutions. Accordingly, we presently believe that these asbestos-related claims will not have a material adverse impact on our future consolidated financial condition, results of operations or cash flows.

We provide warranties on some of our products. The warranty terms vary but range from one year up to limited lifetime warranties on some of our premium aftermarket products. Provisions for estimated expenses related to product warranty are made at the time products are sold or when specific warranty issues are identified on OE products. These estimates are established using historical information about the nature, frequency, and average cost

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

of warranty claims. We actively study trends of our warranty claims and take action to improve product quality and minimize warranty claims. We believe that the warranty reserve is appropriate; however, actual claims incurred could differ from the original estimates, requiring adjustments to the reserve. The reserve is included in both current and long-term liabilities on the balance sheet.

Below is a table that shows the activity in the warranty accrual accounts:

	Nine Months Ended September 30, 2011 2010 (Millions)	
Beginning Balance January 1,	\$ 33	\$ 32
Accruals related to product warranties	7	13
Reductions for payments made	(13)	(12)
Ending Balance September 30,	\$ 27	\$ 33

(8) Earnings Per Share

Earnings per share of common stock outstanding were computed as follows:

	Three Months Ended September 30, 2011		Three Months Ended September 30, 2010		Nine Months Ended September 30, 2011		Nine Months Ended September 30, 2010	
	(Millions Except Share and Per Share Amounts)							
Basic earnings per share								
Net income attributable to Tenneco Inc.	\$	30	\$	10	\$	127	\$	57
Average shares of common stock outstanding		59,793,866		59,235,282		59,866,717		59,102,041
Earnings per average share of common stock	\$	0.51	\$	0.17	\$	2.12	\$	0.97
Diluted earnings per share								
Net income attributable to Tenneco Inc.	\$	30	\$	10	\$	127	\$	57

Edgar Filing: TENNECO INC - Form 10-Q

Average shares of common stock outstanding	59,793,866	59,235,282	59,866,717	59,102,041
Effect of dilutive securities:				
Restricted stock	227,243	411,115	275,333	417,262
Stock options	1,520,367	1,433,522	1,596,228	1,339,790
Average shares of common stock outstanding including dilutive securities	61,541,476	61,079,919	61,738,278	60,859,093
Earnings per average share of common stock	\$ 0.49	\$ 0.17	\$ 2.06	\$ 0.94

Options to purchase 202,009 and 1,385,988 shares of common stock were outstanding as of September 30, 2011 and 2010, respectively, but not included in the computation of diluted earnings per share respectively, because the options were anti-dilutive.

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)**(9) Common Stock**

Equity Plans We have granted a variety of awards, including common stock, restricted stock, restricted stock units, performance units, stock appreciation rights (SARs), and stock options to our directors, officers, and employees.

Accounting Methods We have recorded \$1 million and less than \$1 million in compensation expense in the three months ended September 30, 2011 and 2010, and \$2 million in compensation expense for both the nine months ended September 30, 2011 and 2010, related to nonqualified stock options as part of our selling, general and administrative expense. This resulted in a decrease of \$0.01 in basic and diluted earnings per share for both the three month periods ended September 30, 2011 and 2010, respectively, and a decrease of \$0.04 in basic and diluted earnings per share for both the nine month periods ended September 30, 2011 and 2010.

We immediately expense stock options and restricted stock awarded to employees who are eligible to retire. When employees become eligible to retire during the vesting period, we recognize the remaining expense associated with their stock options and restricted stock.

As of September 30, 2011, there was approximately \$6 million of unrecognized compensation costs related to our stock option awards that we expect to recognize over a weighted average period of 0.9 years.

Compensation expense for restricted stock, restricted stock units, long-term performance units and SARs was \$8 million for both the nine month periods ended September 30, 2011 and 2010 respectively, and was recorded in selling, general, and administrative expense in the Condensed Consolidated Statements of Income.

Cash received from stock option exercises for the nine months ended September 30, 2011 and 2010 was \$4 million, and \$2 million, respectively. Stock option exercises in the first nine months of 2011 and 2010 would have generated an excess tax benefit of \$3 million and \$2 million, respectively. We did not record the excess tax benefit as we have federal and state net operating losses which are not currently being utilized.

Assumptions We calculated the fair values of stock option awards using the Black-Scholes option pricing model with the weighted average assumptions listed below. The fair value of share-based awards is determined at the time the awards are granted which is generally in January of each year, and requires judgment in estimating employee and market behavior.

	Nine Months Ended September 30, 2011 2010	
Stock Options Granted		
Weighted average grant date fair value, per share	\$ 26.13	\$ 11.76
Weighted average assumptions used:		
Expected volatility	70.1%	75.4%
Expected lives	4.8	4.6

Risk-free interest rates	1.8%	2.2%
Dividend yields	0.0%	0.0%

Expected volatility is calculated based on current implied volatility and historical realized volatility for the Company.

Expected lives of options are based upon the historical and expected time to post-vesting forfeiture and exercise. We believe this method is the best estimate of the future exercise patterns currently available.

The risk-free interest rates are based upon the Constant Maturity Rates provided by the U.S. Treasury. For our valuations, we used the continuous rate with a term equal to the expected life of the options.

Granted	1,042	44.02
Vested	(3,206)	15.41
Forfeited	(158)	1.86
Nonvested balance at September 30, 2011	413,539	\$ 22.74

The fair value of restricted stock grants is equal to the market price of our stock at the date of grant. As of September 30, 2011, approximately \$6 million of total unrecognized compensation costs related to restricted stock awards is expected to be recognized over a weighted-average period of approximately 2.1 years.

Share Repurchase Program In May 2011, our Board of Directors approved a share repurchase program, authorizing our company to repurchase up to 400,000 shares of our outstanding common stock over a 12 month period. Our share repurchase program is intended to offset dilution from shares of restricted stock and stock options that were issued in 2011 to employees. We repurchased all of the 400,000 shares through open market purchases, which were funded through cash from operations, as of August 3, 2011 at a total cost of \$16 million through this program. These repurchased shares are held as part of our treasury stock which increased to 1,694,692 shares at September 30, 2011 from 1,294,692 shares at December 31, 2010.

Long-Term Performance Units, Restricted Stock Units and SARs Long-term performance units, restricted stock units and SARs are paid in cash and recognized as a liability based upon their fair value. As of September 30, 2011, \$10 million of unrecognized compensation costs is expected to be recognized over a weighted-average period of

approximately 1.6 years.

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)**(10) Pension Plans, Postretirement and Other Employee Benefits**

Net periodic pension costs (income) and postretirement benefit costs (income) consist of the following components:

	Three Months Ended September 30,					
	Pension				Postretirement	
	2011		2010		2011	2010
	US	Foreign	US	Foreign	US	US
	(Millions)					
Service cost benefits earned during the period	\$ 1	\$ 2	\$ 1	\$ 1	\$	\$
Interest cost	5	5	5	5	2	2
Expected return on plan assets	(6)	(5)	(5)	(5)		
Settlement loss			4			
Net amortization:						
Actuarial loss	1	1		1	1	2
Prior service cost (credit)					(1)	(2)
Net pension and postretirement costs	\$ 1	\$ 3	\$ 5	\$ 2	\$ 2	\$ 2

	Nine Months Ended September 30,					
	Pension				Postretirement	
	2011		2010		2011	2010
	US	Foreign	US	Foreign	US	US
	(Millions)					
Service cost benefits earned during the period	\$ 1	\$ 5	\$ 1	\$ 4	\$	\$ 1
Interest cost	15	15	15	14	6	6
Expected return on plan assets	(17)	(15)	(15)	(15)		
Settlement loss			4			
Net amortization:						
Actuarial loss	3	4	2	3	3	4
Prior service cost (credit)		1		1	(4)	(5)
Net pension and postretirement costs	\$ 2	\$ 10	\$ 7	\$ 7	\$ 5	\$ 6

For the nine months ended September 30, 2011, we made pension contributions of \$17 million for our domestic pension plans and \$16 million for our foreign pension plans. Based on current actuarial estimates, we believe we will be required to make approximately \$11 million in contributions for the remainder of 2011. Pension contributions beyond 2011 will be required, but those amounts will vary based upon many factors, including the performance of our

pension fund investments during 2011.

We made postretirement contributions of approximately \$6 million during the first nine months of 2011. Based on current actuarial estimates, we believe we will be required to make approximately \$3 million in contributions for the remainder of 2011.

The assets of some of our pension plans are invested in trusts that permit commingling of the assets of more than one employee benefit plan for investment and administrative purposes. Each of the plans participating in the trust has interests in the net assets of the underlying investment pools of the trusts. The investments for all our pension plans are recorded at estimated fair value.

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

(11) Acquisitions

In August 2011, we purchased the remaining 25 percent equity interest in our Tenneco Automotive (Thailand) Limited emission control joint venture in Thailand for \$4 million in cash. As a result of this purchase, our equity ownership of this joint venture investment changed to 100 percent from 75 percent.

In January 2010, we purchased an additional 20 percent equity interest in our Tenneco Tongtai (Dalian) Exhaust System Co. Ltd. joint venture investment in China for \$15 million in cash. As a result of this purchase, our equity ownership percentage of this joint venture investment increased to 80 percent from 60 percent.

(12) New Accounting Pronouncements

In April 2011, the Financial Accounting Standards Board (FASB) issued an amendment to the accounting guidance for transfers of financial assets which changes the criteria that must be met to achieve sales accounting. This amendment removes from the assessment of effective control the criterion relating to the transferor's ability to repurchase or redeem financial assets on substantially the agreed terms, even in the event of default by the transferee. In addition, this amendment eliminates the requirement to demonstrate that the transferor possesses adequate collateral to fund substantially all the cost of purchasing replacement financial assets. This amendment is effective for a reporting entity's first interim or annual period beginning on or after December 15, 2011. We do not believe the adoption of this amendment to the accounting guidance for transfers of financial assets on January 1, 2012 will have a material impact on our condensed consolidated financial statements.

In May 2011, the FASB issued an amendment to achieve common fair value measurement and disclosure requirements in U.S. GAAP and IFRS. The amendment includes (1) that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, (2) provides specific requirements for measuring the fair value of an instrument classified in a reporting entity's shareholders' equity, (3) requires disclosure of quantitative information about unobservable inputs used in a fair value measurement that is categorized within Level 3 of the fair value hierarchy, (4) allows the use of a price, that would be received to sell a net asset position for a particular risk or to transfer a net liability position for a particular risk, in measuring the fair value of financial instruments that are managed within a portfolio, (5) in the absence of a Level 1 input a reporting entity should apply premiums or discounts when market participants would do so when pricing an asset or liability and (6) additional disclosure about fair value measurements. This amendment is effective for a reporting entity's interim and annual periods beginning after December 15, 2011. We do not believe the adoption of this amendment for fair value measurements on January 1, 2012 will have a material impact on the measurement of our financial assets and liabilities. We will add additional fair value disclosures, as required by this amendment, beginning with our first interim reporting period ending March 31, 2012.

In June 2011, the FASB issued an amendment to the accounting guidance for the presentation on comprehensive income. This amendment removes one of the three presentation options for presenting the components of other comprehensive income as part of the statement of changes in stockholders' equity and requires either a single continuous statement of comprehensive income or a two statement approach. If a reporting entity elects the two statement approach, this amendment requires consecutive presentation of the statement of net income followed by the statement of other comprehensive income. In addition, this amendment requires an entity to present reclassification adjustments on the face of the financial statements from other comprehensive income to net income. This amendment

shall be applied retrospectively and is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. We do not believe the adoption of this amendment to the accounting guidance for the presentation of comprehensive income on January 1, 2012 will have a material impact on our condensed consolidated financial statements.

In September 2011, the FASB issued an amendment to the accounting guidance for testing goodwill for impairment. This amendment provides a reporting entity the option to first assess qualitative factors to determine whether the existence of events and circumstances leads to a determination that it is more likely than not that the fair

Table of Contents**TENNECO INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**
(Unaudited)

value of a reporting unit is less than its carrying amount. If the reporting entity's assessment after considering all events and circumstances is that it is not more likely than not that its fair value is less than its carrying amount, then performing the two-step impairment test is not required. If the reporting entity concludes that it is more likely than not that its fair value is less than its carrying amount then the first step of the two-step impairment test is required. If the carrying amount of the reporting unit exceeds its fair value, then the reporting unit is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss. This amendment is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. We do not believe the adoption of this amendment on January 1, 2012 for testing goodwill for impairment will have a material impact on our condensed consolidated financial statements.

