**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

**FORM 10-K
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For fiscal year ended, SEPTEMBER 30, 2007
Commission File Number 1-9965
KEITHLEY INSTRUMENTS, INC.
(Exact name of registrant as specified in its charter)**

Ohio **34-0794417**
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)
Address of principal executive offices: **28775 Aurora Road, Solon, Ohio, 44139**
Registrant's telephone number, including area code: **(440) 248-0400**
Securities registered pursuant to section 12(b) of the Act:

Common Shares, Without Par Value
(Title of Each Class)

New York Stock Exchange
(Name of Each Exchange on Which Registered)

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer **Accelerated filer** **Non-accelerated filer**

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the Common Shares of the Registrant held by non-affiliates was \$209.9 million and the aggregate market value of the Class B Common Shares of the Registrant held by non-affiliates was \$0.3 million for a total aggregate market value of all classes of Common Shares held by non-affiliates of \$210.2 million at March 31, 2007, the Registrant's most recently completed second fiscal quarter. While the Class B Common Shares are not listed for public trading on any exchange or market system, shares of that class are convertible into Common Shares at any time on a share-for-share basis. The market values indicated were calculated based upon the last sale price of the Common Shares as reported by the New York Stock Exchange on March 30, 2007, which was \$15.29.

As of December 6, 2007 there were outstanding 13,859,921 Common Shares, without par value, and 2,150,502 Class B Common Shares, without par value.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the registrant's Annual Meeting of Shareholders to be held on February 9, 2008 (the 2008 Annual Meeting) are incorporated by reference in Part III in this Annual Report on Form 10-K (this Annual Report) and are identified under the appropriate items in this Annual Report.

Forward-Looking Statements

Statements and information included in this Annual Report on Form 10-K by Keithley Instruments, Inc. (Keithley, the Company, we, us or our) that are not purely historical are forward-looking statements within the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements in this Annual Report on Form 10-K include statements regarding Keithley's expectations, intentions, beliefs, and strategies regarding the future, including recent trends, cyclicity, growth in the markets Keithley sells into, conditions of the electronics industry, deployment of our own sales employees throughout the world, investments to develop new products, the potential impact of adopting new accounting pronouncements, our future effective tax rate, liquidity position, ability to generate cash, expected growth, and obligations under our retirement benefit plans.

When used in this report, the words believes, expects, anticipates, intends, assumes, estimates, evaluates, forecasts, may, could, future, forward, potential, probable, and similar expressions are intended to identify forward-looking statements.

These forward-looking statements involve risks and uncertainties. We may make other forward-looking statements from time to time, including in press releases and public conference calls and webcasts. All forward-looking statements made by Keithley are based on information available to us at the time the statements are made, and we assume no obligation to update any forward-looking statements. It is important to note that actual results are subject to a number of risks and uncertainties that could cause actual results to differ materially from those included in such forward-looking statements. Some of these risks and uncertainties are discussed below in Item 1A Risk Factors of Part I of this Form 10-K.

PART I

ITEM 1 BUSINESS

General

Keithley Instruments, Inc. was founded in 1946 and organized as an Ohio corporation in 1955. Its principal executive offices are located at 28775 Aurora Road, Solon, Ohio 44139; telephone (440) 248-0400. References herein to the Company, Keithley, we or our are to Keithley Instruments, Inc. and its subsidiaries unless the context indicates otherwise.

Our website is www.keithley.com. We make our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed with or furnished to the U.S. Securities and Exchange Commission (the SEC) available to the public free of charge through our website as soon as reasonably practicable after making such filings. The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may also obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Additionally, the SEC maintains an internet site (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Keithley Instruments, Inc. designs, develops, manufactures, and markets complex electronic instruments and systems geared to the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. The Company has approximately 500 products used to source, measure, connect, control or communicate direct current (DC), radio frequency (RF), or optical signals. Product offerings include integrated systems solutions, along with instruments and personal computer (PC) plug-in boards that can be used as system components or stand-alone solutions. Our customers are scientists and engineers in the worldwide electronics industry involved with advanced materials research, semiconductor device development and fabrication, and the production of end products such as portable wireless devices.

During fiscal 2007, approximately 35 percent of our orders were received from the semiconductor industry; approximately 20 percent came from research and education customers; approximately 10 percent came from the wireless communications customer group; and approximately 25 percent came from the precision electronic components/subassemblies manufacturers customer group, which includes customers in automotive, computers and peripherals, medical equipment, aerospace and defense, and manufacturers of components, including optoelectronic components. The remainder of orders came from customers in a variety of other industries. Although our products

vary in capability, sophistication, use, size and price, they generally test, measure and analyze electrical, RF, optical or physical properties. As such, we consider our business to be in a single industry segment.

Business Strategy

We have focused our efforts on identifying test applications within segments of the electronics test and measurement industry that have high rates of technology change, long-term growth in demand, a meaningful market size, and that leverage our measurement capabilities and/or other test applications. We estimate total annual sales for these segments to be in excess of \$1 billion. New products are an important factor in our sales growth strategy, and we have increased our investment in product development activity spending levels to expand our product offering and accelerate the introduction of new products. Expanding our measurement technology platforms beyond our traditional DC and IV base to include new RF, pulse and C-V (capacitance-voltage) test platforms allows us to serve a broader set of applications in a larger addressable market.

We work closely with our customers to build partnerships in order to anticipate their current and future measurement needs. A thorough understanding of their applications coupled with our precision measurement technology enables us to add value to our customers' processes improving the quality, throughput and yield of their products, as well as to determine which test applications we will choose to serve. We believe our ability to serve our customers has been aided immeasurably by deploying our own sales and support employees throughout the Americas, Europe and Asia, as opposed to relying on a contract sales force.

Table of Contents

We leverage our applications expertise and product platforms to other industries. By concentrating on interrelated industries and product technologies, we are able to gain insight into measurement problems experienced by one set of customers that can be addressed and offered as solutions for others. Our applications knowledge and technology solutions in one area build credibility as we expand to related fields, often using the same measurement platforms that are proven among a variety of customers.

Product Offerings

Keithley has approximately 500 products used to source, measure, connect, control or communicate direct current (DC), radio frequency (RF) or optical signals. Product offerings include integrated systems solutions, along with instruments and personal computer (PC) plug-in boards that can be used as system components or stand-alone solutions. Prices per product vary. Parametric test systems used by semiconductor wafer manufacturers generally range in price from \$150,000 to \$500,000 depending upon the options chosen by the customer. Our semiconductor characterization system ranges in price from \$30,000 to \$75,000. Bench top instruments generally range in price from \$1,000 to \$25,000 on a stand-alone basis and from \$15,000 to \$35,000 when used as a system. Switch systems generally range in price from \$2,000 to \$50,000. PC plug-in boards are used for process control and data collection applications, and in production test for machine builders and system integrators. Selling prices generally range from \$200 to \$4,000.

New Products During Fiscal Year 2007

The Company's objective is to grow faster than the overall test and measurement industry, and new products play a critical role in achieving this higher growth rate. During fiscal 2007, we introduced several new products and enhancements that add complementary capability to our product offering. These products provide our customers with critical tools to serve their production test application and research and development needs.

With regard to our RF product family, we announced the availability of the Model 2810 RF Vector Signal Analyzer, the release of the Model 3500 Portable RF Power Meter, and added a series of new capabilities for our Model 2910 RF Vector Signal Generator. Additionally, we announced the release of our SignalMeister[™] Waveform Creation Software. SignalMeister is a software tool that creates arbitrary waveform (ARB) files that can be downloaded to our Model 2910 RF Vector Signal Generator. It is an expandable software platform with a common user interface that will allow integration of multiple signal creation libraries with flexibility to handle multiple signal standards as they become available. Our RF instruments employ new approaches to test and measurement that enable users to save time, effort and money through their ease of use, flexibility, high-performance and compact size. They can be used throughout our customers' design, development and manufacturing processes, and they complement existing Keithley solutions such as our battery simulation sources, semiconductor characterization systems, and source-measure units. We announced an expansion of our production test capabilities with a new product line based on the PXI platform. This addition to our offering gives customers the ability to combine the speed of data acquisition from our new PXI products with the high throughput and precise measurement capability of our Instruments product line. We are now able to provide hybrid solutions based on the PXI, LXI, PCI, USB, and GPIB platforms. Additionally, we announced the introduction of our Model KPCI-488LP Low Profile GPIB Controller Interface plug-in board which is used by customers to interface our instruments to their PCs.

We continued to enhance our solutions for customers working on cutting-edge semiconductor research and characterization with the newest release of our Model 4200 Semiconductor Characterization System. This new version includes powerful system level pulse capabilities and extends the Model 4200's versatile DC and pulse capability into new areas such as flash memory testing, high-power RF device testing, and pulse testing for advanced semiconductor material. We announced the availability of Automated Characterization Suite integrated test systems, which are highly configurable, instrument-based systems for semiconductor characterization at the device, wafer, or cassette level. Their unique measurement capability, combined with powerful and flexible automation-oriented software, delivers a comprehensive range of applications and features not offered on others' comparable systems.

We announced the release of KTE V5.2, Keithley's Test Environment software and a migration to the Linux Operating System for our S600 Series Parametric Test Systems, used in semiconductor fabrication test at the wafer level. These upgrades provide improvements to our parallel test capability, and provide a more stable operating system, both of which can lower our customers' overall cost of test by reducing test time and increasing service life.

We added low current capabilities to our Series 2600 SourceMeter® Instruments line with the introduction of the Models 2635 and 2636. These products introduce a new and unique way of doing parametric analysis at resolutions as fine as 1fa (10(-15) amp), which is often required for many semiconductor, optoelectronic, and nanotechnology devices. With their Test Script Processor (TSP) and TSP-Link intercommunications bus, these new instruments enable engineers to quickly create fast test systems that are ideal for research, characterization, wafer sort, reliability, production monitoring, and a multitude of other test applications.

We introduced the Model 2100 6 1/2- Digit Digital Multimeter (DMM), which provides USB connectivity. This high precision, low-cost DMM, is the first introduction of our next generation DMMs. The Model 2100 supports a wide range of applications and is well suited for test engineers, R&D engineers, service and calibration technicians, research scientists and engineering students. We have also aggressively priced this DMM making it affordable for a large number of customers.

Our new Series 3700 System Switch/Multimeter and Plug-in Card Family, represents our next-generation platform of switching and integrated DMM test solutions. The Series 3700 System solutions offer scalable, high-performance switching and multi-channel measurements that are optimized for automated testing of electronic products and components. Together with a growing family of plug-in switch and control cards, the Series 3700 is ideal for either a functional test system or in stand-alone data acquisition and measurement applications for production and functional testing of electronic products and devices, especially multi-channel I-V testing and accelerated stress tests.

Table of Contents

Geographic Markets and Distribution

During fiscal 2007, substantially all of the Company's products were manufactured in Ohio and were sold in over 80 countries throughout the world. The Company's principal markets are the United States, Europe and Asia.

In the United States, our products are sold by our own sales personnel and through direct marketing and catalog mailings. Outside the United States, we market our products directly in countries in which we have sales offices and through distributors or manufacturers' representatives in other countries. Keithley has subsidiary sales and service offices located in Great Britain, Germany, France, the Netherlands, Switzerland, Italy, Japan, Malaysia and China. We also have sales offices in Belgium, Finland, Korea, Taiwan, India and Singapore. Sales in areas outside the above named locations are made through independent sales representatives and distributors.

Sources and Availability of Raw Materials

Our products require a wide variety of electronic and mechanical components, most of which are purchased. We have multiple sources for the vast majority of the components and materials we use; however, there are some instances where the components are obtained from a sole-source supplier. If we were unable to purchase components or materials from a sole-source supplier, we could experience a temporary adverse impact on operations; however, we believe alternative sources could be found. Although shortages of purchased materials and components have been experienced from time to time, these items have generally been available as needed.

Patents

Electronic instruments of the nature we design, develop and manufacture generally cannot be patented in their entirety. Although we hold patents with respect to certain of our products, we do not believe our business is dependent to any material extent upon any single patent or group of patents because of the rapid rate of technological change in the industry.

Seasonal Trends and Working Capital Requirements

Our business is not subject to significant seasonal trends. However, many of the industries we serve, including the semiconductor industry, the wireless communications industry and other sectors of the global electronics industry, historically have been cyclical. We do not have any unusual working capital requirements.

Customers

Our customers generally are involved in production test, engineering research and development, electronic service or repair, and educational and governmental research. During the fiscal year ended September 30, 2007, no one customer accounted for more than 10% of our sales. We do not believe that the loss of any one customer would materially affect our sales or net income.

Backlog

Our backlog of unfilled orders amounted to approximately \$14.5 million as of September 30, 2007 and approximately \$17.1 million as of September 30, 2006. We expect that substantially all of the orders included in the 2007 backlog will be delivered during fiscal 2008. A portion of orders included in backlog may be canceled by the customer prior to shipment. The level of backlog at any given time will be affected by the timing of the Company's receipt of orders and the speed with which those orders are filled, and our customers' requested delivery schedules. Accordingly, the Company's backlog as of September 30, 2007 may not necessarily represent the actual amount of shipments or sales for any future period.

Competition

The Company competes on the basis of quality, performance, service and price, with quality and performance frequently being dominant. There are many firms in the world engaged in the manufacture of electronic measurement instruments, some of which are larger and have greater financial resources than the Company. In general, we compete with a number of companies in specialized areas of the test and measurement industry and one large broad line measurement products supplier, Agilent Technologies, Inc.

Research and Development

Our engineering development activities are directed toward the development of new products that will complement, replace or add to the products currently included in our product line. We do not perform basic research, but on an ongoing basis we utilize new component and software technologies in the development of our products. The highly technical nature of our products and the rapid rate of technological change in the industry require a large and

continuing commitment to engineering development efforts. Product development expenses were \$25.9 million in 2007, \$23.7 million in 2006 and \$17.0 million in 2005, or approximately 18%, 15% and 12% of net sales, respectively, for each of the last three fiscal years.

Government Regulations

We believe our current operations and uses of property, plant and equipment conform in all material respects to applicable laws and regulations. Keithley has not experienced, nor do we anticipate, any material claim or material capital expenditure in connection with environmental laws and other regulations.

Employees

As of September 30, 2007, the Company employed approximately 698 persons, 202 of whom were located outside the United States. None of our employees are covered under the terms of a collective bargaining agreement, and we believe that relations with our employees are good.

Foreign Operations and Export Sales

Information related to foreign and domestic operations and export sales is contained in Note K of the Notes to the Consolidated Financial Statements included in Item 8 of this Annual Report.

Table of Contents

Keithley has significant revenues from outside the United States which increase the risk to the Company. These risks include increased exposure to the risk of foreign currency fluctuations and the potential economic and political impacts from conducting business in foreign countries. With the exception of changes in the value of foreign currencies, which is not possible to predict, we believe our foreign subsidiaries and other larger international markets are in countries where the economic and political climates generally are stable. The Company also must comply with foreign regulations, which may increase the complexity of conducting its business.

