Item 1: Description of Business

The Company's website address is rfbkonline.com. The Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other documents filed by the Company with the Securities and Exchange Commission ("SEC") are available free of charge on the Company's website under the Investor Relations menu. Such documents are available on the Company's website as soon as reasonably practicable after they have been filed electronically with the SEC.

Forward Looking Statements

This document contains forward-looking statements, which can be identified by reference to a future period or periods or by the use of words such as "would be," "could be," "will," "estimate," "project," "believe," "intend," "anticipate," "expect" and similar expressions or the negative thereof. These forward-looking statements include:

- statements of goals, intentions and expectations;
- statements regarding prospects and business strategy;
- statements regarding asset quality and market risk; and
 - estimates of future costs, benefits and results.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including, among other things, the following: (1) general economic conditions, (2) competitive pressure among financial services companies, (3) changes in interest rates, (4) deposit flows, (5) loan demand, (6) changes in legislation or regulation, (7) changes in accounting principles, policies and guidelines, (8) litigation liabilities, including costs, expenses, settlements and judgments and (9) other economic, competitive, governmental, regulatory and technological factors affecting the Company's operations, pricing, products and services.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. We have no obligation to update or revise any forward-looking statements to reflect any changed assumptions, any unanticipated events or any changes in the future. Factors which could have a material adverse effect on the operations and future prospects of the Company are detailed in the "Risk Factors" section included under Item 1A of Part I of this form 10-K.

Republic First Bancorp, Inc.

Republic First Bancorp, Inc. (the "Company"), was established in 1987. At December 31, 2004, the Company was a two-bank holding company organized and incorporated under the laws of the Commonwealth of Pennsylvania. Its wholly-owned subsidiaries, Republic First Bank ("Republic") and First Bank of Delaware ("FBD"), offered a variety of credit and depository banking services. Such services were offered to individuals and businesses primarily in the Greater Philadelphia and Delaware area through their ten offices and branches in Philadelphia and Montgomery Counties in Pennsylvania and New Castle County, Delaware, but also through the national consumer loan products offered by the First Bank of Delaware.

The First Bank of Delaware was spun off by the Company, on January 31, 2005. All assets, liabilities and equity of FBD were spun off as an independent company, trading on the OTC market under "FBOD". Shareholders received one share of stock in FBD, for every share owned of the Company. After that date, the Company became a one bank holding company.

As of December 31, 2007, the Company had total assets of approximately \$1.0 billion, total shareholder's equity of approximately \$80.5 million, total deposits of approximately \$780.9 million and net loans receivable outstanding of approximately \$813.0 million. The majority of such loans were made for commercial purposes.

The Company provides banking services through Republic and does not presently engage in any activities other than banking activities. The principal executive office of the Company is located at Two Liberty Place, 50 South 16th Street, Suite 2400, Philadelphia, PA 19102, telephone number (215) 735-4422.

At December 31, 2007 the Company and Republic had a total of 146 full-time equivalent employees.

Republic First Bank

Republic First Bank is a commercial bank chartered pursuant to the laws of the Commonwealth of Pennsylvania, and is subject to examination and comprehensive regulation by the Federal Deposit Insurance Corporation ("FDIC") and the Pennsylvania Department of Banking. The deposits held by Republic are insured up to applicable limits by the Bank Insurance Fund of the FDIC. Republic presently conducts its principal banking activities through its five Philadelphia offices and six suburban offices in Ardmore, Plymouth Meeting, Bala Cynwyd and Abington, located in Montgomery County, Media, located in Delaware County, and Voorhees, located in southern New Jersey.

As of December 31, 2007, Republic had total assets of approximately \$1.0 billion, total shareholder's equity of approximately \$91.3 million, total deposits of approximately \$781.1 million and net loans receivable of approximately \$813.0 million. The majority of such loans were made for commercial purposes.

Services Offered

Republic offers many commercial and consumer banking services with an emphasis on serving the needs of individuals, small and medium-sized businesses, executives, professionals and professional organizations in their service area.

Republic attempts to offer a high level of personalized service to both their small and medium-sized businesses and consumer customers. Republic offers both commercial and consumer deposit accounts, including checking accounts, interest-bearing demand accounts, money market accounts, certificates of deposit, savings accounts, sweep accounts, lockbox services and individual retirement accounts (and other traditional banking services). Republic actively solicits both non-interest and interest-bearing deposits from its borrowers.

Republic offers a broad range of loan and credit facilities to the businesses and residents of its service area, including secured and unsecured commercial loans, commercial real estate and construction loans, residential mortgages, automobile loans, home improvement loans, home equity and overdraft lines of credit, and other products.

Republic manages credit risk through loan application evaluation and monitoring for adherence with credit policies. Since its inception, Republic has had a senior officer monitor compliance with Republic's lending policies and procedures by Republic's loan officers.

Republic also maintains an investment securities portfolio. Investment securities are purchased by Republic in compliance with Republic's Investment Policies, which are approved annually by Republic's Board of Directors. The Investment Policies address such issues as permissible investment categories, credit quality, maturities and concentrations. At December 31, 2007 and 2006, approximately 63% and 71%, respectively, of the aggregate dollar amount of the investment securities consisted of either U.S. Government debt securities or U.S. Government agency issued mortgage backed securities. Credit risk associated with these U.S. Government debt securities and the U.S. Government Agency securities is minimal, with risk-based capital weighting factors of 0% and 20%, respectively. The remainder of the securities portfolio consists of municipal securities, trust preferred securities, corporate bonds, and Federal Home Loan Bank (FHLB) securities.

Service Area/Market Overview

Republic's primary business banking service area consists of the Greater Philadelphia region, including Center City Philadelphia and the northern and western suburban communities located principally in Montgomery and Delaware Counties in Pennsylvania and northern Delaware. Republic also serves the surrounding counties of Bucks and Chester in Pennsylvania, southern New Jersey and southern Delaware.

Competition

There is substantial competition among financial institutions in Republic's business banking service area. Competitors include but are not restricted to the following banks: Wachovia, Citizens, PNC, Sovereign, Commerce, Royal Bank of Pennsylvania, and the Bancorp Bank. Republic competes with new and established local commercial banks, as well as numerous regionally based and super-regional commercial banks. In addition to competing with new and established commercial banking institutions for both deposits and loan customers, Republic competes directly with savings banks, savings and loan associations, finance companies, credit unions, factors, mortgage brokers, insurance companies, securities brokerage firms, mutual funds, money market funds, private lenders and other institutions for deposits, commercial loans, mortgages and consumer loans, as well as other services. Competition among financial institutions is based upon a number of factors,

including, but not limited to, the quality of services rendered, interest rates offered on deposit accounts, interest rates charged on loans and other credit services, service charges, the convenience of banking facilities, locations and hours of operation and, in the case of loans to larger commercial borrowers, relative lending limits. It is the view of Management that a combination of many factors, including, but not limited to, the level of market interest rates, has increased competition for loans and deposits.

Many of the banks with which Republic competes have greater financial resources than Republic and offer a wider range of deposit and lending instruments with higher legal lending limits. Republic's legal lending limit was approximately \$15.0 million at December 31, 2007. Loans above these amounts may be made if the excess over the lending limit is participated to other institutions. After the spin off, Republic and FBD have continued to sell each other such participations. Republic is subject to potential intensified competition from new branches of established banks in the area as well as new banks that could open in its market area. Several new banks with business strategies similar to those of Republic have opened since Republic's inception. There are banks and other financial institutions which serve surrounding areas, and additional out-of-state financial institutions, which currently, or in the future, may compete in Republic's market. Republic competes to attract deposits and loan applications both from customers of existing institutions and from customers new to the greater Philadelphia area. Republic anticipates a continued increase in competition in their market area.

Operating Strategy for Business Banking

Following the spin off of FBD, the Company's business banking objective has been for Republic to become the primary alternative to the large banks that dominate the Greater Philadelphia market. The Company's management team has developed a business strategy consisting of the following key elements to achieve this objective:

Providing Attentive and Personalized Service

The Company believes that a very attractive niche exists serving small to medium-sized business customers not adequately served by Republic's larger competitors. The Company believes this segment of the market responds very positively to the attentive and highly personalized service provided by Republic. Republic offers individuals and small to medium-sized businesses a wide array of banking products, informed and professional service, extended operating hours, consistently applied credit policies, and local, timely decision making. The banking industry is experiencing a period of rapid consolidation, and many local branches have been acquired by large out-of-market institutions. The Company is positioned to respond to these dynamics by offering a community banking alternative and tailoring its product offerings to fill voids created as larger competitors increase the price of products and services or de-emphasize such products and services.

Attracting and Retaining Highly Experienced Personnel

Republic's officers and other personnel have substantial experience acquired at larger banks in the region. Additionally, Republic extensively screens and trains its staff to instill a sales and service oriented culture and maximize cross-selling opportunities and business relationships. Republic offers meaningful sales-based incentives to certain customer contact employees.

Capitalizing on Market Dynamics

In recent years, banks controlling large amounts of the deposits in Republic's primary market areas have been acquired by large and super-regional bank holding companies. The ensuing cultural changes in these banking institutions have resulted in changes in their product offerings and in the degree of personal attention they provide. The Company has sought to capitalize on these changes by offering a community banking alternative. As a result of continuing consolidations and its marketing efforts, the Company believes it has a continuing opportunity to increase its market

share.

Products and Services

Republic offers a range of competitively priced commercial and other banking services, including secured and unsecured commercial loans, real estate loans, construction and land development loans, automobile loans, home improvement loans, mortgages, home equity and overdraft lines of credit, and other products. Republic offers both commercial and consumer deposit accounts, including checking accounts, interest-bearing demand accounts, money market accounts, certificates of deposit, savings accounts, sweep accounts, lockbox services and individual retirement accounts (and other traditional banking services). Republic's commercial loans typically range between \$250,000 and \$5.0 million but customers may borrow significantly larger amounts up to Republic's legal lending limit of approximately \$15.0 million. Individual customers may

have several loans, often secured by different collateral, which are in total subject to that lending limit. Relationships in excess of \$8.8 million at December 31, 2007, amounted to \$372.9 million. The \$8.8 million threshold approximates 10% of total capital and reserves and reflects an additional internal monitoring guideline.

Republic attempts to offer a high level of personalized service to both their commercial and consumer customers. Republic is a member of the STARTM and PLUSTM automated teller ("ATM") networks in order to provide customers with access to ATMs worldwide. Republic currently has eleven proprietary ATMs at branch locations and two additional ATMs at a location in Southern New Jersey.

Republic's lending activities generally are focused on small and medium sized businesses within the professional community. Commercial and construction loans are the most significant category of Republic's outstanding loans, representing approximately 96% of total loans outstanding at December 31, 2007. Repayment of these loans is, in part, dependent on general economic conditions affecting the community and the various businesses within the community. Although management continues to follow established underwriting policies, and monitors loans through Republic's loan review officer, credit risk is still inherent in the portfolio. Although the majority of Republic's loan portfolio is collateralized with real estate or other collateral, a portion of the commercial portfolio is unsecured, representing loans made to borrowers considered to be of sufficient strength to merit unsecured financing. Republic makes both fixed and variable rate loans with terms ranging from one to five years. Variable rate loans are generally tied to the national prime rate of interest.

Branch Expansion Plans and Growth Strategy

A branch was opened by Republic in Center City Philadelphia in third quarter 2007. One additional branch is planned for 2008 in Northeast Philadelphia. A branch was opened in third quarter 2007 in Bala Cynwyd, Pennsylvania to replace the 4190 City Line Avenue, Philadelphia location. Another branch was opened in third quarter 2007 in Plymouth Meeting, Pennsylvania to replace the East Norriton, Pennsylvania location. The Graduate Hospital location was closed in third quarter 2007. Additional locations may also be pursued.

Supervision and Regulation

Various requirements and restrictions under the laws of the United States and the Commonwealth of Pennsylvania affect the Company and Republic.

General

Republic, a Pennsylvania chartered bank, is subject to supervision and regulation by the FDIC and the Pennsylvania Department of Banking. The Company is a bank holding company subject to supervision and regulation by the Federal Reserve Bank of Philadelphia ("FRB") under the federal Bank Holding Company Act of 1956, as amended (the "BHC Act"). As a bank holding company, the Company's activities and those of Republic are limited to the business of banking and activities closely related or incidental to banking, and the Company may not directly or indirectly acquire the ownership or control of more than 5% of any class of voting shares or substantially all of the assets of any company, including a bank, without the prior approval of the FRB.

Republic is also subject to requirements and restrictions under federal and state law, including requirements to maintain reserves against deposits, restrictions on the types and amounts of loans that may be granted and the interest that may be charged thereon, and limitations on the types of investments that may be made and the types of services that may be offered. Various consumer laws and regulations also affect the operations of Republic. In addition to the impact of regulation, commercial banks are affected significantly by the actions of the FRB in attempting to control the money supply and credit availability in order to influence market interest rates and the national economy.

Holding Company Structure

Republic is subject to restrictions under federal law which limits its ability to transfer funds to the Company, whether in the form of loans, other extensions of credit, investments or asset purchases. Such transfers by Republic to the Company are generally limited in amount to 10% of Republic's capital and surplus. Furthermore, such loans and extensions of credit are required to be secured in specific amounts, and all transactions are required to be on an arm's length basis. Republic has never made any loans or extensions of credit to the Company or purchased any assets from the Company.

Under regulatory policy, the Company is expected to serve as a source of financial strength to Republic and to commit resources to support Republic. This support may be required at times when, absent such policy, the Company might not otherwise provide such support. Any capital loans by the Company to Republic are subordinate in right of payment to deposits and to certain other indebtedness of Republic. In the event of the Company's bankruptcy, any commitment by the Company to a federal bank regulatory agency to maintain the capital of Republic will be assumed by the bankruptcy trustee and entitled to a priority of payment.

Gramm-Leach-Bliley Act

On November 12, 1999, the federal Gramm-Leach-Bliley Act (the "GLB Act") was enacted. The GLB Act did three fundamental things:

- (a) repealed the key provisions of the Glass Steagall Act so as to permit commercial banks to affiliate with investment banks (securities firms);
- (b) amended the BHC Act to permit qualifying bank holding companies to engage in any type of financial activities that were not permitted for banks themselves; and
- (c) permitted subsidiaries of banks to engage in a broad range of financial activities that were not permitted for banks themselves.

The result was that banking companies would generally be able to offer a wider range of financial products and services and would be more readily able to combine with other types of financial companies, such as securities and insurance companies.

The GLB Act created a new kind of bank holding company called a "financial holding company" (an "FHC"). An FHC is authorized to engage in any activity that is "financial in nature or incidental to financial activities" and any activity that the Federal Reserve determines is "complementary to financial activities" and does not pose undue risks to the financial system. Among other things, "financial in nature" activities include securities underwriting and dealing, insurance underwriting and sales, and certain merchant banking activities. A bank holding company qualifies to become an FHC if each of its depository institution subsidiaries is "well capitalized," "well managed," and CRA-rated "satisfactory" or better. A qualifying bank holding company becomes an FHC by filing with the Board of Governors of the Federal Reserve System (the "Federal Reserve") an election to become an FHC. If an FHC at any time fails to remain "well capitalized" or "well managed," the consequences can be severe. Such an FHC must enter into a written agreement with the Federal Reserve to restore compliance. If compliance is not restored within 180 days, the Federal Reserve can require the FHC to cease all its newly authorized activities or even to divest itself of its depository institutions. On the other hand, a failure to maintain a CR rating of "satisfactory" will not jeopardize any then existing newly authorized activities; rather, the FHC cannot engage in any additional newly authorized activities until a "satisfactory" CRA rating is restored.