In September 2011, the FASB issued an amendment to the accounting guidance relating to employers' disclosures for multiemployer pension and multiemployer other postretirement benefit plans. The amendment requires additional disclosures including a description of the nature of the plan benefits, a qualitative description of an employer's responsibility for the obligations of the plan, including benefits earned by employees during employment with another employer and other quantitative information to help readers understand the financial information about the plan such as total plan assets, actuarial present value of accumulated plan benefits and total contributions received by the plan. The amendment is effective for annual periods for fiscal years ending after December 15, 2011. We do not believe the adoption of this amendment on January 1, 2012 will have a material impact on our condensed consolidated financial statements. We will add additional disclosures relating to our participation in multiemployer pension plans beginning with the annual reporting period ending December 31, 2011.

(13) Guarantees

We have from time to time issued guarantees for the performance of obligations by some of our subsidiaries, and some of our subsidiaries have guaranteed our debt. All of our existing and future material domestic wholly-owned subsidiaries fully and unconditionally guarantee our senior credit facility and our senior notes on a joint and several basis. The arrangement for the senior credit facility is also secured by first-priority liens on substantially all our domestic assets and pledges of up to 66 percent of the stock of certain first-tier foreign subsidiaries. No assets or capital stock of our direct or indirect foreign subsidiaries secure our senior notes. For additional information, refer to Note 15 of the condensed consolidated financial statements of Tenneco Inc., where we present the Supplemental Guarantor Condensed Consolidating Financial Statements.

In March 2011, we entered into two performance guarantee agreements in the U.K. between Tenneco Management Europe Limited ("TMEL") and the two Walker Group Retirement Plans, the Walker Group Employee Benefit Plan and the Walker Group Executive Retirement Benefit Plan (the "Walker Plans"), whereby TMEL will guarantee the payment of all current and future pension contributions in event of a payment default by the sponsoring or participating employers of the Walker Plans. As a result of our decision to enter into these performance guarantee agreements, the levy due to the U.K. Pension Protection Fund will be reduced. The Walker Plans are comprised of employees from Tenneco Walker (U.K.) Limited and our Futaba Tenneco U.K. joint venture. Employer contributions are funded by both Tenneco Walker (U.K.) Limited, as the sponsoring employer and Futaba Tenneco U.K., as a participating employer. The performance guarantee agreements are expected to remain in effect until all pension obligations for the Walker Plans' sponsoring and participating employers have been satisfied. The maximum amount payable for these pension performance guarantees is approximately \$25 million as of September 30, 2011 which is determined by taking 105 percent of the liability of the Walker Plans calculated under section 179 of the U.K. Pension Act of 2004

offset by plan assets. We did not record an additional liability in March 2011 for this performance guarantee since Tenneco Walker (U.K.) Limited, as the sponsoring employer of the Walker Plans, already recognizes 100 percent of the pension obligation calculated based on U.S. GAAP, for all of the Walker Plans participating employers on its balance sheet, which was \$6 million and \$9 million at September 30, 2011 and December 31, 2010, respectively. At September 30, 2011, all pension contributions under the Walker Plans were current for all of the Walker Plans sponsoring and participating employers.

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

In June 2011, we entered into an indemnity agreement between TMEL and Futaba Industrial Co. Ltd. (Futaba) which requires Futaba to indemnify TMEL for any cost, loss or liability which TMEL may incur under the performance guarantee agreements. The maximum amount reimbursable by Futaba to TMEL under this indemnity agreement is equal to the amount incurred by TMEL under the performance guarantee agreements multiplied by Futaba's shareholder ownership percentage of the Futaba Tenneco U.K. joint venture. At September 30, 2011 the maximum amount reimbursable by Futaba to TMEL is approximately \$4 million.

We have issued guarantees through letters of credit in connection with some obligations of our affiliates. As of September 30, 2011, we have guaranteed \$54 million in letters of credit to support some of our subsidiaries' insurance arrangements, foreign employee benefit programs, environmental remediation activities and cash management and capital requirements.

Negotiable Financial Instruments One of our European subsidiaries receives payment from one of its OE customers whereby the accounts receivable are satisfied through the delivery of negotiable financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets. The amount of these financial instruments that was collected before their maturity date and sold at a discount totaled \$1 million and \$6 million at September 30, 2011 and December 31, 2010, respectively. No negotiable financial instruments were held by our European subsidiary as of September 30, 2011 and December 31, 2010, respectively.

In certain instances, several of our Chinese subsidiaries receive payment from OE customers and satisfy vendor payments through the receipt and delivery of negotiable financial instruments. Financial instruments used to satisfy vendor payables and not redeemed totaled \$19 million and \$8 million at September 30, 2011 and December 31, 2010, respectively, and were classified as notes payable. Financial instruments received from OE customers and not redeemed totaled \$11 million at both September 30, 2011 and December 31, 2010, respectively. We classify financial instruments received from our OE customers as other current assets if issued by a financial institution of our customers or as customer notes and accounts, net if issued by our customer. We classified \$11 million in other current assets at both September 30, 2011 and December 31, 2010, respectively. Some of our Chinese subsidiaries that issue their own negotiable financial instruments to pay vendors are required to maintain a cash balance if they exceed certain credit limits with the financial institution that guarantees those financial instruments. A restricted cash balance was not required at those Chinese subsidiaries at September 30, 2011 and December 31, 2010, respectively.

The negotiable financial instruments received by one of our European subsidiaries and some of our Chinese subsidiaries are checks drawn by our OE customers and guaranteed by their banks that are payable at a future date. The use of these instruments for payment follows local commercial practice. Because negotiable financial instruments are financial obligations of our customers and are guaranteed by our customers' banks, we believe they represent a lower financial risk than the outstanding accounts receivable that they satisfy which are not guaranteed by a bank.

(14) Segment Information

We are a global manufacturer with three geographic reportable segments: (1) North America, (2) Europe, South America and India (Europe), and (3) Asia Pacific. Each segment manufactures and distributes ride control and emission control products primarily for the automotive industry. We have not aggregated individual operating

segments within these reportable segments. We evaluate segment performance based primarily on earnings before interest expense, income taxes, and noncontrolling interests. Products are transferred between segments and geographic areas on a basis intended to reflect as nearly as possible the market value of the products.

(15) Supplemental Guarantor Condensed Consolidating Financial Statements*Basis of Presentation*

Substantially all of our existing and future material domestic 100% owned subsidiaries (which are referred to as the Guarantor Subsidiaries) fully and unconditionally guarantee our senior notes due in 2015, 2018, and 2020 on a joint

and several basis. The Guarantor Subsidiaries are combined in the presentation below.

These consolidating financial statements are presented on the equity method. Under this method, our investments are recorded at cost and adjusted for our ownership share of a subsidiary's cumulative results of operations, capital contributions and distributions, and other equity changes. You should read the condensed consolidating financial information of the Guarantor Subsidiaries in connection with our condensed consolidated financial statements and related notes of which this note is an integral part.

Distributions

There are no significant restrictions on the ability of the Guarantor Subsidiaries to make distributions to us.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As you read the following review of our financial condition and results of operations, you should also read our condensed consolidated financial statements and related notes beginning on page 6.

Executive Summary

We are one of the world's leading manufacturers of automotive emission control and ride control products and systems for light, commercial and specialty vehicle applications. We serve both original equipment (OE) vehicle designers and manufacturers and the repair and replacement markets, or aftermarket, globally through leading brands, including Monroe®, Rancho®, Clevite® Elastomers, Marzocchi® and Fric Rot™ ride control products and Walker®, Fonos™, and Gillet™ emission control products. We serve more than 64 different original equipment manufacturers, and our products or systems are included on nine of the top 10 passenger models produced in Europe and nine of the top 10 light truck models produced in North America for 2010. Our aftermarket customers are comprised of full-line and specialty warehouse distributors, retailers, jobbers, installer chains and car dealers. As of December 31, 2010, we operated 86 manufacturing facilities worldwide and employed approximately 22,000 people to service our customers demands.

Factors that continue to be critical to our success include winning new business awards, managing our overall global manufacturing footprint to ensure proper placement and workforce levels in line with business needs, maintaining competitive wages and benefits, maximizing efficiencies in manufacturing processes and reducing overall costs. In addition, our ability to adapt to key industry trends, such as a shift in consumer preferences to other vehicles in response to higher fuel costs and other economic and social factors, increasing technologically sophisticated content, changing aftermarket distribution channels, increasing environmental standards and extended product life of automotive parts, also play a critical role in our success. Other factors that are critical to our success include adjusting to economic challenges such as increases in the cost of raw materials and our ability to successfully reduce the impact of any such cost increases through material substitutions, cost reduction initiatives and other methods.

For the first nine months of 2011, light vehicle production has continued to improve in most geographic regions in which we operate. Light vehicle production was up eight percent in North America and up seven percent in both Europe and China.

We have a substantial amount of indebtedness. As such, our ability to generate cash both to fund operations and service our debt is also a significant area of focus for our company. See "Liquidity and Capital Resources" below for further discussion of cash flows and Item 1A, "Risk Factors" included in our Annual Report on Form 10-K for the year ended December 31, 2010.

Total revenues for the third quarter of 2011 were \$1,773 million (\$339 million in aftermarket revenues and \$1,434 million in original equipment revenues), a 15 percent increase from \$1,542 million (\$312 million in aftermarket revenues and \$1,230 million in original equipment revenues) in the third quarter of 2010. Excluding the impact of currency and substrate sales, revenue was up \$147 million, or 13 percent, driven primarily by higher OE production volumes, higher aftermarket sales globally and new launches of light and commercial vehicle emission control programs.

Cost of sales: Cost of sales for the third quarter of 2011 was \$1,492 million, or 84.2 percent of sales, compared to \$1,280 million, or 83.0 percent of sales in the third quarter of 2010. The following table lists the primary drivers behind the change in cost of sales (\$ millions).

Quarter ended September 30, 2010	\$ 1,280
Volume and mix	155
Material	15
Currency exchange rates	45
Restructuring	(4)
Other Costs	1
Quarter ended September 30, 2011	\$ 1,492

Table of Contents

The increase in cost of sales was due primarily to the year-over-year increase in production volumes, the impact of foreign currency exchange rates and higher material and other costs, mainly manufacturing.

Gross margin: Revenue less cost of sales for the third quarter of 2011 was \$281 million, or 15.8 percent, versus \$262 million, or 17.0 percent in the third quarter of 2010. The gross margin decline of 1.2 percentage points was primarily driven by a higher mix of OE revenues and higher material costs net of recoveries, which together had a 1.2 percentage point negative impact on gross margin. The effects on gross margin resulting from higher volumes and lower restructuring and related expenses were offset by higher manufacturing costs, particularly in our North America OE ride control business.

Engineering, research and development: Engineering, research and development expense was \$32 million and \$30 million in the third quarter of 2011 and 2010, respectively. Increased spending to support customer programs, technology applications, and growth in emerging markets, drove the increase in expense year-over-year.

Selling, general and administrative: Selling, general and administrative expense was down \$8 million in the third quarter of 2011, at \$101 million, compared to \$109 million in the third quarter of 2010. The decrease in expense year-over-year was driven by lower deferred and long-term compensation expense indexed to the Company's stock price, which was partially offset by wage inflation in South America and costs to support new plants in China. The third quarter of 2010 included a \$4 million charge related to an actuarial loss for a lump-sum pension payment.

Depreciation and amortization: Depreciation and amortization expense in the third quarter of 2011 was \$51 million, compared to \$55 million in the third quarter of 2010. Included in the third quarter of 2010 was \$3 million of restructuring and related expenses.

Goodwill impairment: In the third quarter of 2011, we performed an impairment evaluation of our Australian reporting unit's goodwill balance as a result of continued deterioration of that reporting unit's financial performance driven primarily by significant declines in industry production volumes in that region. As a result of our impairment evaluation, we concluded that the remaining amount of goodwill related to our Australian reporting unit was impaired and accordingly, we recorded a goodwill impairment charge of \$11 million during the third quarter of 2011.

Earnings before interest expense, taxes and noncontrolling interests (EBIT) was \$84 million for the third quarter of 2011, an improvement of \$17 million, when compared to \$67 million in the third quarter of 2010. Higher OE volumes globally, the launch of strong-margin light and commercial vehicle business, decreased restructuring and related costs, lower selling, general, and administrative costs, mainly due to deferred and long-term compensation expense indexed to the Company's stock price, and \$7 million of favorable currency, drove the year-over-year increase to EBIT. Partially offsetting the increase were higher operational costs in North America OE ride control business, which included material costs and manufacturing inefficiencies, and a goodwill impairment charge in Australia.