Executive Officers Of The Registrant

Certain information regarding our executive officers is set forth below:

Name	Position	Age
Joseph P. Keithley	Chairman of the Board of Directors, President and Chief Executive Officer	58
Steven A. Chipchase	Vice President Operations	44
Philip R. Etsler	Vice President Human Resources	57
Alan S. Gaffney	Vice President Commercial Marketing and Information Systems	37
Mark A. Hoersten	Vice President Business Management	49
Larry L. Pendergrass	Vice President New Product Development	52
John A. Pesec	Vice President Worldwide Sales and Support	47
Mark J. Plush	Vice President and Chief Financial Officer	58
Linda C. Rae	Executive Vice President and Chief Operating Officer	42
Suzanne S. Taylor	Vice President and Chief Compliance Officer	44

Joseph P. Keithley was elected Chairman of the Board of Directors in February 1991. He was elected Chief Executive Officer in November 1993, and President in May 1994. He has been a Director since 1986, and was elected Vice Chairman of the Board in February 1988. Mr. Keithley joined the Company in 1976 and held various positions in production, customer service, sales and marketing prior to being elected Vice President of Marketing in 1986. From 1986 until his election to Chief Executive Officer in 1993, Mr. Keithley held various management positions within the Company.

Stephen A. Chipchase was elected Vice President Operations in December 2005. Mr. Chipchase joined Keithley in April 2000 as Materials/ Logistics Manager and held various positions in operations, including Cell Manager from March to July 2003, Acting Director of Operations from July 2003 to February 2004, and Director of Operations from February 2004 to December 2005.

Philip R. Etsler has been Vice President of Human Resources since February 1990. He joined the Company in January 1986 as Personnel Director.

Alan S. Gaffney was elected Vice President Commercial Marketing and Information Systems in May 2003. He joined Keithley in July 1999 as Direct Marketing Manager. He became Director of Worldwide Communications and Marketing Support in May 2000.

Mark A. Hoersten was elected Vice President Business Management in May 2003. He joined Keithley in June 1980 as a Design Engineer and held various positions in product development and marketing until September 1997 when Mr. Hoersten became the Director of Marketing. He was promoted to Telecommunications Test Business Manager in July 1999, and General Manager in April 2001.

Larry L. Pendergrass joined Keithley in May 2003 as Vice President New Product Development. Prior to joining Keithley, Mr. Pendergrass had over 20 years experience in research and development, product development, and manufacturing engineering in various roles including Section Manager, Project Manager and Project Leader with Agilent Technologies and Hewlett-Packard.

John A. Pesec was elected Vice President Worldwide Sales and Support in September 2002. Mr. Pesec joined Keithley in July 1990 and has held various positions with Keithley since then, including Director of Pacific Basin Operations from February 1995 to January 1998, Director Semiconductor Sales from January 1998 to March 1999, Director of Sales from March 1999 to April 2001, and Managing Director Worldwide Sales from April 2001 to September 2002.

Mark J. Plush was elected Vice President and Chief Financial Officer in October 1998. Mr. Plush joined the Company in March 1982 as Controller.

Linda C. Rae was elected Executive Vice President and Chief Operating Officer in December 2005. Ms. Rae joined Keithley in September 1995 as a Product Marketer and has held various marketing positions with Keithley since then, including Component Test Business Manager from July 1999 to June 2000, Business Manager of Optoelectronics from June 2000 to April 2001, General Manager from April 2001 to May 2003, and Senior Vice President and General Manager from May 2003 to December 2005.

Suzanne S. Taylor joined Keithley in April 2007 as Vice President and Chief Compliance Officer. Prior to joining Keithley, Ms. Taylor served in various counsel capacities for both public and private companies, including Assistant General Counsel, Platinum Equity, LLC from January 2006 to March 2007; Senior Vice President, General Counsel, SourceOne Healthcare Technologies Inc. from March 2003 to November 2005; and Senior Vice President, General Counsel, Imperial Home Décor Group, Inc. from September 1998 to February 2003.

-5-

Table of Contents

ITEM 1A RISK FACTORS

Current and potential shareholders should consider the risk factors described below. Any of these or other factors, many of which are beyond our control, could negatively affect our revenue, results of operations and cash flow.

Cyclical nature of the electronics industry and timing of large orders

Many of the industries we serve, including but not limited to the semiconductor industry, the wireless communications industry, and precision electronic components and subassemblies manufacturers, have historically been very cyclical and have experienced periodic downturns. The downturns have had, and may have in the future, a material adverse impact on our customers' demand for equipment, including test and measurement equipment. The severity and length of a downturn also may affect overall access to capital, which could adversely affect the Company's customers. In addition, the factors leading to and the severity and length of a downturn are difficult to predict and there can be no assurance that we will appropriately anticipate changes in the underlying end markets we serve or that any increased levels of business activity will continue as a trend into the future. Our orders are cancelable by customers, and consequently, orders outstanding at the end of a reporting period may not result in realized sales in the future. Orders from our top 25 customers during the quarter can generally vary between 30-50 percent of our total orders for any given quarter. This can cause our financial results to fluctuate from quarter to quarter, which may have an adverse impact on our stock price.

Rapid technology changes

Our business relies on the development of new high technology products and services, including products incorporating RF and pulse capabilities, to provide solutions to our customers' complex measurement needs. This requires anticipation of customers' changing needs and emerging technology trends. We must make long-term investments and commit significant resources before knowing whether our expectations will eventually result in products that achieve market acceptance. We have increased our expenses for new product development; however, our new products may or may not result in significant sources of revenue and earnings in the future. If our new product development investments do not result in future earnings, our operating results could be adversely affected.

Competitive factors

We compete on the basis of product performance, customer service, product availability and price. There are many firms in the world engaged in the manufacture of electronic measurement instruments, and the test and measurement industry is highly competitive. Many of our competitors are larger and have greater financial resources, and/or have established significant reputations within the test and measurement industry and with the customer base we serve. If any of our competitors were to develop products or services that were more cost-effective or technically superior to ours, or if we were unable to differentiate our product offerings from those of our competitors, demand for our products could slow. Additionally, aggressive competition could cause downward pricing pressure, which would reduce our gross margins or cause us to lose market share. We also face competition for personnel with certain highly technical specialties. If we were unable to hire or retain certain key employees, our business could be adversely affected.

Dependence on key suppliers

Our products contain large quantities of electronic components and subassemblies that in some cases are supplied through sole or limited source third-party suppliers. As a result, there can be no assurance that parts and supplies will be available in a timely manner and at reasonable prices. Additionally, our inventory is subject to risks of changes in market demand for particular products. Our inability to obtain critical parts and supplies or any resulting excess and/or obsolete inventory could have an adverse impact on our results of operations.

International operations, political and economic conditions

We currently have subsidiaries or sales offices located in 16 countries outside the United States, and non-U.S. sales accounted for nearly three-fourths of our revenue during fiscal 2007. Our future results could be adversely affected by several factors relating to our international sales operations, including fluctuating foreign currency exchange rates, political unrest, wars and acts of terrorism, changes in other economic or political conditions, trade protection measures, import or export licensing requirements, unexpected changes in regulatory requirements and natural disasters. Any of these factors could have a negative impact on our revenue and operating results.

Changes in manufacturing processes

We have implemented a lean manufacturing environment in our manufacturing facilities, which are located in Solon, Ohio. We may not experience future benefits from lean manufacturing if we are unable to continue to effectively fine-tune our operations, and we could incur additional costs in the future, having a negative impact on gross margin, if new initiatives are needed to further improve manufacturing efficiencies. Additionally, we have begun to outsource the manufacturing of certain of our products to a Malaysian contract manufacturer. If this manufacturer is unable to meet our customers' demand or if their quality does not meet our standard, our reputation, and therefore our business, could be adversely affected.

Tax planning strategies

We pay taxes in multiple jurisdictions throughout the world. We utilize available tax credits and other tax planning strategies in an effort to minimize our overall tax liability. Our estimated tax rate for fiscal 2008 could change from what is currently anticipated due to changes in tax laws in various countries, changes in our overall tax planning strategy, or changes in the mix of countries where earnings or losses are incurred. At September 30, 2007, we had a valuation allowance against certain deferred tax assets and had not established valuation allowances against other deferred tax assets based on tax strategies planned to mitigate the risk of impairment to these assets. Accordingly, if facts or financial results were to change thereby impacting the likelihood of realizing the deferred tax assets, our tax rate and therefore our earnings could be adversely affected.

-6-

Table of Contents

Information technology management systems

Our IT systems are critical to our normal business operations, and we rely on them to provide adequate, accurate and timely information for our order entry, billing, manufacturing and other customer support functions. Any failure in those system could adversely affect our operating results.

We also have outsourced the hosting of these systems to a third-party vendor located in Texas. If our third-party vendor experiences shut downs or other service-related issues, it could interrupt our normal business processes including our ability to process orders, ship our products, bill and service our customers, and otherwise run our business, resulting in a material adverse effect on our revenue and operating results.

Fixed cost of sales force

We have continued to build our direct sales force throughout the world with our own employees rather than utilizing third-party sales representatives. This action increases our fixed costs, and our results could be adversely affected during times of depressed sales.

Non-cash compensation expense

We currently grant non-cash compensation in the form of non-qualified stock options, performance share units and restricted share units. The final number of common shares to be issued pursuant to the performance share unit awards will be determined at the end of each three-year performance period. The awards issued in fiscal year 2006 and 2007 can be adjusted in 50 and 25 percent increments, respectively, and may range from a maximum of twice the initial award, as specified in the agreement, to a minimum of no units depending upon the level of attainment of performance thresholds. We currently are accruing expense for performance share unit awards based upon our estimate that the number of shares to be issued will be equal to 50 percent of the initial award amount for those issued in fiscal 2006 and 100 percent of the initial award amount for those issued in 2007. Our future earnings can fluctuate throughout the performance period specified in the agreements depending upon our estimate of the number of awards we expect will be issued upon the completion of the performance period.

Historical stock option grant practices

We experienced substantial costs due to the previously announced independent investigation into our past stock option grant practices that was conducted by a Special Committee of our Board of Directors.

As disclosed under Legal Proceedings, in August 2006 we established a Special Committee of our Board of Directors to investigate the Company's stock option practices since the beginning of the fiscal year ended September 30, 1995.

In addition, we were notified in September 2006 that the staff of the SEC was conducting an inquiry into our stock option practices. The Company announced the special committee's findings in December 2006, including that no restatement of the Company's historical financial statements would be required. There can be no assurance, however, that the staff of the SEC will not disagree with this position in the future and require a restatement.

Certain of the Company's Directors and current and former officers have been named as defendants in a consolidated shareholder derivative action filed in the United States District Court for the Northern District of Ohio captioned In Re Keithley Instruments, Inc. Derivative Litigation. The consolidated action seeks unspecified money damages, disgorgement of profits and benefits, equitable injunctive relief and other remedies. The Company is also named as a nominal defendant.

We are not able to predict the future outcome of the SEC inquiry and the derivative action. These matters could result in significant new expenses, diversion of management's attention from our business, commencement of formal similar, administrative or litigation actions against the Company or our current or former employees or Directors, significant fines or penalties, indemnity commitments to current and former officers and Directors and other material harm to our business. The SEC also may disagree with the manner in which we have accounted for and reported (or not reported) the financial impact of past option grants or other potential accounting errors, and there is a risk that its inquiry could lead to circumstances in which we may have to restate our prior financial statements, amend prior SEC filings or otherwise take actions not currently contemplated. Any such circumstance also could lead to future delays in filing of subsequent SEC reports.

Other risk factors

Our business could be affected by worldwide macroeconomic factors. A rise in energy prices or interest rates could have a negative impact on the overall economy which could impact our revenue and operating results. Other risk

factors include, but are not limited to, changes in our customer and product mix affecting our gross margins, our ability to work with third parties to augment our product offering, credit risk of customers, potential litigation, claims, regulatory and administrative proceedings arising in the normal course of business, as well as terrorist activities and armed conflicts.

ITEM 1B UNRESOLVED STAFF COMMENTS

None.

ITEM 2 PROPERTIES

The Company's principal administrative, marketing, manufacturing and development activities are conducted at two Company-owned buildings in Solon, Ohio. The Company also leases space in Santa Rosa, California for its RF product development group. The two Company-owned buildings total approximately 200,000 square feet and sit on approximately 33 acres of land. The Company also owns another 50,000 square foot building on 5.5 acres of land adjacent to its executive offices. This facility currently is being leased to others, but is available for expansion should additional space be required. Additionally, we have a number of sales and service offices in the United States and overseas. We believe the facilities owned and leased are well maintained, adequately insured and suitable for their present and intended uses.

ITEM 3 LEGAL PROCEEDINGS

As previously announced, in August 2006 the Company's Board of Directors formed a Special Committee of independent directors to investigate the Company's stock option practices since the beginning of the fiscal year ended September 30, 1995. The Committee retained independent counsel (the Independent Counsel) to assist it in the investigation. Following appointment of the Special Committee, the Company voluntarily notified the staff of the Securities and Exchange Commission of the Special Committee investigation. In September 2006, the Company received notice that the SEC was conducting an inquiry into the Company's option grant practices. In December 2006, the Company announced the Special Committee's findings, which were adopted by the Board of Directors and were as follows:

There was no evidence of backdating annual stock option grants prior to the date of approval by the Board of Directors.

There was a multi-day delay by management in setting the exercise price for annual stock option grants in 2000, 2001 and 2002. The delay resulted in the options having a lower exercise price than the price on the date of Board approval.

Although the Special Committee determined that the terms of the Company's stock incentive plans required the options to be priced on the date the Board approved them, there was no finding of intentional misconduct on the part of senior management or any other Keithley officer, director or employee responsible for the administration of the Company's stock option grants.

Based on evidence gathered and analyzed by the Independent Counsel, the Special Committee found the dates selected by management for the annual grants in 2000-2002 are the appropriate measurement dates for accounting purposes. Accordingly, the Company was not required to record any compensation expense with respect to the annual option grants in 2000-2002, and the Company was not required to restate its financial statements as a result of these grants.

The Special Committee concluded that the Company's public filings regarding annual options grants during the years reviewed were accurate; there is no evidence that the Company timed the grant date or pricing of annual stock option grants to take advantage of material non-public information; and there was no wrong doing or lack of oversight by the Company's independent directors or the Human Resources and Compensation Committee of the Board of Directors (the Compensation Committee).

The Special Committee also reviewed the Company's practices regarding stock option grants, other than its annual grants, which are generally grants of smaller numbers of options to new hires and to existing employees for promotions. The Special Committee concluded that management exceeded certain of the authority granted to management by the Company's stock option plans and the Compensation Committee, but that these grants involved small numbers of shares and were largely the result of ministerial errors by management.

As a result of the investigation, the Company's Compensation Committee modified its procedures for the granting of equity awards that govern how stock options and other equity awards are granted and documented. In addition, as previously disclosed, as a result of costs incurred by the Company in connection with the investigation, three executive officers of the Company did not receive bonuses for fiscal year 2006 or salary increases for calendar year 2007, and two of the executives received no equity awards when awards were made to other executives in January 2007.

On August 9, 2006 and August 15, 2006, the Company was named as a nominal defendant in two separate shareholder derivative suits, Nathan Diamond v. Joseph P. Keithley, et al., Cuyahoga County, Ohio, Court of Common Pleas (Diamond) and Michael C. Miller v. Joseph P. Keithley, et al, Cuyahoga County, Ohio, Court of Common Pleas (Miller). Both suits were removed to the United States District Court for the Northern District of Ohio on September 8, 2006. Miller and Diamond were consolidated before the Hon. Judge Christopher Boyko. On

November 13, 2006, the plaintiffs filed a consolidated Complaint (the Consolidated Complaint). On October 23, 2006 and October 24, 2006, the Company was named as a nominal defendant in two additional shareholder derivative lawsuits, Edward P. Hardy v. Joseph P. Keithley, et al., in the United States District Court for the Northern District of Ohio and Mike Marks v. Joseph P. Keithley, in the United States District Court for the Northern District of Ohio.