In addition to activities currently permitted by law and regulation for bank holding companies, an FHC may engage in virtually any other kind of financial activity. Under limited circumstances, an FHC may even be authorized to engage in certain non-financial activities. The most important of these authorized activities are as follows:

- (a) Securities underwriting and dealing;
- (b) Insurance underwriting and sales;
- (c) Merchant banking activities;
- (d) Activities determined by the Federal Reserve to be "financial in nature" and incidental activities; and
- (e) Activities determined by the Federal Reserve to be "complementary" to financial activities.

Bank holding companies that do not qualify or elect to become FHCs will be limited in their activities to those previously permitted by law and regulation. The Company has not elected to become a FHC but has not precluded the possibility of doing so in the future.

The GLB Act also authorized national banks to create "financial subsidiaries." This is in addition to the present authority of national banks to create "operating subsidiaries". A "financial subsidiary" is a direct subsidiary of a national bank that satisfies the same conditions as an FHC, plus certain other conditions, and is approved in advance by the Office of the Comptroller of the Currency (the "OCC"). A national bank's "financial subsidiary" can engage in most, but not all, of the newly authorized activities.

In addition, the GLB Act provided significant new protections for the privacy of customer information. These provisions apply to any company the business of which is engaging in activities permitted for an FHC, even if it is not itself an FHC. The

GLB Act subjected a financial institution to four new requirements regarding non-public information about a customer. The financial institution must (1) adopt and disclose a privacy policy; (2) give customers the right to "opt out" of disclosures to non-affiliated parties; (3) not disclose any information to third party marketers; and (4) follow regulatory standards (to be adopted in the future) to protect the security and confidentiality of customer information.

Although the long-range effects of the GLB Act cannot be predicted with certainty, it will probably further narrow the differences and intensify competition between and among commercial banks, investment banks, insurance firms and other financial service companies.

Sarbanes-Oxley Act of 2002

The following is a brief summary of some of the provisions of the Sarbanes-Oxley Act of 2002 ("SOX") that affect the Company. It is not intended as an exhaustive description of SOX or its impact on the Company.

SOX instituted or increased various requirements for corporate governance, board of director and audit committee composition and membership, board duties, auditing standards, external audit firm standards, additional disclosure requirements, including CEO and CFO certification of financial statements and related controls, and other new requirements.

Boards of directors are now required to have a majority of independent directors, and the audit committees are required to be wholly independent, with greater financial expertise. Such independent directors are not allowed to receive compensation from the company on whose board they serve except for directors' fees. Additionally, requirements for auditing standards and independence of external auditors were increased and included independent audit partner review, audit partner rotation and limitations over non-audit services. Penalties for non-compliance with existing and new requirements were established or increased.

In addition, Section 404 of SOX required that by each year end, our management perform a detailed assessment of internal controls and report thereon as follows:

- 1. We must state that we accept the responsibility for maintaining an adequate internal control structure and procedures for financial reporting;
- 2. We must present an assessment, at each year end, of the effectiveness of the internal control structure and procedures for our financial reporting; and
- 3. We must have our auditors audit our internal control over financial reporting and provide an opinion that we have maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007. The audit must be made in accordance with standards issued or adopted by the Public Company Accounting Oversight Board.

We had taken necessary steps with respect to achieving compliance and have updated our assessment and reporting on internal controls through the end of 2007.

Regulatory Restrictions on Dividends

Dividend payments by Republic to the Company are subject to the Pennsylvania Banking Code of 1965 (the "Banking Code") and the Federal Deposit Insurance Act (the "FDIA"). Under the Banking Code, no dividends may be paid except from "accumulated net earnings" (generally, undivided profits). Under the FDIA, an insured bank may pay no dividends if the bank is in arrears in the payment of any insurance assessment due to the FDIC. Under current banking laws, Republic would be limited to \$56.8 million of dividends payable plus an additional amount equal to its net profit for

2008, up to the date of any such dividend declaration. However, dividends would be further limited in order to maintain capital ratios as discussed in "Regulatory Capital Requirements". The Company may consider dividend payments in 2008.

State and federal regulatory authorities have adopted standards for the maintenance of adequate levels of capital by banks, which may vary. Adherence to such standards further limits the ability of Republic to pay dividends to the Company.

Dividend Policy

The Company has not paid any cash dividends on its Common Stock. The Company may consider dividend payments in 2008.

FDIC Insurance Assessments

The FDIC has implemented a risk-related premium schedule for all insured depository institutions that results in the assessment of premiums based on capital and supervisory measures.

Under the risk-related premium schedule, the FDIC, on a semiannual basis, assigns each institution to one of three capital groups (well capitalized, adequately capitalized or under capitalized) and further assigns such institution to one of three subgroups within a capital group corresponding to the FDIC's judgment of the institution's strength based on supervisory evaluations, including examination reports, statistical analysis and other information relevant to gauging the risk posed by the institution. Only institutions with a total capital to risk-adjusted assets ratio of 10.00% or greater, a Tier 1 capital to risk-adjusted assets ratio of 6.00% or greater and a Tier 1 leverage ratio of 5.00% or greater, are assigned to the well capitalized group.

Capital Adequacy

The FRB has adopted risk-based capital guidelines for bank holding companies, such as the Company. The required minimum ratio of total capital to risk-weighted assets (including off-balance sheet activities, such as standby letters of credit) is 8.0%. At least half of the total capital is required to be Tier 1 capital, consisting principally of common shareholders' equity, non-cumulative perpetual preferred stock and minority interests in the equity accounts of consolidated subsidiaries, less goodwill. The remainder, Tier 2 capital, may consist of a limited amount of subordinated debt and intermediate-term preferred stock, certain hybrid capital instruments and other debt securities, perpetual preferred stock, and a limited amount of the general loan loss allowance.

In addition to the risk-based capital guidelines, the FRB has established minimum leverage ratio (Tier 1 capital to average total assets) guidelines for bank holding companies. These guidelines provide for a minimum leverage ratio of 3% for those bank holding companies that have the highest regulatory examination ratings and are not contemplating or experiencing significant growth or expansion. All other bank holding companies are required to maintain a leverage ratio of at least 1% to 2% above the 3% stated minimum. The Company is in compliance with these guidelines. The FDIC subjects Republic to similar capital requirements.

The risk-based capital standards are required to take adequate account of interest rate risk, concentration of credit risk and the risks of non-traditional activities.

Interstate Banking

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1995 (the "Interstate Banking Law") amended various federal banking laws to provide for nationwide interstate banking, interstate bank mergers and interstate branching. The interstate banking provisions allow for the acquisition by a bank holding company of a bank located in another state.

Interstate bank mergers and branch purchase and assumption transactions were allowed effective September 1, 1998; however, states may "opt-out" of the merger and purchase and assumption provisions by enacting a law that specifically prohibits such interstate transactions. States could, in the alternative, enact legislation to allow interstate merger and purchase and assumption transactions prior to September 1, 1999. States could also enact legislation to allow for de

novo interstate branching by out of state banks. In July 1997, Pennsylvania adopted "opt-in" legislation that allows interstate merger and purchase and assumption transactions.

Profitability, Monetary Policy and Economic Conditions

In addition to being affected by general economic conditions, the earnings and growth of Republic will be affected by the policies of regulatory authorities, including the Pennsylvania Department of Banking, the FRB and the FDIC. An important function of the FRB is to regulate the supply of money and other credit conditions in order to manage interest rates. The monetary policies and regulations of the FRB have had a significant effect on the operating results of commercial banks in the past and are expected to continue to do so in the future. The effects of such policies upon the future business, earnings and

growth of the Bank cannot be determined. See "Management's Discussion and Analysis of Operations and Financial Condition - Results of Operations".

Republic is not considered to be a "well known seasoned issuer."

Item 1A: Risk Factors

In addition to factors discussed elsewhere in this report and in "Management's Discussion and Analysis of Results of Operations and Financial Condition," the following are some of the important factors that could materially and adversely affect our business, financial condition and results of operations.

Our earnings are sensitive to fluctuations in interest rates.

The earnings of the Company depend on the earnings of Republic. Republic is dependent primarily upon the level of net interest income, which is the difference between interest earned on its interest-earning assets, such as loans and investments, and the interest paid on its interest-bearing liabilities, such as deposits and borrowings. Accordingly, the operations of Republic are subject to risks and uncertainties surrounding their exposure to change in the interest rate environment.

Our earnings may be negatively impacted by a general economic downturn or changes in the credit risk of our borrowers.

Republic's results of operations are affected by the ability of its borrowers to repay their loans. Lending money is an essential part of the banking business. However, borrowers do not always repay their loans. The risk of non-payment is affected by credit risks of a particular borrower, changes in economic conditions, the duration of the loan and in the case of a collateralized loan, uncertainties as to the future value of the collateral.

Our allowance for loan losses may not be sufficient to absorb actual loan losses.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America require management to make significant estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant estimates are made by management in determining the allowance for loan losses, carrying values of other real estate owned, and income taxes. Consideration is given to a variety of factors in establishing these estimates. There is no precise method of predicting loan losses. Republic can give no assurance that its allowance for loan losses is or will be sufficient to absorb actual loan losses. Loan losses could have a material adverse effect on Republic's financial condition and results of operations. Republic attempts to maintain an appropriate allowance for loan losses to provide for estimated losses in its loan portfolio. In estimating the allowance for loan losses, management considers current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, borrowers' perceived financial and managerial strengths, the adequacy of underlying collateral, if collateral dependent, or present value of future cash flows and other relevant factors. Since the allowance for loan losses and carrying value of real estate owned are dependent, to a great extent, on the general economy and other conditions that may be beyond Republic's control, it is at least reasonably possible that the estimates of the allowance for loan losses and the carrying values of the real estate owned could differ materially in the near term.

We face increasing competition in our market from other banks and financial institutions.

Republic may not be able to compete effectively in its markets, which could adversely affect its results of operations. The banking and financial services industry in Republic's market area is highly competitive. The increasingly competitive environment is a result of changes in regulation, changes in technology and product delivery systems, and the accelerated pace of consolidation among financial service providers. Such larger institutions have greater access to capital markets, with higher lending limits and a broader array of services. Competition may require

increases in deposit rates and decreases in loan rates.

Our governing documents contain provisions which may reduce the likelihood of a change in control transaction.

The Company's Articles of Incorporation and Bylaws contain certain anti-takeover provisions that may make it more difficult or expensive or may discourage a tender offer, change in control or takeover attempt that is opposed by its Board of Directors. In particular, the Articles of Incorporation and Bylaws: classify the Board of Directors into three groups, so that shareholders elect only one-third of the Board each year; permit shareholders to remove directors only for cause and only upon the vote of the holders of at least 75% of the voting shares; require shareholders to give the Company advance notice to nominate candidates for election to the Board of Directors or to make shareholder proposals at a shareholders' meeting; and require the vote of the holders of at least 60% of the Company's voting shares for stockholder amendments to the Company's

Bylaws. These provisions of the Company's Articles of Incorporation and Bylaws could discourage potential acquisition proposals and could delay or prevent a change in control, even though a majority of the Company's shareholders may consider such proposals desirable. Such provisions could also make it more difficult for third parties to remove and replace the members of the Company's Board of Directors. Moreover, these provisions could diminish the opportunities for shareholders to participate in certain tender offers, including tender offers at prices above the then-current market value of the Company's common stock, and may also inhibit increases in the trading price of the Company's common stock that could result from takeover attempts or speculation.

In addition, in the event of certain hostile fundamental changes, all of our senior officers are entitled to receive payments equal to two times such officers' base annual salary in the event they determine not to continue their employment.

Government regulation restricts the scope of our operations.

The Company and Republic operate in a highly regulated environment and are subject to supervision and regulation by several governmental regulatory agencies, including the FDIC and the Pennsylvania Department of Banking. The Company and Republic are subject to federal and state regulations governing virtually all aspects of their activities, including but not limited to, lines of business, liquidity, investments, the payment of dividends, and others. Regulations that apply to the Company and Republic are generally intended to provide protection for depositors and customers rather than for investors. The Company and Republic will remain subject to these regulations, and to the possibility of changes in federal and state laws, regulations, governmental policies, income tax laws and accounting principles. Changes in the regulatory environment in which the Company and Republic operate could adversely affect the banking industry as a whole and the Company and Republic's operations in particular. For example, regulatory changes could limit our growth and our return to investors by restricting such activities as the payment of dividends, mergers with or acquisitions by other institutions, investments, loans and interest rates, and providing securities, insurance or trust services. Such regulations and the cost of adherence to such regulations can have a significant impact on earnings and financial condition.

Also, legislation may change present capital requirements, which could restrict the Company and Republic's activities and require the Company and Republic to maintain additional capital. The Company and Republic cannot predict what changes, if any, legislators and federal and state agencies will make to existing federal and state legislation and regulations or the effect that such changes may have on the Company and Republic's business.

Our business is concentrated in and dependent upon the continued growth and welfare of our primary market area.

We operate primarily in the Philadelphia geographic market. Our success depends upon the business activity, population, income levels, deposits and real estate activity in this market. Although our customers' business and financial interests may extend well beyond this market area, adverse economic conditions that affect our home market could reduce our growth rate, affect the ability of our customers to repay their loans to us and generally affect our financial condition and results of operations. Because of our geographic concentration, we are less able than other regional or national financial institutions to diversify our credit risks across multiple markets.

We may experience difficulties in managing our growth and our growth strategy involves risks that may negatively impact our net income.

As part of our general growth strategy, we may expand into additional communities or attempt to strengthen our position in our current markets by opening new branches and acquiring existing branches of other financial institutions. To the extent that we undertake additional branch openings and acquisitions, we are likely to continue to experience the effects of higher operating expenses relative to operating income from the new operations, which may have an adverse effect on our levels of reported net income, return on average equity and return on average assets.

Other effects of engaging in such growth strategies may include potential diversion of our management's time and attention and general disruption to our business.

Although we do not have any current plans to do so, we may also acquire banks and related businesses that we believe provide a strategic fit with our business. We may also engage in de novo bank formations. To the extent that we grow through acquisitions and de novo bank formations, we cannot assure you that we will be able to adequately and profitably manage this growth. Acquiring other banks and businesses will involve similar risks to those commonly associated with branching, but may also involve additional risks, including:

 potential exposure to unknown or contingent liabilities of banks and businesses we acquire;

- exposure to potential asset quality issues of the acquired bank or related business;
- difficulty and expense of integrating the operations and personnel of banks and businesses we acquire; and
- the possible loss of key employees and customers of the banks and businesses we acquire.

Our growth may require us to raise additional capital in the future, but that capital may not be available when it is needed.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. We anticipate that our existing capital resources will satisfy our capital requirements for the foreseeable future. However, we may at some point need to raise additional capital to support our continued growth. Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time, which are outside our control, and on our financial performance. Accordingly, we cannot assure you of our ability to raise additional capital, if needed, on terms acceptable to us. If we cannot raise additional capital when needed, our ability to further expand our operations through internal growth, branching, de novo bank formations and/or acquisitions could be materially impaired.