Total revenues for the first nine months of 2011 were up 24 percent to \$5,421 million (\$999 million in aftermarket revenues and \$4,422 million in original equipment revenues), from \$4,360 million (\$890 million in aftermarket revenues and \$3,470 million in original equipment revenues) for the first nine months of 2010. Excluding the impact of currency and substrate sales, revenue was up \$552 million, from \$3,438 million to \$3,990 million, driven by higher year-over-year OE vehicle production levels in most regions in which we operate, new platform launches and higher aftermarket sales.

Table of Contents

Cost of sales: Cost of sales for the first three quarters of 2011 was \$4,523 million, or 83.4 percent of sales, compared to \$3,575 million, or 82.0 percent of sales in the first three quarters of 2010. The following table lists the primary drivers behind the change in cost of sales (\$ millions).

Nine months ended September 30, 2010	\$ 3,575
Volume and mix	698
Material	54
Currency exchange rates	186
Restructuring	(11)
Other Costs	21
Nine months ended September 30, 2011	\$ 4,523

The increase in cost of sales was due primarily to the year-over-year increase in production volumes, the impact of foreign currency exchange rates and higher material and other costs, mainly manufacturing.

Gross margin: Revenue less cost of sales for the first nine months of 2011 was \$898 million, or 16.6 percent, versus \$785 million, or 18.0 percent in the first nine months of 2010. The gross margin decline was primarily driven by a higher mix of OE revenues, higher substrate sales and higher material costs net of recoveries, which together had a 1.4 percentage point impact on gross margin. The effects on gross margin resulting from higher volumes and lower restructuring and related expenses were offset by unfavorable pricing, primarily related to contractual price reductions and higher manufacturing costs, particularly in our North America OE ride control business.

Engineering, research and development: Engineering, research and development expense was \$102 million and \$90 million in the first nine months of 2011 and 2010, respectively. Increased spending to support customer programs, technology applications, and growth in emerging markets, and higher foreign exchange rates drove the increase in expense year-over-year.

Selling, general and administrative: Selling, general and administrative expense was up \$21 million in the first three quarters of 2011, at \$328 million, compared to \$307 million in the first three quarters of 2010. Investments in new facilities in China and Thailand and higher aftermarket changeover costs primarily drove the increase in expense year-over-year. Lower deferred and long-term compensation expense indexed to the Company's stock price partially offset these increases.

Depreciation and amortization: Depreciation and amortization expense in the first nine months of 2011 was \$156 million, compared to \$163 million in the first nine months of 2010. Included in the first nine months of 2010 was \$5 million of restructuring and related expenses.

Goodwill impairment: We recorded a goodwill impairment charge of \$11 million during the first nine months of 2011.

Earnings before interest expense, taxes and noncontrolling interests was \$291 million for the first three quarters of 2011, an improvement of \$72 million, when compared to \$219 million in the first three quarters of 2010. Higher OE revenues, stronger margins on new light and commercial vehicle launches, lower depreciation and amortization expense, decreased restructuring and related costs, higher aftermarket sales, lower deferred and long-term compensation expense indexed to the Company's stock price and \$16 million of positive currency, drove the year-over-year increase to EBIT. Partially offsetting the increase were higher selling, general, administrative and engineering spending, which included higher aftermarket changeover costs and investments in new facilities in China

and Thailand, unfavorable pricing, primarily related to contractual price reductions, increased material costs net of recoveries, a goodwill impairment charge of \$11 million in Australia and higher manufacturing and freight expenses.

Table of Contents

Results from Operations

Net Sales and Operating Revenues for the Three Months Ended September 30, 2011 and 2010

The following tables reflect our revenues for 2011 and 2010. We present these reconciliations of revenues in order to reflect the trend in our sales in various product lines and geographic regions separately from the effects of doing business in currencies other than the U.S. dollar. We have not reflected any currency impact in the 2010 table since this is the base period for measuring the effects of currency during 2011 on our operations. We believe investors find this information useful in understanding period-to-period comparisons in our revenues.

Additionally, we show the component of our revenue represented by substrate sales in the following tables. While we generally have primary design, engineering and manufacturing responsibility for OE emission control systems, we do not manufacture substrates. Substrates are porous ceramic filters coated with a catalyst precious metals such as platinum, palladium and rhodium. These are supplied to us by Tier 2 suppliers as directed by our OE customers. We generally earn a small margin on these components of the system. As the need for more sophisticated emission control solutions increases to meet more stringent environmental regulations, and as we capture more diesel aftertreatment business, these substrate components have been increasing as a percentage of our revenue. While these substrates dilute our gross margin percentage, they are a necessary component of an emission control system. We view the growth of substrates as a key indicator that our value-add content in an emission control system is moving toward the higher technology hot-end gas and diesel business.

Our value-add content in an emission control system includes designing the system to meet environmental regulations through integration of the substrates into the system, maximizing use of thermal energy to heat up the catalyst quickly, efficiently managing airflow to reduce back pressure as the exhaust stream moves past the catalyst, managing the expansion and contraction of the emission control system components due to temperature extremes experienced by an emission control system, using advanced acoustic engineering tools to design the desired exhaust sound, minimizing the opportunity for the fragile components of the substrate to be damaged when we integrate it into the emission control system and reducing unwanted noise, vibration and harshness transmitted through the emission control system.

We present these substrate sales separately in the following table because we believe investors utilize this information to understand the impact of this portion of our revenues on our overall business and because it removes the impact of potentially volatile precious metals pricing from our revenues. While our original equipment

Table of Contents

customers generally assume the risk of precious metals pricing volatility, it impacts our reported revenues. Excluding substrate catalytic converter and diesel particulate filter sales removes this impact.

North American light vehicle production increased six percent, while industry Class 8 commercial vehicle production was up 63 percent and industry Class 4-7 commercial vehicle production was up 56 percent in the third

Table of Contents

quarter of 2011 when compared to the third quarter of 2010. Revenues from our North American operations increased in the third quarter of 2011 compared to last year's third quarter due to higher OE and aftermarket sales of both product lines. The increase in North American OE revenues was primarily driven by improved volumes, which accounted for \$55 million of the year-over-year change in revenues, on Tenneco-supplied vehicles such as the Ford F-150 pick-up, the Ford Focus, and VW Jetta platforms. Also contributing to the increase were incremental commercial vehicle revenues including Navistar and Caterpillar and a favorable \$1 million currency impact on OE revenue year-over-year. The increase in aftermarket revenue for North America was primarily due to higher volumes in both product lines which resulted in a combined increase in revenue of \$17 million. In addition, favorable currency impacted aftermarket revenue by \$2 million year-over-year.

Our European, South American and Indian segment's revenues increased in the third quarter of 2011 compared to last year's third quarter, due to increased sales in both European OE business units, European aftermarket ride control, as well as in South America and India. European light vehicle industry production was up two percent, while industry Class 8 commercial vehicle production was up 23 percent and industry Class 4-7 commercial vehicle production was up six percent in the third quarter of 2011 when compared to the third quarter of 2010. Improved volumes on platforms such as the VW Polo, the Mercedes CLS and the Audi A4 were the primary drivers of our increased Europe OE revenues and contributed to an increase in revenue of \$69 million. Higher commercial and specialty revenue also contributed to the increase. In addition, European OE revenue benefited compared to last year from favorable foreign currency which had an impact of \$27 million. European ride control aftermarket revenues improved compared to last year on higher volumes which had a \$4 million impact, tied in part to heavy duty sales and favorable foreign currency which had a \$2 million impact. Lower emission control aftermarket sales volumes of \$7 million were partially offset by \$2 million in favorable foreign currency. Light vehicle production increased four percent in South America and three percent in India for the third quarter of 2011 when compared to the third quarter of 2010. South American and Indian revenues were higher in the third quarter of 2011 when compared to the prior year's third quarter primarily due to stronger OE volumes in India, which increased revenue by \$12 million. Currency also added \$3 million to South American and Indian revenue.

Industry light vehicle production for the third quarter 2011 increased eight percent from last year in China and increased three percent in Australia year-over-year. Revenues from our Asia Pacific segment, which includes Australia and Asia, increased due to higher sales in Asia and Australia. Asian revenues for 2011 improved from last year, primarily due to \$26 million from strong volumes, particularly in China on key Tenneco-supplied Audi, Volkswagen and Nissan platforms. Favorable foreign currency of \$8 million also added to the improvement year-over-year in Asia. The positive impact on revenue of \$1 million due to higher OE production volumes and favorable foreign currency of \$6 million drove the third quarter 2011 revenue increase for Australia over the third quarter of 2010.

North American light vehicle production increased eight percent, while industry Class 8 commercial vehicle production was up 68 percent and industry Class 4-7 commercial vehicle production was up 49 percent in the first

Table of Contents

nine months of 2011 when compared to the first nine months of 2010. Revenues from our North American operations increased in the first three quarters of 2011 compared to last year's first three quarters due to higher OE and aftermarket sales of both product lines. The increase in North American OE revenues was primarily driven by improved production volumes, which accounted for \$392 million of the year-over-year change in revenues, on Tenneco-supplied vehicles such as the Ford Super-Duty and F-150 pick-ups, Ford Focus, VW Jetta, Chevrolet Equinox, GM's crossover models and the Toyota Tundra. Also contributing to the increase were incremental commercial vehicle revenues and a favorable \$5 million currency impact on OE revenue year-over-year. The increase in aftermarket revenue for North America was primarily due to higher volumes in both product lines which resulted in a combined increase in revenue of \$45 million. Favorable currency impacted aftermarket revenue by \$6 million year-over-year.

Our European, South American and Indian segment's revenues increased in the first nine months of 2011 compared to last year's first nine months, due to increased sales in both European OE business units, European aftermarket ride control, as well as in South America and India. European light vehicle industry production was up seven percent, while industry Class 8 commercial vehicle production was up 39 percent and industry Class 4-7 commercial vehicle production was up 19 percent in the first three quarters of 2011 when compared to the first three quarters of 2010. Improved volumes due to higher OE production on platforms such as the VW Golf and Polo, the Mercedes E-class, CLS and Sprinter, the Ford Focus, the BMW 1 and 3 Series, Audi A4, A6 and A1, Renault/Dacia Logan and Opel Astra and Zafira were the primary drivers of our increased Europe OE revenues and contributed to an increase in revenue of \$250 million. Higher commercial and specialty revenue also contribute to this increase. European OE revenue also benefited compared to last year from improved pricing, mainly material cost recovery and favorable foreign currency which had a combined impact of \$129 million. Excluding currency, European ride control aftermarket revenues improved compared to last year on higher sales volumes which had a \$14 million impact, tied in part to heavy duty sales. Excluding currency, European emission control aftermarket sales were down due to volumes which accounted for \$7 million of the decline. Light vehicle production increased seven percent in South America and 15 percent in India for the first nine months of 2011 when compared to the first nine months of 2010. South American and Indian revenues were higher in the first nine months of 2011 when compared to the prior year's first nine months primarily due to stronger OE and aftermarket volumes in both regions, which increased revenue by \$68 million. Currency also added \$21 million to South American and Indian revenue.

Industry light vehicle production for the first nine months of 2011 increased seven percent in China but decreased nine percent in Australia year-over-year. Revenues from our Asia Pacific segment, which includes Australia and Asia, increased due to higher sales in Asia. Asian revenues for the first nine months of 2011 improved from last year, primarily due to \$68 million from stronger production volumes, particularly in China on key Tenneco-supplied GM, Ford, Audi, Volkswagon and Nissan platforms. Foreign currency also benefited Asian revenue by \$21 million. Excluding \$19 million in favorable foreign currency, lower OE production volumes in Australia drove an \$8 million negative impact on revenue for the first nine months of 2011 over the first nine months of 2010.

Earnings before Interest Expense, Income Taxes and Noncontrolling Interests (EBIT) for the Three Months Ended September 30, 2011 and 2010

	Three Months Ended September 30, 2011 2010 Change (Millions)		
North America	\$ 46	\$ 42	\$ 4

Edgar Filing: TENNECO INC - Form 10-Q

Europe, South America and India	36	15	21
Asia Pacific	2	10	(8)
	\$ 84	\$ 67	\$ 17

Table of Contents

The EBIT results shown in the preceding table include the following items, certain of which are discussed below under Restructuring and Other Charges, which have an effect on the comparability of EBIT results between periods:

	Three Months Ended September 30, 2011 2010 (Millions)	
North America		
Restructuring and related expenses	\$	\$ 5
Pension Charge(1)		4
Europe, South America and India		
Restructuring and related expenses	1	
Asia Pacific		
Restructuring and related expenses	3	1
Goodwill impairment charge(2)	11	

- (1) Represents a charge related to an actuarial loss for a lump-sum pension payment in a non-qualified pension plan in which one current and three former employees were participants. Lump-sum pension payments are required when participants retire or when they turn 55. One former employee turned 55 in the third quarter 2010.
- (2) Non-cash asset impairment charge related to goodwill for Tenneco's Australian reporting unit.