The four suits have been consolidated in a single action, In re Keithley Instruments, Inc. Derivative Litigation, in the United States District Court for the Northern District of Ohio. Pursuant to the consolidation order, the Consolidated Complaint is the operative complaint in the action. The Consolidated Complaint alleges that various Company officers and/or directors manipulated the dates on which stock options were granted by the Company so as to maximize the value of the stock options. The suits allege numerous claims, including violations of Sections 10(b), 10b(5) and 20(a) of the Securities Exchange Act of 1934, breaches of fiduciary duties, aiding and abetting, corporate waste, unjust enrichment and rescission.

ITEM 4 SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

Table of Contents**PART II****ITEM 5 MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company's Common Shares trade on the New York Stock Exchange under the symbol KEI. The high and low prices shown below are sales prices of the Company's Common Shares as reported on the NYSE. There is no established public trading market for the Class B Common Shares; however, they are readily convertible on a one-for-one basis into Common Shares.

	High	Low	Cash Dividends Per Common Share	Cash Dividends Per Class B Common Share
Fiscal 2007				
First Quarter	\$13.85	\$11.79	\$.0375	\$.0300
Second Quarter	16.44	12.75	.0375	.0300
Third Quarter	15.73	11.80	.0375	.0300
Fourth Quarter	14.45	9.30	.0375	.0300
Fiscal 2006				
First Quarter	\$16.30	\$13.81	\$.0375	\$.0300
Second Quarter	15.95	13.71	.0375	.0300
Third Quarter	16.10	11.36	.0375	.0300
Fourth Quarter	13.43	10.77	.0375	.0300

The approximate number of shareholders of record of Common Shares and Class B Common Shares, including those shareholders participating in the Dividend Reinvestment Plan, as of December 6, 2007 was 2,171 and 4, respectively.

Equity Compensation Plan Information as of September 30, 2007

Plan category	Number of securities to be issued upon exercise of outstanding options (a)	Weighted-average exercise price of outstanding options (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	3,241,580	\$ 20.31	1,267,263(1)
Equity compensation plans not approved by security holders			
Total	3,241,580	\$ 20.31	1,267,263(1)

- (1) Includes 483,914 shares available for issuance under the 2005 Employee Stock Purchase and Dividend Reinvestment Plan.

Issuer Purchases of Equity Securities

The following table sets forth, for the months indicated, our purchases of common shares in the fourth quarter of fiscal year 2007:

Period	Total number of shares purchased	Average price paid per share (1)	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
July 1 - 31, 2007	7,500	\$ 11.45	7,500	1,992,500
August 1 - 31, 2007	78,300	\$ 10.20	78,300	1,914,200
September 1 - 30, 2007	83,015(2)	\$ 10.09(2)	65,200	1,849,000
Total	168,815(2)	\$ 10.20(2)	151,000	1,849,000

- (1) Price includes commissions.

- (2) Includes 17,815 shares acquired in exchange for the exercise of a non-qualified stock option at a price of \$9.63 per share.

On February 12, 2007, the Company announced its Board of Directors had approved an open market stock repurchase program (the 2007 Program). Under the terms of the 2007 Program, the Company may purchase up to 2,000,000 Common Shares, which represented approximately 12 percent of its total outstanding Common Shares at the start of the 2007 Program, through February 28, 2009. The 2007 Program replaces the prior repurchase program, which expired on December 31, 2006. The purpose of the 2007 Program is to offset the dilutive effect of stock option and stock purchase plans, and to provide value to shareholders. Common Shares held in treasury may be reissued in settlement of purchases under these stock plans.

Table of Contents*Stock Performance Graph*

The graph below compares the 5-year cumulative return from investing \$100 on September 30, 2002 in each of the Company's Common Shares, the Russell 2000 Index and the Standard & Poor's Information Technology Index. The comparison assumes that all dividends are reinvested.

	9/02	9/03	9/04	9/05	9/06	9/07
Keithley Instruments, Inc.	100.00	117.85	146.51	123.74	109.29	91.97
Russell 2000	100.00	136.50	162.12	191.23	210.20	236.14

ITEM 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In Thousands of Dollars except for per share information.

Introduction and Overview

This Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to provide investors with an understanding of the operating performance and financial condition of Keithley Instruments, Inc. A discussion of our business, including our strategy for growth, products and competition, is included in Part I of this Form 10-K above.

Business Overview

Our business is to design, develop, manufacture and market complex electronic instruments and systems geared to the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. Our primary products are integrated systems used to source, measure, connect, control or communicate electrical direct current (DC), radio frequency (RF) or optical signals. Our customers are engineers, technicians and scientists in manufacturing, product development and research functions. During fiscal 2007, semiconductor orders comprised approximately 35 percent of our total orders; wireless communications orders were about 10 percent; precision electronic components/subassembly manufacturers were approximately 25 percent, which includes customers in automotive, computers and peripherals, medical equipment, aerospace and defense, and manufacturers of components; and research and education orders were about 20 percent. The remainder of orders came from customers in a variety of other industries. Although our products vary in capability, sophistication, use, size and price, they generally test, measure and analyze electrical, RF, optical or physical properties. As such, we consider our business to be in a single industry segment.

The most important factors influencing our ability to grow revenue are (i) our customers' spending patterns as they invest in new capacity or upgrade their lines for their new product offerings, (ii) our ability to offer interrelated products with differentiated value that solve our customers' most compelling test challenges, and (iii) our success in penetrating key accounts with our globally deployed sales and service team. We continue to believe that our strategy of pursuing a focused set of applications will allow us to grow faster than the overall test and measurement industry. Many of the industries we serve, including but not limited to the semiconductor industry, the wireless communications industry, and precision electronic components/subassembly manufacturers, have historically been very cyclical and have experienced periodic downturns. We began experiencing a softening in orders during the second quarter of fiscal 2007 reflecting our semiconductor customers' cautious attitude with regard to capital equipment spending. We believe that this cautious attitude among our customers continued during the remainder of the fiscal year. During the second half of the fiscal year, we implemented cost containment plans that would limit spending in a way that would not jeopardize our new product development timetables. Overall, we were successful with these initiatives, as we met our reduced spending objectives throughout our operations. Our new product development spending for the year increased over the prior year, which was planned. We believe that new product development is important, and we remain committed to maintain the necessary resources to implement our strategy in the short-term to successfully introduce our new product launches that we have in development.

Our focus during the past several years has been on building long-term relationships and strong collaborative partnerships with our global customers to serve their measurement needs. Toward that end, we rely primarily upon employing our own sales personnel to sell our products, and use sales representatives, to whom we pay a commission, in areas where we believe it is not cost-beneficial to employ our own people. This sales channel strategy allows us to build a sales network of focused, highly trained sales engineers who specialize in measurement expertise and problem-solving for customers and enhances our ability to sell our products to customers with worldwide operations. We believe our ability to serve our customers has been strongly enhanced by deploying our own employees throughout the United States, Europe and Asia. We expect that selling through our own sales force will be favorable to earnings during times of strong sales and unfavorable during times of depressed sales as a greater portion of our selling costs are now fixed.

We continue to believe that both the semiconductor and wireless areas drive change within the electronics industry. These technology changes create many opportunities for us. In fiscal 2004, we opened a West Coast development

center, the sole focus of which is to develop our new RF product family. RF measuring is increasingly becoming an important part of our customers' requirements, as they are incorporating RF technology into their products. We have begun to receive important design wins for our RF products and our expanded offering has greatly increased our exposure to new customers and opportunities. Additionally, advances in technology require us to enhance our parametric test platforms to respond to our customers' changing needs. While we focus on these important initiatives, we cannot stop investing in our precision DC and current-voltage (I-V) product lines, as they serve the same core set of customers.

Critical Accounting Policies and Estimates

Management has identified the Company's critical accounting policies. These policies have the potential to have a more significant impact on our financial statements, either because of the significance of the financial statement item to which they relate, or because they require judgment and estimation due to the uncertainty involved in measuring, at a specific point in time, events which will be settled in the future.

Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the reported financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates.

Table of Contents

Revenue recognition:

Keithley Instruments, Inc. recognizes product revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Delivery is considered to have been met when title and risk of loss have transferred to the customer. Upon shipment, a provision is made for estimated costs that may be incurred for product warranties and sales returns. Revenue earned from service contracts is recognized ratably over the contractual service periods, and is not material to the Company's consolidated results. Shipping and handling costs are recorded as Cost of goods sold on the Consolidated Statements of Operations.

Inventories:

Inventories are stated at the lower of cost or market. Cost is determined based on a currently-adjusted standard, which approximates actual cost on a first-in, first-out basis. We periodically review our recorded inventory and estimate a reserve for obsolete or slow-moving items. If actual demand and market conditions are less favorable than those projected by management, additional reserves may be required. If actual market conditions are more favorable than anticipated, our cost of sales will be lower than expected in that period.

Income taxes:

Keithley is subject to taxation from federal, state and international jurisdictions. The annual provision for income taxes and the determination of the resulting deferred tax assets and liabilities involves a significant amount of judgment by management. Judgment also is applied in determining whether the deferred tax assets will be realized in full or in part. In evaluating our ability to recover our deferred tax assets, we consider all available positive and negative evidence including our past operating results, the existence of cumulative losses in the most recent fiscal years, and our forecast of future taxable income. In determining future taxable income, we are responsible for assumptions utilized including the amount of federal, state and international pretax operating income, the reversal of book versus tax differences, and the implementation of feasible and prudent tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates we are using to manage the underlying business.

A valuation allowance against deferred tax assets has been established related to foreign net operating losses (NOLs) and state and local taxes which may not be realized due to the uncertainty of future profit levels in certain taxing jurisdictions. We intend to maintain this valuation allowance until sufficient positive evidence exists to support reversal of the valuation allowance, until such NOLs are utilized or until such NOLs expire. Our income tax expense (benefit) recorded in the future will be reduced to the extent of offsetting decreases in our valuation allowance. The realization of certain tax credits and the remaining deferred tax asset is dependent upon forecasted taxable income. If actual results are significantly less than our forecast, an additional valuation allowance may be recorded against the tax credits or the remaining deferred tax assets. An increase in the valuation allowance would result in additional income tax expense in such period and could have a significant impact on our future earnings. In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations in various tax jurisdictions. We recognize potential liabilities for anticipated tax issues based upon our estimate of whether additional taxes will be due. If payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the liabilities are no longer necessary. If our estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to income tax expense would result.

Pension plan:

Retirement benefit plans are a significant cost of doing business representing obligations that will be ultimately settled far in the future and therefore are subject to estimation. Pension accounting is intended to reflect the recognition of future benefit costs over the employee's approximate service period based on the terms of the plans and the investment and funding decisions made by us. We are required to make assumptions regarding such variables as the expected long-term rate of return on assets and the discount rate applied to determine service cost and interest cost to arrive at pension income or expense for the year. As the rate of return on plan assets assumption is a long-term estimate, it can differ materially from the actual return realized on plan assets in any given year, especially when markets are highly volatile. We have analyzed the rates of return on assets used and determined that the rates we use are reasonable based on the plans' historical performance relative to the overall markets in the countries where the plans are effective, as

well as the plans' asset mix between equities and fixed income investments. Assumed discount rates are used in measurements of the projected and accumulated benefit obligations, and the service and interest cost components of net periodic pension cost.

The discount rate for the United States plan was determined as of the June 30, 2007 measurement date by constructing a portfolio of bonds with cash flows from coupon payments and maturities matching the projected benefit payments under the Plan. Bonds considered in constructing the model portfolio are rated AA- or higher by Standard & Poor's. Callable bonds were excluded from consideration. The longest maturity of any bond included in the data is August 25, 2036. Benefit payments lying beyond 2036 were discounted back to this year using interest rates taken from the Citigroup Pension Discount Curve Comparison to Above Median as of June 30, 2007. The matching bond portfolio produces coupon income in excess of what is needed to meet early period benefit payments. The excess coupon income is accumulated at interest, based on the Citigroup Pension Discount Curve Comparison to Above Median as of June 30, 2007, until such time as it is used to pay benefits.

The discount rate used in determining the recorded liability for our United States pension plan was 6.375% for 2007, compared to 6.625% for 2006 and 5.50% for 2005. The decrease in the rate was primarily due to lower interest rates on long-term, highly rated corporate bonds. The discount rate for our German pension plan was 5.5% for 2007, compared to 4.5% for 2006 and 4.25% for 2005. The increase in the rate was primarily due to higher interest rates on long-term, highly rated corporate bonds.

Actual rate of return on United States plan assets was 15.6% for 2007 compared to an expected rate of return of 8.25%. A 0.25% increase (decrease) in the expected rate of return would have produced a \$95 decrease (increase) in 2007 expense.

Table of Contents

The pension plan assets in Germany are invested through an insurance company. The insurance company directs the investments for this insurance contract. Because of the type of investments in the insurance contract, an expected rate of return of 5.0% was assumed.

Management will continue to assess the expected long-term rate of return on plan assets and discount rate assumptions for both the United States plan and non-U.S. plans based on relevant market conditions as prescribed by accounting principles generally accepted in the United States and will make adjustments to the assumptions as appropriate. Pension income or expense is allocated to Cost of goods sold, Selling, general and administrative expenses, and Product development expenses in the Consolidated Statements of Operations.

Stock compensation plans:

With the adoption of SFAS No. 123(R) on October 1, 2005, the Company is required to record the fair value of stock-based compensation awards as an expense. In order to determine the fair value of stock options on the date of grant, the Company applies the Black-Scholes option-pricing model. Inherent in this model are assumptions related to expected stock-price volatility, option life, risk-free interest rate and dividend yield. While risk-free interest rate and dividend yield are less subjective assumptions, typically based on factual data derived from public sources, the expected stock-price volatility and option life assumptions require a greater level of judgment which makes them critical accounting estimates. We use an expected stock-price volatility assumption that is primarily based upon observed historical volatility of Keithley's stock price, as there is not a substantial enough market for exchange-traded options. During fiscal year 2007, we used a stock-price volatility assumption of 42%. With regard to the weighted-average expected option life assumption, we consider several factors, including the historical option exercise behavior of our employees, historical cancellation rates of past options, and the current life of options outstanding and vested. During fiscal year 2007, we used an expected life assumption of 4.75 years. We also are required to estimate an expected forfeiture rate when recognizing compensation cost. We review this rate every reporting period and adjust it when necessary based upon our past history of actual forfeitures.

We currently grant non-cash compensation in the form of non-qualified stock options, performance share units and restricted share units. The final number of common shares to be issued pursuant to the performance share unit awards will be determined at the end of each three-year performance period. The awards issued in fiscal year 2006 and 2007 can be adjusted in 50 and 25 percent increments, respectively, and may range from a maximum of twice the initial award, as specified in the agreement, to a minimum of no units depending upon the level of attainment of performance thresholds. We currently are accruing expense for performance share unit awards based upon our estimate that the number of shares to be issued will be equal to 50 percent of the initial award amount for those issued in fiscal 2006 and 100 percent of the initial award amount for those issued in 2007. Our future earnings can fluctuate throughout the performance period specified in the agreements depending upon our estimate of the number of awards we expect will be issued upon the completion of the performance period.