Our community banking strategy relies heavily on our management team, and the unexpected loss of key managers may adversely affect our operations.

Much of our success to date has been influenced strongly by our ability to attract and to retain senior management experienced in banking and financial services and familiar with the communities in our market. Our ability to retain executive officers, the current management teams, branch managers and loan officers of our bank subsidiary will continue to be important to the successful implementation of our strategy. It is also critical, as we grow, to be able to attract and retain qualified additional management and loan officers with the appropriate level of experience and knowledge about our market areas to implement our community-based operating strategy. The unexpected loss of services of any key management personnel, or the inability to recruit and retain qualified personnel in the future, could have an adverse effect on our business, financial condition and results of operations.

We have a continuing need for technological change and we may not have the resources to effectively implement new technology.

The financial services industry is constantly undergoing rapid technological changes with frequent introductions of new technology-driven products and services. In addition to better serving customers, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success will depend in part upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience as well as to create additional efficiencies in our operations as we continue to grow and expand in our market. Many of our larger competitors have substantially greater resources to invest in technological improvements. As a result, they may be able to offer additional or superior products to those that we will be able to offer, which would put us at a competitive disadvantage. Accordingly, we cannot provide you with assurance that we will be able to effectively implement new technology-driven products and services or be successful in marketing such products and services to our customers.

There is a limited trading market for our common shares, and you may not be able to resell your shares at or above the price shareholders paid for them.

Although our common shares are listed for trading on the NASDAQ Stock Market, the trading in our common shares has less liquidity than many other companies quoted on the NASDAQ. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the market of willing buyers and sellers of our common shares at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which we have no control. We cannot assure you that volume of trading in our common shares will increase in the future.

System failure or breaches of our network security could subject us to increased operating costs as well as litigation and other liabilities.

The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to protect our computer equipment against damage from physical theft, fire, power loss, telecommunications failure or a similar catastrophic event, as well as from security breaches, denial of service attacks, viruses, worms and other disruptive problems caused by hackers. Any damage or failure that causes an interruption in our operations could have a material adverse effect on our financial condition and results of operations. Computer break-ins, phishing and other disruptions could also jeopardize the security of information stored in and transmitted through our computer systems and

network infrastructure, which may result in significant liability to us and may cause existing and potential customers to refrain from doing business with us. Although we, with the help of third-party service providers, intend to continue to implement security technology and establish operational procedures to prevent such damage, there can be no assurance that these security measures will be successful. In addition, advances in computer capabilities, new discoveries in the field of cryptography or other developments could result in a compromise or breach of the algorithms we and our third-party service providers use to encrypt and protect customer transaction data. A failure of such security measures could have a material adverse effect on our financial condition and results of operations.

We are subject to certain operational risks, including, but not limited to, customer or employee fraud and data processing system failures and errors.

Employee errors and misconduct could subject us to financial losses or regulatory sanctions and seriously harm our reputation. Misconduct by our employees could include hiding unauthorized activities from us, improper or unauthorized activities on behalf of our customers or improper use of confidential information. It is not always possible to prevent employee errors and misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Employee errors could also subject us to financial claims for negligence.

We maintain a system of internal controls and insurance coverage to mitigate operational risks, including data processing system failures and errors and customer or employee fraud. Should our internal controls fail to prevent or detect an occurrence, or if any resulting loss is not insured or exceeds applicable insurance limits, it could have a material adverse effect on our business, financial condition and results of operations.

Item 1B: Unresolved Staff Comments

None

Item 2: Description of Properties

Republic entered into a lease agreement that commenced June 1, 2007 for approximately 53,275 square feet on two floors of Two Liberty Place, 1601 Chestnut St., Philadelphia, Pennsylvania, as its new headquarter facilities. The space is occupied by the Company, the executive offices of Republic and FBD which will assume its proportionate share of related costs. Bank office operations of Republic and the commercial bank lending department of Republic is also located therein. The initial thirteen year, seven month lease term contains two five year renewal options and the initial lease term will expire on December 31, 2020. Annual rent expense commenced at \$750,245 less the following abatement periods: (1) the first twenty-eight months for 5,815 square feet of space and (2) the following periods for the remaining rentable area: (a) the first six months of the first lease year, (b) the first four months of the second lease year, and (c) the first four months of the third lease year.

Republic leases approximately 1,829 square feet on the ground floor at 1601 Market Street in Center City, Philadelphia. This space contains a banking area and vault and represents Republic's main office. The initial ten year term of the lease expired March 2003 and contains five-year and ten-year renewal options that have been exercised and also contains an additional five-year option. The annual rent for such location is \$99,985 payable in monthly installments.

Republic leases approximately 1,743 square feet of space on the ground floor at 1601 Walnut Street, Center City Philadelphia, PA. This space contains a banking area and vault. The initial ten-year term of the lease expired August 2006. The lease has been extended to August 2014 and contains an additional five-year renewal option. The annual rent for such location is \$130,191, payable in monthly installments.

Republic leases approximately 798 square feet of space on the ground floor and 903 square feet on the 2nd floor at 233 East Lancaster Avenue, Ardmore, PA. The space contains a banking area and business development office. The initial ten-year term of the lease expired in August 2005, and contains a five year renewal option that has been exercised and also contains an additional five-year option. The annual rental at such location is \$59,514, payable in monthly installments.

Republic entered into a lease agreement that commenced May 1, 2007 for approximately 1,574 square feet for its Bala Cynwyd office at Two Bala Plaza, Bala Cynwyd, Pennsylvania. The space contains a banking area. The initial six-year, four month lease term contains two five-year renewal options and the initial lease term will expire on August 31, 2013. The annual rent at such location is \$49,319, payable in monthly installments.

Republic entered into a lease agreement that commenced April 27, 2007 for approximately 2,820 square feet for its Plymouth Meeting office at 421 Germantown Pike, Plymouth Meeting, Pennsylvania. The space contains a banking area and a business development office. The initial seven-year, five month lease term contains one six-year renewal option and the initial lease terms will expire on September 30, 2014. The annual rent at such location is \$93,295, payable in monthly installments.

Republic owns an approximately 2,800 square foot facility for its Abington, Montgomery County office at 1480 York Road, Abington, Pennsylvania. This space contains a banking area and a business development office.

Republic leases approximately 1,822 square feet on the ground floor at 1818 Market St. Philadelphia, Pennsylvania. The space contains a banking area and a vault. The initial ten-year term of the lease expires in August 2008, has been extended for fifteen years to August 2023, and contains an additional five-year renewal option. The annual rent for such location is \$104,461, payable in monthly installments.

Republic leases approximately 4,700 square feet of space on the first, second, and third floor, at 436 East Baltimore Avenue, Media, Pennsylvania. The space contains a banking area and business development office. The initial five-year term of the lease expires October 2009 with four five-year renewal options. The annual rent is \$75,106 payable in monthly installments.

Republic leases an approximately 6,000 square feet facility for its Northeast Philadelphia office at Mayfair and Cottman Avenues, Philadelphia, Pennsylvania. The space contains a banking area and a business development office. The initial fifteen-year term of the lease expires June 2021 with two five-year renewal options. The annual rent is \$96,000 payable in monthly installments.

Republic leases an approximately 1,850 square feet facility for its Voorhees office at 342 Burnt Mill Road, Voorhees, New Jersey. The space contains a banking area. The initial fifteen-year term of the lease expires May 2021 with two five-year renewal options. The annual rent is \$42,600 payable in monthly installments.

Republic entered into a lease agreement that commenced September 1, 2007 for approximately 2,467 square feet at 833 Chestnut Street, Philadelphia, Pennsylvania. The space contains a banking area and a business development office. The initial fifteen-year term of the lease expires August 2022 with three five-year renewal options. The annual rent is \$71,954, payable in monthly installments.

Republic entered into a lease agreement that commenced December 26, 2007 for approximately 2,710 square feet for its Torresdale location, to be opened in 2008, at 8764 Frankford Avenue, Philadelphia, Pennsylvania. The space contains a banking area and business development office. The initial fifteen-year term of the lease expires December 2022 with two five-year renewal options. The annual rent is \$120,000, payable in monthly installments.

Item 3: Legal Proceedings

The Company and Republic are from time to time parties (plaintiff or defendant) to lawsuits in the normal course of business. While any litigation involves an element of uncertainty, management, after reviewing pending actions with its legal counsel, is of the opinion that the liability of the Company and Republic, if any, resulting from such actions will not have a material effect on the financial condition or results of operations of the Company and Republic.

Item 4: Submission of Matters to a Vote of Security Holders

Not applicable.

PART II

Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Shares of the Common Stock are quoted on Nasdaq under the symbol "FRBK." The table below presents the range of high and low trade prices reported for the Common Stock on Nasdaq for the periods indicated. Market quotations reflect inter-dealer prices, without retail mark-up, markdown, or commission, and may not necessarily reflect actual transactions. As of December 31, 2007, there were approximately 2,100 holders of record of the Common Stock. On March 4, 2008, the closing price of a share of Common Stock on Nasdaq was \$6.15. 2006 information has been restated for a 10% stock dividend declared during 2007.

	Year		High	Low
		Quarter		
2007		4th	\$ 8.94	\$ 6.77
		3rd	9.92	7.25
		2nd	11.93	9.45

2006		4th	\$12.37	\$11.36
		3rd	12.53	11.36
		2nd	12.95	11.90
		1st	12.29	10.55

Common Stock Performance

The following line graph compares the yearly percentage change in the cumulative stockholder return on the Company's common stock to the NASDAQ Market Index and the SNL Bank Index over the five-year period beginning December 31, 2002, and ending December 31, 2007. Cumulative stockholder return has been measured on a weighted-average basis based on market capitalizations of the component companies comprising the peer group index at the close of trading on the last trading day preceding the beginning of each year assuming an initial investment of \$100 and reinvestment of dividends.

	Period Ending

- (c) The repurchase program is in effect from June 14, 2007 through June 30, 2008.

Dividend Policy

The Company has not paid any cash dividends on its Common Stock. The Company may consider dividend payments in 2008. The payment of dividends in the future, if any, will depend upon earnings, capital levels, cash requirements, the financial condition of the Company and Republic, applicable government regulations and policies and other factors deemed relevant by the Company's Board of Directors, including the amount of cash dividends payable to the Company by Republic. The principal source of income and cash flow for the Company, including cash flow to pay cash dividends on the Common Stock, is dividends from Republic. Various federal and state laws, regulations and policies limit the ability of Republic to pay cash dividends to the Company. For certain limitations on Republic's ability to pay cash dividends to the Company, see "Description of Business - Supervision and Regulation".

Item 7: Management's Discussion and Analysis of Results of Operations and Financial Condition

The following is management's discussion and analysis of the significant changes in the Company's results of operations, financial condition and capital resources presented in the accompanying consolidated financial statements of Republic First Bancorp, Inc. This discussion should be read in conjunction with the accompanying notes to the consolidated financial statements.

Certain statements in this document may be considered to be "forward-looking statements" as that term is defined in the U.S. Private Securities Litigation Reform Act of 1995, such as statements that include the words "may", "believes", "expect", "estimate", "project", "anticipate", "should", "would", "intend", "probability", "risk", "target", "objective" and sim or variations on such expressions. The forward-looking statements contained herein are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. For example, risks and uncertainties can arise with changes in: general economic conditions, including their impact on capital expenditures; business conditions in the financial services industry; the regulatory environment, including evolving banking industry standards; rapidly changing technology and competition with community, regional and national financial institutions; new service and product offerings by competitors, price pressures; and similar items. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis only as of the date hereof. The Company undertakes no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances that arise after the date hereof. Readers should carefully review the risk factors described in other documents the Company files from time to time with the Securities and Exchange Commission, including the Company's Annual Report on Form 10-K for the year ended December 31, 2007, Quarterly Reports on Form 10-Q filed by the Company in 2007 and any Current Reports on Form 8-K filed by the Company, as well as similar filings in 2007.

Critical Accounting Policies, Judgments and Estimates

Discontinued Operations - In accordance with SFAS No. 144, the Company has presented the operations of First Bank of Delaware as discontinued operations starting with the first quarter 2005. On January 31, 2005 the First Bank of Delaware was spun off, effective January 1, 2005. All assets, liabilities and equity of First Bank of Delaware were spun off as an independent company, trading on the OTC market under the stock symbol "FBOD". Shareholders received one share of stock in First Bank of Delaware, for every share owned of the Company. The short-term loan and tax refund lines of business were accordingly transferred after that date. Republic continued to purchase tax refund anticipation loans from the First Bank of Delaware through 2006. However, First Bank of Delaware decided not to continue with this program in 2007.

In reviewing and understanding financial information for the Company you are encouraged to read and understand the significant accounting policies used in preparing our consolidated financial statements. These policies are described in Note 2 of the notes to our unaudited consolidated financial statements. The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States of America and to general practices within the banking industry. The preparation of the Company's consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Management evaluates these estimates and assumptions on an ongoing basis including those related to the allowance for loan losses, other-than-temporary impairment of securities and deferred income taxes. Management bases its estimates on historical experience and various other factors and assumptions that are believed to be reasonable under the circumstances. These form the bases for making judgments on the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Allowance for Loan Losses—The allowance for loan losses is increased by charges to income through the provision for loan losses and decreased by charge-offs (net of recoveries). The allowance is maintained at a level that management considers adequate to provide for losses based upon evaluation of the known and inherent risks in the loan portfolio. Management's periodic evaluation of the adequacy of the allowance is based on the Company's past loan loss experience, the volume and composition of lending conducted by the Company, adverse situations that may affect a borrower's ability to repay, the estimated value of any underlying collateral, current economic conditions and other factors affecting the known and inherent risk in the portfolio. This evaluation is inherently subjective as it requires material estimates including, among others, the amount and timing of expected future cash flows on impacted loans, exposure at default, value of collateral, and estimated losses on our commercial and residential loan portfolios. All of these estimates may be susceptible to significant change.

The allowance consists of specific allowances for both impaired loans and all classified loans which are not impaired and a general allowance on the remainder of the portfolio. Although we determine the amount of each element of the allowance separately, the entire allowance for loan losses is available for the entire portfolio.

We establish an allowance on certain impaired loans for the amount by which the discounted cash flows, observable market price or fair value of collateral if the loan is collateral dependent is lower than the carrying value of the loan. A loan is considered to be impaired when, based upon current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan. An insignificant delay or insignificant shortfall in amount of payments does not necessarily result in the loan being identified as impaired.

We also establish a specific valuation allowance on classified loans which are not impaired. We segregate these loans by category and assign allowances to each loan based on inherent losses associated with each type of lending and consideration that these loans, in the aggregate, represent an above-average credit risk and that more of these loans will prove to be uncollectible compared to loans in the general portfolio. The categories used by the Company include "Doubtful," "Substandard" and "Special Mention." Classification of a loan within such categories is based on identified weaknesses that increase the credit risk of the loan.

We establish a general allowance on non-classified loans to recognize the inherent losses associated with lending activities, but which, unlike specific allowances, have not been allocated to particular problem loans. This general valuation allowance is determined by segregating the loans by loan category and assigning allowance percentages based on our historical loss experience, delinquency trends, and management's evaluation of the collectibility of the loan portfolio.