EBIT for North American operations was \$46 million in the third quarter of 2011, an increase of \$4 million from \$42 million in the third quarter one year ago. The benefits to EBIT from higher OE revenues, stronger margins on new light and commercial vehicle launches, lower selling, general, and administrative costs, in particular deferred and long-term compensation expense indexed to the Company's stock price, decreased depreciation and amortization expense and improved aftermarket revenues were partially offset by increased operational costs in North America OE ride control business, which included material costs and manufacturing inefficiencies. There were \$5 million of restructuring and related expenses in the third quarter of 2010. Currency had a unfavorable year-over-year impact of \$5 million in North America's third quarter 2011 EBIT.

Our European, South American and Indian segment's EBIT was \$36 million for the third quarter of 2011, up \$21 million from \$15 million in the third quarter of 2010. The increase was driven by higher OE production volumes, new platform launches, and lower selling, general, and administrative costs, in particular deferred and long-term compensation expense indexed to the Company's stock price. Increased engineering expense partially offset the increase. Restructuring and related expenses of \$1 million, primarily related to headcount reductions in Europe, were included in EBIT for the third quarter of 2011. Currency had a \$10 million favorable year-over-year impact on European, South American and Indian segment's third quarter 2011 EBIT.

EBIT for our Asia Pacific segment, which includes Asia and Australia, decreased \$8 million to \$2 million in the third quarter of 2011 from \$10 million in the prior year's third quarter. An \$11 million goodwill impairment charge recorded in Australia was the primary driver of the decline to Asia Pacific's EBIT. Partially offsetting this EBIT decline was the improvement from higher volumes in Asia and lower deferred and long-term compensation expense indexed to the Company's stock price. There were \$3 million of restructuring and related expenses in the third quarter of 2011 related to permanently eliminating 53 positions in Australia compared to \$1 million of restructuring and related expense in

the third quarter of 2010. Currency had a favorable year-over-year impact of \$2 million in Asia Pacific's third quarter 2011 EBIT.

Currency had a \$7 million favorable impact on overall company EBIT for 2011 as compared to the prior year.

Table of Contents***EBIT as a Percentage of Revenue for the Three Months Ended September 30, 2011 and 2010***

	Three Months Ended September 30, 2011 2010	
North America	6%	6%
Europe, South America & India	5%	2%
Asia Pacific	1%	6%
Total Tenneco	5%	4%

In North America, EBIT as a percentage of revenue for the third quarter of 2011 was even when compared to last year's third quarter. The increase in EBIT from higher OE revenues, new platform launches, higher aftermarket revenues, lower selling, general and administrative costs, in particular deferred and long-term compensation expense indexed to the Company's stock price, and decreased restructuring and related charges was offset as a percentage of revenue by increased operational costs in North America OE ride control business, which included material costs and manufacturing inefficiencies, and unfavorable currency. In Europe, South America and India, EBIT margin for the third quarter of 2011 was up three percentage points from the prior year's third quarter. Improved volumes, new platform launches, lower selling, general, and administrative costs, in particular deferred and long-term compensation expense indexed to the Company's stock price, and favorable currency were partially offset by increased engineering expense and higher restructuring and related expenses. EBIT as a percentage of revenue for our Asia Pacific segment decreased five percentage points in the third quarter of 2011 versus the prior year's third quarter as a goodwill impairment charge recorded in the third quarter of 2011 and increased restructuring and related expenses more than offset higher volumes in China, lower deferred and long-term compensation expense indexed to the Company's stock price and favorable currency as a percentage of revenue.

EBIT for the Nine months Ended September 30, 2011 and 2010

	Nine Months Ended September 30, 2011 2010		Change
	(Millions)		
North America	\$ 170	\$ 128	\$ 42
Europe, South America & India	97	57	40
Asia Pacific	24	34	(10)
	\$ 291	\$ 219	\$ 72

The EBIT results shown in the preceding table include the following items, certain of which are discussed below under Restructuring and Other Charges, which have an effect on the comparability of EBIT results between periods:

Nine Months

	Ended September 30, 2011 2010 (Millions)	
North America		
Restructuring and related expenses	\$ 1	\$ 12
Pension Charge(1)		4
Europe, South America & India		
Restructuring and related expenses	3	2
Asia Pacific		
Restructuring and related expenses	3	1
Goodwill impairment charge(2)	11	

Table of Contents

- (1) Represents a charge related to an actuarial loss for a lump-sum pension payment.
- (2) Non-cash asset impairment charge related to goodwill for Tenneco's Australian reporting unit.

EBIT from North American operations increased to \$170 million in the first nine months of 2011, from \$128 million one year ago. The benefits to EBIT from significantly higher OE production volumes, the related manufacturing efficiencies, decreased depreciation and amortization expense, lower deferred and long-term compensation expense indexed to the Company's stock price and improved aftermarket revenues were partially offset by increased material spending, increased manufacturing and distribution costs, and higher selling, general, administrative and engineering costs, which included a year-over-year increase to aftermarket changeover costs related to new aftermarket business. Restructuring and related expenses of \$1 million were included in the first three quarters of 2011 compared to \$12 million of restructuring and related expenses in the first three quarters of 2010. Currency had a \$2 million favorable impact on North America's first nine months of 2011 EBIT.

Our European, South American and Indian segment's EBIT was \$97 million for the first nine months of 2011 compared to \$57 million during the same period last year. The increase was driven by higher OE production volumes and the related manufacturing efficiencies, material cost management activities and lower deferred and long-term compensation expense indexed to the Company's stock price. Unfavorable pricing, mainly contractual price reductions and the timing of price recoveries for material costs in the Europe aftermarket, and increased selling, general, administrative and engineering costs, in particular inflationary wage costs in South America, partially offset the increase. Restructuring and related expenses of \$3 million were included in EBIT for the first nine months of 2011 and \$2 million were included in the first nine months of 2010. Currency had a \$13 million favorable impact on the first nine months' EBIT of 2011 when compared to the first nine months of last year.

EBIT for our Asia Pacific segment in the first nine months of 2011 was \$24 million compared to \$34 million in the first nine months of 2010. Higher volumes and the related manufacturing efficiencies in China and lower deferred and long-term compensation expense indexed to the Company's stock price drove EBIT improvement, but was more than offset by a goodwill impairment charge and volume declines in Australia, unfavorable pricing and increased selling, general, administrative, and engineering costs to support new plants in China and Thailand. Currency had a \$1 million favorable impact on the first nine months' EBIT of 2011 when compared to the first nine months of last year.

Currency had a \$16 million favorable impact on overall company EBIT for the nine months ended September 30, 2011, as compared to the prior year.

EBIT as a Percentage of Revenue for the Nine months Ended September 30, 2011 and 2010

	Nine Months Ended September 30, 2011 2010	
North America	7%	6%
Europe, South America & India	4%	3%
Asia Pacific	4%	7%
Total Tenneco	5%	5%

In North America, EBIT as a percentage of revenue for the first nine months of 2011 was up one percentage point when compared to last year. The increase in EBIT from higher OE production volumes and the related manufacturing efficiencies, higher aftermarket sales, lower depreciation and amortization expense, lower deferred and long-term compensation expense indexed to the Company's stock price, decreased restructuring and related charges and favorable currency was partially offset as a percentage of revenue by increased material spending and manufacturing and distribution costs and higher selling, general, administrative and engineering expenses, including higher aftermarket changeover costs. In Europe, South America and India, EBIT margin for the first three quarters of 2011 was up one percentage point from prior year. Improved volumes, the related manufacturing efficiencies, lower deferred and long-term compensation expense indexed to the Company's stock price, currency benefits and material cost management actions, were almost offset as a percentage of revenue by unfavorable

Table of Contents

pricing and increased selling, general, administrative and engineering expenses. EBIT as a percentage of revenue for our Asia Pacific segment decreased three percentage points in the first nine months of 2011 versus the prior year as higher volumes and the related manufacturing efficiencies in China and lower deferred and long-term compensation expense indexed to the Company's stock price, were more than offset by a goodwill impairment charge and production declines in Australia, increased selling, general, administrative, and engineering expenses and unfavorable pricing.

Interest Expense, Net of Interest Capitalized

We reported interest expense in the third quarter of 2011 of \$27 million net of interest capitalized of \$1 million (\$26 million in our U.S. operations and \$1 million in our foreign operations), down from \$36 million net of interest capitalized of \$1 million (\$35 million in our U.S. operations and \$1 million in our foreign operations) in the third quarter of 2010. Included in the third quarter of 2010 was \$5 million of expense related to our refinancing activities. Excluding the refinancing expenses, interest expense decreased in the third quarter of 2011 compared to the third quarter of the prior year as a result of lower rates due to last year's debt refinancing transactions.

We reported interest expense in the first three quarters of 2011 of \$81 million net of interest capitalized of \$3 million (\$79 million in our U.S. operations and \$2 million in our foreign operations), down from \$100 million net of interest capitalized of \$3 million (\$97 million in our U.S. operations and \$3 million in our foreign operations) in the first three quarters of 2010. Included in the first three quarters of 2011 was \$1 million of expense related to our refinancing activities. Included in the first three quarters of 2010 was \$6 million of expense related to our refinancing activities. Excluding the refinancing expenses, interest expense decreased in the first three quarters of 2011 compared to the first three quarters of the prior year as a result of lower rates due to last year's debt refinancing transactions.

On September 30, 2011, we had \$989 million in long-term debt obligations that have fixed interest rates. Of that amount, \$500 million is fixed through December 2020, \$250 million is fixed through November 2015, \$225 million is fixed through August 2018 and the remainder is fixed from 2012 through 2025. We also have \$247 million in long-term debt obligations that are subject to variable interest rates. For more detailed explanations on our debt structure and senior credit facility refer to "Liquidity and Capital Resources - Capitalization" later in this Management's Discussion and Analysis.

Income Taxes

Income tax expense was \$21 million for the third quarter of 2011. The tax expense recorded for the third quarter 2011 differs from a statutory rate of 35 percent due to net tax charges of \$2 million primarily related to losses in certain foreign jurisdictions and adjustments to prior tax estimates partially offset by the benefit of U.S. taxable income with no associated tax expense due to our net operating loss carryforward. In the third quarter of 2010, we reported income tax expense of \$15 million. The tax expense recorded differs from a statutory rate of 35 percent because of tax expenses of \$4 million primarily related to the impact of recording a valuation allowance against our tax benefit for losses in certain foreign jurisdictions.

Income tax expense was \$65 million for the first nine months of 2011. The tax expense recorded for the first nine months of 2011 differs from a statutory rate of 35 percent due to a net tax benefit of \$9 million primarily related to U.S. taxable income with no associated tax expense due to our net operating loss carryforward and income generated in lower tax rate jurisdictions, partially offset by adjustments to prior year income tax estimates and the impact of recording a valuation allowance against the tax benefit for losses in certain foreign jurisdictions. In the first nine months of 2010, income tax expense was \$45 million. The tax expense recorded for the first nine months of 2010 differs from a statutory rate of 35 percent because of tax expenses of \$3 million primarily related to income generated in lower tax rate jurisdictions as well as adjustments to tax estimates, which were more than offset by non-cash tax charges related to adjustments to prior year income tax estimates and the impact of not benefiting tax losses in the

U.S. and certain foreign jurisdictions.

Table of Contents***Restructuring and Other Charges***

Over the past several years, we have adopted plans to restructure portions of our operations. These plans were approved by our Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. In 2010, we incurred \$19 million in restructuring and related costs, of which \$14 million was recorded in cost of sales and \$5 million was recorded in depreciation and amortization expense. In the third quarter of 2011, we incurred \$4 million in restructuring and related costs, all of which was recorded in cost of sales. For the first nine months of 2011, we incurred \$7 million in restructuring and related costs, primarily related to headcount reductions in Europe and Australia and the closure of our ride control plant in Cozad, Nebraska, all of which was recorded in cost of sales.