Results of Operations

The following discussion should be read in conjunction with the Financial Statements and Supplementary Data included in Item 8 of this Annual Report.

Percent of net sales for the years ended September 30:

	2007	2006	2005
Net sales	100.0	100.0	100.0
Cost of goods sold	40.2	38.7	39.3
Gross profit	59.8	61.3	60.7
Selling, general and administrative expenses	44.5	40.9	39.7
Product development expenses	18.0	15.3	12.0
Operating (loss) income	(2.7)	5.1	9.0
Investment income	1.5	1.3	1.0

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Interest expense	(0.0)	(0.0)	(0.0)
(Loss) income before income taxes	(1.2)	6.4	10.0
(Benefit) provision for income taxes	(1.0)	1.0	2.8
Net (loss) income	(0.2)	5.4	7.2

We recorded a net loss for fiscal year 2007 of \$349, or \$0.02 per diluted share. We recorded net income of \$8,361, or \$0.50 per diluted share, for 2006 and \$10,128, or \$0.61 per share, for 2005.

Net sales were \$143,658 in 2007 compared with \$155,212 in 2006, and \$141,552 in 2005. The 7% sales decrease in 2007 was primarily due to lower sales to our semiconductor production test customers for our parametric testers, while the 10% sales increase in 2006 was primarily due to higher sales to our semiconductor customers for both production and development applications. The effect of currency exchange rates was negligible on sales in all periods. During fiscal 2007, we began to experience a softening in conditions in the electronics industry, particularly amongst our semiconductor customers. Throughout 2006 and 2005 we had noted improving conditions in the strength of our customers and the electronics industry as a whole. Geographically, sales were down 22% in the Americas, up 4% in Asia, and down 5% in Europe during 2007. During 2006, sales were up 19% in the Americas, down 2% in Asia, and up 15% in Europe.

Cost of goods sold as a percentage of net sales was 40.2%, 38.7% and 39.3% in 2007, 2006 and 2005, respectively. The increase in cost as a percentage of sales in 2007 over 2006 was primarily the result of lower volumes and unfavorable product mix. The decrease in 2006 over 2005 was due to spreading fixed manufacturing costs over higher sales volume, offset somewhat by higher salaries and benefits and a less favorable geographic mix. Foreign exchange hedging had a minimal effect on cost of goods sold in 2007, 2006 and 2005.

-14-

Table of Contents

Selling, general and administrative expenses of \$64,008 increased less than 1% in 2007 from \$63,554 in 2006, and increased 13% in 2006 from \$56,177 in 2005. The slight increase in 2007 over 2006 was the result of higher salaries due to increased headcount, higher costs associated with the stock option investigation and shareholder litigation, higher costs in our Asian sales and support operations, and higher translation costs outside the U.S. due to a 5% weaker dollar. These costs were offset by lower employee benefit costs, lower costs associated with stock-based compensation as a result of adjusting the estimated expense for certain performance share award units to 50% of target, and lower costs for bonuses and other incentives tied to financial performance. During the second half of fiscal 2007, we also reduced our discretionary spending for items such as consultants, temporary help and training. The increase in 2006 over 2005 was primarily due to higher salaries, benefits and commissions, \$1,868 higher stock-based compensation expense, higher costs for our new Southeast Asia sales offices, and for legal and other costs related to the stock option investigation and shareholder lawsuits. This was partially offset by a 4% stronger U.S. dollar. Product development expenses of \$25,863 increased 9% from \$23,671 in 2006, and increased 39% in 2006 from \$17,040 in 2005. The increases in 2007 and 2006 were primarily a result of our increased investment in product development activities to expand our product offerings, including our RF product line.

Interest income was \$2,307 in 2007, \$1,972 in 2006 and \$1,383 in 2005. Higher interest rates accounted for the increase in 2007, and higher rates and higher average cash and short-term investment balances accounted for the increase in 2006. Interest expense was \$55 in 2007, \$9 in 2006 and \$64 in 2005.

The tax rate for fiscal 2007, including discrete items, was a 79.3% benefit, compared to an effective rate of 15.7% in 2006 and 28.1% in 2005. The effective benefit in 2007 was greater than the U.S. statutory rate due to the current year utilization of research tax credits, and an \$882 benefit for the retroactive application of research tax credits for fiscal 2006. These benefits were partially offset by the net U.S. tax on foreign remittances, effective tax rates in foreign jurisdictions that are higher than the U.S. statutory tax rate, and the net impact of other permanent differences. The effective tax rate for 2006 was less than the U.S. statutory rate due to the utilization of a foreign tax credit carryforward that previously had a valuation allowance against it, the release of the valuation allowance on the remainder of the foreign tax credit carryforward and tax benefits from extraterritorial income exclusion on U.S. exports. These benefits were partially mitigated by state and local income taxes and earnings of certain subsidiaries being taxed at a rate greater than the U.S. statutory tax rate. The effective tax rate for 2005 was less than the U.S. Statutory rate as a result of extraterritorial income exclusion benefits, R&E credit utilization and changes in state deferred taxes.

See Note I.

Our financial results are affected by foreign exchange rate fluctuations. Generally, a weakening U.S. dollar versus foreign currency favorably impacts our foreign currency denominated sales. A strengthening U.S. dollar has an unfavorable effect. This foreign exchange effect cannot be precisely isolated since many other factors affect our foreign sales and earnings. These factors include product offerings and pricing policies of Keithley and our competition, whether competition is foreign or U.S. based, changes in technology, product and customer mix, and local and worldwide economic conditions.

We utilize hedging techniques designed to mitigate the short-term effect of exchange rate fluctuations on operations and balance sheet positions by entering into foreign exchange forward contracts. We do not speculate in foreign currencies or derivative financial instruments, and hedging techniques do not increase our exposure to foreign exchange rate fluctuations.

Financial Condition, Liquidity and Capital Resources*Working Capital*

The following table summarizes working capital as of September 30:

	2007	2006
Current assets:		
Cash and cash equivalents	\$ 12,888	\$ 10,501
Short-term investments	32,340	36,203

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Refundable income taxes	136	583
Accounts receivable and other, net	19,510	26,836
Total inventories	14,675	14,647
Deferred income taxes	3,961	4,206
Other current assets	2,026	1,664
 Total current assets	 85,536	 94,640
 Current liabilities:		
Short-term debt	799	872
Accounts payable	8,018	8,033
Accrued payroll and related expenses	4,799	6,089
Other accrued expenses	4,753	4,870
Income taxes payable	3,911	2,733
 Total current liabilities	 22,280	 22,597
 Working capital	 \$ 63,256	 \$ 72,043

-15-

Table of Contents

Working capital decreased during fiscal 2007 by \$8,787. Accounts receivable and other, net decreased \$7,326 due primarily to lower sales during the fourth quarter of fiscal year 2007 versus 2006 and lower days sales outstanding at September 30, 2007 of 50 versus 53 at September 30, 2006. Income taxes payable increased \$1,178 primarily due to taxes owed in Germany. Accrued payroll and related expenses decreased \$1,290 primarily due to lower accruals for incentive/bonus-related accounts. Significant changes in cash and cash equivalents and short-term investments are discussed in the *Sources and Uses of Cash* section below.

Sources and Uses of Cash

The following table is a summary of our Consolidated Statements of Cash Flows:

	2007	2006
Cash provided by (used in):		
Operating activities	\$ 5,641	\$ 5,985
Investing activities	(525)	(4,182)
Financing activities	(3,152)	(5,861)

Operating activities. Cash provided by operating activities was \$5,641 and \$5,985 for fiscal years 2007 and 2006, respectively. Cash from operating activities is net income adjusted for certain non-cash expenses and changes in assets and liabilities.

During fiscal year 2007, operating cash flows resulted primarily from a decrease in accounts receivable, and the positive impact of non-cash charges for depreciation and stock-based compensation. This was partially offset by non-cash charges for deferred income taxes, and \$2,500 in contributions to the Company's U.S. pension plan. See Note G. In fiscal year 2006, cash from operations resulted primarily from net income and the positive impact of non-cash expenses for depreciation, deferred income taxes and stock-based compensation. This was partially offset by increases in accounts receivable and inventories, and by contributing \$2,500 to our U.S. pension plan.

Investing activities. Cash used in investing activities was \$525 and \$4,182 in fiscal year 2007 and 2006, respectively. Cash flows from investing activities consist primarily of the purchase and sale of investments and purchases of property, plant and equipment. Capital spending was \$4,511 in 2007 versus \$4,910 in 2006. We purchased \$32,927 of short-term investments in 2007 versus \$35,665 last year, while sales of short-term investments generated \$36,913 in cash in 2007, compared to \$36,393 in 2006. Short-term investments totaled \$36,340 at September 30, 2007 as compared to \$36,203 at the same time last year. During the fourth quarter of fiscal 2006, we spent \$4,000 to invest in a private company, \$1,250 in the form of non-marketable common stock and \$2,750 in the form of subordinated debt. This investment is included in the *Other assets* caption of the Consolidated Balance Sheets at September 30, 2007 and 2006.

Financing activities. Cash used for financing activities in 2007 was \$3,152 versus \$5,861 in 2006. During 2007, we repurchased \$1,550 of our Common Shares versus \$5,027 in 2006. See Note C. Additionally, we repaid \$79 in short-term debt during fiscal 2007 versus borrowing \$865 during fiscal 2006. Short-term debt was \$799 at September 30, 2007 versus \$872 in 2006. The borrowings were used primarily in the UK and Japan to fund local operations.

The Company's credit agreement, which expires March 31, 2010, is a \$10,000 debt facility (\$0 outstanding at September 30, 2007) that provides unsecured, multi-currency revolving credit at various interest rates based on Prime or LIBOR. We are required to pay a facility fee of 0.125% on the total amount of the commitment. Additionally, the Company has a number of other credit facilities in various currencies and for standby letters of credit aggregating \$5,000 (which includes \$799 of short-term debt and \$483 for standby letters of credit at September 30, 2007.)

At September 30, 2007, we had total unused lines of credit with domestic and foreign banks aggregating \$13,718 of which \$10,000 was long-term and \$3,718 was a combination of long-term and short-term depending upon the nature of the indebtedness. See Note E. Under certain provisions of the debt agreements, we are required to comply with various financial ratios and covenants. We were in compliance with all such debt covenants, as amended, at September 30, 2007 and during each of the three years then ended.

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Our current stock repurchase program expires on February 28, 2009. Under the current program we may repurchase up to an additional 1,849,000 Common Shares. See Note C.

During 2008, we expect to finance capital spending, working capital requirements and the stock repurchase program with cash and short-term investments on hand and cash provided by operations. Capital expenditures in fiscal 2008 are expected to approximate \$4,500 to \$5,500.

Set forth below is a table of information with respect to the Company's contractual obligations as of September 30, 2007:

Contractual Obligations	Total	Payments Due by Period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Short-Term Debt	\$ 799	\$ 799	\$	\$	\$
Operating Lease Obligations	6,328	2,761	2,941	452	174
Payments Under Deferred Compensation Agreements (a)	4,278	401	1,246	301	2,330
Pension Benefit (b)			(b)	(b)	(b)
Non-cancelable Purchase Commitments	820	820			
Total Contractual Obligations	\$ 12,225	\$ 4,781	\$ 4,187	\$ 753	\$ 2,504

-16-

Table of Contents

- (a) Includes amounts due under deferred compensation agreements with current and former employees and a Director. Amounts exclude additional interest and investment gains or losses that will be earned or incurred from September 30, 2007 through the time of payment.
- (b) The obligation related to pension benefits is actuarially determined and is reflective of obligations as of September 30, 2007. The Company made a 2007 pension contribution of \$2,500 in fiscal 2007, and as such does not have a required contribution due in fiscal 2008. We are not able to reasonably estimate our future required contributions beyond 2007 due to

uncertainties regarding significant assumptions involved in estimating future required contributions to our defined benefit pension plans, including interest rate levels, the amount and timing of asset returns; what, if any, changes may occur in legislation; and how contributions in excess of the minimum requirements could impact the amounts and timing of future contributions.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Recent Accounting Pronouncements

In June 2005, the FASB issued SFAS No. 154, (SFAS No. 154), Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20, (APB 20), and FASB Statement No. 3. SFAS No. 154 applies to all voluntary changes in accounting principle, and changes the requirements for accounting for and reporting of a change in accounting principle. SFAS No.154 requires retrospective application to prior periods financial statements of a voluntary change in accounting principle unless it is impracticable. APB 20 previously required that most voluntary changes in accounting principle be recognized with a cumulative effect adjustment in net income of the period of the change. The Company adopted SFAS No. 154 effective October 1, 2006 and the adoption did not have a material impact on the Company's consolidated financial statements.

In February 2006, the FASB issued SFAS No. 155, (SFAS No. 155), Accounting for Certain Hybrid Financial Instruments, which amends SFAS No. 133 (SFAS No. 133), Accounting for Derivative Instruments and Hedging Activities and SFAS No. 140, (SFAS No. 140), Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. SFAS No. 155 simplifies the accounting for certain derivatives embedded in other financial instruments by allowing them to be accounted for as a whole if the holder elects to account for the whole instrument on a fair value basis. SFAS No. 155 also clarifies and amends certain other provisions of SFAS No. 133 and SFAS No. 140. The Company adopted SFAS No. 155 effective October 1, 2006 and the adoption did not have a material impact on the Company's consolidated financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, (FIN 48), Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure,

and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006, although early adoption is encouraged. The Company has not so elected and will adopt FIN 48 effect October 1, 2007. We are in the process of determining the impact of FIN No. 48 on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, (SFAS No. 157), Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the Board having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. However, the FASB did provide a one year deferral for the implementation of SFAS No. 157 for other nonfinancial assets and liabilities. The Company is currently evaluating the impact of this Statement on its consolidated financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 regarding the process of quantifying financial statement misstatements. SAB No. 108 states that registrants should use both a balance sheet approach and an income statement approach when quantifying and evaluating the materiality of a misstatement. The interpretations in SAB No. 108 contain guidance on correcting errors under the dual approach as well as provide transition guidance for correcting errors. This interpretation does not change the requirements within SFAS No. 154, Accounting Changes and Error Corrections a replacement of APB No. 20 and FASB Statement No. 3, for the correction of an error on financial statements. SAB No. 108 became effective during the Company s fiscal year ended September 30, 2007. The adoption of SAB No. 108 did not have a material impact on the Company s consolidated financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standard No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, (SFAS No. 158), an amendment of FASB Statements No. 87, 88, 106 and 132(R). SFAS No. 158 represents the completion of the first phase in the FASB s postretirement benefits accounting project and requires an employer that is a business entity and sponsors one or more single employer benefit plans to (1) recognize the over funded or under funded status of the benefit plan in its statement of financial position, (2) recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs of credits that arise during the period but are not recognized as components of net periodic benefit cost, (3) measure defined benefit plan assets and obligations as of the end of the employer s fiscal year, and (4) disclose in the notes to financial statements additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation. The provisions of SFAS No. 158 are effective as of September 30, 2007, except for the measurement date provisions, which are effective for fiscal years ending after December 15, 2008. The adoption of SFAS No. 158 reduced total stockholders equity by \$1,975 as of September 30, 2007. The Company has not yet determined the impact of the change in measurement date provision of this statement.