The allowance is adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the evaluation date. These significant factors may include changes in lending policies and procedures, changes in existing general economic and business conditions affecting our primary lending areas, credit quality trends, collateral value, loan volumes and concentrations, seasoning of the loan portfolio, loss experience in particular segments of the portfolio, duration of the current business cycle, and bank regulatory examination results. The applied loss factors are reevaluated each reporting period to ensure their relevance in the current economic environment.

While management uses the best information available to make loan loss allowance valuations, adjustments to the allowance may be necessary based on changes in economic and other conditions, changes in the composition of the loan portfolio or changes in accounting guidance. In times of economic slowdown, either regional or national, the risk inherent in the loan portfolio could increase resulting in the need for additional provisions to the allowance for loan losses in future periods. An increase could also be necessitated by an increase in the size of the loan portfolio or in any of its components even though the credit quality of the overall portfolio may be improving. Historically, our estimates of the allowance for loan loss have approximated actual losses incurred. In addition, the Pennsylvania Department of Banking and the FDIC, as an integral part of their examination processes, periodically review our allowance for loan losses. The Pennsylvania Department of Banking or the FDIC may require the recognition of adjustment to the allowance for loan losses based on their judgment of information available to them at the time of their examinations. To the extent that actual outcomes differ from management's estimates, additional provisions to the allowance for loan losses may be required that would adversely impact earnings in future periods.

Other-Than-Temporary Impairment of Securities—Securities are evaluated on at least a quarterly basis, and more frequently when market conditions warrant such an evaluation, to determine whether a decline in their value is other-than-temporary. To determine whether a loss in value is other-than-temporary, management utilizes criteria such as the reasons underlying the decline, the magnitude and duration of the decline and the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for an anticipated recovery in the fair value. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to

support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized.

Income Taxes—Management makes estimates and judgments to calculate various tax liabilities and determine the recoverability of various deferred tax assets, which arise from temporary differences between the tax and financial statement recognition of revenues and expenses. Management also estimates a reserve for deferred tax assets if, based on the available evidence, it is more likely than not that some portion or all of the recorded deferred tax assets will not be realized in future periods. These estimates and judgments are inherently subjective. Historically, our estimates and judgments to calculate our deferred tax accounts have not required significant revision.

In evaluating our ability to recover deferred tax assets, management considers all available positive and negative evidence, including our past operating results and our forecast of future taxable income. In determining future taxable income, management makes assumptions for the amount of taxable income, the reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. These assumptions require us to make judgments about our future taxable income and are consistent with the plans and estimates we use to manage our business. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. An increase in the valuation allowance would result in additional income tax expense in the period and could have a significant impact on our future earnings.

Recent Accounting Pronouncements

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments. This statement amends FASB Statements No. 133, Accounting for Derivative Instruments and Hedging Activities, and No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. This statement resolves issues addressed in Statement 133 Implementation Issue No. D1, Application of Statement 133 to Beneficial Interest in Securitized Financial Assets. This statement is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company adopted this guidance on January 1, 2007. The adoption did not have any effect on the Company's consolidated financial position or results of operations.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Asset- An Amendment of FASB Statement No. 140. This statement amends SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities, with respect to the accounting for separately recognized servicing assets and servicing liabilities. This statement requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable. It also permits, but does not require, the subsequent measurement of servicing assets and servicing liabilities at fair value. The Company adopted this statement effective January 1, 2007. The adoption did not have a material effect on the Company's consolidated financial position or results of operations.

In July 2006, the FASB issued FASB Interpretation ("FIN") No. 48, Accounting for Uncertainty in Income Taxes. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This Interpretation is effective for fiscal years beginning after December 15, 2006. The adoption did not have any impact on the Company's consolidated financial position or results of operations.

In September 2006, the FASB ratified the consensus reached by the Emerging Issues Task Force ("EITF") in Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. EITF 06-4 applies to life insurance arrangements that provide an employee with a specified benefit that is not limited to the employee's active service period, including certain bank-owned life insurance ("BOLI") policies. EITF 06-4 requires an employer to recognize a liability and related compensation costs for future benefits that extend to postretirement periods. EITF 06-4 is effective for fiscal years beginning after December 15, 2007, with earlier application permitted. The Company is continuing to evaluate the impact of this consensus, which may require the Company to recognize an additional liability and compensation expense related to its deferred compensation agreements.

In September 2006, the FASB ratified the consensus reached by the EITF in Issue 06-5, Accounting for Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance. Technical Bulletin No. 85-4 states that an entity should report as an

asset in the statement of financial position the amount that could be realized under the insurance contract. EITF 06-5 clarifies certain factors that should be considered in the determination of the amount that could be realized. EITF 06-5 is effective for fiscal years beginning after December 15, 2006, with earlier application permitted under certain circumstances. The Company adopted this guidance on January 1, 2007. The adoption did not have any effect on the Company's consolidated financial position or results of operations.

In September 2006, the FASB issued FASB Statement No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. FASB Statement No. 157 applies to other accounting pronouncements that require or permit fair value measurements. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim

periods within those fiscal years. The Company does not anticipate any material impact on its consolidated financial position or results of operations.

In December 2007, the FASB issued proposed FASB Staff Position (FSP) 157-b, Effective Date of FASB Statement No. 157, that would permit a one-year deferral in applying the measurement provisions of statement No. 157 to non-financial assets and non-financial liabilities (non-financial items) that are not recognized or disclosed at fair value in an entity's financial statements on a recurring basis (at least annually). Therefore, if the change in fair value of a non-financial item is not required to be recognized or disclosed in the financial statements on an annual basis or more frequently, the effective date of application of statement 157 to that item is deferred until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. This deferral does not apply, however, to an entity that applies statement 157 in interim or annual financial statements before proposed FSP 157-b is finalized. The Company is currently evaluating the impact, if any, that the adoption of FSP 157-b will have on the Company's consolidated financial position or results of operations.

In September 2006, the SEC issued SAB No. 108, Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a potential current year misstatement. Prior to SAB No. 108, companies might evaluate the materiality of financial-statement misstatements using either the income statement or balance sheet approach, with the income statement approach focusing on new misstatements added in the current year, and the balance sheet approach focusing on the cumulative amount of misstatement present in a company's balance sheet. Misstatements that would be material under one approach could be viewed as immaterial under another approach, and not be corrected. SAB No. 108 now requires that companies view financial statement misstatements as material if they are material according to either the income statement or balance sheet approach. The Company adopted this guidance on January 1, 2007. The adoption did not have any effect on the Company's consolidated financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. This statement permits entities to choose to measure many financial instruments and certain other items at fair value. An entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. This statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company does not anticipate any material impact on its consolidated financial position or results of operations.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10, Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements (EITF 06-10). EITF 06-10 provides guidance for determining a liability for the postretirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The Company is currently assessing the impact of EITF 06-10 on its consolidated financial position and results of operations.

In December 2007, the FASB issued SFAS No. 141 (R), Business Combinations. This statement establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. This new pronouncement will impact the Company's accounting for business combinations completed beginning January 1, 2009.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51. This statement establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In December 2007, the SEC issued SAB No. 110 which amends and replaces Question 6 of Section D.2 of Topic 14, Share-Based Payment, of the Staff Accounting Bulletin series. Question 6 of Section D.2 of Topic 14 expresses the views of the staff regarding the use of the "simplified" method in developing an estimate of expected term of "plain vanilla" share options and allows usage of the "simplified" method for share option grants prior to December 31, 2007. SAB 110 allows public companies which do not have historically sufficient experience to provide a reasonable estimate to continue use of the

"simplified" method for estimating the expected term of "plain vanilla" share option grants after December 31, 2007. SAB 110 is effective January 1, 2008. The Company does not anticipate any material impact on its consolidated financial position or results of operations.

In December 2007, the SEC issued SAB No. 109, Written Loan Commitments Recorded at Fair Value Through Earnings expresses the views of the staff regarding written loan commitments that are accounted for at fair value through earnings under generally accepted accounting principles. To make the staff's views consistent with current authoritative accounting guidance, the SAB revises and rescinds portions of SAB No. 105, Application of Accounting Principles to Loan Commitments. Specifically, the SAB revises the SEC staff's views on incorporating expected net future cash flows related to loan servicing activities in the fair value measurement of a written loan commitment. The SAB retains the staff's views on incorporating expected net future cash flows related to internally-developed intangible assets in the fair value measurement of a written loan commitment. The staff expects registrants to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The Company does not expect SAB 109 to have a material impact on its consolidated financial statements.

In June 2007, the EITF reached a consensus on Issue No. 06-11, Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards (EITF 06-11). EITF 06-11 states that an entity should recognize a realized tax benefit associated with dividends on nonvested equity shares, nonvested equity share units and outstanding equity share options charged to retained earnings as an increase in additional paid in capital. The amount recognized in additional paid in capital should be included in the pool of excess tax benefits available to absorb potential future tax deficiencies on share-based payment awards. EITF 06-11 should be applied prospectively to income tax benefits of dividends on equity-classified share-based payment awards that are declared in fiscal years beginning after December 15, 2007. The Company expects that EITF 06-11 will not have an impact on its consolidated financial statements.

In May 2007, the FASB issued FASB Staff Position (FSP) FIN 48-1, Definition of Settlement in FASB Interpretation No. 48 (FSP FIN 48-1). FSP FIN 48-1 provides guidance on how to determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. FSP FIN 48-1 is effective retroactively to January 1, 2007. The implementation of this standard did not have a material impact on the Company's consolidated financial position or results of operations.

In February 2007, the FASB issued FASB Staff Position (FSP) FAS 158-1, Conforming Amendments to the Illustrations in FASB Statements No. 87, No. 88, and No 106 and to the Related Staff Implementation Guides. This FSP makes conforming amendments to other FASB statements and staff implementation guides and provides technical corrections to SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans. The conforming amendments in this FSP were adopted as of the effective date of SFAS No. 158. The adoption did not have a material impact on the Company's consolidated financial statements or disclosures.

Results of Operations for the years ended December 31, 2007 and 2006

Overview

The Company's net income decreased \$3.2 million, or 32.0%, to \$6.9 million or \$0.65 per diluted share for the year ended December 31, 2007, compared to \$10.1 million, or \$0.95 per diluted share for the prior year. There was a \$5.6 million, or 8.9%, increase in total interest income, reflecting a 12.6% increase in average loans outstanding and a 67.4% increase in average investment securities while interest expense increased \$9.6 million reflecting a 11.6% increase in average interest bearing deposits outstanding and higher rates as well as a 50.2% increase in average borrowings outstanding. Accordingly, net interest income decreased \$4.0 million. Contributing to the \$4.0 million decrease in net interest income was the impact of \$1.6 million in net interest income related to tax refund loans in 2006 which was not earned in 2007 due to the discontinuation of the program. Also there were interest reductions due

to the increase in non-performing loans in 2007. The provision for loan losses in 2007 increased \$226,000 to \$1.6 million, compared to \$1.4 million in 2006, reflecting the impact of a 2007 increase in non-accrual loans as well as an increase in reserves on certain loans due to a downturn in the housing market which was offset by \$283,000 in net tax refund recoveries in 2007 versus \$359,000 in net tax refund charge-offs in 2006. Non-interest income decreased \$567,000 to \$3.1 million in 2007 compared to \$3.6 million in 2006. Non-interest expenses increased \$347,000 to \$21.4 million compared to \$21.1 million in 2006. Return on average assets and average equity of 0.71% and 8.86% respectively in 2007 compared to 1.19% and 14.59% respectively in 2006.

Analysis of Net Interest Income

Historically, the Company's earnings have depended primarily upon Republic's net interest income, which is the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities. Net interest income is affected by changes in the mix of the volume and rates of interest-earning assets and interest-bearing liabilities. The following table provides an analysis of net interest income on an annualized basis, setting forth for the periods (i) average assets, liabilities, and shareholders' equity, (ii) interest income earned on interest-earning assets and interest expense on interest-bearing liabilities, (iii) average yields earned on interest-earning assets and average rates on interest-bearing liabilities, and (iv) Republic's net interest margin (net interest income as a percentage of average total interest-earning assets). Averages are computed based on daily balances. Non-accrual loans are included in average loans receivable. Yields are adjusted for tax equivalency in 2007 and 2006, as Republic had tax-exempt income. Republic had no tax exempt income on securities in 2005.

⁽¹⁾ Yields on investments are calculated based on amortized cost.

⁽²⁾ The net interest margin is calculated by dividing net interest income by average total interest earning assets. Both net interest income and net interest margin were increased in 2007 and 2006 over the financial statement amount, to adjust for tax equivalency.

Rate/Volume Analysis of Changes in Net Interest Income

Net interest income may also be analyzed by segregating the volume and rate components of interest income and interest expense. The following table sets forth an analysis of volume and rate changes in net interest income for the periods indicated. For purposes of this table, changes in interest income and expense are allocated to volume and rate categories based upon the respective changes in average balances and average rates.

	Year ended December 31,					31,	Year ended December 31,

Net Interest Income

The Company's tax equivalent net interest margin decreased 94 basis points to 3.26% for 2007 compared to 4.20% in 2006. Excluding the impact of tax refund loans, which were substantially all a first quarter 2006 event, the net interest margin was 3.26% in 2007 and 4.04% in 2006.

While yields on interest-bearing assets decreased 36 basis points to 7.38% in 2007 from 7.74% in 2006, the yield on total deposits and other borrowings increased 63 basis points to 4.36% in 2007 from 3.73% in 2006. The decrease in yields on assets resulted primarily from the high yield tax refund loans recorded in 2006 as well as interest reductions due to the increase in non accrual loans in 2007 and rate reductions in the last four months of 2007 on variable rate loans as a result of actions taken by the Federal Reserve. The increase in yields on deposits was due to the repricing of maturing time deposits at higher rates and increases in rates on money market and savings deposits. The cost of overnight borrowings decreased slightly as a result of actions taken by the Federal Reserve but those actions had limited immediate impact in reducing the cost of deposits.

The Company's tax equivalent net interest income decreased \$3.8 million, or 11.2%, to \$30.3 million for 2007 from \$34.1 million for 2006. As shown in the Rate Volume table above, the decrease in net interest income was due primarily to higher rates on deposits and lower rates on loans as discussed in the previous paragraph. These factors more than offset the impact of the growth in average interest-earning assets, primarily loans. Average interest-earning assets amounted to \$930.0 million for 2007 and \$811.8 million for 2006. The \$118.2 million increase resulted from

loan growth of \$91.6 million and securities growth of \$38.6 million.

The Company's total tax equivalent interest income increased \$5.8 million, or 9.2%, to \$68.6 million for 2007 from \$62.8 million for 2006. Interest and fees on loans increased \$3.9 million, or 6.7%, to \$62.2 million for 2007 from \$58.3 million for 2006. The increase in interest and fees on loans of \$3.9 million resulted from a 12.6% increase in average loans outstanding less interest reductions due to an increase in non-performing loans in 2007 and rate reductions on variable rate loans in the last four months of 2007. Also, \$1.9 million in interest on tax refund loans was realized in 2006. Interest and dividends on investment securities increased \$2.5 million to \$5.8 million for 2007 from \$3.3 million for 2006. The increase reflected an increase in average securities outstanding of \$38.6 million, or 67.4%, to \$95.7 million for 2007 from \$57.2 million for 2006. Interest on federal funds sold and other interest earning assets decreased \$605,000, or 46.9%, to \$686,000 for 2007

from \$1.3 million for 2006. The decrease reflected a \$12.0 million decrease in average balances to \$13.9 million for 2007 from \$25.9 million for 2006.