Amounts related to activities that are part of our restructuring plans are as follows:

	December 31,			September 30,	
	2010	2011	Impact	2011	
	Restructuring	Expenses	of	Restructuring	
	Reserve		Exchange	Reserve	Reserve
			Rates	Adjustments	
			Cash		
			Payments		
			(Millions)		
Severance	\$ 7	7	(12)	(1)	\$ 1

Under the terms of our amended and extended senior credit agreement that took effect on June 3, 2010, we are allowed to exclude \$60 million of cash charges and expenses, before taxes, related to cost reduction initiatives incurred after June 3, 2010 from the calculation of the financial covenant ratios required under our senior credit facility. As of September 30, 2011, we have excluded \$16 million in cumulative allowable charges relating to restructuring initiatives against the \$60 million available under the terms of the senior credit facility.

On September 22, 2009, we announced that we were closing our original equipment ride control plant in Cozad, Nebraska. The closure of the Cozad plant will eliminate approximately 500 positions. We are hiring at other facilities as we move production from Cozad to those facilities, which will result in a net decrease of approximately 60 positions. Much of the production is being shifted from Cozad to our plant in Hartwell, Georgia.

During the transition of production from our Cozad facility to our Hartwell facility, several customer programs, which were planned to phase out, were reinstated and volumes increased beyond the amount in our original restructuring plan. To meet the higher volume requirements, we have taken a number of actions over the past few months to stabilize the production environment in Hartwell including reinforcing several core processes, realigning assembly lines, upgrading equipment to increase output and accelerating our Lean manufacturing activities. Based on the higher volumes, we are adjusting our consolidation plan. Our revised consolidation plan includes temporarily continuing some basic production operations in Cozad, and redirecting some programs from our Hartwell facility to our other North American facilities to better balance production. These actions will take place over the next several quarters. As of September 30, 2011, more than 95 percent of the positions at our Cozad facility have been eliminated. We still estimate that we will generate \$8 million in annualized cost savings once these actions are completed.

During 2009 and 2010, we recorded \$11 million and \$10 million, respectively, of restructuring and related expenses related to this initiative, of which approximately \$16 million represents cash expenditures. For the first nine months of 2011, we have recorded an additional cash charge of \$1 million related to this initiative.

During the third quarter of 2011, we recorded \$3 million of restructuring and related expenses, all of which represented cash expenditures, related to the permanent elimination of 53 positions in our Australian operations as a result of the continued decline in industry production volumes in that region.

In addition, during the third quarter of 2011, we performed an impairment evaluation within the Asia Pacific segment, of our Australian reporting unit's goodwill balance as a result of continued deterioration of that reporting unit's financial performance driven primarily by significant declines in industry production volumes in that region. As a result of our impairment evaluation, we concluded that the remaining amount of goodwill related to our Australian reporting unit was impaired and accordingly, we recorded a goodwill impairment charge of \$11 million during the third quarter of 2011.

Table of Contents***Earnings Per Share***

We reported net income attributable to Tenneco Inc. of \$30 million or \$0.49 per diluted common share for the third quarter of 2011. Included in the third quarter results for 2011 were negative impacts from expenses related to our restructuring activities, a goodwill impairment charge and tax charges. The net impact of these items had reduced earnings per diluted common share by \$0.18. We reported net income attributable to Tenneco Inc. of \$10 million or \$0.17 per diluted common share for the third quarter of 2010. Included in the results for the third quarter of 2010 were negative impacts from expenses related to our restructuring activities, a pension charge, costs related to debt refinancing and tax adjustments. The net impact of these items decreased earnings per diluted common share by \$0.22.

We reported net income attributable to Tenneco Inc. of \$127 million or \$2.06 per diluted common share for the first three quarters of 2011. Included in the first nine months results for 2011 were negative impacts from expenses related to our restructuring activities, a goodwill impairment charge and costs related to our refinancing activities, which were partially offset by net tax benefits. The net impact of these items decreased earnings per diluted common share by \$0.06. We reported net income attributable to Tenneco Inc. of \$57 million or \$0.94 per diluted common share for the first three quarters of 2010. Included in the results for the first three quarters of 2010 were negative impacts from expenses related to our restructuring activities, a pension charge, costs related to debt refinancing and tax adjustments. The net impact of these items decreased earnings per diluted common share by \$0.33.

Dividends on Common Stock

On January 10, 2001, our Board of Directors eliminated the quarterly dividend on our common stock. There are no current plans to reinstate a dividend on our common stock.

Cash Flows for the Three Months Ended September 30, 2011 and 2010

	Three Months Ended September 30, 2011 2010 (Millions)	
Cash provided (used) by:		
Operating activities	\$ 80	\$ 17
Investing activities	(54)	(35)
Financing activities	(3)	44

Operating Activities

For the three months ended September 30, 2011, operating activities provided \$80 million in cash compared to \$17 million in cash provided during the same period last year. For the third quarter of 2011, cash used for working capital was \$18 million versus \$69 million of cash used for working capital in the same period of 2010. Receivables, inventory and accounts payable represented a combined use of \$24 million in the third quarter of 2011 compared to a use of \$100 million in the third quarter of 2010, driven in both periods by higher demand on working capital to support increased revenue. Cash taxes were \$25 million for the third quarter of 2011 compared to \$18 million in the third quarter of the prior year.

One of our European subsidiaries receives payment from one of its OE customers whereby the accounts receivable are satisfied through the delivery of negotiable financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets. The amount of these financial instruments that was collected before their maturity date and sold at a discount totaled \$1 million and \$6 million at September 30, 2011 and December 31, 2010, respectively. No negotiable financial instruments were held by our European subsidiary as of September 30, 2011 and December 31, 2010, respectively.

Table of Contents

In certain instances, several of our Chinese subsidiaries receive payment from OE customers and satisfy vendor payments through the receipt and delivery of negotiable financial instruments. Financial instruments used to satisfy vendor payables and not redeemed totaled \$19 million and \$8 million at September 30, 2011 and December 31, 2010, respectively, and were classified as notes payable. Financial instruments received from OE customers and not redeemed totaled \$11 million at both September 30, 2011 and December 31, 2010, respectively. We classify financial instruments received from our OE customers as other current assets if issued by a financial institution of our customers or as customer notes and accounts, net if issued by our customer. We classified \$11 million in other current assets at both September 30, 2011 and December 31, 2010, respectively. Some of our Chinese subsidiaries that issue their own negotiable financial instruments to pay vendors are required to maintain a cash balance if they exceed certain credit limits with the financial institution that guarantees those financial instruments. A restricted cash balance was not required at those Chinese subsidiaries at September 30, 2011 and December 31, 2010, respectively.

The negotiable financial instruments received by one of our European subsidiaries and some of our Chinese subsidiaries are checks drawn by our OE customers and guaranteed by their banks that are payable at a future date. The use of these instruments for payment follows local commercial practice. Because negotiable financial instruments are financial obligations of our customers and are guaranteed by our customers' banks, we believe they represent a lower financial risk than the outstanding accounts receivable that they satisfy which are not guaranteed by a bank.

Investing Activities

Cash used for investing activities was \$19 million higher in the third quarter of 2011 compared to the same period a year ago. Cash payments for plant, property and equipment were \$50 million in the third quarter of 2011 versus payments of \$33 million in the third quarter of 2010, an increase of \$17 million. This increase was due to investments for new business launches, technology development and future growth opportunities. Cash payments for software-related intangible assets were \$4 million in the third quarter of 2011 compared to \$3 million in the third quarter of 2010.

Financing Activities

Cash flow from financing activities was an outflow of \$3 million for the quarter ending September 30, 2011 compared to an inflow of \$44 million for the quarter ending September 30, 2010. In the second quarter of 2011 we announced a plan to repurchase up to 400,000 shares of our outstanding common stock. During the third quarter of 2011, we purchased 129,500 shares of our outstanding common stock for \$5 million which completed the stock buyback plan. We also paid \$4 million to secure the remaining 25 percent interest in our emission control joint venture in Thailand, now wholly-owned, during the third quarter of 2011. Borrowings under our revolving credit facility were \$97 million in the third quarter of 2011 and \$86 million in the prior year third quarter. There were no borrowings outstanding under the North American accounts receivable securitization programs in either quarter ended September 30 of 2011 or 2010.

Cash Flows for the Nine Months Ended September 30, 2011 and 2010

Nine Months Ended September 30, 2011 2010 (Millions)

Financing activities	53	64

Table of Contents

Operating Activities

For the nine months ended September 30, 2011, operating activities provided \$44 million in cash compared to \$64 million in cash provided during the same period last year. For the first nine months of 2011, cash used for working capital was \$241 million versus \$178 million of cash used for working capital in the same period of 2010. The demand for working capital to support higher revenue drove the increase in the first nine months of 2011 versus 2010. Receivables were a use of cash of \$314 million in the first nine months of 2011 compared to a cash use of \$374 million in the prior year's first nine months. Inventory represented a cash outflow of \$85 million during the first nine months of 2011, compared to a cash outflow of \$123 million for the same period of the prior year. Accounts payable provided cash of \$159 million for the nine months ended September 30, 2011, compared to cash provided of \$265 million for the nine months ended September 30, 2010. Cash taxes were \$58 million for the first nine months of 2011 compared to \$42 million in the first nine months of the prior year.

Investing Activities

Cash used for investing activities was \$39 million higher in the first nine months of 2011 compared to the same period a year ago. Cash payments for plant, property and equipment were \$145 million in the first nine months of 2011 versus payments of \$105 million in the first nine months of 2010, an increase of \$40 million. This increase was due to investments for new business launches, technology development and future growth opportunities. Cash payments for software-related intangible assets were \$10 million in the first nine months of 2011 compared to \$11 million in the first nine months of 2010.

Financing Activities

Cash flow from financing activities was an inflow of \$53 million for the nine months ending September 30, 2011 compared to an inflow of \$64 million for the nine months ending September 30, 2010. In the second quarter of 2011 we announced a plan to repurchase up to 400,000 shares of our outstanding common stock. During the first nine months of 2011, we purchased all 400,000 shares of our outstanding common stock for \$16 million. We also paid \$4 million to secure the remaining 25 percent interest in our emission control joint venture in Thailand, now wholly-owned, during the first nine months of 2011.

Outlook

Industry light vehicle production in the fourth quarter is forecasted to increase two percent year-over-year in regions where Tenneco operates according to IHS Automotive. IHS Automotive projects that light vehicle production in the fourth quarter will increase year-over-year by 12 percent in North America, two percent in China, one percent in South America and eight percent in Australia. Light vehicle production is predicted by IHS Automotive to decline two percent in Europe and eight percent in India. Full-year production in the regions where we operate is predicted to increase six percent versus last year according to IHS Automotive.

Besides benefiting from recovering light vehicle production volumes, we are continuing to launch and ramp-up incremental commercial vehicle emission control business to help our customers meet stricter diesel emissions control standards for on-road and off-road vehicles. Commercial vehicle emission control launches are currently underway in North America, Europe, China and South America. We now expect that commercial vehicle OE revenue will be approximately \$650 million for the full year, entirely due to lower volumes related to launch timing and ramp-up schedules, primarily in the Europe segment. However, we remain confident in our total OE revenue guidance for 2011. In addition, we continue to expand into new markets with new customers, including our most recently announced new emission control business with a commercial vehicle customer in Japan.

We expect our revenue growth to continue to be driven by leveraging production volume recovery with our global platform strength, successfully launching and ramping up new commercial vehicle business and continued strong contributions from our global aftermarket. We plan to continue to grow our business by investing in new manufacturing and engineering capacity to meet customer demand in the world's fastest growing markets and we will continue to take actions to improve our operations in established markets.

Table of Contents

Critical Accounting Policies

We prepare our condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. Preparing our condensed consolidated financial statements in accordance with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The following paragraphs include a discussion of some critical areas where estimates are required.

Revenue Recognition

We recognize revenue for sales to our original equipment and aftermarket customers when title and risk of loss passes to the customers under the terms of our arrangements with those customers, which is usually at the time of shipment from our plants or distribution centers. Generally, in connection with the sale of exhaust systems to certain original equipment manufacturers, we purchase catalytic converters and diesel particulate filters or components thereof including precious metals (substrates) on behalf of our customers which are used in the assembled system. These substrates are included in our inventory and passed through to the customer at our cost, plus a small margin, since we take title to the inventory and are responsible for both the delivery and quality of the finished product. Revenues recognized for substrate sales were \$1,258 million, and \$922 million for the first nine months of 2011 and 2010, respectively. For our aftermarket customers, we provide for promotional incentives and returns at the time of sale. Estimates are based upon the terms of the incentives and historical experience with returns. Certain taxes assessed by governmental authorities on revenue producing transactions, such as value added taxes, are excluded from revenue and recorded on a net basis. Shipping and handling costs billed to customers are included in revenues and the related costs are included in cost of sales in our Condensed Consolidated Statements of Income.