In February 2007, the FASB issued Statement of Financial Accounting Standard No. 159, (SFAS No. 159), The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FAS 115. SFAS No. 159 allows companies to choose, at specified election dates, to measure eligible financial assets and liabilities at fair value that are not otherwise required to be measured at fair value. Unrealized gains and losses shall be reported on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal

Table of Contents

years beginning after November 15, 2007 and will be applied prospectively. The Company has not yet determined the impact of this statement on the consolidated financial statements.

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to a variety of risks, including foreign currency fluctuations, interest rate fluctuations and changes in the market value of its short-term investments. In the normal course of business, we employ established policies and procedures to manage our exposure to fluctuations in foreign currency values and interest rates.

The Company is exposed to foreign currency exchange rate risk primarily through transactions denominated in foreign currencies. We currently utilize foreign exchange forward contracts or option contracts to sell foreign currencies to fix the exchange rates related to near-term sales and effectively fix our margins. Generally, these contracts have maturities of three months or less. Our policy is to only enter into derivative transactions when we have an identifiable exposure to risk, thus not creating additional foreign currency exchange rate risk. In our opinion, a 10 percent adverse change in foreign currency exchange rates would not have a material effect on these instruments nor therefore, on our results of operations, financial position or cash flows.

The Company maintains a short-term investment portfolio consisting of U.S. government backed notes and bonds and corporate notes and bonds. An increase in interest rates would decrease the value of certain of these investments.

However, in management's opinion, a 10 percent increase in interest rates would not have a material impact on our results of operations, financial position or cash flows.

The Company also had an interest rate swap instrument originally entered into to mitigate the risk of interest rate changes related to long-term debt. The agreement effectively fixed the interest rate on a notional \$3,000 of variable rate debt; however, the interest rate swap instrument was determined to be an ineffective hedge and accordingly, changes in the fair market value of the interest rate swap were recorded in the Company's records as income or expense. The instrument expired September 19, 2005.

ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Keithley Instruments, Inc.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, shareholders' equity and cash flows present fairly, in all material respects, the financial position of Keithley Instruments, Inc. at September 30, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in management's report on internal control over financial reporting included in Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance

with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Thousands of Dollars Except for Per-Share Data)

Note A Summary of Significant Accounting Policies

Principles of consolidation

The consolidated financial statements include the accounts of Keithley Instruments, Inc. and its subsidiaries. Intercompany transactions have been eliminated.

Nature of operations

Keithley's business is to design, develop, manufacture and market complex electronic instruments and systems to serve the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. Our primary products are integrated systems used to source, measure, connect, control or communicate electrical direct current (DC), radio frequency (RF) or optical signals. Although our products vary in capability, sophistication, use, size and price, they generally test, measure and analyze electrical, RF, optical or physical properties. As such, we consider our business to be in a single industry segment.

Revenue recognition

Keithley Instruments, Inc. recognizes product revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Delivery is considered to have been met when title and risk of loss have transferred to the customer. Upon shipment, a provision is made for estimated costs that may be incurred for product warranties and sales returns. Revenue earned from service is recognized ratably over the contractual service periods, and is not material to the Company's consolidated results.

Foreign currency translation

Our revenues, costs and expenses, and assets and liabilities are exposed to changes in foreign currency exchange rates as a result of our global operations. For those subsidiaries that operate in a local functional currency environment, all assets and liabilities are translated into U.S. dollars using current exchange rates, and revenues and expenses are translated using weighted average exchange rates in effect during the period. Resulting translation adjustments are reported as a separate component of accumulated comprehensive income in shareholders' equity. For those entities that operate in a U.S. dollar functional currency environment, foreign currency assets and liabilities are remeasured into U.S. dollars at current exchange rates. Gains or losses from foreign currency remeasurement are generally immaterial and are included in the Selling, general and administrative expenses caption of the consolidated statements of operations.

Advertising

Advertising production and placement costs are expensed when incurred. Advertising expenses were \$8,066, \$7,983 and \$7,358 in 2007, 2006 and 2005, respectively.

Intangible assets

Intangible assets consist of software costs and are accounted for in accordance with SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed. Per the requirements of this Standard, the Company will amortize the cost over the estimated economic life of the software products, which is estimated to be five years. At each balance sheet date, the unamortized cost of the software will be compared to its net realizable value. The net realizable value is the estimated future gross revenues from the software product reduced by the estimated future costs of completing and disposing of that product, including the costs of performing maintenance and customer support. The excess of the unamortized cost over the net realizable value would then be recognized as an impairment loss. Amortization expense will be recorded as Cost of goods sold on the Consolidated Statements of Operations.

Product development expenses

Expenditures for product development are charged to expense as incurred.

Cash and cash equivalents

The Company considers all highly liquid investments with maturities of three months or less when purchased to be cash equivalents. Cash flows resulting from hedging transactions are classified in the same category as the cash flows from the item being hedged.

Accounts receivable and allowance for doubtful accounts

Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is our best estimate of the amount of probable credit losses in our existing accounts receivable. We determine the allowance based on historical write-off experience by industry and regional economic data. We review our allowance for doubtful accounts periodically and all account balances are reviewed for collectibility. Account balances are charged off against the allowance when we feel it is probable the receivable will not be recovered. We do not have any off-balance sheet credit exposure related to our customers. The changes in the allowance for doubtful accounts for fiscal years ending September 30, 2007, 2006 and 2005 are as follows:

	2007	2006	2005
Balance at beginning of year	\$ 448	\$ 451	\$ 454
Additions	48	86	4
Write-offs, net of recoveries	(11)	(94)	(3)
Foreign exchange revaluation	15	5	(4)
Balance at end of year	\$ 500	\$ 448	\$ 451

Table of Contents**Inventories**

Inventories are stated at the lower of cost or market. Cost is determined based on a currently-adjusted standard, which approximates actual cost on a first-in, first-out basis. The Company provides inventory allowances based on excess and obsolete inventories determined primarily by future demand forecasts. The allowance is measured as the difference between the cost of the inventory and market based upon assumptions about future demand and charged to the provision for inventory, which is a component of cost of sales. At the point of the loss recognition, a new, lower-cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

Property, plant and equipment

Property, plant and equipment are stated at cost. Depreciation is provided over periods approximating the estimated useful lives of the assets. Substantially all manufacturing, laboratory and office equipment is depreciated by the double declining balance method over periods of 3 to 10 years. Buildings are depreciated by the straight-line method over periods of 23 to 45 years. Leasehold improvements are amortized over the shorter of the asset lives or the terms of the leases. Depreciation expense was \$4,380, \$4,194 and \$4,081 in fiscal 2007, 2006 and 2005, respectively.

Capitalized software

Certain internal and external costs incurred to acquire or create internal use software are capitalized in accordance with AICPA Statement of Position 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use. Capitalized software is included in property, plant and equipment and is depreciated over 3 to 5 years after it is placed in service.

Impairment of long-lived assets

Long-lived assets are reviewed for impairment when events or circumstances indicate costs may not be recoverable. Impairment exists when the carrying value of the assets is greater than the pretax undiscounted future cash flows expected to be provided by the asset. If impairment exists, the asset is written down to its fair value. Fair value is determined through quoted market values or through the calculation of the pretax present value of future cash flows expected to be provided by the asset.

Capital stock

The Company has two classes of stock. Each Class B Common Share has ten times the voting power of a Common Share, but the Class B Common Shares are entitled to cash dividends of no more than 80% of the cash dividends on the Common Shares. Holders of Common Shares, voting as a class, elect one-fourth of the Company's Board of Directors and participate with holders of Class B Common Shares in electing the balance of the Directors and in voting on all other corporate matters requiring shareholder approval. Additional Class B Common Shares may be issued only to holders of such shares for stock dividends or stock splits. These shares are convertible at any time to Common Shares on a one-for-one basis.

The number of Common Shares, Class B Common Shares and Common Shares held in treasury is shown below:

	Common Shares	Class B Common Shares	Common Shares held in treasury
Balance September 30, 2004	14,067,107	2,150,502	(143,991)
Common Shares acquired for settlement of deferred Directors' fees			(11,222)
Common Shares reissued in settlement of directors' fees			17,795
Shares issued under stock plans	233,569		
Balance September 30, 2005	14,300,676	2,150,502	(137,418) (17,563)

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Common Shares acquired for settlement of deferred Directors fees			8,856
Common Shares reissued in settlement of directors fees			(405,500)
Shares issued under stock plans	109,569		
Repurchase of Common Shares			
Balance at September 30, 2006	14,410,245	2,150,502	(551,625)
Common Shares acquired for settlement of deferred Directors fees			(21,542)
Common Shares reissued in settlement of directors fees			1,934
Shares issued under stock plans	170,733		
Repurchase of Common Shares			(168,815)
Balance at September 30, 2007	14,580,978	2,150,502	(740,048)

-24-

Table of Contents**Accumulated other comprehensive income**

The components of accumulated other comprehensive income at September 30, 2007 and 2006 are as follows:

	2007	2006
Translation adjustment	\$ 1,162	\$ 703
Minimum pension liability adjustment	(29)	(27)
Net unrealized (loss) gain on derivative securities	(86)	40
Net unrealized investment loss	(18)	(101)
Benefit plan obligation	(1,975)	
Accumulated other comprehensive (loss) income	\$ (946)	\$ 615

Income taxes

Deferred tax assets and liabilities are recognized under the liability method based upon the difference between the amounts reported for financial reporting and tax purposes. These deferred taxes are measured by applying current enacted tax rates. Valuation allowances are established when necessary to reflect the estimated amount of deferred tax assets that may not be realized based upon the Company's analysis of estimated future taxable income and establishment of tax strategies. Future taxable income, the results of tax strategies and changes in tax laws could impact these estimates. We have provided for estimated United States and foreign withholding taxes, less available tax credits, for the undistributed earnings of the non-United States subsidiaries as of September 30, 2007, 2006 and 2005.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the reported financial statements and the reported amounts of revenues and expenses during the reporting periods. Examples include the allowance for doubtful accounts, estimates of contingent liabilities, inventory valuation, pension plan assumptions, estimates and assumptions relating to stock-based compensation costs, and the assessment of the valuation of deferred income taxes and income tax reserves. Actual results could differ from those estimates.

Earnings per share

Both Common Shares and Class B Common Shares are included in calculating earnings per share. The weighted average number of shares outstanding used in the calculation is set forth below:

	2007	2006	2005
Net (loss) income in thousands	\$ (349)	\$ 8,361	\$ 10,128
Weighted average shares outstanding	16,206,698	16,395,407	16,337,903
Assumed exercise of stock options, weighted average of incremental shares		170,495	251,408
Assumed purchase of stock under stock purchase plan, weighted average		1,262	1,983
Diluted shares adjusted weighted-average shares and assumed conversions	16,206,698	16,567,164	16,591,294
Basic (loss) earnings per share	\$ (0.02)	\$ 0.51	\$ 0.62
Diluted (loss) earnings per share	\$ (0.02)	\$ 0.50	\$ 0.61

Due to the net loss in fiscal 2007, 165,176 shares are excluded from the dilutive calculation for the exercise of stock options, the issuance of stock-based awards and purchase of stock under the stock purchase plan. Both vested and nonvested option awards representing an additional 3.0 million, 2.6 million and 2.4 million shares were outstanding at September 30, 2007, 2006 and 2005, respectively, but were not included in the calculation of diluted earnings per share as their effect would have been antidilutive.

Stock-based compensation

As of September 30, 2007, the Company had established a number of stock-based incentive programs as discussed in more detail in Note H – Stock Plans. Prior to fiscal 2006, the Company applied the intrinsic value method as outlined in Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB No. 25), and related interpretations in accounting for stock options and share units granted under these programs. Under the intrinsic value method, no compensation expense was recognized if the exercise price of the Company’s employee stock options equaled the market price of the underlying stock on the date of the grant. Accordingly, no compensation cost was recognized in the accompanying consolidated statements of earnings prior to fiscal year 2006 for stock options granted to employees, since all options granted under the Company’s share incentive programs had an exercise price equal to the market value of the underlying common stock on the date of grant.

-25-

Table of Contents

Effective October 1, 2005, the Company adopted SFAS No. 123(R), Share-Based Payment (SFAS No. 123(R)). This statement replaced SFAS No. 123, Accounting for Stock-Based Compensation (SFAS No. 123) and superseded APB No. 25. SFAS No. 123(R) requires that all stock-based compensation be recognized as an expense in the financial statements and that such cost be measured at the fair value of the award. This statement was adopted using the modified prospective method of application, which requires the Company to recognize compensation expense on a prospective basis. Therefore, financial statements for years prior to adoption have not been restated. Under this method, in addition to reflecting compensation expense for new share-based awards, expense is also recognized to reflect the remaining service period of awards that had been included in pro-forma disclosures in prior years. SFAS No. 123(R) also requires that excess tax benefits related to stock option exercises be reflected as financing cash inflows instead of operating cash inflows. In calculating diluted earnings per share, we have elected to use the actual method for calculating windfall tax benefits or shortfalls for fully and partially vested options in arriving at the assumed proceeds in the treasury stock calculation. We have also elected to use the guidance in FASB Staff Position FAS No. 123(R)-3, Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards in determining the pool of windfall tax benefits at adoption of SFAS No. 123(R).

The following table illustrates the effect on net earnings per share as if the fair value method had been applied to all outstanding awards for fiscal year 2005:

	2005
Net income	\$10,128
Deduct: Stock-based employee compensation income included in reported income, net of related tax effects	(5)
Deduct: Stock-based employee compensation expense determined under fair value based methods for all awards, net of related tax effects	(6,168)
Pro forma net income	\$ 3,955
Pro forma earnings per share:	
Basic	\$ 0.24
Diluted	\$ 0.24

Derivatives and Hedging Activities

In accordance with the provisions of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (as amended), all of the Company's derivative instruments are recognized on the balance sheet at their fair value. To hedge sales, the Company currently utilizes foreign exchange forward contracts or option contracts to sell foreign currencies to fix the exchange rates related to near-term sales and effectively fix the Company's margins. Underlying hedged transactions are recorded at hedged rates, therefore realized and unrealized gains and losses are recorded when the hedged transactions occur. The Company also had an interest rate swap instrument that expired September 19, 2005. The estimated fair value of the swap instrument was determined through quotes from the related financial institutions.

On the date the derivative contract is entered into, the Company designates its derivative as either a hedge of the fair value of a recognized asset or liability (fair value hedge), as a hedge of the variability of cash flows to be received (cash flow hedge), or as a foreign-currency cash flow hedge (foreign currency hedge). Changes in the fair value of a derivative that is highly effective as, and that is designated and qualifies as, a fair value hedge, along with the gain or loss on the hedged asset or liability that is attributable to the hedged risk are recorded in current period earnings. Changes in the fair value of a derivative that is highly effective and that is designed and qualifies as a cash flow hedge are recorded in other comprehensive income until earnings are affected by the transaction in the underlying asset. Changes in the fair value of derivatives that are highly effective and that qualify as foreign currency hedges are recorded in either current period income or other comprehensive income, depending on whether the hedge transaction is a fair value hedge or a cash flow hedge. At September 30, 2007, the foreign exchange forward contracts were

designated as foreign currency cash flow hedges. Prior to its expiration, the interest rate swap instrument was determined to be an ineffective hedge and accordingly, changes in its fair market value were recorded in the Company's records as income or expense in the interest expense line item in the consolidated statements of operations. The Company recorded income of \$120 in 2005 for the interest rate swap fair market value.