The Company's total interest expense increased \$9.6 million, or 33.6%, to \$38.3 million for 2007 from \$28.7 million for 2006. Interest-bearing liabilities averaged \$799.8 million for 2007 from \$686.2 million for 2006, or an increase of \$113.6 million. The increase reflected additional funding for loan and securities growth. Average deposit balances increased \$65.4 million while there was a \$44.5 million increase in average other borrowings. The average rate paid on interest-bearing liabilities increased 61 basis points to 4.79% for 2007 from 4.18% for 2006. Interest expense on time deposit balances increased \$4.7 million to \$18.8 million for 2007 from \$14.1 million for 2006. Money market and savings interest expense increased \$2.8 million to \$11.9 million for 2007 from \$9.1 million for 2006. The majority of the increase in interest expense on deposits reflected the higher average deposit balances as well as the higher short term interest rate environment for the first eight months of 2007. The 100 basis point decrease in short term interest rates from September 2007 through December 2007 had minimal effect on deposit rates in 2007. Accordingly, rates on total interest-bearing deposits increased 70 basis points in 2007 compared to 2006.

Interest expense on other borrowings increased \$2.2 million to \$7.1 million for 2007 from \$4.9 million for 2006, as a result of increased average balances. Average other borrowings, primarily overnight FHLB borrowings, increased \$44.5 million, or 50.2%, between those respective periods. Increases in balances were utilized to fund loan growth. Rates on other borrowings, primarily due to the 100 basis point decrease in short-term interest rates from September 2007 through December 2007 decreased to 5.35% for 2007 from 5.53% for 2006. Interest expense on other borrowings also included the impact of \$8.8 million of average trust preferred securities.

Provision for Loan Losses

The provision for loan losses is charged to operations in an amount necessary to bring the total allowance for loan losses to a level that reflects the known and inherent losses in the portfolio. The provision for loan losses amounted to \$1.6 million for 2007 compared to \$1.4 million for 2006. The 2006 provision reflected \$359,000 for net charge-offs of tax refund loans, which were more than offset by \$1.6 million in related net revenues. The comparable 2007 provision reflected \$283,000 for net recoveries on tax refund loans. This favorable variance was more than offset by an increase in the 2007 provision for loan losses of \$1.4 million for loans transferred to non-accrual status in 2007 and \$638,000 for increases in reserves on certain loans due to a downturn in the housing market. Those increases were partially offset by the reversal of reserves on loans which were paid down or otherwise disposed of. The remaining provisions in both both periods also reflected amounts required to increase the allowance for loan growth in accordance with the Company's methodology. Non-accrual loans increased from \$6.9 million at December 31, 2006 to \$22.3 million at December 31, 2007.

Non-Interest Income

Total non-interest income decreased \$567,000 to \$3.1 million for 2007 compared to \$3.6 million for 2006, primarily due to a decrease of \$292,000 related to service fees on deposit accounts. The decrease in service fees on deposit accounts reflected the termination of services to several large customers. In addition, other income decreased \$329,000 primarily due to fee recoveries recorded in 2006. Loan advisory and servicing fees decreased \$57,000 which was partially offset by a \$56,000 increase in bank owned life insurance income and a \$55,000 increase in gain on sales of other real estate owned.

Non-Interest Expenses

Total non-interest expenses increased \$347,000, or 1.7%, to \$21.4 million for 2007 from \$21.0 million in 2006. Salaries and employee benefits decreased \$1.0 million, or 8.7%, to \$10.6 million for 2007 from \$11.6 million in 2006. That decrease reflected a reduction in bonuses and incentives expense of \$1.0 million.

Occupancy expense increased \$533,000, or 28.2%, to \$2.4 million for 2007 compared to \$1.9 million for 2006. The increase reflected two additional branches which opened in the second and third quarters of 2006 as well as the corporate headquarters move in second quarter 2007 and an additional branch which opened in the third quarter of 2007.

Depreciation expense increased \$352,000, of 34.9%, to \$1.4 million for 2007 compared to \$1.0 million for 2006. The increase was primarily due to the impact of the three additional branch locations and the corporate headquarters move.

Legal fees increased \$96,000, or 14.7%, to \$750,000 for 2007 compared to \$654,000 for 2006 resulting from increased fees on a number of different matters.

Advertising expenses increased \$9,000, or 1.8%, to \$503,000 for 2007 compared to \$494,000 for 2006. The increase was primarily due to higher levels of print advertising.

Data processing increased \$197,000, or 39.7%, to \$693,000 for 2007 compared to \$496,000 for 2006, primarily due to Check 21 related expenses and other system enhancements.

Insurance expense increased \$45,000, or 12.7%, to \$398,000 for 2007 compared to \$353,000 for 2006, resulting from the overall growth of the Company.

Professional fees decreased \$20,000, or 3.6%, to \$542,000 for 2007 compared to \$562,000 for 2006, reflecting decreases in recruiting expenses.

Taxes, other increased \$79,000, or 10.7%, to \$820,000 for 2007 compared to \$741,000 for 2006. The increase reflected an increase in Pennsylvania shares tax, which is assessed at an amount of 1.25% on a 6 year moving average of regulatory capital. The full amount of the increase resulted from increased capital.

Other expenses increased \$60,000, or 1.9%, to \$3.2 million for 2007 compared to \$3.2 million for 2006, which reflected the impact of the three additional branch locations.

Provision for Income Taxes

The provision for income taxes decreased \$1.9 million to \$3.3 million from \$5.2 million for 2006. That decrease was primarily the result of the decrease in pre-tax income. The effective tax rates in those periods were 32% amd 34%, respectively.

Results of Operations for the years ended December 31, 2006 and 2005

Overview

The Company's net income increased \$1.2 million, or 13.8%, to \$10.1 million or \$1.04 per diluted share for the year ended December 31, 2006, compared to \$8.9 million, or \$0.93 per diluted share for the prior year. The improvement reflected a \$17.4 million, or 38.3%, increase in total interest income, due primarily to a 21.0% increase in average loans outstanding and secondarily to higher rates. Interest expense increased \$12.5 million, also reflecting higher rates, a 15.5% increase in average deposits outstanding and a 16.8% in average borrowings outstanding. Accordingly, net interest income increased \$4.9 million. Partially offsetting the increase in net interest income were the provision for loan losses (up approximately \$200 thousand), non-interest income (level with 2005 at \$3.6 million), and non-interest expenses (up \$2.8 million). The decrease in return on average assets and average equity from 1.19% and 14.59% respectively in 2006 compared to 1.22% and 15.22% respectively in 2005, resulted primarily from increased funding costs.

Net Interest Income

The Company's tax equivalent net interest margin decreased 3 basis points to 4.20% for 2006 compared to 4.23% for 2005. While yields on interest-earning assets increased 116 basis points to 7.74% in 2006 from 6.58% in 2005, the yield on total deposits and other borrowings increased 129 basis points to 3.73% from 2.44% between 2006 and 2005. The increases in yields on assets and cost of funds resulted primarily from the 300 basis points of increases in short-term interest rates between the two periods. The resulting decrease in margin reflected an increase in interest bearing assets of \$121.9 million, while interest bearing liabilities increased \$110.5 million.

The Company's tax equivalent net interest income increased \$5.0 million, or 17.1%, to \$34.1 million for 2006 from \$29.2 million for 2005. As shown in the Rate Volume table above, the increase in net interest income was due primarily to the increased volume of loans. Higher rates on loans resulted primarily from variable rate loans which immediately adjust to increases in the prime rate. Interest expense increased primarily as a result of higher rates, resulting from the higher short-term interest rate environment, and also reflected the impact of the increase in higher cost time deposit balances.

The Company's total tax equivalent interest income increased \$17.4 million, or 38.4%, to \$62.8 million for 2006, from \$45.4 million for 2005. Interest and fees on loans increased \$15.9 million to \$58.3 million for 2006, from \$42.3 million for 2005. The majority of the increase resulted from a 21.0% increase in average loan balances. For 2006, average loan balances amounted to \$728.8 million, compared to \$602.0 million in 2005. The balance of the increase in interest on loans resulted

primarily from the repricing of the variable rate loan portfolio to higher short term market interest rates. Tax equivalent interest and dividends on investment securities increased \$1.2 million to \$3.3 million for 2006, from \$2.0 million for 2005. This increase reflected rate increases on variable rate securities as well as an increase in average securities outstanding to \$57.2 million for 2006 from \$51.3 million for 2005. Interest on federal funds sold and other interest-earning assets increased \$213,000, or 19.8%, to \$1.3 million for 2006 from \$1.1 million for 2005 as increases in short term market interest rates more than offset the \$10.7 million decrease in average balances to \$25.9 million for 2006 from \$36.6 million for 2005.

The Company's total interest expense increased \$12.5 million, or 76.8%, to \$28.7 million for 2006, from \$16.2 million for 2005. Interest-bearing liabilities averaged \$686.2 million for 2006, from \$575.8 million for 2005, an increase of \$110.5 million. The increase reflected additional funding utilized for loan growth. Average time deposit (certificates of deposit) balances increased \$92.4 million, or 43.6%, to \$304.4 million for 2006 from \$212.0 million in 2005 while lower cost average transaction account balances declined \$1.1 million, or 0.3%, to \$375.5 million for 2006 from \$376.6 million for 2005. The average rate paid on interest-bearing liabilities increased 136 basis points to 4.18% for 2006. Money market and savings expense increased \$3.1 million to \$9.1 million for 2006 from \$6.0 million for 2005, due almost entirely to increases in short-term rates as average balances increased \$1.4 million, or 0.6%. Interest expense on time deposits increased \$7.3 million, or 107.8%, to \$14.1 million for 2006 from \$6.8 million for 2005, primarily as a result of the increased average balances as well as rates. As time deposits mature, they frequently reprice at market rates which are currently 5% or more. Interest expense on other borrowings increased \$1.8 million to \$4.9 million for 2006 from \$3.1 million for 2005, primarily as a result of higher short term rates. Average other borrowings, primarily overnight FHLB borrowings, increased \$12.7 million, or 16.8%, to \$88.6 million for 2006 from \$75.9 million for 2005. Rates on overnight borrowings reflected the higher short-term interest rate environment as the rate on other borrowings increased to 5.53% for 2006 from 4.05% for 2005. Interest expense on other borrowings also includes the interest expense on \$6.2 million of trust preferred securities which was approximately \$525,000 and \$444,000 in 2006 and 2005, respectively.

Provision for Loan Losses

The provision for loan losses is charged to operations in an amount necessary to bring the total allowance for loan losses to a level that reflects the known and estimated inherent losses in the portfolio. The provision for loan losses amounted to \$1.4 million in 2006. The provision reflected \$359,000 for net losses on tax refund loans, which were more than offset by \$1.6 million in related revenues, and amounts required to increase the allowance for loan growth in accordance with the Company's methodology. The prior year provision of \$1.2 million reflected \$496,000 for net losses on tax refund loans, which more than offset by \$1.2 million in related revenues. In addition, the 2005 provision was reduced as a result of a \$250,000 recovery on a commercial loan which had been charged off in the prior year. That recovery resulted in an allowance balance which exceeded the level deemed necessary by the Company's methodology and the provision was reduced accordingly.

Non-Interest Income

Total non-interest income increased \$26,000 to \$3.6 million for 2006. A \$661,000 increase in loan advisory and servicing fees and a \$130,000 gain on the sale of other real estate owned were offset by a decrease of \$521,000 in service fees on deposit accounts, a one time \$251,000 award in a lawsuit recorded in 2005, and a \$97,000 gain on call of security also recorded in 2005. The \$521,000 decrease in service fees on deposit accounts reflected the termination of services to several large customers.

Non-Interest Expenses

Total non-interest expenses increased \$2.8 million or 15.4% to \$21.0 million for 2006, from \$18.2 million for 2005. Salaries and employee benefits increased \$2.1 million or 21.5%, to \$11.6 million for 2006, from \$9.6 million for

2005. That increase reflected additional salary expense related to commercial loan and deposit production, including related support staff, and staff for two new branches. It also reflected annual merit increases which are targeted at approximately 3.5%.

Occupancy expense increased \$321,000, or 20.5%, to \$1.9 million for 2006, versus \$1.6 million for 2005. The increase reflected two additional branch locations which opened in 2006.

Depreciation expense increased \$17,000 or 1.7% to \$1.0 million for 2006. 2006 expense reflected the impact of the two additional branch locations, which was partially offset by the 2005 write-off assets determined to have shorter lives than originally expected.

Legal fees decreased \$19,000, or 2.8%, to \$654,000 in 2006, compared to \$673,000 in 2005, resulting from reduced fees on a number of different matters.

Other real estate expense decreased \$34,000, or 77.3%, to \$10,000 in 2006, compared to \$44,000 in 2005. The decrease resulted from the timing of property tax payments.

Advertising expense increased \$302,000, or 157.3%, to \$494,000 in 2006, compared to \$192,000 in 2005. The increase was primarily due to higher levels of TV, radio, print, and direct mail advertising including advertising two new branches and deposit promotions.

Data processing expense decreased \$8,000, or 1.6%, to \$496,000 in 2006, compared to \$504,000 in 2005.

Insurance expense increased \$57,000 or 19.3% to \$353,000 in 2006, compared to \$296,000 in 2005. The increase was primarily due the overall growth of the Company.

Professional fees decreased \$207,000 or 26.9% to \$562,000 in 2006, compared to \$769,000 in 2005. The decrease reflected lower expenses connected with Sarbanes-Oxley compliance.

Taxes, other than income increased \$53,000 or 7.7% to \$741,000 for 2006 versus \$688,000 for 2005. The increase reflected an increase in Pennsylvania shares tax resulting from increases in the Company's capital. The tax is assessed at an annual rate of 1.25% on a 6 year moving average of regulatory capital.

Other expenses increased \$268,000, or 9.2% to \$3.2 million for 2006, from \$2.9 million for 2005, which reflected increases of \$114,000 in training and development expenses, \$94,000 in expenses for the two additional branch locations and \$56,000 in loan production expense.

Provision for Income Taxes

The provision for income taxes for continuing operations increased \$721,000, to \$5.2 million for 2006, from \$4.5 million for 2005. That increase was primarily the result of the increase in pre-tax income. The effective tax rates in those periods were comparable at 34.0% and 33.5% respectively.

Financial Condition

December 31, 2007 Compared to December 31, 2006

Total assets increased \$7.5 million to \$1.016 billion at December 31, 2007, compared to \$1.009 billion at December 31, 2006. This net increase reflected a higher balance in loans offset by lower balances in cash and cash equivalents and investment securities.