Warranty Reserves

Where we have offered product warranty, we also provide for warranty costs. Provisions for estimated expenses related to product warranty are made at the time products are sold or when specific warranty issues are identified on OE products. These estimates are established using historical information about the nature, frequency, and average cost of warranty claims and upon specific warranty issues as they arise. The warranty terms vary but range from one year up to limited lifetime warranties on some of our premium aftermarket products. We actively study trends of our warranty claims and take action to improve product quality and minimize warranty claims. While we have not experienced any material differences between these estimates and our actual costs, it is reasonably possible that future warranty issues could arise that could have a significant impact on our condensed consolidated financial statements.

Pre-production Design and Development and Tooling Assets

We expense pre-production design and development costs as incurred unless we have a contractual guarantee for reimbursement from the original equipment customer. Unbilled pre-production design and development costs recorded in prepayments and other and long-term receivables totaled \$20 and \$15 million at September 30, 2011 and December 31, 2010, respectively. In addition, plant, property and equipment included \$36 million and \$38 million at September 30, 2011 and December 31, 2010, respectively, for original equipment tools and dies that we own, and prepayments and other included \$44 million and \$46 million at September 30, 2011 and December 31, 2010, respectively, for in-process tools and dies that we are building for our original equipment customers.

Income Taxes

We evaluate our deferred income taxes quarterly to determine if valuation allowances are required or should be adjusted. U.S. GAAP requires that companies assess whether valuation allowances should be established against their deferred tax assets based on consideration of all available evidence, both positive and negative, using a more likely than not standard. This assessment considers, among other matters, the nature, frequency and amount of recent losses, the duration of statutory carryforward periods, and tax planning strategies. In making such judgments, significant weight is given to evidence that can be objectively verified.

Table of Contents

Valuation allowances have been established for deferred tax assets based on a more likely than not threshold. The ability to realize deferred tax assets depends on our ability to generate sufficient taxable income within the carryforward periods provided for in the tax law for each tax jurisdiction. We have considered the following possible sources of taxable income when assessing the realization of our deferred tax assets:

Future reversals of existing taxable temporary differences;

Taxable income or loss, based on recent results, exclusive of reversing temporary differences and carryforwards; and

Tax-planning strategies.

We reported income tax expense of \$21 million and \$65 million in the three month and nine month periods ending September 30, 2011, respectively. The tax expense recorded differs for the first nine months of 2011 from the expense that would be recorded using a U.S. Federal statutory rate of 35 percent due to a net tax benefit of \$9 million primarily related to U.S. taxable income with no associated tax expense due to our net operating loss (NOL) carryforward and income generated in lower tax rate jurisdictions, partially offset by adjustments to prior year income tax estimates and the impact of recording a valuation allowance against the tax benefit for losses in certain foreign jurisdictions. Beginning in 2008, given our historical losses, we concluded that our ability to fully utilize our NOLs was limited due to projecting the continuation of the negative economic environment and the impact of the negative operating environment on our tax planning strategies. As a result of our tax planning strategies which have not yet been implemented and which do not depend upon generating future taxable income, we carry deferred tax assets in the U.S. of \$90 million relating to the expected utilization of those NOLs. The federal NOLs expire beginning in tax years ending in 2021 through 2029. The state NOLs expire in various tax years through 2029.

If our operating performance improves on a sustained basis, our conclusion regarding the need for a valuation allowance could change, resulting in the reversal of some or all of the valuation allowance in the future. The charge to establish the U.S. valuation allowance also includes items related to the losses allocable to certain state jurisdictions where it was determined that tax attributes related to those jurisdictions were potentially not realizable.

We are required to record a valuation allowance against deferred tax assets generated by taxable losses in each period in the U.S. as well as in other foreign jurisdictions. Our future provision for income taxes will include no tax benefit with respect to losses incurred and no tax expense with respect to income generated in these jurisdictions until the respective valuation allowance is eliminated. This will cause variability in our effective tax rate.

Goodwill, net

We evaluate goodwill for impairment in the fourth quarter of each year, or more frequently if events indicate it is warranted. The goodwill impairment test consists of a two-step process. In step one, we compare the estimated fair value of our reporting units with goodwill to the carrying value of the unit's assets and liabilities to determine if impairment exists within the recorded balance of goodwill. We estimate the fair value of each reporting unit using the income approach which is based on the present value of estimated future cash flows. The income approach is dependent on a number of factors, including estimates of market trends, forecasted revenues and expenses, capital expenditures, weighted average cost of capital and other variables. A separate discount rate derived by a combination of published sources, internal estimates and weighted based on our debt and equity structure, was used to calculate the discounted cash flows for each of our reporting units. These estimates are based on assumptions that we believe to be reasonable, but which are inherently uncertain and outside of the control of management. If the carrying value of the reporting unit is higher than its fair value, there is an indication that impairment may exist which requires step two to be performed to measure the amount of the impairment loss. The amount of impairment is determined by comparing

the implied fair value of a reporting unit's goodwill to its carrying value.

During the third quarter of 2011, we performed an impairment evaluation of our Australian reporting unit's goodwill balance as a result of continued deterioration of that reporting unit's financial performance driven primarily by significant declines in industry production volumes in that region. We identified in our step one test that the carrying value of our Australian reporting unit was higher than its fair value which is an indication that impairment may exist which required us to perform step two of the goodwill impairment test to measure the amount

Table of Contents

of the impairment loss. Step two of the goodwill impairment evaluation required us to calculate the implied fair value of goodwill of our Australian reporting unit by allocating the estimated fair value to the assets and liabilities of this reporting unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the acquisition price. As a result of performing steps one and two of the goodwill impairment test, we concluded that the remaining amount of goodwill related to our Australian reporting unit was impaired and accordingly, we recorded a goodwill impairment charge of \$11 million during the third quarter of 2011.

In the fourth quarter of 2010, the estimated fair value of all of our reporting units, except for our Australian reporting unit, significantly exceeded the carrying value of its assets and liabilities.

Pension and Other Postretirement Benefits

We have various defined benefit pension plans that cover some of our employees. We also have postretirement health care and life insurance plans that cover some of our domestic employees. Our pension and postretirement health care and life insurance expenses and valuations are dependent on assumptions used by our actuaries in calculating those amounts. These assumptions include discount rates, health care cost trend rates, long-term return on plan assets, retirement rates, mortality rates and other factors. Health care cost trend rate assumptions are developed based on historical cost data and an assessment of likely long-term trends. Retirement rates are based primarily on actual plan experience while mortality rates are based upon the general population experience which is not expected to differ materially from our experience.

Our approach to establishing the discount rate assumption for both our domestic and foreign plans is generally based on the yield on high-quality corporate fixed-income investments. At the end of each year, the discount rate is determined using the results of bond yield curve models based on a portfolio of high quality bonds matching the notional cash inflows with the expected benefit payments for each significant benefit plan. Based on this approach, for 2011 we lowered the weighted average discount rate for all our pension plans to 5.5 percent in 2011 from 6.0 percent in 2010. The discount rate for postretirement benefits was lowered to 5.6 percent in 2011 from 6.1 percent in 2010.

Our approach to determining expected return on plan asset assumptions evaluates both historical returns as well as estimates of future returns, and is adjusted for any expected changes in the long-term outlook for the equity and fixed income markets. As a result, our estimate of the weighted average long-term rate of return on plan assets for all of our pension plans was lowered from 7.6 percent in 2010 to 7.2 percent for 2011.

Except in the U.K., our pension plans generally do not require employee contributions. Our policy is to fund our pension plans in accordance with applicable U.S. and foreign government regulations and to make additional payments as funds are available to achieve full funding of the projected benefit obligation. At September 30, 2011, all legal funding requirements had been met.

Changes in Accounting Pronouncements

Footnote 12 in our Notes to Condensed Consolidated Financial Statements located in Part I Item 1 of this Form 10-Q is incorporated herein for reference.

Table of Contents**Liquidity and Capital Resources*****Capitalization***

	September 30, 2011	December 31, 2010	% Change
	(Millions)		
Short-term debt and maturities classified as current	\$ 70	\$ 63	11%

Total debt	1,304	1,223	7
Total redeemable noncontrolling interests	10	12	(17)
Total noncontrolling interests	37	39	(5)
Tenneco Inc. shareholders' equity	83	(4)	NM
Total equity	120	35	243
Total capitalization	\$ 1,434	\$ 1,270	13

General. Short-term debt, which includes maturities classified as current and borrowings by foreign subsidiaries, was \$70 million and \$63 million as of September 30, 2011 and December 31, 2010, respectively. Borrowings under our revolving credit facilities, which are classified as long-term debt, were \$97 million and zero at September 30, 2011 and December 31, 2010, respectively.

The 2011 year-to-date increase in total equity primarily resulted from net income attributable to Tenneco Inc. of \$127 million, an \$8 million increase in additional liability for pension and postretirement benefits, a \$6 million increase in premium on common stock and other capital surplus relating to common stock issued pursuant to benefit plans, offset by a \$36 million decrease caused by the impact of changes in foreign exchange rates on the translation of financial statements of our foreign subsidiaries into U.S. dollars, a \$16 million increase in treasury stock as a result of open market purchases of common stock under our share repurchase program, and a \$2 million decrease in premium on common stock and other capital surplus due to the purchase of the remaining 25 percent equity interest in our Tenneco Automotive (Thailand) Limited joint venture.

Overview. Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of up to 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

On June 3, 2010, we completed an amendment and extension of our senior secured credit facility by extending the term of our revolving credit facility and replacing our \$128 million term loan A with a larger and longer maturity term loan B facility. As a result of the amendment and extension, as of September 30, 2011, the senior credit facility provides us with a total revolving credit facility size of \$622 million until March 16, 2012, when commitments of \$66 million will expire. After March 16, 2012, the extended revolving credit facility will provide \$556 million of

revolving credit and will mature on May 31, 2014. The extended facility will mature earlier on December 15, 2013, if our \$130 million tranche B-1 letter of credit/revolving loan facility is not refinanced by that date. Prior to maturity, funds may be borrowed, repaid and re-borrowed under the two revolving credit facilities without premium or penalty.

As of September 30, 2011, the senior credit facility also provides a six-year, \$148 million term loan B maturing in June 2016, and a seven-year \$130 million tranche B-1 letter of credit/revolving loan facility maturing in March 2014. We are required to make quarterly principal payments of \$375 thousand on the term loan B, through March 31, 2016 with a final payment of \$141 million due June 3, 2016. The tranche B-1 letter of credit/revolving loan facility requires repayment by March 2014. We can enter into revolving loans and issue letters of credit under the \$130 million tranche B-1 letter of credit/revolving loan facility. The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. There is no additional cost to us for issuing letters of credit under the tranche B-1 letter of credit/revolving loan facility. However, outstanding letters of credit reduce our availability to enter into revolving loans under the facility. We pay the tranche B-1 lenders interest equal to the London Interbank

Table of Contents

Offered Rate (LIBOR) plus a margin on all borrowings under the facility. Funds deposited with the administrative agent by the lenders and not borrowed by the Company earn interest at an annual rate approximately equal to LIBOR less 25 basis points.

Beginning June 3, 2010, our term loan B and revolving credit facility bear interest at an annual rate equal to, at our option, either (i) LIBOR plus a margin of 475 and 450 basis points, respectively, or (ii) a rate consisting of the greater of (a) the JPMorgan Chase prime rate plus a margin of 375 and 350 basis points, respectively, (b) the Federal Funds rate plus 50 basis points plus a margin of 375 and 350 basis points, respectively, and (c) the Eurodollar Rate plus 100 basis points plus a margin of 375 and 350 basis points, respectively. The margin we pay on these borrowings will be reduced by 25 basis points following each fiscal quarter for which our consolidated net leverage ratio is less than 2.25 for extending lenders and for the term loan B and will be further reduced by an additional 25 basis points following each fiscal quarter for which the consolidated net leverage ratio is less than 2.00 for extending lenders. Our consolidated net leverage ratio was 2.07 and 2.24 as of September 30, 2011 and December 31, 2010, respectively. As a result, the margin we pay on these borrowings was reduced in February 2011 by 25 basis points for extending lenders. However, since the ratio increased during the first quarter to 2.32, the margin we pay on borrowings increased by 25 basis points beginning in May 2011 and remained at such level until August 2011 when it decreased again by 25 basis points.