The Company documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. The Company also assesses whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge, the Company discontinues hedge accounting prospectively. Cash flows resulting from hedging transactions are classified in the consolidated statements of cash flows in the same category as the cash flows from the item being hedged.

Reclassifications

Certain reclassifications have been made to prior year financial statements and the notes to conform to the current year presentation.

Recent accounting pronouncements

In June 2005, the FASB issued SFAS No. 154, (SFAS No. 154), Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20, (APB 20), and FASB Statement No. 3. SFAS No. 154 applies to all voluntary changes in accounting principle, and changes the requirements for accounting for and reporting of a change in accounting principle. SFAS No.154 requires retrospective application to prior periods' financial statements of a voluntary change in accounting principle unless it is impracticable. APB 20 previously required that most voluntary changes in accounting principle be recognized with a cumulative effect adjustment in net income of the period of the change. The Company adopted SFAS No. 154 effective October 1, 2006 and the adoption did not have a material impact on the Company's consolidated financial statements.

Table of Contents

In February 2006, the FASB issued SFAS No. 155, (SFAS No. 155), Accounting for Certain Hybrid Financial Instruments, which amends SFAS No. 133 (SFAS No. 133), Accounting for Derivative Instruments and Hedging Activities and SFAS No. 140, (SFAS No. 140), Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. SFAS No. 155 simplifies the accounting for certain derivatives embedded in other financial instruments by allowing them to be accounted for as a whole if the holder elects to account for the whole instrument on a fair value basis. SFAS No. 155 also clarifies and amends certain other provisions of SFAS No. 133 and SFAS No. 140. The Company adopted SFAS No. 155 effective October 1, 2006 and the adoption did not have a material impact on the Company's consolidated financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, (FIN 48), Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006, although early adoption is encouraged. The Company has not so elected and will adopt FIN 48 effect October 1, 2007. We are in the process of determining the impact of FIN No. 48 on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, (SFAS No. 157), Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the Board having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. However, the FASB did provide a one year deferral for the implementation of SFAS No. 157 for other nonfinancial assets and liabilities. The Company is currently evaluating the impact of this Statement on its consolidated financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 regarding the process of quantifying financial statement misstatements. SAB No. 108 states that registrants should use both a balance sheet approach and an income statement approach when quantifying and evaluating the materiality of a misstatement. The interpretations in SAB No. 108 contain guidance on correcting errors under the dual approach as well as provide transition guidance for correcting errors. This interpretation does not change the requirements within SFAS No. 154, Accounting Changes and Error Corrections a replacement of APB No. 20 and FASB Statement No. 3, for the correction of an error on financial statements. SAB No. 108 became effective during the Company's fiscal year ended September 30, 2007. The adoption of SAB No. 108 did not have a material impact on the Company's consolidated financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standard No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, (SFAS No. 158), an amendment of FASB Statements No. 87, 88, 106 and 132(R). SFAS No. 158 represents the completion of the first phase in the FASB's postretirement benefits accounting project and requires an employer that is a business entity and sponsors one or more single employer benefit plans to (1) recognize the over funded or under funded status of the benefit plan in its statement of financial position, (2) recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs of credits that arise during the period but are not recognized as components of net periodic benefit cost, (3) measure defined benefit plan assets and obligations as of the end of the employer's fiscal year, and (4) disclose in the notes to financial statements additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation. The provisions of SFAS No. 158 are effective as of September 30, 2007, except for the measurement date provisions, which are effective for fiscal years ending after December 15, 2008. The adoption of SFAS No. 158 reduced total stockholders' equity by \$1,975 as of September 30, 2007. The Company has not yet determined the impact of the change in measurement date provision of this statement.

In February 2007, the FASB issued Statement of Financial Accounting Standard No. 159, (SFAS No. 159), The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FAS 115. SFAS No. 159

allows companies to choose, at specified election dates, to measure eligible financial assets and liabilities at fair value that are not otherwise required to be measured at fair value. Unrealized gains and losses shall be reported on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007 and will be applied prospectively. The Company has not yet determined the impact of this statement on the consolidated financial statements.

Note B Guarantor s Disclosure Requirements

Guarantee of original lease:

The Company has assigned the lease of its former office space in Reading, Great Britain to a third party. In the event the third party defaults on the monthly lease payments, the Company would be responsible for the payments until the lease expires on July 14, 2009. If the third party were to default, the maximum amount of future payments (undiscounted) the Company would be required to make under the guarantee would be approximately \$422 through July 14, 2009. The Company has not recorded any liability for this item, as it does not believe that it is probable that the third party will default on the lease payments.

Product warranties:

Generally, the Company s products are covered under a one-year warranty; however, certain products are covered under a two or three-year warranty. It is the Company s policy to accrue for all product warranties based upon historical in-warranty repair data. In addition, the Company accrues for specifically identified product performance issues. The Company also offers extended warranties for certain of its products for which revenue is recognized over the life of the contract period. The costs associated with servicing the extended warranties are expensed as incurred. The revenue, as well as the costs related to the extended warranties, is immaterial for fiscal years 2007, 2006 and 2005.

Table of Contents

A reconciliation of the estimated changes in the aggregated product warranty liability for fiscal year 2007 and 2006 is as follows:

	2007	2006
Beginning balance	\$ 992	\$ 1,084
Accruals for warranties issued during the period	1,125	1,442
Accruals related to pre-existing warranties (including changes in estimates and expiring warranties)	(68)	(211)
Settlements made (in cash or in kind) during the period	(1,327)	(1,323)
Ending balance	\$ 722	\$ 992

Note C Repurchase of Common Shares

In February 2007, the Company's Board of Directors approved an open market stock repurchase program (the 2007 program). Under the terms of the 2007 program, the Company may purchase up to 2,000,000 Common Shares, which represented approximately 12 percent of the shares outstanding at the time the program was approved, over a two-year period ending February 28, 2009. The purpose of the 2007 program is to offset the dilutive effect of stock option and stock purchase plans, and to provide value to shareholders. Common Shares held in treasury may be reissued in settlement of stock purchases under the plans. The 2007 program replaces the prior program, which expired in December 2006 and had substantially the same terms as the 2007 program.

Additionally, the Company acquired 17,815 Common Shares in exchange for the exercise of a non-qualified stock option at a price of \$9.63 per share.

The following table summarizes the Company's stock repurchase activity:

	2007	2006
Total number of shares purchased	168,815	405,500
Average price paid per share (including commissions)	\$ 10.20	\$ 12.40
Identity of broker-dealer used to effect the purchases	National Financial Securities LLC	National Financial Securities LLC
Number of shares purchased as part of a publicly announced repurchase program	151,000	405,500
Maximum number of shares that remain to be purchased under the program	1,849,000	1,594,500

At September 30, 2007 and 2006, 574,315 and 405,500 Common Shares purchased under the Company's share repurchase programs remained in treasury, respectively. There were no Common Share repurchases under the Company's share repurchase programs during fiscal year 2005.

Also, included in the Common shares held in treasury, at cost caption of the consolidated balance sheets are shares repurchased to settle non-employee Directors' fees deferred pursuant to the Keithley Instruments, Inc. 1996 Outside Directors Deferred Stock Plan. Shares held in treasury pursuant to this plan totaled 165,733 and 146,125 at September 30, 2007 and 2006, respectively.

Note D Investments

The Company classifies its short-term investments as available-for-sale, which requires they be recorded at fair market value with the resulting gains and losses included in Accumulated other comprehensive income on the Company's Consolidated Balance Sheets. There were no gains or losses on sales of marketable securities in fiscal year 2007, 2006 or 2005.

Short-term investments at September 30, 2007 were comprised of the following:

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

	Adjusted cost	Unrealized gains	Unrealized losses	Market value
U.S. government and agency securities	\$ 7,270	\$	\$ (27)	\$ 7,243
Corporate notes, bonds, and other fixed income securities	25,097			25,097
Total short-term investments	\$ 32,367	\$	\$ (27)	\$ 32,340

Short-term investments at September 30, 2006 were comprised of the following:

	Adjusted cost	Unrealized gains	Unrealized losses	Market value
U.S. government and agency securities	\$ 16,558	\$	\$ (154)	\$ 16,404
Corporate notes, bonds, and other fixed income securities	19,799			19,799
Total short-term investments	\$ 36,357	\$	\$ (154)	\$ 36,203

-28-

Table of Contents

At September 30, 2007 and 2006, the securities, notes and bonds have maturity dates as follows:

	2007	2006
Less than 1 year	\$ 13,743	\$ 13,353
1 year to 5 years		11,151
5 to 10 years	672	2,629
10 to 15 years		1,505
Greater than 15 years	17,925	7,565
Total short-term investments	\$ 32,340	\$ 36,203

Our short-term investments consist primarily of high quality debt securities, therefore unrealized losses are largely driven by increased market interest rates. These unrealized losses were not significant on an individual investment security basis, and no impairment relating to short-term investments was considered to be other-than-temporary. The \$27 and \$154 of unrealized losses for U.S. government and agency securities at September 30, 2007 and 2006 relate to investments with a fair market value of approximately \$7,243 and \$16,404, respectively. The \$27 unrealized losses at September 30, 2007 relate to investments that have been in a continuous loss position for more than 12 months. The caption, Other assets, on the Company's Consolidated Balance Sheets includes the following long-term investments carried using the cost method at September 30, 2007 and 2006:

	2007	2006
Non-marketable equity securities	\$ 1,250	\$ 1,250
Notes receivable	3,073	2,750
Venture capital fund	74	183
	\$ 4,397	\$ 4,183

Notes receivable at September 30, 2007 and 2006 include a note with a principle balance of \$2,750 plus interest at a rate of 8.65% compounded annually. This note, including interest, becomes payable on demand on or after September 21, 2016. Notes receivable at September 30, 2007 also includes \$85 in principle plus interest at a rate of 8.25% per annum. This note plus interest is payable through August 31, 2010.

The Company reviews its investments for other-than-temporary impairment whenever the fair value of an investment is less than amortized cost and evidence indicates that an investment's carrying value is not recoverable within a reasonable period of time. In the evaluation of whether an impairment is other-than-temporary, the Company considers its ability and intent to hold the investment until the market price recovers, the reasons for the impairment, compliance with the Company's investment policy, the severity and duration of the impairment and expected future performance. Based on this evaluation, the Company recorded impairment losses of \$109 and \$153 during fiscal year 2007 and 2006, respectively. No impairment losses were recorded in fiscal year 2005.

Note E Financing Arrangements

On March 29, 2007, the Company extended the term of its credit agreement, as amended, to March 31, 2010 from March 31, 2009. The agreement is a \$10,000 debt facility (\$0 outstanding at September 30, 2007) that provides unsecured, multi-currency revolving credit at various interest rates based on Prime or LIBOR. The three-month LIBOR interest rate was 5.2% and 5.4% at September 30, 2007 and 2006, respectively. The Company is required to pay a facility fee of 0.125% per annum on the total amount of the commitment. The agreement may be extended annually. Additionally, the Company has a number of other credit facilities in various currencies and for standby letters of credit aggregating \$5,000 (\$799 of short-term debt and \$483 for standby letters of credit outstanding at September 30, 2007, and \$872 of short-term debt and \$392 for standby letters of credit at September 30, 2006). The

weighted average interest rate on short-term borrowings was 3.4% and 3.0% at September 30, 2007 and 2006, respectively. The Company had total unused lines of credit with domestic and foreign banks aggregating \$13,718 of which \$10,000 was long-term and \$3,718 was a combination of long-term and short-term depending upon the nature of the indebtedness at September 30, 2007.

Under certain provisions of the debt agreements, the Company is required to comply with various financial ratios and covenants. The Company was in compliance with all such debt covenants, as amended, during each of the three years ended and at September 30, 2007.

Note F Foreign Currency

The functional currency for the Company's foreign subsidiaries is the applicable local currency. Income and expenses are translated into U.S. dollars at average exchange rates for the period. Assets and liabilities are translated at the rates in effect at the end of the period. Translation gains and losses are recognized in the accumulated other comprehensive income component of shareholders' equity.

Certain transactions of the Company and its foreign subsidiaries are denominated in currencies other than the functional currency. The Consolidated Statements of Operations include gains (losses) from such foreign exchange transactions of \$290, (\$54) and \$12 for 2007, 2006 and 2005, respectively.

At September 30, 2007, the Company had obligations under foreign exchange forward contracts to sell 2,250,000 Euros, 320,000 British pounds and 270,000,000 Yen and to buy 110,000 British pounds at various dates through December 2007. In accordance with the provisions of SFAS 133 (as amended), the foreign exchange forward contracts are recorded on the Company's Consolidated Balance Sheets. At September 30, 2007 and 2006, the fair market value of the contracts represented a (liability) asset to the Company of (\$229) and \$104, respectively.

-29-

Table of Contents**Note G Employee Benefit Plans**

The Company has a noncontributory defined benefit pension plan covering all of its eligible employees in the United States and a contributory defined plan covering eligible German employees. Pension benefits are based upon the employee's length of service and a percentage of compensation. The Company also has government mandated defined benefit retirement plans for its eligible employees in Japan and Korea; however, these plans are not material to the Company's consolidated financial statements.

Adoption of SFAS No. 158

SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*—an amendment of FASB Statements No. 87, 88, 106 and 132(R), requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability on its statement of financial position using prospective application. SFAS No. 158 also requires an employer to recognize changes in the funded status in the year in which the changes occur through comprehensive income.

Keithley Instruments, Inc. adopted SFAS No. 158 effective September 30, 2007. Upon adoption, we recorded an after-tax adjustment to reduce other comprehensive income by \$1,975 for all of the Company's pension/retirement benefit plans. The accumulated other comprehensive loss before tax of \$3,056 consisted of \$2,494 of unrecognized actuarial loss, \$540 of unrecognized prior service cost, and \$22 of unrecognized transition obligation for pension benefit plans.

The following table sets forth the funded status of the Company's significant benefit plans at September 30, 2007 and 2006:

	United States Plan		German Plan	
	2007	2006	2007	2006
Change in projected benefit obligations:				
Benefit obligation at beginning of year	\$33,800	\$36,940	\$ 7,135	\$ 6,379
Service cost	1,420	1,641	250	214
Interest cost	2,203	2,000	344	275
Actuarial loss (gain)	1,271	(5,668)	(1,092)	54
Benefits paid	(1,127)	(1,113)	(193)	(149)
Foreign currency exchange rate changes			862	362
Benefit obligation at year end	\$37,567	\$33,800	\$ 7,306	\$ 7,135
Accumulated benefit obligation at year end	\$33,571	\$30,176	\$ 6,770	\$ 6,380
Change in plan assets:				
Fair value of plan assets at beginning of year	\$37,883	\$34,409	\$ 1,219	\$ 1,092
Actual return on pension assets	5,921	3,087	26	26
Employer contributions	2,500	1,500	24	61
Participants contributions			48	
Benefits paid	(1,127)	(1,113)	(32)	(22)
Foreign currency exchange rate changes			154	62
Fair value of plan assets at end of year	45,177	37,883	1,439	1,219
Funded status—over (under) funded	7,610	4,083	(5,867)	(5,916)
Unrecognized actuarial loss		4,593		754

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Contributions after measurement date	1,000	1,000		
Unrecognized prior service cost		692		29
Unrecognized initial net obligation				41
Prepaid pension assets (pension liability) recognized	\$ 8,610	\$10,368	\$(5,867)	\$(5,092)

* The Company has purchased indirect insurance of \$5,827 which is expected to be available to the Company as German pension liabilities of \$5,867 mature. The caption, Other assets, on the Company's Consolidated Balance Sheets includes \$5,827 and \$4,885 at September 30, 2007 and 2006, respectively, for this asset. In accordance with generally accepted accounting principles this Company asset is not included in the German plan assets.