Loans:

The loan portfolio, which represents the Company's largest asset, is its most significant source of interest income. The Company's lending strategy is to focus on small and medium sized businesses and professionals that seek highly personalized banking services. Total loans increased \$29.5 million, or 3.7%, to \$821.5 million at December 31, 2007, versus \$792.1 million at December 31, 2006. The increase reflected \$26.4 million, or 3.4%, of growth in commercial and construction loans. The loan portfolio consists of secured and unsecured commercial loans including commercial real estate, construction loans, residential mortgages, automobile loans, home improvement loans, home equity loans and lines of credit, overdraft lines of credit and others. Republic's commercial loans typically range between \$250,000 and \$5,000,000 but customers may borrow significantly larger amounts up to Republic's legal lending limit of

approximately \$15.0 million at December 31, 2007. Individual customers may have several loans that are secured by different collateral which are in total subject to that lending limit. The aggregate amount of those relationships that exceeded \$8.8 million at December 31, 2007, was \$372.9 million. The \$8.8 million threshold approximates 10% of total capital and reflects an additional internal monitoring guideline.

Investment Securities:

Investment securities available-for-sale are investments which may be sold in response to changing market and interest rate conditions and for liquidity and other purposes. The Company's investment securities available-for-sale consist primarily of U.S Government debt securities, U.S. Government agency issued mortgage backed securities, municipal securities and debt securities, which include corporate bonds and trust preferred securities. Available-for-sale securities totaled \$83.7 million at December 31, 2007, a decrease of \$18.4 million, or 18.0%, from year-end 2006. This decrease reflected \$28.2 million in proceeds from maturities and calls on securities partially offset by \$9.6 million in purchases of primarily mortgage backed and municipal securities. The purchases were made to decrease exposure to lower interest rate environments, and enhance net interest income. At December 31, 2007 and December 31, 2006, the portfolio had net unrealized gains of \$409,000 and \$427,000, respectively.

Investment securities held-to-maturity are investments for which there is the intent and ability to hold the investment to maturity. These investments are carried at amortized cost. The held-to-maturity portfolio consists primarily of debt securities and stocks. At December 31, 2007, securities held to maturity totaled \$282,000, a decrease of \$51,000 or 15.3%, from \$333,000 at year-end 2006. The decline reflected a reduction in the amount of debt securities. At both dates, respective carrying values approximated market values.

Restricted Stock:

Republic is required to maintain FHLB stock in proportion to its outstanding debt to FHLB. When the debt is repaid, the purchase price of the stock is refunded. At December 31, 2007, FHLB stock totaled \$6.2 million, a decrease of \$446,000, or 6.7%, from \$6.7 million at December 31, 2006.

Republic is also required to maintain ACBB stock as a condition of a contingency line of credit. At December 31, 2007 and 2006, ACBB stock totaled \$143,000.

Cash and Cash Equivalents:

Cash and due from banks, interest bearing deposits and federal funds sold comprise this category which consists of the Company's most liquid assets. The aggregate amount in these three categories decreased by \$9.9 million, to \$73.2 million at December 31, 2007, from \$83.1 million at December 31, 2006, primarily due to an \$8.5 million decrease in cash and due from banks.

Fixed Assets:

Bank premises and equipment, net of accumulated depreciation totaled \$11.3 million at December 31, 2007 an increase of \$5.6 million, or 99.9% from \$5.6 million at December 31, 2006, reflecting main office expenditures and branch expansion.

Other Real Estate Owned:

At December 31, 2007, the Company had assets classified as other real estate owned with a value of \$3.7 million comprised of a tract development project for single family homes with a value of \$3.5 million, a commercial building with a value of \$109,000 and a parcel of land with a value of \$42,000. At December 31, 2006, the Company had parcels of land classified as other real estate owned with a value of \$572,000, of which assets valued at \$530,000 were sold in 2007.

Bank Owned Life Insurance:

At December 31, 2007, the value of the insurance was \$11.7 million, an increase of \$424,000, or 3.8%, from \$11.3 million at December 31, 2006. The increase reflected income earned on the insurance policies.

Other Assets:

Other assets decreased by \$1.6 million to \$8.0 million at December 31, 2007, from \$9.6 million at December 31, 2006, primarily due to the effect of a \$2.5 million adjustment to the deferred tax asset (offset in other liabilities) partially offset by an increase of \$649,000 in assets related to a deferred compensation plan.

Deposits:

Deposits, which include non-interest and interest-bearing demand deposits, money market, savings and time deposits including some brokered deposits, are Republic's major source of funding. Deposits are generally solicited from the Company's market area through the offering of a variety of products to attract and retain customers, with a primary focus on multi-product relationships.

Total deposits increased by \$26.1 million to \$780.9 million at December 31, 2007, from \$754.8 million at December 31, 2006. Average transaction accounts increased 2.3% or \$8.7 million from the prior year end to \$384.2 million in 2007. Time deposits increased \$54.1 million, or 14.7%, to \$422.9 million at December 31, 2007, versus \$368.8 million at the prior year-end.

FHLB Borrowings and Overnight Advances:

FHLB borrowings and overnight advances are used to supplement deposit generation. Republic had no term borrowings at December 31, 2007 and December 31, 2006, respectively. Republic had short-term borrowings (overnight) of \$133.4 million at December 31, 2007 versus \$159.7 million at the prior year-end.

Subordinated Debt:

Subordinated debt amounted to \$11.3 million at December 31, 2007, compared to \$6.2 million at December 31, 2006, as a result of a \$5.2 million issuance of trust preferred securities in June 2007 at a rate of LIBOR plus 1.55%.

Shareholders' Equity:

Total shareholders' equity increased \$5.7 million to \$80.5 million at December 31, 2007, versus \$74.7 million at December 31, 2006. This increase was primarily the result of 2007 net income of \$6.9 million, partially offset by \$1.3 million for the purchase of treasury shares.

Commitments, Contingencies and Concentrations

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements.

Credit risk is defined as the possibility of sustaining a loss due to the failure of the other parties to a financial instrument to perform in accordance with the terms of the contract. The maximum exposure to credit loss under commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Company uses the same underwriting standards and policies in making credit commitments as it does for on-balance-sheet instruments.

Financial instruments whose contract amounts represent potential credit risk are commitments to extend credit of approximately \$160.2 million and \$163.2 million and standby letters of credit of approximately \$4.6 million and \$7.3 million at December 31, 2007 and 2006, respectively. Commitments often expire without being drawn upon. The \$160.2 million of commitments to extend credit at December 31, 2007, were substantially all variable rate commitments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and many

require the payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include real estate, marketable securities, pledged deposits, equipment and accounts receivable.

Standby letters of credit are conditional commitments issued that guarantee the performance of a customer to a third party. The credit risk and collateral policy involved in issuing letters of credit is essentially the same as that involved in extending loan commitments. The amount of collateral obtained is based on management's credit evaluation of the customer. Collateral held varies but may include real estate, marketable securities, pledged deposits, equipment and accounts receivable.

Contingencies also include a standby letter of credit issued by an unrelated bank in the amount of \$170,000 which was required by a lessor.

Contractual obligations and other commitments

The following table sets forth contractual obligations and other commitments representing required and potential cash outflows as of December 31, 2007:

(Dollars in thousands)	,	Total		ss than e Year	T	ne to hree ears	I	ree to Five Years	After Five Years
Minimum annual rentals or									
noncancellable	\$	44,926	\$	1,394	\$	3,426	\$	3,947	\$ 36,159
operating leases

Former CEO SERP		143		95		48		-	-
Director and Officer retirement plan									
obligations		1,467		117		177		252	921
Loan commitments		160,245	1	13,718		21,189		2,624	22,714
Standby letters of credit		4,613		4,451		54		108	-
Total	\$	647,406	\$ 5	527,548	\$	41,001	\$	7,667	\$ 71,190

As of December 31, 2007, the Company had entered into non-cancelable lease agreements for its main office and operations center, ten current Republic retail branch facilities, and a new branch facility scheduled to open in 2008, expiring through August 31, 2037, including renewal options. The leases are accounted for as operating leases. The minimum annual rental payments required under these leases are \$44.9 million through the year 2037. The Company has entered into employment agreements with the CEO of the Company and the President of Republic. The aggregate commitment for future salaries and benefits under these employment agreements at December 31, 2007 is approximately \$1.7 million. The Company has retirement plan agreements with certain Directors and Officers. The accrued benefits under the plan at December 31, 2007 was approximately \$1.5 million, with a minimum age of 65 established to qualify for the payments.

The Company and Republic are from time to time a party (plaintiff or defendant) to lawsuits that are in the normal course of business. While any litigation involves an element of uncertainty, management, after reviewing pending actions with its legal counsel, is of the opinion that the liability of the Company and Republic, if any, resulting from such actions will not have a material effect on the financial condition or results of operations of the Company and Republic.

At December 31, 2007, the Company had no foreign loans and no loan concentrations exceeding 10% of total loans except for credits extended to real estate operators and lessors in the aggregate amount of \$261.9 million, which represented 31.9% of gross loans receivable at December 31, 2007. Various types of real estate are included in this category, including industrial, retail shopping centers, office space, residential multi-family and others. In addition, credits extended for single family construction amounted to \$101.6 million, which represented 12.4% of gross loans receivable at December 31, 2007. Loan concentrations are considered to exist when there is amounts loaned to a multiple number of borrowers engaged in similar activities that management believes would cause them to be

similarly impacted by economic or other conditions.

Interest Rate Risk Management

Interest rate risk management involves managing the extent to which interest-sensitive assets and interest-sensitive liabilities are matched. The Company attempts to optimize net interest income while managing period-to-period fluctuations therein. The Company typically defines interest-sensitive assets and interest-sensitive liabilities as those that reprice within one year or less.

The difference between interest-sensitive assets and interest-sensitive liabilities is known as the "interest-sensitivity gap" ("GAP"). A positive GAP occurs when interest-sensitive assets exceed interest-sensitive liabilities repricing in the same time periods, and a negative GAP occurs when interest-sensitive liabilities exceed interest-sensitive assets repricing in the same time periods. A negative GAP ratio suggests that a financial institution may be better positioned to take advantage of declining interest rates rather than increasing interest rates, and a positive GAP ratio suggests the converse. Static GAP analysis describes interest rate sensitivity at a point in time. However, it alone does not accurately measure the magnitude of changes in net interest income since changes in interest rates do not impact all categories of assets and liabilities equally or simultaneously. Interest rate sensitivity analysis also requires assumptions about repricing certain categories of assets and liabilities. For purposes of interest rate sensitivity analysis, assets and liabilities are stated at either their contractual maturity, estimated likely call date, or earliest repricing opportunity. Mortgage backed securities and amortizing loans are scheduled based on their anticipated cash flow, including prepayments based on historical data and current market trends. Savings, money market and interest-bearing demand accounts do not have a stated maturity or repricing term and can be withdrawn or repriced at any time. Management estimates the repricing characteristics of these accounts based on historical performance and other deposit behavior assumptions. These deposits are not considered to reprice simultaneously and, accordingly, a portion of the deposits are moved into time brackets exceeding one year. However, management may choose not to reprice liabilities proportionally to changes in market interest rates, for competitive or other reasons.

Shortcomings, inherent in a simplified and static GAP analysis, may result in an institution with a negative GAP having interest rate behavior associated with an asset-sensitive balance sheet. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Furthermore, repricing characteristics of certain assets and liabilities may vary substantially within a given time period. In the event of a change in interest rates, prepayments and other cash flows could also deviate significantly from those assumed in calculating GAP in the manner presented in the table below.

The Company attempts to manage its assets and liabilities in a manner that optimizes net interest income in a range of interest rate environments. Management uses GAP analysis and simulation models to monitor behavior of its interest sensitive assets and liabilities. Adjustments to the mix of assets and liabilities are made periodically in an effort to provide steady growth in net interest income.

Management presently believes that the effect on Republic of any future fall in interest rates, reflected in lower yielding assets, could be detrimental since Republic may not have the immediate ability to commensurately decrease rates on its interest bearing liabilities, primarily time deposits, other borrowings and certain transaction accounts. An increase in interest rates could have a negative effect on Republic, due to a possible lag in the repricing of core deposits not assumed in the model.

The following tables present a summary of the Company's interest rate sensitivity GAP at December 31, 2007. Amounts shown in the table include both estimated maturities and instruments scheduled to reprice, including prime based loans. For purposes of these tables, the Company has used assumptions based on industry data and historical experience to calculate the expected maturity of loans because, statistically, certain categories of loans are prepaid before their maturity date, even without regard to interest rate fluctuations. Additionally, certain prepayment assumptions were made with regard to investment securities based upon the expected prepayment of the underlying collateral of the mortgage-backed securities. The interest rate on the trust preferred securities is variable and adjusts semi-annually.

Interest Sensitivity Gap At December 31, 2007 (Dollars in thousands)

⁽¹⁾ Demand, savings and money market accounts are shown to reprice based upon management's estimate of when rates would have to be increased to retain balances in response to competition. Such estimates are necessarily arbitrary and wholly judgmental.

In addition to the GAP analysis, the Company utilizes income simulation modeling in measuring its interest rate risk and managing its interest rate sensitivity. Income simulation considers not only the impact of changing market interest rates on forecasted net interest income, but also other factors such a yield curve relationships, the volume and mix of assets and liabilities and general market conditions.

Net Portfolio Value and Net Interest Income Analysis. Our interest rate sensitivity also is monitored by management through the use of models which generate estimates of the change in its net portfolio value ("NPV") and net interest income ("NII") over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. The NPV ratio, under any interest rate scenario, is defined as the NPV in that scenario divided by the market value of assets in the same scenario. The following table sets forth our NPV as of December 31, 2007 and reflects the changes to NPV as a result of immediate and sustained changes in interest rates as indicated.

Change in	NPV as % of Portfolio							
Interest Rates In Basis Points	No	et Portfolio Value		Value of A	ssets			
(Rate Shock)	Amount	\$ Change (Do	% Change ollars in Thousands)	NPV Ratio	Change			
200bp	\$119,982	\$(11,534)	(8.77)%	12.06%	(98)bp			
100	126,123	(5,393)	(4.10)	12.58	(46)			
Static	131,516			13.04				
(100)	132,168	652	0.50	13.08	4			
(200)	131,426	(90)	(0.07)	13.00	(4)			

In addition to modeling changes in NPV, we also analyze potential changes to NII for a twelve-month period under rising and falling interest rate scenarios. The following table shows our NII model as of December 31, 2007.

Change in Interest Rates in				
Basis Points (Rate Shock)	Net Interest Income	\$ Change	% Change	
	(Dollars in Thousa	ands)	-	
200bp	\$28,862	\$(1,361)	(4.50)%	
100	29,628	(595)	(1.97)	
Static	30,223			
(100)	30,644	421	1.39	
(200)	31,330	1,107	3.67	

The above table indicates that as of December 31, 2007, in the event of an immediate and sustained 200 basis point increase in interest rates, the Company's net interest income for the 12 months ending December 31, 2007, subject to the significant limitations specified in the following paragraph, might decrease by \$1.4 million over the static scenario.

As is the case with the GAP Table, certain shortcomings are inherent in the methodology used in the above interest rate risk measurements. Modeling changes in NPV and NII require the making of certain assumptions which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the models presented assume that the composition of our interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in

interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the NPV measurements and net interest income models provide an indication of interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect

of changes in market interest rates on net interest income and will differ from actual results. It is unlikely that the increases in net interest income shown in the table would occur, if deposit rates continue to lag prime rate reductions.