The borrowings under our tranche B-1 letter of credit/revolving loan facility incur interest at an annual rate equal to, at our option, either (i) LIBOR plus a margin of 500 basis points, or (ii) a rate consisting of the greater of (a) the JPMorgan Chase prime rate plus a margin of 400 basis points, (b) the Federal Funds rate plus 50 basis points plus a margin of 400 basis points, and (c) the Eurodollar Rate plus 100 basis points plus a margin of 400 basis points. The rate will increase by 50 basis points following each fiscal quarter for which our consolidated net leverage ratio is greater than or equal to 5.00.

At September 30, 2011, of the \$752 million available under the two revolving credit facilities within our senior secured credit facility, we had unused borrowing capacity of \$601 million with \$97 million in outstanding borrowings and \$54 million in letters of credit outstanding. As of September 30, 2011, our outstanding debt also included \$250 million of 81/8 percent senior notes due November 15, 2015, \$148 million term loan B due June 3, 2016, \$225 million of 73/4 percent senior notes due August 15, 2018, \$500 million of 67/8 percent senior notes due December 15, 2020, and \$84 million of other debt.

On December 9, 2010, we commenced a cash tender offer of our outstanding \$500 million 85/8 percent senior subordinated notes due in 2014 and a consent solicitation to amend the indenture governing these notes. The consent solicitation expired on December 22, 2010 and the cash tender offer expired on January 6, 2011. On December 23, 2010, we issued \$500 million of 67/8 percent senior notes due December 15, 2020 in a private offering. The net proceeds of this transaction, together with cash and available liquidity, were used to finance the purchase of our 85/8 percent senior subordinated notes pursuant to the tender offer at a price of 103.25 percent of the principal amount, plus accrued and unpaid interest for holders who tendered prior to the expiration of the consent solicitation, and 100.25 percent of the principal amount, plus accrued and unpaid interest, for other participants. On January 7, 2011, we redeemed all remaining outstanding \$20 million of senior subordinated notes that were not previously tendered, at a price of 102.875 percent of the principal amount, plus accrued and unpaid interest. To facilitate these transactions, we amended our senior credit agreement to permit us to refinance our senior subordinated notes with new senior unsecured notes. We did not incur any fee in connection with this amendment. The new notes are general senior obligations of Tenneco Inc. and are not secured by assets of Tenneco Inc. or any of our subsidiaries that guarantee the new notes. We recorded \$20 million of pre-tax charges in December 2010 and an additional \$1 million of pre-tax charges in the first quarter of 2011 related to our repurchase and redemption of our 85/8 percent senior subordinated notes. On March 14, 2011, we completed an offer to exchange the \$500 million of 67/8 percent senior notes due in 2020 which have been registered under the Securities Act of 1933, for and in replacement of all outstanding

unregistered 67/8 percent senior notes due in 2020. We received tenders from holders of all \$500 million of the aggregate outstanding amount of the original notes. The terms of the new notes are substantially identical to

Table of Contents

the terms of the original notes for which they were exchanged, except that the transfer restrictions and the registration rights applicable to the original notes generally do not apply to the new notes.

On August 3, 2010, we issued \$225 million of 73/4 percent senior notes due August 15, 2018 in a private offering. The net proceeds of this transaction, together with cash and available liquidity, were used to finance the redemption of our 101/4 percent senior secured notes due in 2013. We called the senior secured notes for redemption on August 3, 2010, and completed the redemption on September 2, 2010 at a price of 101.708 percent of the principal amount, plus accrued and unpaid interest. We recorded \$5 million of expense related to our redemption of our 101/4 percent senior secured notes in the third quarter of 2010. The new notes are general senior obligations of Tenneco Inc. and are not secured by assets of Tenneco Inc. or any of our subsidiaries that guarantee the new notes. On February 14, 2011, we completed an offer to exchange the \$225 million of 73/4 percent senior notes due in 2018 which have been registered under the Securities Act of 1933, for and in replacement of all outstanding unregistered 73/4 percent senior notes due in 2018. We received tenders from holders of all \$225 million of the aggregate outstanding amount of the original notes. The terms of the new notes are substantially identical to the terms of the original notes for which they were exchanged, except that the transfer restrictions and the registration rights applicable to the original notes generally do not apply to the new notes.

Senior Credit Facility Interest Rates and Fees. Borrowings and letters of credit issued under the senior credit facility bear interest at an annual rate equal to, at our option, either (i) LIBOR plus a margin as set forth in the table below; or (ii) a rate consisting of the greater of the JPMorgan Chase prime rate, the Federal Funds rate plus 50 basis points or the Eurodollar Rate plus 100 basis points, plus a margin as set forth in the table below:

	8/14/2009 thru 2/28/2010	3/1/2010 thru 6/2/2010	6/3/2010 thru 2/27/2011	2/28/2011 thru 5/15/2011	5/16/2011 thru 8/7/2011	Beginning 8/8/2011
Applicable Margin over:						
LIBOR for Revolving Loans	5.50%	4.50%	4.50%	4.25%	4.50%	4.25%
LIBOR for Term Loan B Loans			4.75%	4.50%	4.75%	4.50%
LIBOR for Term Loan A Loans	5.50%	4.50%				
LIBOR for Tranche B-1 Loans	5.50%	5.00%	5.00%	5.00%	5.00%	5.00%
Prime-based Loans	4.50%	3.50%				
Prime for Revolving Loans			3.50%	3.25%	3.50%	3.25%
Prime for Term Loan B Loans			3.75%	3.50%	3.75%	3.50%

Federal Funds for Revolving Loans			3.50%	3.25%	3.50%	3.25%
Federal Funds for Term Loan B Loans			3.75%	3.50%	3.75%	3.50%
Federal Funds for Tranche B-1 Loans	5.00%	4.00%	4.00%	4.00%	4.00%	4.00%
Commitment Fee	0.75%	0.50%	0.75%	0.50%	0.75%	0.50%

Senior Credit Facility Other Terms and Conditions. Our senior credit facility requires that we maintain financial ratios equal to or better than the following consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA, as defined in the senior credit facility agreement), and consolidated interest coverage ratio (consolidated EBITDA divided by consolidated interest expense, as defined under the senior credit facility agreement) at the end of each period indicated. Failure to maintain these ratios will result in a default under our senior credit facility. The financial ratios required under the amended and restated senior credit facility and, the actual ratios we achieved for the first three quarters of 2011, are as follows:

	March 31, 2011		Quarter Ended June 30, 2011		September 30, 2011	
	Req.	Act.	Req.	Act.	Req.	Act.
Leverage Ratio (maximum)	4.00	2.32	3.75	2.17	3.50	2.07
Interest Coverage Ratio (minimum)	2.55	4.37	2.55	4.76	2.55	5.17

Table of Contents

The financial ratios required under the senior credit facility for the remainder of 2011 and beyond are set forth below:

Period Ending	Leverage Ratio	Interest Coverage Ratio
December 31, 2011	3.50	2.55
Each quarter thereafter	3.50	2.75

The covenants in our senior credit facility agreement generally prohibit us from repaying or refinancing our senior notes. So long as no default existed, we would, however, under our senior credit facility agreement, be permitted to repay or refinance our senior notes: (i) with the net cash proceeds of incremental facilities and permitted refinancing indebtedness (as defined in the senior credit facility agreement); (ii) with the net cash proceeds from the sale of shares of our common stock; (iii) in exchange for permitted refinancing indebtedness or in exchange for shares of our common stock; (iv) with the net cash proceeds of any new senior or subordinated unsecured indebtedness; (v) with the proceeds of revolving credit loans (as defined in the senior credit facility agreement); (vi) with the cash generated by the operations of the company; and (vii) in an amount equal to the sum of (a) the net cash proceeds of qualified stock issued by the Company after March 16, 2007, plus (b) the portion of annual excess cash flow (beginning with excess cash flow for fiscal year 2010) not required to be applied to payment of the credit facilities and which is not used for other purposes, provided that the aggregate principal amount of senior notes purchased and cancelled or redeemed pursuant to clauses (v), (vi) and (vii), is capped as follows based on the pro forma consolidated leverage ratio after giving effect to such purchase, cancellation or redemption:

Proforma Consolidated Leverage Ratio	Aggregate Senior Note Maximum Amount (Millions)
Greater than or equal to 3.0x	\$ 20
Greater than or equal to 2.5x	\$ 100
Less than 2.5x	\$ 125

Although the senior credit facility agreement would permit us to repay or refinance our senior notes under the conditions described above, any repayment or refinancing of our outstanding notes would be subject to market conditions and either the voluntary participation of note holders or our ability to redeem the notes under the terms of the applicable note indenture. For example, while the senior credit agreement would allow us to repay our outstanding notes via a direct exchange of the notes for either permitted refinancing indebtedness or for shares of our common stock, we do not, under the terms of the agreements governing our outstanding notes, have the right to refinance the notes via any type of direct exchange.

The senior credit facility agreement also contains other restrictions on our operations that are customary for similar facilities, including limitations on: (i) incurring additional liens; (ii) sale and leaseback transactions (except for the permitted transactions as described in the senior credit facility agreement); (iii) liquidations and dissolutions; (iv) incurring additional indebtedness or guarantees; (v) investments and acquisitions; (vi) dividends and share repurchases; (vii) mergers and consolidations; and (viii) refinancing of the senior notes. Compliance with these requirements and restrictions is a condition for any incremental borrowings under the senior credit facility agreement and failure to meet these requirements enables the lenders to require repayment of any outstanding loans.

As of September 30, 2011, we were in compliance with all the financial covenants and operational restrictions of the facility. Our senior credit facility does not contain any terms that could accelerate payment of the facility or affect pricing under the facility as a result of a credit rating agency downgrade.

Senior Notes. As of September 30, 2011, our outstanding debt also includes \$250 million of 81/8 percent senior notes due November 15, 2015, \$225 million of 73/4 percent senior notes due August 15, 2018 and \$500 million of 67/8 percent senior notes due December 15, 2020. Under the indentures governing the notes, we are permitted to redeem some or all of the remaining senior notes at any time after November 15, 2011 in the case of the senior notes due 2015, August 14, 2014 in the case of the senior notes due 2018, and December 15, 2015 in the case of senior notes due 2020. On January 7, 2011, we redeemed all remaining outstanding \$20 million of senior subordinated

Table of Contents

notes at a price of 102.875 percent of principal amount plus accrued and unpaid interest. If we sell certain of our assets or experience specified kinds of changes in control, we must offer to repurchase the notes. Under the indentures governing the notes, we are permitted to redeem up to 35 percent of the senior notes due 2018, with the proceeds of certain equity offerings completed before August 13, 2013 and up to 35 percent of the senior notes due 2020, with the proceeds of certain equity offerings completed before December 15, 2013.

Our senior notes require that, as a condition precedent to incurring certain types of indebtedness not otherwise permitted, our consolidated fixed charge coverage ratio, as calculated on a pro forma basis, be greater than 2.00. The indentures also contain restrictions on our operations, including limitations on: (i) incurring additional indebtedness or liens; (ii) dividends; (iii) distributions and stock repurchases; (iv) investments; (v) asset sales and (vi) mergers and consolidations. Subject to limited exceptions, all of our existing and future material domestic wholly owned subsidiaries fully and unconditionally guarantee these notes on a joint and several basis. There are no significant restrictions on the ability of the subsidiaries that have guaranteed these notes to make distributions to us. As of September 30, 2011, we were in compliance with the covenants and restrictions of these indentures.

Accounts Receivable Securitization. We securitize some of our accounts receivable on a limited recourse basis in North America and Europe. As servicer under these accounts receivable securitization programs, we are responsible for performing all accounts receivable administration functions for these securitized financial assets including collections and processing of customer invoice adjustments. In North America, we have an accounts receivable securitization program with three commercial banks comprised of a first priority facility and a second priority facility. We securitize original equipment and aftermarket receivables on a daily basis under the bank program. In March 2011, the North American program was amended and extended to March 23, 2012. The first priority facility continues to provide financing of up to \$110 million and the second priority facility, which is subordinated to the first priority facility, continues to provide up to an additional \$40 million of financing. Both facilities monetize accounts receivable generated in the U.S. and Canada that meet certain eligibility requirements, and the second priority facility also monetizes certain accounts receivable generated in the U.S. or Canada that would otherwise be ineligible under the first priority securitization facility. The amendments to the North American program expand the trade receivables that are eligible for purchase under the program and decrease the margin we pay to our banks. We had no outstanding third party investments in our securitized accounts receivable under the North American program at September 30, 2011 and December 31, 2010, respectively.