The amounts recognized in the Consolidated Balance Sheets shown above for the United States Plan are included in the caption Other assets. The amounts shown for the German Plan are included in the caption Other long-term liabilities.

Table of Contents

Amounts recognized in the Accumulated other comprehensive (loss) income at September 30, 2007 and 2006 are as follows:

	2007	2006
United States Plan	\$(2,289)	\$
German Plan	121	
Other	193	
Total	\$(1,975)	\$

The following table provides estimated amounts that will be amortized from accumulated other comprehensive loss into net period benefit cost in 2008:

	United States Plan	German Plan
Net actuarial loss	\$ 83	\$
Prior service benefit	179	5
Transition obligation		22
Total	\$ 262	\$ 27

A summary of the components of net periodic pension cost based on a measurement date of June 30 for the United States plan and the German plan is shown below:

	United States Plan		German Plan	
	2007	2006	2007	2006
Service cost-benefits earned during the year	\$ 1,420	\$ 1,641	\$250	\$214
Interest cost on projected benefit obligation	2,203	2,000	344	275
Expected return on plan assets	(3,129)	(2,890)	(67)	(80)
Amortization of transition asset		(10)	23	21
Amortization of prior service cost	179	178	5	5
Amortization of net loss	65	438	3	
Net periodic pension cost	\$ 738	\$ 1,357	\$558	\$435

As of the measurement date, the plan assets allocation for the United States plan by asset category was as follows:

	June 30,	
	2007	2006
Equity securities	65%	63%
Fixed income	11	12
Market neutral hedge fund	17	18
Cash equivalent (money market fund)	5	4
Real estate	2	3

100% 100%

The United States Plan investment strategy is to emphasize total return, which is defined as the aggregate return from capital appreciation, dividends, and interest income. In determining the asset classes in which the Plan will invest, as well as the target weightings to each asset class, the Company gives consideration to several factors. These include historical risk and return statistics for each asset class and the statistical relationships between the asset classes. The Company also has recognized certain aspects specific to the Plan including the current funding status, the average age of employee participants, and the ability of the Company to make future contributions to the Plan.

German plan assets represent employee and Company contributions and are invested in an insurance company in a direct insurance contract payable to the individual participants. The insurance company directs the investments for this contract.

The significant actuarial assumptions used to determine benefit obligations at September 30, 2007 and 2006 were as follows:

	2007	2006
United States Pension Plan:		
Discount rate	6.375%	6.625%
Rate of increase in compensation levels	4.0%	4.0%
German Pension Plan:		
Discount rate	5.5%	4.5%
Rate of increase in compensation levels	2.5%	3.0%

-31-

Table of Contents

The significant actuarial assumptions used to determine net pension expense for fiscal years 2007, 2006 and 2005 were as follows:

	2007	2006	2005
United States Pension Plan:			
Discount rate	6.625%	5.375%	6.5%
Expected long-term rate of return on plan assets	8.25%	8.25%	8.25%
Rate of increase in compensation levels	4.0%	3.5%	3.5%

German Pension Plan:

Discount rate	4.5%	4.25%	5.25%
Expected long-term rate of return on plan assets	5.0%	5.0%	7.0%
Rate of increase in compensation levels	3.0%	3.0%	3.0%

In determining its expected long-term rate-of-return-on-assets assumption for the fiscal year ending September 30, 2007, the Company considered historical experience, its asset allocation, expected future long-term rates of return for each major asset class, an assumed long-term inflation rate, and an asset performance simulator.

Expected future benefit payments for both the United States and the German plans are as follows:

	United States Plan	German Plan
2008	\$ 1,245	\$ 226
2009	\$ 1,265	\$ 273
2010	\$ 1,304	\$ 291
2011	\$ 1,404	\$ 313
2012	\$ 1,582	\$ 337
2013 2017	\$ 10 351	\$ 2,104

The Company expects to contribute approximately \$1,500 to \$2,500 to its pension plans in fiscal year 2008.

In addition to the defined benefit pension plans, the Company also maintains a retirement plan for all of its eligible employees in the United States under Section 401(k) of the Internal Revenue Code. It has been the Company's practice to match a minimum of 25 percent of the first six percent of a participant's contribution, and may match up to 50 percent of the first six percent of a participant's contribution depending upon the Company's financial performance, as part of its profit sharing program. Expense for the 401(k) plan amounted to \$555, \$724 and \$900 in 2007, 2006 and 2005, respectively. In addition to the extra 25 percent match in the 401(k) plan, the Company may contribute additional profit sharing to all eligible worldwide employees. U.S. employee participants, at their discretion, may opt for a cash payout or may defer the bonus into the 401(k) plan. Non-U.S. employees receive a cash payout. There was no expense related to the additional profit sharing program recorded in 2007, 2006 or 2005.

Note H Stock Plans

As of September 30, 2007, the Company had one active equity compensation plan, the Keithley Instruments, Inc. 2002 Stock Incentive Plan, as amended December 28, 2006 (the "2002 Stock Plan"). Under the terms of this plan, 3,000,000 Common Shares were reserved for the granting of equity-based awards to directors, officers and other key employees. This plan will expire on February 16, 2012. The Company also has nonqualified stock options outstanding under two other plans, however, awards can no longer be granted from these plans. All options outstanding at the time of termination of all three plans shall continue in full force and effect in accordance with their terms. The Compensation and Human Resources Committee of the Board of Directors administers the plans. The option price under nonqualified stock options is determined by the Committee based upon the date the option is granted. The 2002 Stock Plan also provides for restricted stock awards and stock appreciation rights. At September 30, 2007, 783,349 shares were registered and available for the granting of equity-based awards to directors, officers and other key

employees.

Stock-based compensation expense is attributable to the granting of stock options, performance share units, restricted share units and restricted share awards. The Company records the expense using the single approach method on a straight line basis over the requisite service period of the respective grants. During fiscal years 2007 and 2006, the Company recorded stock-based compensation expense as follows:

	2007	2006
Cost of goods sold	\$ 91	\$ 104
Selling, general and administrative expenses	1,211	1,868
Product development expenses	207	268
Stock-based compensation included in operating expenses	1,509	2,240
Estimated tax impact of stock-based compensation	497	745
Stock-based compensation expense, net of tax	\$1,012	\$1,495
Stock-based compensation expense per share, net of tax	\$ 0.06	\$ 0.09

-32-

Table of Contents

Prior to the Company's adoption of SFAS No. 123(R) in fiscal year 2006, we accounted for stock-based compensation in accordance with APB 25. During fiscal year 2005, we recorded \$5 of pre-tax stock-based compensation income in the Selling, general and administrative expenses caption of the Consolidated Statements of Operations.

At September 30, 2007 and 2006, the total estimated unrecognized compensation cost related to nonvested stock-based compensation was \$3,177 and \$2,460, respectively, and the related weighted-average period over which it is expected to be recognized is approximately 2.2 years and 2.3 years, respectively.

During the second and third quarters of fiscal 2005, the Company's Board of Directors and Executive Committee of the Board of Directors authorized the acceleration of the vesting of certain unvested and out-of-the-money stock options. These options, outstanding as of January 31, 2005 and August 9, 2005, had exercise prices of \$17.00 or higher and \$16.00 or higher, respectively. As a result of the acceleration, the Company reduced stock option expense it otherwise would have been required to record under SFAS No. 123(R) by approximately \$2,200 in fiscal 2006, \$2,000 in fiscal 2007, and expects to reduce expense in 2008 by approximately \$900 on a pre-tax basis.

SFAS No. 123(R) resulted in a change to the statement of cash flows in that cash retained as a result of excess tax benefits relating to share-based payments to employees, as well as non-employees, would be presented in the statement as a financing cash inflow. Prior to the adoption of SFAS No. 123(R), the cash retained from excess tax benefits was presented in operating cash flows. The excess tax benefit recognized during fiscal year 2007, 2006 and 2005 was approximately \$358, \$266 and \$3,313, respectively.

Stock Option Activity

A summary of the Company's stock option programs is as follows:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at September 30, 2004	3,404,846	\$ 19.88		
Options granted at fair market value	94,250	16.33		
Options exercised	(67,050)	7.24		\$ 624
Options forfeited	(38,825)	15.49		
Options expired	(50,875)	23.50		
Outstanding at September 30, 2005	3,342,346	20.03		
Options granted at fair market value	165,651	15.05		
Options exercised	(59,366)	5.46		\$ 540
Options forfeited	(1,500)	13.76		
Options expired	(124,150)	17.85

Options granted at fair market value	106,025	13.91		
Options exercised	(122,376)	4.70		\$ 1,045
Options forfeited				
Options expired	(65,050)	29.70		
Outstanding at September 30, 2007	3,241,580	\$ 20.31	5.04	\$ 945

Vested and expected to vest at September 30, 2007	3,240,080	\$ 20.31	5.04	\$ 945
Exercisable at September 30, 2007	2,968,904	\$ 20.84	4.72	\$ 945

-33-

Table of Contents

The options outstanding at September 30, 2007 have been segregated into ranges for additional disclosure as follows:

Range of Exercise Prices	Outstanding		Weighted Average Exercise Price	Exercisable	
	Number of Shares	Weighted Average Remaining Contractual Life (years)		Number of Shares	Weighted Average Exercise Price
\$2.53 - \$13.76	690,604	4.22	\$ 11.51	684,704	\$ 11.51
\$14.00 - \$16.12	811,526	6.62	\$ 15.62	544,750	\$ 16.09
\$16.23 - \$18.41	578,700	4.34	\$ 18.06	578,700	\$ 18.06
\$18.72 - \$19.23	569,050	6.41	\$ 18.81	569,050	\$ 18.81
\$19.97 - \$45.13	587,700	3.19	\$ 40.52	587,700	\$ 40.52
\$48.44 - \$66.75	4,000	3.00	\$ 61.05	4,000	\$ 61.05
	3,241,580	5.04	\$ 20.31	2,968,904	\$ 20.84

The exercise period for all stock options generally may not exceed ten years from the date of grant. Stock option grants to individuals generally vest fifty percent after two years, and an additional twenty five percent after each of years three and four.

The weighted-average fair values at date of grant for options granted during fiscal years 2007, 2006 and 2005 were \$5.41, \$5.93, and \$4.60, respectively. The fair value of options at the date of grant was estimated using the Black-Scholes option-pricing model with the following assumptions:

	2007	2006	2005
Expected life (years)	4.75	4.5	2.5
Risk-free interest rate	4.785%	4.3%	3.4%
Volatility	42%	45%	44%
Dividend yield	1.1%	1.0%	1.0%

The risk-free interest rate and dividend yield were obtained from published sources based upon factual data. In order to determine the expected life, we considered the historical exercise behavior, vesting periods, and the remaining contractual life of outstanding options. The weighted-average expected stock-price volatility assumptions were determined primarily based upon observed historical volatility of Keithley's stock price, as there is not a substantial enough market for comparable exchange-traded options.

Performance Award Units

Beginning in fiscal 2006, the Company began granting performance award units to officers and other key employees. The performance award unit agreements provide for the award of performance units with each unit representing the right to receive one of the Company's Common Shares to be issued after the applicable award period. The award periods for performance award units issued in fiscal 2007 and 2006 will end on September 30, 2009 and 2008, respectively. The final number of units earned pursuant to an award may range from a minimum of no units to a maximum of twice the initial award. The awards issued in fiscal 2007 may be adjusted in 25 percent increments, while those issued in 2006 may be adjusted in 50 percent increments. The number of units earned will be based on the Company's revenue growth relative to a defined peer group, and the Company's return on assets or return on invested capital. Each reporting period, the compensation cost of the performance award units is subject to adjustment based upon our estimate of the number of awards we expect will be issued upon the completion of the performance period. Effective September 30, 2007, we recorded a favorable adjustment of \$781 for the awards issued during fiscal 2006,

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

as we currently expect they will settle at 50 percent of target. Expense for the awards issued during fiscal 2007 is being accrued at target. The awards were valued at the closing market price of the Company's Common Shares on the date of grant and vest at the end of the performance period.

Following is a summary of activity related to performance awards:

	Number of Units	Weighted Average Grant Date Fair Value
Outstanding at September 30, 2005		
Awards granted	164,025	\$ 15.05
Awards forfeited	(2,400)	15.05
Outstanding at September 30, 2006	161,625	15.05
Awards granted	142,800	13.95
Awards forfeited	(4,375)	14.62
Adjustment of 2006 awards	(79,525)	15.05
Outstanding at September 30, 2007	220,525	\$ 14.34

Table of Contents**Restricted Award Units**

Beginning in fiscal 2006, the Company began granting restricted award units to key employees. The restricted award unit agreements provide for the award of restricted units with each unit representing one share of the Company's Common Shares. The awards generally will vest on the fourth anniversary of the award date, subject to certain conditions specified in the agreement, and were valued at the closing market price of the Company's Common Shares on the date of grant.

Following is a summary of activity related to restricted awards:

	Number of Units	Weighted Average Grant Date Fair Value
Outstanding at September 30, 2005		
Awards granted	16,775	\$ 14.91
Awards forfeited	(850)	15.05
Outstanding at September 30, 2006	15,925	14.90
Awards granted	25,250	13.59
Awards vested	(650)	15.05
Awards forfeited	(2,425)	14.57
Outstanding at September 30, 2007	38,100	\$ 13.96

The total fair value of shares vested during fiscal year 2007 was \$8.

Directors Equity Plans

Prior to the adoption of SFAS No. 123(R), the Company's non-employee Directors had received annual stock option grants issued pursuant to the 1997 Directors' Stock Option Plan or the 1992 Directors' Stock Option Plan. These grants are included in the stock option activity above. The Company's Board of Directors terminated these plans on December 8, 2005 and February 15, 1997, respectively. Beginning October 1, 2005, the non-employee Director annual stock option grant was replaced with an annual Common Share grant equal to \$58. The Common Shares are issued on a quarterly basis out of the Keithley Instruments, Inc. 2002 Stock Incentive Plan. During fiscal 2007 and 2006, we recorded expense of \$522 and \$507 for the issuance of 41,031 and 35,695 shares, respectively, pursuant to this program based upon the fair market value of the shares at the date of grant. The Board of Directors also may issue restricted stock grants worth \$75 to new non-employee Directors at the time of his or her election. These restricted stock grants will vest over a 3-year period. One such grant was issued on February 13, 2006 for 5,098 shares based upon the fair market value at the date of grant of \$14.71 per share. We recorded expense of \$25 and \$16 for this grant in fiscal 2007 and 2006, respectively.