The Company's management believes that the assumptions utilized in evaluating the Company's estimated net interest income are reasonable; however, the interest rate sensitivity of the Company's assets, liabilities and off-balance sheet financial instruments as well as the estimated effect of changes in interest rates on estimated net interest income could vary substantially if different assumptions are used or actual experience differs from the experience on which the assumptions were based. Periodically, the Company may and does make significant changes to underlying assumptions, which are wholly judgmental. Prepayments on residential mortgage loans and mortgage backed securities have increased over historical levels due to the lower interest rate environment, and may result in reductions in margins.

Capital Resources

The Company is required to comply with certain "risk-based" capital adequacy guidelines issued by the FRB and the FDIC. The risk-based capital guidelines assign varying risk weights to the individual assets held by a bank. The guidelines also assign weights to the "credit-equivalent" amounts of certain off-balance sheet items, such as letters of credit and interest rate and currency swap contracts. Under these guidelines, banks are expected to meet a minimum target ratio for "qualifying total capital" to weighted risk assets of 8%, at least one-half of which is to be in the form of "Tier 1 capital". Qualifying total capital is divided into two separate categories or "tiers". "Tier 1 capital" includes common stockholders' equity, certain qualifying perpetual preferred stock and minority interests in the equity accounts of consolidated subsidiaries, less goodwill, "Tier 2 capital" components (limited in the aggregate to one-half of total qualifying capital) includes allowances for credit losses (within limits), certain excess levels of perpetual preferred stock and certain types of "hybrid" capital instruments, subordinated debt and other preferred stock. Applying the federal guidelines, the ratio of qualifying total capital to weighted-risk assets, was 11.01% and 10.30% at December 31, 2007 and 2006, respectively, and as required by the guidelines, at least one-half of the qualifying total capital consisted of Tier 1 capital elements. Tier 1 risk-based capital ratios on December 31, 2007 and 2006 were 10.07% and 9.46%, respectively. At December 31, 2007 and 2006, the Company exceeded the requirements for risk-based capital adequacy under both federal and Pennsylvania state guidelines.

Under FRB and FDIC regulations, a bank and a holding company are deemed to be "well capitalized" when it has a "leverage ratio" ("Tier I capital to total assets") of at least 5%, a Tier I capital to weighted-risk assets ratio of at least 6%, and a total capital to weighted-risk assets ratio of at least 10%. At December 31, 2007 and 2006, the Company's leverage ratio was 9.44% and 8.75%, respectively. Accordingly, at December 31, 2007 and 2006, the Company was considered "well capitalized" under FRB and FDIC regulations.

On November 28, 2001, Republic First Bancorp, Inc., through a pooled offering with Sandler O'Neill & Partners, issued \$6.2 million of corporation-obligated mandatorily redeemable capital securities of the subsidiary trust holding solely junior subordinated debentures of the corporation more commonly known as trust preferred securities. The purpose of the issuance was to increase capital as a result of the Company's continued loan and core deposit growth. The trust preferred securities qualify as Tier 1 capital for regulatory purposes in amounts up to 25% of total Tier 1 capital. The Company had the ability to call the securities on any interest payment date after five years, without a prepayment penalty, notwithstanding their final 30 year maturity. The interest rate was variable and adjustable semi-annually at 3.75% over the 6 month London Interbank Offered Rate ("Libor"). The Company did call the securities in December 2006 and then issued \$6.2 million in Trust Preferred Securities at a variable interest rate, adjustable quarterly, at 1.73% over the 3 month Libor. The Company may call the securities on any interest payment date after five years.

On June 28, 2007, the Company, through a pooled offering, issued an additional \$5.2 million of corporation-obligated mandatorily redeemable capital securities of the subsidiary trust holding solely junior subordinated debentures of the

corporation more commonly known as Trust Preferred Securities for the same purpose as the 2001 issuance. The Company has the ability to call the securities or any interest payment date after five years, without a prepayment penalty, notwithstanding their final 30 year maturity. The interest rate is variable, adjustable quarterly, at 1.55% over the 3 month Libor.

The shareholders' equity of the Company as of December 31, 2007, totaled approximately \$80.5 million compared to approximately \$74.7 million as of December 31, 2006. This increase of \$5.7 million reflected 2007 net income of \$6.9 million, less \$1.3 million for the purchase of treasury shares. That net income increased the book value per share of the Company's common stock from \$7.16 as of December 31, 2006, based upon 10,445,332 shares outstanding (restated for a 10% stock dividend), to \$7.80 as of December 31, 2007, based upon 10,320,908 shares outstanding at December 31, 2007, as adjusted for treasury stock.

Regulatory Capital Requirements

Federal banking agencies impose three minimum capital requirements on the Company's risk-based capital ratios based on total capital, Tier 1 capital, and a leverage capital ratio. The risk-based capital ratios measure the adequacy of a bank's capital against the riskiness of its assets and off-balance sheet activities. Failure to maintain adequate capital is a basis for "prompt corrective action" or other regulatory enforcement action. In assessing a bank's capital adequacy, regulators also consider other factors such as interest rate risk exposure; liquidity, funding and market risks; quality and level or earnings; concentrations of credit, quality of loans and investments; risks of any nontraditional activities; effectiveness of bank policies; and management's overall ability to monitor and control risks.

The following table presents the Company's regulatory capital ratios at December 31, 2007 and 2006:

					To be	well

Management believes that the Company and Republic met, as of December 31, 2007 and 2006, all capital adequacy requirements to which they are subject. As of December 31, 2007, the FDIC categorized Republic as well capitalized under the regulatory framework for prompt corrective action provisions of the Federal Deposit Insurance Act. There are no calculations or events since that notification, which management believes would have changed Republic's category.

The Company and Republic's ability to maintain the required levels of capital is substantially dependent upon the success of their capital and business plans, the impact of future economic events on Republic's loan customers and Republic's ability to manage its interest rate risk, growth and other operating expenses.

In addition to the above minimum capital requirements, the Federal Reserve Bank approved a rule that became effective on December 19, 1992, implementing a statutory requirement that federal banking regulators take specified "prompt corrective action" when an insured institution's capital level falls below certain levels. The rule defines five capital categories based on several of the above capital ratios. Republic currently exceeds the levels required for a bank to be classified as "well capitalized". However, the Federal Reserve Bank may consider other criteria when determining such classifications, which criteria could result in a downgrading in such classifications.

The Company's equity to assets ratio increased to 7.92% as of December 31, 2007, from 7.41% as of December 31, 2006. The increase at year-end 2007 was the result of 2007 net income of \$6.9 million. The Company's average equity to assets ratio for 2007, 2006 and 2005 was 8.01%, 8.17% and 7.99%, respectively. The Company's average return on equity for 2007, 2006 and 2005 was 8.86%, 14.59% and 15.22%, respectively; and its average return on assets for 2007, 2006 and 2005, was 0.71%, 1.19% and 1.22%, respectively.

Liquidity

Financial institutions must maintain liquidity to meet day-to-day requirements of depositors and borrowers, time investment purchases to market conditions and provide a cushion against unforeseen needs. Liquidity needs can be met by either reducing assets or increasing liabilities. The most liquid assets consist of cash, amounts due from banks and federal funds sold.

Regulatory authorities require the Company to maintain certain liquidity ratios such that Republic maintains available funds, or can obtain available funds at reasonable rates, in order to satisfy commitments to borrowers and the demands of depositors. In response to these requirements, the Company has formed an Asset/Liability Committee (ALCO), comprised of certain members of Republic's board of directors and senior management, which monitors such ratios. The purpose of the committee is, in part, to monitor Republic's liquidity and adherence to the ratios in addition to managing relative interest rate risk. The ALCO meets at least quarterly.

The Company's most liquid assets, comprised of cash and cash equivalents on the balance sheet, totaled \$73.2 million at December 31, 2007, compared to \$83.1 million at December 31, 2006. Loan maturities and repayments are another source of asset liquidity. At December 31, 2007, Republic estimated that in excess of \$50.0 million of loans would mature or repay in the six-month period ended June 30, 2008. Additionally, the majority of its securities are available to satisfy liquidity requirements through pledges to the FHLB to access Republic's line of credit.

Funding requirements have historically been satisfied by generating core deposits and certificates of deposit with competitive rates, buying federal funds or utilizing the facilities of the Federal Home Loan Bank System ("FHLB"). At December 31, 2007, Republic had \$113.1 million in unused lines of credit available under arrangements with the FHLB and with correspondent banks, compared to \$82.7 million at December 31, 2006. The increase in available lines resulted from Republic's decreased level of overnight borrowings against these lines. Management believes it satisfactorily exceeds regulatory liquidity guidelines. These lines of credit enable Republic to purchase funds for short to long-term needs at rates often lower than other sources and require pledging of securities or loan collateral.

At December 31, 2007, the Company had outstanding commitments (including unused lines of credit and letters of credit) of \$164.9 million. Certificates of deposit scheduled to mature in one year totaled \$406.9 million at December 31, 2007. The Company anticipates that it will have sufficient funds available to meet its current commitments. In addition, the Company can use term borrowings to replace these borrowed funds.

Republic's target and actual liquidity levels are determined by comparisons of the estimated repayment and marketability of Republic's interest-earning assets with projected future outflows of deposits and other liabilities. Republic has established a contingency line of credit with a correspondent bank to assist in managing Republic's liquidity position. That line of credit totaled \$15.0 million at December 31, 2007. Republic had drawn down \$0 on this line at December 31, 2007. Republic has also established a line of credit with the Federal Home Loan Bank of Pittsburgh with a maximum borrowing capacity of approximately \$211.5 million. That \$211.5 million capacity is reduced by advances outstanding to arrive at the unused line of credit available. As of December 31, 2007 and 2006, Republic had borrowed \$113.4 million and \$139.7 million, respectively from the FHLB. Investment securities represent a primary source of liquidity for Republic. Accordingly, investment decisions generally reflect liquidity over other considerations. Additionally, Republic has uncollateralized overnight advances with PNC. As of December 31, 2007 and 2006, there were \$20.0 million and \$20.0 million of such overnight advances outstanding.

Operating cash flows are primarily derived from cash provided from net income during the year and are another source of liquidity.

The Company's primary short-term funding sources are certificates of deposit and its securities portfolio. The circumstances that are reasonably likely to affect those sources are as follows. Republic has historically been able to generate certificates of deposit by matching Philadelphia market rates or paying a premium rate of 25 to 50 basis points over those market rates. It is anticipated that this source of liquidity will continue to be available; however, the incremental cost may vary

depending on market conditions. The Company's securities portfolio is also available for liquidity, most likely as collateral for FHLB advances. Because of the FHLB's AAA rating, it is unlikely those advances would not be available. But even if they are not, numerous investment companies would likely provide repurchase agreements up to the amount of the market value of the securities.

The ALCO committee is responsible for managing the liquidity position and interest sensitivity of Republic. That committee's primary objective is to maximize net interest income while configuring Republic's interest-sensitive assets and liabilities to manage interest rate risk and provide adequate liquidity for projected needs.

Investment Securities Portfolio

Republic's investment securities portfolio is intended to provide liquidity and contribute to earnings while diversifying credit risk. The Company attempts to maximize earnings while minimizing its exposure to interest rate risk. The securities portfolio consists primarily of U.S. Government agency securities, mortgage backed securities, municipal securities, corporate bonds and trust preferred securities. The Company's ALCO monitors and approves all security purchases. The increase in securities in 2006 was a result of the Company's desire to reduce its exposure to lower rate environments, by purchasing long term bonds. The decline in securities in 2007 primarily reflected the maturity of an eighteen month security.

A summary of investment securities available-for-sale and investment securities held-to-maturity at December 31, 2007, 2006 and 2005 follows.

The Company's loan portfolio consists of secured and unsecured commercial loans including commercial real estate loans, loans secured by one-to-four family residential property, commercial construction and residential construction loans as well as residential mortgages, home equity loans and other consumer loans. Commercial loans are primarily secured term loans made to small to medium-sized businesses and professionals for working capital, asset acquisition and other purposes. Commercial loans are originated as either fixed or variable rate loans with typical terms of 1 to 5 years. Republic's commercial loans typically range between \$250,000 and \$5.0 million but customers may borrow significantly larger amounts up to Republic's legal lending limit of approximately \$15.0 million at December 31, 2007. Individual customers may have several loans often secured by different collateral. Such relationships in excess of \$8.8 million (an internal monitoring guideline which approximates 10% of capital and reserves) at December 31, 2007, amounted to \$372.9 million. There were no loans in excess of the legal lending limit at December 31, 2007.

The Company's total loans increased \$29.5 million, or 3.7%, to \$821.5 million at December 31, 2007, from \$792.1 million at December 31, 2006. That increase reflected a \$11.0 million, or 2.4%, increase in real estate secured loans, which represents the Company's largest loan portfolio. The increase also reflected a \$9.9 million, or 4.5%, increase in construction loans.

The following table sets forth the Company's gross loans by major categories for the periods indicated:

	A	t December 3	1,	
	(Do	llars in thousa	nds)	
2007	2006	2005	2004	2003

⁽¹⁾ Residential real estate secured is comprised of jumbo residential first mortgage loans for all years presented.

Loan Maturity and Interest Rate Sensitivity

The amount of loans outstanding by category as of the dates indicated, which are due in (i) one year or less, (ii) more than one year through five years and (iii) over five years, is shown in the following table. Loan balances are also categorized according to their sensitivity to changes in interest rates:

	At December 31, 2007 (Dollars in thousands)											
		Commercial and Commercial Real Estate		Construction and Land Development		Residential Real Estate		onsumer d Other		Total		
Fixed Rate												
1 year or less	\$	77,004	\$	9,254	\$	-	\$	381	\$	86,639		
1-5 years		255,289		6,840		-		1,143		263,272		
After 5 years		90,371		17,224		5,960		5,054		118,609		
Total fixed rate		422,664		33,318		5,960		6,578		468,520		
Adjustable Rate												
1 year or less		63,787		152,270		-		986		217,043		
1-5 years		22,900		18,983		-		187		42,070		
After 5 years		53,320		24,045		-		16,551		93,916		
Total adjustable rate		140,007		195,298		-		- 17,724		353,029		
Total	\$	562,671	\$	228,616	\$	5,960	\$	24,302	\$	821,549		

In the ordinary course of business, loans maturing within one year may be renewed, in whole or in part, as to principal amount, at interest rates prevailing at the date of renewal.

At December 31, 2007, 57.0% of total loans were fixed rate compared to 51.3% at December 31, 2006.

Credit Quality

Republic's written lending policies require specified underwriting, loan documentation and credit analysis standards to be met prior to funding, with independent credit department approval for the majority of new loan balances. A committee of the Board of Directors oversees the loan approval process to monitor that proper standards are maintained, while approving the majority of commercial loans.

Loans, including impaired loans, are generally classified as non-accrual if they are past due as to maturity or payment of interest or principal for a period of more than 90 days, unless such loans are well-secured and in the process of collection. Loans that are on a current payment status or past due less than 90 days may also be classified as non-accrual if repayment in full of principal and/or interest is in doubt.

Loans may be returned to accrual status when all principal and interest amounts contractually due are reasonably assured of repayment within an acceptable period of time, and there is a sustained period of repayment performance by the borrower, in accordance with the contractual terms.