Each facility contains customary covenants for financings of this type, including restrictions related to liens, payments, mergers or consolidation and amendments to the agreements underlying the receivables pool. Further, each facility may be terminated upon the occurrence of customary events (with customary grace periods, if applicable), including breaches of covenants, failure to maintain certain financial ratios, inaccuracies of representations and warranties, bankruptcy and insolvency events, certain changes in the rate of default or delinquency of the receivables, a change of control and the entry or other enforcement of material judgments. In addition, each facility contains cross-default provisions, where the facility could be terminated in the event of non-payment of other material indebtedness when due and any other event which permits the acceleration of the maturity of material indebtedness.

We also securitize receivables in our European operations with regional banks in Europe. The arrangements to securitize receivables in Europe are provided under seven separate facilities provided by various financial institutions in each of the foreign jurisdictions. The commitments for these arrangements are generally for one year, but some may be cancelled with notice 90 days prior to renewal. In some instances, the arrangement provides for cancellation by the applicable financial institution at any time upon 15 days, or less, notification. The amount of outstanding third party investments in our securitized accounts receivable in Europe was \$140 million and \$91 million at September 30, 2011 and December 31, 2010, respectively.

If we were not able to securitize receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreements might increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreements.

In our North American accounts receivable securitization programs, we transfer a partial interest in a pool of receivables and the interest that we retain is subordinate to the transferred interest. Accordingly, we account for our

Table of Contents

North American securitization program as a secured borrowing. In our European programs, we transfer accounts receivables in their entirety to the acquiring entities and satisfy all of the conditions established under ASC Topic 860,

Transfers and Servicing, to report the transfer of financial assets in their entirety as a sale. The fair value of assets received as proceeds in exchange for the transfer of accounts receivable under our European securitization programs approximates the fair value of such receivables. We recognized interest expense of less than \$1 million in the three month period ending September 30, 2011 and \$1 million in the three month period ended September 30, 2010, and \$2 million and \$3 million for each of the nine month periods ended September 30, 2011 and 2010 respectively, relating to our North American securitization program. In addition, we recognized a loss of \$1 million in each of the three month periods ended September 30, 2011 and 2010, respectively, and \$4 million and \$3 million for the nine month periods ended September 30, 2011 and 2010, respectively, on the sale of trade accounts receivable in our European accounts receivable securitization programs, representing the discount from book values at which these receivables were sold to our banks. The discount rate varies based on funding costs incurred by our banks, which averaged approximately three percent and four percent during the first nine months of 2011 and 2010, respectively.

Capital Requirements. We believe that cash flows from operations, combined with our cash on hand, subject to any applicable withholding taxes upon repatriation of cash balances from our foreign operations, and available borrowing capacity described above, assuming that we maintain compliance with the financial covenants and other requirements of our loan agreement, will be sufficient to meet our future capital requirements, including debt amortization, capital expenditures, pension contributions, and other operational requirements, for the following year. Our ability to meet the financial covenants depends upon a number of operational and economic factors, many of which are beyond our control. In the event that we are unable to meet these financial covenants, we would consider several options to meet our cash flow needs. Such actions include additional restructuring initiatives and other cost reductions, sales of assets, reductions to working capital and capital spending, issuance of equity and other alternatives to enhance our financial and operating position. Should we be required to implement any of these actions to meet our cash flow needs, we believe we can do so in a reasonable time frame.

Derivative Financial Instruments***Foreign Currency Exchange Rate Risk***

We use derivative financial instruments, principally foreign currency forward purchase and sale contracts with terms of less than one year, to hedge our exposure to changes in foreign currency exchange rates. Our primary exposure to changes in foreign currency rates results from intercompany loans made between affiliates to minimize the need for borrowings from third parties. Additionally, we enter into foreign currency forward purchase and sale contracts to mitigate our exposure to changes in exchange rates on certain intercompany and third-party trade receivables and payables. We manage counter-party credit risk by entering into derivative financial instruments with major financial institutions that can be expected to fully perform under the terms of such agreements. We do not enter into derivative financial instruments for speculative purposes.

In managing our foreign currency exposures, we identify and aggregate existing offsetting positions and then hedge residual exposures through third-party derivative contracts. The fair value of our foreign currency forward contracts was a net liability position of \$2 million at September 30, 2011 and is based on an internally developed model which incorporates observable inputs including quoted spot rates, forward exchange rates and discounted future expected cash flows utilizing market interest rates with similar quality and maturity characteristics. The

Table of Contents

following table summarizes by major currency the notional amounts for our foreign currency forward purchase and sale contracts as of September 30, 2011. All contracts in the following table mature in 2011.

		Notional Amount in Foreign Currency (Millions)
Australian dollars	Purchase	2
British pounds	Purchase	4
European euro	Sell	(9)
Japanese yen	Purchase	442
South African rand	Purchase	162
U.S. dollars	Purchase	1
	Sell	(23)
Other	Sell	(1)

Interest Rate Risk

Our financial instruments that are sensitive to market risk for changes in interest rates are primarily our debt securities. We use our revolving credit facilities to finance our short-term and long-term capital requirements. We pay a current market rate of interest on these borrowings. Our long-term capital requirements have been financed with long-term debt with original maturity dates ranging from four to ten years. On September 30, 2011, we had \$989 million in long-term debt obligations that have fixed interest rates. Of that amount, \$500 million is fixed through December 2020, \$250 million is fixed through November 2015, \$225 million is fixed through August 2018 and the remainder is fixed from 2012 through 2025. We also have \$247 million in long-term debt obligations that are subject to variable interest rates. For more detailed explanations on our debt structure and senior credit facility refer to Liquidity and Capital Resources Capitalization earlier in this Management's Discussion and Analysis.

We estimate that the fair value of our long-term debt at September 30, 2011 was about 101 percent of its book value. A one percentage point increase or decrease in interest rates would increase or decrease the annual interest expense we recognize in the income statement and the cash we pay for interest expense by about \$3 million.

Environmental and Legal Contingencies

We are involved in environmental remediation matters, legal proceedings, claims, investigations and warranty obligations that are incidental to the conduct of our business and create the potential for contingent losses. We accrue for potential contingent losses when our review of available facts indicates that it is probable a loss has been incurred and the amount of the loss is reasonably estimable. Each quarter we assess our loss contingencies based upon currently available facts, existing technology, and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors and record adjustments to these reserves as required. As an example, we consider all available evidence including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations when we evaluate our environmental remediation contingencies. Further, all of our loss contingency estimates are subject to revision in future periods based on actual costs or new information. With respect to our environmental liabilities, where future cash flows are fixed or reliably determinable, we have discounted those liabilities. All other environmental liabilities are recorded at their undiscounted amounts. We evaluate recoveries separately from the liability and, when they are assured, recoveries are recorded and reported separately from the associated liability in our condensed consolidated financial statements.

We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing condition caused by past operations that do not contribute to current or future revenue generation. As of September 30, 2011, we have the obligation to remediate or contribute towards the remediation of certain sites, including one Federal Superfund site. At September 30, 2011, our aggregated estimated share of environmental remediation costs for all these sites on a

Table of Contents

discounted basis was approximately \$18 million, of which \$5 million is recorded in other current liabilities and \$13 million is recorded in deferred credits and other liabilities in our condensed consolidated balance sheet. For those locations in which the liability was discounted, the weighted average discount rate used was 1.9 percent. The undiscounted value of the estimated remediation costs was \$21 million. Our expected payments of environmental remediation costs are estimated to be approximately \$3 million in 2011 and 2012, \$2 million in 2013, \$1 million in 2014 through 2015 and \$12 million thereafter. Based on information known to us, we have established reserves that we believe are adequate for these costs. Although we believe these estimates of remediation costs are reasonable and are based on the latest available information, the costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute towards the remediation costs. In addition, certain environmental statutes provide that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other potentially responsible parties at these sites has been considered, where appropriate, in our determination of our estimated liability. We do not believe that any potential costs associated with our current status as a potentially responsible party in the Federal Superfund site, or as a liable party at the other locations referenced herein, will be material to our condensed consolidated results of operations, financial position or cash flows.

We also from time to time are involved in legal proceedings, claims or investigations. Some of these proceedings allege damages against us relating to environmental liabilities (including, toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warning issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. For example, one of our Argentine subsidiaries is currently defending against a criminal complaint alleging the failure to comply with laws requiring the proceeds of export transactions to be collected, reported and/or converted to local currency within specified time periods. As another example, we are subject to an audit in 11 states of our practices with respect to the payment of unclaimed property to those states, which could cover over 30 years. We now have practices in place which we believe ensure that we pay unclaimed property as required. We vigorously defend ourselves against all of these claims. In future periods, we could be subject to cash costs or charges to earnings if any of these matters are resolved on unfavorable terms. However, although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, we do not expect that these legal proceedings or claims will have any material adverse impact on our future consolidated financial position, results of operations or cash flows.

In addition, we are subject to a number of lawsuits initiated by a significant number of claimants alleging health problems as a result of exposure to asbestos. In the early 2000's we were named in nearly 20,000 complaints, most of which were filed in Mississippi state court and the vast majority of which made no allegations of exposure to asbestos from our product categories. Most of these claims have been dismissed and our current docket of active and inactive cases is less than 500 cases nationwide. A small number of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by The Pullman Company, one of our subsidiaries. The balance of the claims is related to alleged exposure to asbestos in our automotive products. Only a small percentage of the claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former products and that, in any event, they would not be at increased risk of asbestos-related disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number of each in some cases exceeding 100 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar amount for damages. As major asbestos manufacturers continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject

to charges to earnings if any of these matters are resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have regularly achieved favorable resolutions. Accordingly, we presently believe that these asbestos-related claims

Table of Contents

will not have a material adverse impact on our future consolidated financial condition, results of operations or cash flows.

Employee Stock Ownership Plans

We have established Employee Stock Ownership Plans for the benefit of U.S. employees. Under the plans, subject to limitations in the Internal Revenue Code, participants may elect to defer up to 75 percent of their salary through contributions to the plan, which are invested in selected mutual funds or used to buy our common stock. We match in cash 50 percent of each employee's contribution up to eight percent of the employee's salary. In connection with freezing the defined benefit pension plans for nearly all U.S. based salaried and non-union hourly employees effective December 31, 2006, and the related replacement of those defined benefit plans with defined contribution plans, we are making additional contributions to the Employee Stock Ownership Plans. We recorded expense for these contributions of approximately \$14 million and \$12 million for the nine months ended September 30, 2011 and 2010, respectively. Matching contributions vest immediately. Defined benefit replacement contributions fully vest on the employee's third anniversary of employment.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding our exposure to interest rate risk and foreign currency exchange rate risk, see the caption entitled "Derivative Financial Instruments" in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, which is incorporated herein by reference.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the quarter covered by this report. Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by our company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended September 30, 2011, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II****ITEM 1A. RISK FACTORS**

We are exposed to certain risks and uncertainties that could have a material adverse impact on our business, financial condition and operating results. There have been no material changes to the Risk Factors described in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2010.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) None.

(b) Not applicable.

(c) *Purchase of equity securities by the issuer and affiliated purchasers.* The following table provides information relating to our purchase of shares of our common stock in the third quarter of 2011. These purchases reflect shares purchased through our share repurchase program and shares withheld upon vesting of restricted stock, to satisfy statutory minimum tax withholding obligations.

Period	Total Number of Shares Purchased	Average Price Paid	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet be Purchased Under These Plans or Programs
July 2011	76,684	\$ 43.28	75,500	54,000
August 2011	54,018	\$ 40.43	54,000	
Total	130,702	\$ 42.10	129,500	

In May 2011, our Board of Directors approved a share repurchase program, authorizing our company to repurchase up to 400,000 shares of our outstanding common stock over a 12 month period. Our share repurchase program is intended to offset dilution from shares of restricted stock and stock options that were issued in 2011 to employees. We repurchased all of the 400,000 shares through open market purchases, which were funded through cash from operations, as of August 3, 2011 at a total cost of \$16 million through this program. These repurchased shares are held as part of our treasury stock which increased to 1,694,692 shares at September 30, 2011 from 1,294,692 shares at December 31, 2010.

During the third quarter of 2011, we repurchased and subsequently cancelled 1,202 shares to satisfy the statutory minimum tax withholding requirements for restricted stock which vested during the quarter. We intend to continue to satisfy statutory minimum tax withholding obligations in connection with the vesting of outstanding restricted stock through the withholding of shares.