Employee Stock Purchase Plan

The Company's current employee stock purchase plan is the 2005 Employee Stock Purchase and Dividend Reinvestment Plan, as amended, the 2005 Plan. The plan offers eligible employees the opportunity to acquire the Company's Common Shares at a small discount and without transaction costs. Eligible employees can only participate in the plan on a year-to-year basis, must enroll prior to the commencement of each plan year, and in the case of U.S. employees, must authorize monthly payroll deductions. Non-U.S. employees submit their contribution at the end of the plan year. A mid-year enrollment option is also available for new employees. For each plan year, the purchase price will be equal to 95 percent of the market price at the end of the subscription period. The provisions contained in the 2005 Plan eliminate the measurement of compensation expense required by SFAS No. 123(R). The 2005 Plan subscription period begins on July 1 and ends on June 30. In July 2007 and 2006, 6,676 and 9,410 shares were

purchased by employees under this plan at a price of \$11.92 and \$12.09 per share, respectively. A total of 500,000 Common Shares were reserved for purchase under the 2005 Plan, of which 483,914 remain available for purchase at September 30, 2007.

Prior to the 2005 Plan, the Company sponsored the 1993 Employee Stock Purchase and Dividend Reinvestment Plan, the 2003 Plan. The provisions of the 2003 Plan were similar to the 2005 Plan; however, the purchase price of the Common Shares was 85 percent of the lower of the market price at the beginning or ending of the plan year, which had generally been the calendar year. A total of 1,500,000 Common Shares were reserved for purchase under the plan, however, the plan was terminated during fiscal 2007 as it was replaced by the 2005 Plan. During fiscal year 2005, the plan was amended to require at least one subscription period each and every 12 months during the term of the plan, however, the Board of Directors or the Chief Financial Officer, as its delegatee, may establish multiple subscription periods with variable durations. Accordingly, the subscription period starting January 1, 2005 ended on June 30, 2005. In July 2005 and January 2005, 65,266 and 101,253 shares were purchased by employees under this plan at a price of \$13.10 and \$15.61 per share, respectively.

-35-

Table of Contents**Note I Income Taxes**

Income before income taxes, based on geographic location of the operation to which such earnings are attributable, is provided below. Because the Company has elected to treat certain foreign subsidiaries as branches for United States income tax purposes, pretax (loss) income attributable to the U.S. shown below may differ from the pretax income reported on the Company's annual United States Federal income tax return.

	2007	2006	2005
United States	\$ (6,216)	\$ 8,705	\$ 13,637
Non-U.S.	4,531	1,208	450
	\$ (1,685)	\$ 9,913	\$ 14,087

The (benefit) provision for income taxes is as follows:

	2007	2006	2005
Current:			
Federal	\$ 633	\$ (109)	\$ 4,032
Non-U.S.	2,503	617	1,705
State and local	45	3	301
Total current	3,181	511	6,038
Deferred:			
Federal, state and local	(4,034)	962	(1,530)
Non-U.S.	(483)	79	(549)
Total deferred	(4,517)	1,041	(2,079)
Total (benefit) provision	\$ (1,336)	\$ 1,552	\$ 3,959

Following is a reconciliation between the provision for income (benefit) taxes and the amount computed by applying the United States Federal income tax statutory rate of 34% to (loss) income before taxes:

	2007	2006	2005
Federal income (benefit) tax at statutory rate	\$ (573)	\$ 3,370	\$ 4,790
State and local income taxes	29	612	(9)
Extraterritorial Income Exclusion	(306)	(547)	(697)
Domestic Manufacturing Deduction		(24)	
Research Tax Credit	(880)	(201)	(674)
Tax on non-U.S. income	3,265	265	481
Foreign tax credit carryforwards	(2,242)	(400)	(323)
Valuation allowance	15	(1,281)	234
Adjustment for prior years' taxes	(752)	(315)	
Other	108	73	157
Effective (benefit) provision for income taxes	\$ (1,336)	\$ 1,552	\$ 3,959

Effective income tax rate	(79.3)%	15.7%	28.1%
---------------------------	---------	-------	-------

The Adjustment for prior years taxes for 2007 includes a tax benefit of approximately \$882 associated with the retroactive application of the research tax credit from January 1, 2006 through September 30, 2006. This was not recorded during the fiscal year ended September 30, 2006 as the research tax credit had expired effective December 31, 2005. The research tax credit was retroactively extended on December 8, 2006.

-36-

Table of Contents

Significant components of the Company's deferred tax assets and liabilities as of September 30, 2007 and 2006 are as follows:

	2007	2006
Deferred tax assets:		
Stock options	\$ 1,253	\$ 940
Capitalized research and development	12,470	11,125
Inventory	1,516	1,640
Deferred compensation	1,467	1,408
Tax credit carryforward	9,503	6,343
Depreciation	1,201	1,274
Warranty	213	318
Medical	122	131
State and local taxes	976	940
Foreign net operating losses	933	1,135
Other	1,987	1,470
Total deferred tax assets	31,641	26,724
Deferred tax liabilities:		
Pension	2,709	3,552
Other	42	146
Total deferred tax liabilities	2,751	3,698
Valuation allowance	(1,180)	(1,141)
Net deferred tax assets	\$ 27,710	\$ 21,885

The valuation allowance relates to net operating losses which may not be realized due to the uncertainty of future profit levels in certain taxing jurisdictions.

The changes in the valuation allowance for deferred tax assets for fiscal years ending September 30, 2007, 2006 and 2005 are as follows:

	2007	2006	2005
Balance at beginning of year	\$ 1,141	\$ 3,000	\$ 2,627
Charged to costs and expenses	213	561	373
Deductions	(174)	(2,420)	
Balance at end of year	\$ 1,180	\$ 1,141	\$ 3,000

The valuation allowance against the foreign tax credits was released during 2006 due to the current year utilization of credits and the Company's increased capacity to utilize credits prior to the expiration period. During 2007, the Company utilized \$174 of foreign losses which previously had a valuation allowance recorded.

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

At September 30, 2007, the Company had tax credit carryforwards and foreign net operating loss carryforwards (tax effected) as follows:

		Year Expiration Commences
Alternative minimum tax credit	\$ 2,212	indefinite
Foreign tax credit	2,008	2012-2017
R&D credit	5,283	2009-2022
Foreign net operating losses	933	2010-indefinite

Pursuant to SFAS 123(R), the Company does not record the tax benefits of stock-based compensation in excess of the book deductions until these benefits are realized using the tax law ordering rules. The Company recorded credits of \$358, \$646 and \$352 to additional paid-in-capital during the years ended September 30, 2007, 2006 and 2005, respectively, in connection with these excess tax benefits.

The calculation of the Company's provision for income taxes involves the interpretation of complex tax laws and regulations. Tax benefits for certain items are not recognized, unless it is probable that the Company's position will be sustained if challenged by tax authorities. Tax liabilities for other items are recognized for anticipated tax contingencies based on the Company's estimate of whether additional taxes will be due.

-37-

Table of Contents**Note J Commitments and Contingencies**

The Company leases certain office and manufacturing facilities and office equipment under operating leases. Rent expense under operating leases (net of sublease income of \$116 in 2007, \$146 in 2006 and \$185 in 2005) was \$3,079, \$2,716 and \$2,289 for 2007, 2006 and 2005, respectively. Future minimum lease payments under operating leases are:

2008	\$2,761
2009	2,164
2010	777
2011	388
2012	64
After 2012	174
Total minimum operating lease payments	 \$6,328

As previously announced, in August 2006 the Company's Board of Directors formed a Special Committee of independent directors to investigate the Company's stock option practices since the beginning of the fiscal year ended September 30, 1995. The Committee retained independent counsel (the Independent Counsel) to assist it in the investigation. Following appointment of the Special Committee, the Company voluntarily notified the staff of the Securities and Exchange Commission of the Special Committee investigation. In September 2006, the Company received notice that the SEC was conducting an inquiry into the Company's option grant practices. In December 2006, the Company announced the Special Committee's findings, which were adopted by the Board of Directors and were as follows:

There was no evidence of backdating annual stock option grants prior to the date of approval by the Board of Directors.

There was a multi-day delay by management in setting the exercise price for annual stock option grants in 2000, 2001 and 2002. The delay resulted in the options having a lower exercise price than the price on the date of Board approval.

Although the Special Committee determined that the terms of the Company's stock incentive plans required the options to be priced on the date the Board approved them, there was no finding of intentional misconduct on the part of senior management or any other Keithley officer, director or employee responsible for the administration of the Company's stock option grants.

Based on evidence gathered and analyzed by the Independent Counsel, the Special Committee found the dates selected by management for the annual grants in 2000-2002 are the appropriate measurement dates for accounting purposes. Accordingly, the Company was not required to record any compensation expense with respect to the annual option grants in 2000-2002, and the Company was not required to restate its financial statements as a result of these grants.

The Special Committee concluded that the Company's public filings regarding annual options grants during the years reviewed were accurate; there is no evidence that the Company timed the grant date or pricing of annual stock option grants to take advantage of material non-public information; and there was no wrong doing or lack of oversight by the Company's independent directors or the Human Resources and Compensation Committee of the Board of Directors (the Compensation Committee).

The Special Committee also reviewed the Company's practices regarding stock option grants, other than its annual grants, which are generally grants of smaller numbers of options to new hires and to existing employees for promotions. The Special Committee concluded that management exceeded certain of the authority granted to

management by the Company's stock option plans and the Compensation Committee, but that these grants involved small numbers of shares and were largely the result of ministerial errors by management.

As a result of the investigation, the Company's Compensation Committee modified its procedures for the granting of equity awards that govern how stock options and other equity awards are granted and documented. In addition, as previously disclosed, as a result of the costs incurred by the Company in connection with the investigation, three executive officers of the Company did not receive bonuses for fiscal year 2006 or salary increases for calendar year 2007, and two of the executives received no equity awards when awards were made to other executives in January 2007.

On August 9, 2006 and August 15, 2006, the Company was named as a nominal defendant in two separate shareholder derivative suits, Nathan Diamond v. Joseph P. Keithley, et al., Cuyahoga County, Ohio, Court of Common Pleas (Diamond) and Michael C. Miller v. Joseph P. Keithley, et al, Cuyahoga County, Ohio, Court of Common Pleas (Miller). Both suits were removed to the United States District Court for the Northern District of Ohio on September 8, 2006. Miller and Diamond were consolidated before the Hon. Judge Christopher Boyko. On November 13, 2006, the plaintiffs filed a consolidated Complaint (the Consolidated Complaint).

On October 23, 2006 and October 24, 2006, the Company was named as a nominal defendant in two additional shareholder derivative lawsuits, Edward P. Hardy v. Joseph P. Keithley, et al., in the United States District Court for the Northern District of Ohio and Mike Marks v. Joseph P. Keithley, in the United States District Court for the Northern District of Ohio.

The four suits have been consolidated in a single action, In re Keithley Instruments, Inc. Derivative Litigation, in the United States District Court for the Northern District of Ohio. Pursuant to the consolidation order, the Consolidated Complaint is the operative complaint in the action. The Consolidated Complaint alleges that various Company officers and/or directors manipulated the dates on which stock-options were granted by the Company so as to maximize the value of the stock options. The suits allege numerous claims, including violations of Sections 10(b), 10b(5) and 20(a) of the Securities Exchange Act of 1934, breaches of fiduciary duties, aiding and abetting, corporate waste, unjust enrichment and rescission.

In the normal course of business, the Company is subject to various legal claims, actions, complaints and other matters. While the results of such matters cannot be predicted with certainty, management believes that the final outcome of pending matters known to management will not have a material adverse impact on the financial position or results of operations of the Company.

Table of Contents**Note K Segment and Geographic Information**

The Company's business is to develop test and measurement-based solutions to verify customers' product performance or aid in their product development process. The Company's customers are engineers, technicians and scientists in manufacturing, product development and research functions within a range of industries. Although the Company's products vary in capability, sophistication, use, size and price, they basically test, measure and analyze electrical and physical properties, and in some cases RF or light. As such, the Company's management has determined that the Company operates in a single industry segment. The operations by geographic area are presented below. The basis for attributing revenues from external customers to a geographic area is the location of the customer.

	2007	2006	2005
Net sales:			
United States	\$ 37,275	\$ 46,489	\$ 39,819
Other Americas	2,785	4,982	3,418
Germany	18,238	19,791	15,903
Other Europe	29,416	30,387	27,641
Japan	16,688	16,691	17,189
Other Asia	39,256	36,872	37,582
	\$ 143,658	\$ 155,212	\$ 141,552
Long-lived assets:			
United States	\$ 29,557	\$ 30,246	\$ 24,408
Germany	6,369	5,406	4,720
Other	1,121	921	1,064
	\$ 37,047	\$ 36,573	\$ 30,192

Other Asia net sales include \$16,084 to China for fiscal year 2007. Net sales to China were not material for fiscal years 2006 or 2005.

Unaudited Quarterly Results of Operations

Following are the Company's unaudited quarterly results of operations for fiscal 2007 and 2006.

	First	Second	Third	Fourth
Fiscal 2007				
Net sales	\$41,026	\$32,930	\$33,446	\$36,256
Gross profit	24,914	19,640	19,387	21,993
Income (loss) before income taxes	3,085	(2,639)	(2,446)	315
Net (loss) income	3,075	(2,073)	(459)	(892)
Diluted earnings (loss) per share	.19	(.13)	(.03)	(.05)
Fiscal 2006				
Net sales	\$35,790	\$39,679	\$38,427	\$41,316

Gross profit	22,203	24,215	23,427	25,330
Income before income taxes	2,621	3,008	1,730	2,554
Net income	1,926	2,098	1,669	2,668
Diluted earnings per share	.12	.13	.10	.16

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company has evaluated, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the design and operation of the Company's disclosure controls and procedures as of September 30, 2007 pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and that information was accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

We are responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based upon the evaluation, management has concluded that our internal control over financial reporting was effective as of September 30, 2007.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the Company's most recent quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Chief Executive and Chief Financial Officer Certifications

The certifications of our Chief Executive Officer and Chief Financial Officer required under Section 302 of the Sarbanes-Oxley Act have been filed as Exhibits 31(a) and 31(b) to this report. Additionally, in March 2007, our Chief Executive Officer filed with the New York Stock Exchange (NYSE) the annual certification required to be furnished to the NYSE pursuant to Section 303A.12 of the NYSE Listed Company Manual. The certification confirmed that our Chief Executive Officer was not aware of any violation by the Company of the NYSE's corporate governance listing standards.

ITEM 9B OTHER INFORMATION

None.

PART III

ITEM 10 DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Information concerning the Company's directors, its audit committee, code of ethics, and compliance with Section 16(a) of the Exchange Act will be included in the Company's Proxy Statement for the 2008 Annual Meeting of Shareholders, to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934 and is incorporated herein by reference.

The information required with respect to the executive officers of the Company is included under the caption

Executive Officers of the Registrant in Item 1 of Part I of this Annual Report and incorporated herein by reference.

ITEM 11 EXECUTIVE COMPENSATION

See the caption Executive Compensation and Related Information in the Company's Proxy Statement to be used in conjunction with the 2008 Annual Meeting of Shareholders and to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934, which section is incorporated herein by this reference.

ITEM 12 SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

See the caption Principal Shareholders in the Company's Proxy Statement to be used in conjunction with the 2008 Annual Meeting of Shareholders and to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934, which section is incorporated herein by this reference.

ITEM 13 CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

None.

ITEM 14 PRINCIPAL ACCOUNTANT FEES AND SERVICES

See the caption Audit Fees in the Company's Proxy Statement to be used in conjunction with the February 9, 2008 Annual Meeting Shareholders and to be filed with the Securities and Exchange Commission pursuant to Section 14(a)

of the Securities Exchange Act of 1934, which section is incorporated herein by this reference.