While a loan is classified as non-accrual or as an impaired loan and the future collectibility of the recorded loan balance is doubtful, collections of interest and principal are generally applied as a reduction to principal outstanding. When the future collectibility of the recorded loan balance is expected, interest income may be recognized on a cash basis. For non-accrual loans which have been partially charged off, recognition of interest on a cash basis is limited to

that which would have been recognized on the recorded loan balance at the contractual interest rate. Cash interest receipts in excess of that amount are recorded as recoveries to the allowance for loan losses until prior charge-offs have been fully recovered.

The following summary shows information concerning loan delinquency and non-performing assets at the dates indicated.

	At December 31,											
		2007		2006	2005		2004			2003		
				(Do	ollars	in thousa	nds)

Total non-performing assets (1)	\$	25,961	\$	7,488	\$	3,560	\$	4,991	\$	8,273		
Non-performing loans as a percentage of												
total												
loans, net of unearned income (1) (2)		2.71%)	0.87%	'n	0.50%	\acute{o}	0.88%)	1.75%		
Non-performing assets as a percentage of												
total assets		2.55%)	0.74%	'n	0.42%	\acute{o}	0.75%)	1.33%		

⁽¹⁾ Non-performing loans are comprised of (i) loans that are on a non-accrual basis, (ii) accruing loans that are 90 days or more past due and (iii) restructured loans. Non-performing assets are composed of non-performing loans and other real estate owned.

(2) Includes loans held for sale.

Total non-performing loans increased \$15.4 million to \$22.3 million at December 31, 2007, from \$6.9 million at the prior year-end. The \$15.4 million increase in 2007 non-performing loans compared to 2006 reflected the transfer of loans to two borrowers totaling \$20.0 million to non-accrual status, partially offset by the payoff of one loan totaling \$1.9 million, the charge off and paydown of loans to one borrower totaling \$1.0 million, and the paydown and transfer to substandard of one loan totaling \$2.0 million. Problem loans consist of loans that are included in performing loans, but for which potential credit problems of the borrowers have caused management to have serious doubts as to the ability of such borrowers to continue to comply with present repayment terms. At December 31, 2007, all identified problem loans are included in the preceding table, or are classified as substandard or doubtful, with a reserve allocation in the allowance for loan losses (see "Allowance For Loan Losses").

The following summary shows the impact on interest income of non-accrual loans for the periods indicated:

	For the Year Ended December 31,										
	2007		2006		2005	2004			2003		
Interest income that would have been											
recorded											
had the loans been in accordance with their											
original terms	\$ 1,447,000	\$	479,000	\$	165,000	\$	391,000	\$	253,000		
Interest income included in net income	\$ -	\$	_	\$	_	\$	170,000	\$	_		

At December 31, 2007, the Company had no foreign loans and no loan concentrations exceeding 10% of total loans except for credits extended to non-residential building operators and real estate agents and managers in the aggregate

amount of \$261.9 million, which represented 31.9% of gross loans receivable at December 31, 2007. Various types of real estate are included in this category, including industrial, retail shopping centers, office space, residential multi-family and others. In addition, credits were extended for single family construction in the amount of \$101.6 million, which represented 12.4% of gross loans receivable at December 31, 2007. Loan concentrations are considered to exist when multiple number of borrowers are engaged in similar activities that management believes would cause them to be similarly impacted by economic or other conditions. Republic had no credit exposure to "highly leveraged transactions" at December 31, 2007 as defined by the FRB.

Allowance for Loan Losses

A detailed analysis of the Company's allowance for loan losses for the years ended December 31, 2007, 2006, 2005, 2004 and 2003 is as follows: (Dollars in thousands)

	For the Year Ended December 31,

⁽¹⁾ Includes non-accruing loans.

In 2007, the Company charged-off commercial loans to three borrowers totaling \$1.4 million. In 2006, the Company charged-off commercial loans to three borrowers totaling \$523,000. There were no charge-offs on tax refund loans in 2007 as the Company did not purchase tax refund loans in that year. Charge-offs on tax refund loans amounted to \$1.3 million in 2006. Recoveries on tax refund loans decreased to \$283,000 in 2007, from \$927,000 in 2006 as a result of the discontinuation of the tax refund loan program in 2007. Management makes at least a quarterly determination as to an appropriate provision from earnings to maintain an allowance for loan losses that is management's best estimate of known and inherent losses. The Company's Board of Directors periodically reviews the status of all non-accrual and impaired loans and loans classified by Republic's regulators or internal loan review officer, who reviews both the loan portfolio and overall adequacy of the allowance for loan losses. The Board of Directors also considers specific loans, pools of similar loans, historical charge-off activity, economic conditions and other relevant factors in reviewing the adequacy of the loan loss reserve. Any additions deemed necessary to the allowance for loan losses are charged to operating expenses.

⁽²⁾ Excluding tax refund loan net charge-offs, ratios were 0.17%, 0.08% and (0.04)% in 2007, 2006 and 2005, respectively.

The Company has an existing loan review program, which monitors the loan portfolio on an ongoing basis. Loan review is conducted by a loan review officer who reports quarterly, directly to the Board of Directors.

Estimating the appropriate level of the allowance for loan losses at any given date is difficult, particularly in a continually changing economy. In Management's opinion, the allowance for loan losses was appropriate at December 31, 2007. However, there can be no assurance that, if asset quality deteriorates in future periods, additions to the allowance for loan losses will not be required.

Republic's management is unable to determine in which loan category future charge-offs and recoveries may occur. The following schedule sets forth the allocation of the allowance for loan losses among various categories. The allocation is accordingly based upon historical experience. The entire allowance for loan losses is available to absorb loan losses in any loan category:

	At December 31,

⁽¹⁾ Gross loans net of unearned income.

The methodology utilized to estimate the amount of the allowance for loan losses is as follows: The Company first applies an estimated loss percentage against all loans which are not specifically reserved. In 2007, excluding tax refund loans, the Company experienced net charge-offs to average loans of approximately 0.17%. Net recoveries and net charge-offs, respectively, excluding short-term and tax refund loans, to average loans were 0.08%, (0.04)%, (0.03)% and (0.15)% in 2006, 2005, 2004 and 2003. In the absence of sustained charge-off history, management estimates loss percentages based upon the purpose and/or collateral of various commercial loan categories. While such loss percentages exceed the percentages suggested by historical experience, the Company maintained those percentages in 2007. The Company will continue to evaluate these percentages and may adjust these estimates on the basis of charge-off history, economic conditions, industry experience or other relevant factors. The Company also provides specific reserves for impaired loans to the extent the estimated realizable value of the underlying collateral is less than the loan balance, when the collateral is the only source of repayment. Also, the Company estimates and recognizes reserve allocations on loans classified as "doubtful", "substandard" or "special mention" based upon any factor that might impact loss estimates. Those factors include but are not limited to the impact of economic conditions on the borrower and management's potential alternative strategies for loan or collateral disposition. At December 31, 2005, the unallocated component increased \$87,000 to \$824,000 from \$737,000 at December 31, 2004. The unallocated component decreased \$536,000 from \$824,000 at December 31, 2005 to \$288,000 at December 31, 2006 as the Company integrated the revised Interagency Policy Statement on the allowance for loan losses issued by the FDIC in December 2006. As of December 31, 2007, the unallocated component decreased \$39,000 to \$249,000 from \$288,000 at December 31, 2006. Total loans at December 31, 2007, increased to \$821.5 million from \$792.1 million at the prior year-end. The unallocated allowance is established for losses that have not been identified through the formulaic and other specific components of the allowance as described above. The unallocated portion is more subjective and requires a high degree of management judgment and experience. Management has identified several factors that impact credit losses that are not considered in either the formula or the specific allowance segments. These factors consist of macro and micro economic conditions, industry and geographic loan concentrations, changes in the composition of the loan portfolio, changes in underwriting processes and trends in problem loan and loss recovery rates. The impact of the above is considered in light of management's conclusions as to the overall adequacy of underlying collateral and other factors.

⁽²⁾ Includes loans held for sale.

The majority of the Company's loan portfolio represents loans made for commercial purposes, while significant amounts of residential property may serve as collateral for such loans. The Company attempts to evaluate larger loans individually, on the basis of its loan review process, which scrutinizes loans on a selective basis; and other available information. Even if all commercial purpose loans could be reviewed, there is no assurance that information on potential problems would be available. The Company's portfolios of loans made for purposes of financing residential mortgages and consumer loans are evaluated in groups. At December 31, 2007, loans made for commercial and construction, residential mortgage and consumer purposes, respectively, amounted to \$791.3 million, \$6.0 million and \$24.3 million.

The recorded investment in loans that are impaired in accordance with SFAS No. 114 totaled \$22.3 million, \$6.9 million and \$3.4 million at December 31, 2007, 2006 and 2005 respectively. The amounts of related valuation allowances were \$1.6 million, \$1.8 million and \$1.6 respectively at those dates. For the years ended December 31, 2007, 2006 and 2005 the average

recorded investment in impaired loans was approximately \$16.1 million, \$5.3 million, and \$3.5 million, respectively. The Company did not recognize any interest income on impaired loans during 2007, 2006 or 2005. There were no commitments to extend credit to any borrowers with impaired loans as of the end of the periods presented herein.

At December 31, 2007 and 2006, accruing special mention loans totaled approximately \$10.6 million and \$2.9 million, respectively. The amounts of related valuation allowances were \$688,000 and \$61,000 respectively at those dates. At December 31, 2007 and 2006, accruing substandard loans totaled approximately \$702,000 and \$162,000 respectively. The amounts of related valuation were \$56,000 and \$28,000 respectively at those dates. There were no accruing doubtful loans at December 31, 2007 and 2006. Republic had delinquent loans as follows: (i) 30 to 59 days past due, at December 31, 2007 and 2006, in the aggregate principal amount of \$3.6 million and \$40,000 respectively; and (ii) 60 to 89 days past due, at December 31, 2007 and 2006 in the aggregate principal amount of \$1.6 million and \$2.5 million respectively.

The following table is an analysis of the change in Other Real Estate Owned for the years ended December 31, 2007 and 2006.

Dollars in thousands

	2007	2006	
Balance at January 1,	\$ 572	\$ 137	
Additions, net	3,639	572	
Sales	530	137	
Balance at December 31,	\$ 3,681	\$ 572	

Deposit Structure

Of the total daily average deposits of approximately \$745.3 million held by Republic during the year ended December 31, 2007, approximately \$78.6 million, or 10.6%, represented non-interest bearing demand deposits, compared to approximately \$82.2 million, or 12.1%, of total daily average deposits during 2006. Total deposits at December 31, 2007, consisted of \$99.0 million in non-interest-bearing demand deposits, \$35.2 million in interest-bearing demand deposits, \$223.6 million in savings and money market accounts, \$179.0 million in time deposits under \$100,000 and \$243.9 million in time deposits greater than \$100,000.

The following table is a distribution of Republic's deposits for the periods indicated:

	At December 31, (Dollars in thousands)											
		2007 2006 2005 2004										
Demand deposits, non-interest bearing	\$	99,040	\$	78,131	\$	88,862	\$	97,790	\$	74,572		
Demand deposits, interest bearing		35,235		47,573		69,940		54,762		70,536		
Money market & savings deposits		223,645		260,246		223,129		170,980		98,196		
Time deposits		422,935		368,823		265,912		187,152		182,193		
Total deposits	\$	780,855	\$	754,773	\$	647,843	\$	510,684	\$	425,497		

In general, Republic pays higher interest rates on time deposits compared to other deposit categories. Republic's various deposit liabilities may fluctuate from period-to-period, reflecting customer behavior and strategies to optimize net interest income.

The following table is a distribution of the average balances of Republic's deposits and the average rates paid thereon, for the years ended December 31, 2007, 2006 and 2005.

Variable Interest Entities

In January 2003, the FASB issued FASB Interpretation 46 (FIN 46), Consolidation of Variable Interest Entities. FIN 46 clarifies the application of Accounting Research Bulletin 51, Consolidated Financial Statements, to certain entities in which voting rights are not effective in identifying the investor with the controlling financial interest. An entity is subject to consolidation under FIN 46 if the investors either do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support, are unable to direct the entity's activities, or are not exposed to the entity's losses or entitled to its residual returns ("variable interest entities"). Variable interest entities within the scope of FIN 46 will be required to be consolidated by their primary beneficiary. The primary beneficiary of a variable interest entity is determined to be the party that absorbs a majority of the entity's expected losses, receives a majority of its expected returns, or both.

Management previously determined that Republic First Capital Trust I, utilized for the Company's \$6,000,000 of pooled trust preferred securities issuance, qualifies as a variable interest entity under FIN 46. Republic First Capital Trust I ("RFCT") originally issued mandatorily redeemable preferred stock to investors and loaned the proceeds to the Company. The securities were subsequently reissued via a call during 2006 by Republic First Capital Trust II. Republic First Capital Trust II holds, as its sole asset, subordinated debentures issued by the Company in 2006. The Company issued an additional \$5,000,000 of pooled trust preferred securities in June 2007. Republic First Capital Trust III holds, as its sole asset, subordinated debentures issued by the Company in 2007.

The Company does not consolidate RFCT. FIN 46(R) precludes consideration of the call option embedded in the preferred stock when determining if the Company has the right to a majority of RFCT's expected residual returns. The non-consolidation

results in the investment in the common stock of RFCT to be included in other assets with a corresponding increase in outstanding debt of \$341,000. In addition, the income received on the Company's common stock investment is included in other income. The adoption of FIN 46R did not have a material impact on the financial position or results of operations. The Federal Reserve has issued final guidance on the regulatory capital treatment for the trust-preferred securities issued by RFCT as a result of the adoption of FIN 46(R). The final rule would retain the current maximum percentage of total capital permitted for trust preferred securities at 25%, but would enact other changes to the rules governing trust preferred securities that affect their use as part of the collection of entities known as "restricted core capital elements". The rule would take effect March 31, 2009; however, a five-year transition period starting March 31, 2004 and leading up to that date would allow bank holding companies to continue to count trust preferred securities as Tier 1 Capital after applying FIN-46(R). Management has evaluated the effects of the final rule and does not anticipate a material impact on its capital ratios.

Effects of Inflation

The majority of assets and liabilities of a financial institution are monetary in nature. Therefore, a financial institution differs greatly from most commercial and industrial companies that have significant investments in fixed assets or inventories. Management believes that the most significant impact of inflation on financial results is the Company's need and ability to react to changes in interest rates. As discussed previously, Management attempts to maintain an essentially balanced position between rate sensitive assets and liabilities over a one year time horizon in order to protect net interest income from being affected by wide interest rate fluctuations.

Item 7A: Quantitative and Qualitative Disclosure about Market Risk (Item 305 of Reg S-K)

See "Management Discussion and Analysis of Results of Operations and Financial Condition – Interest Rate Risk Management".

Item 8: Financial Statements and Supplementary Data

The consolidated financial statements of the Company begin on Page 53.

Item 9: Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A: Controls and Procedures

Evaluation of Disclosure Controls and Procedures. As of December 31, 2007, the end of the period covered by this Annual Report on From 10-K, the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer each concluded that as of December 31, 2007, the end of the period covered by this Annual Report on Form 10-K, the Company maintained effective disclosure controls and procedures.

Management's Report on Internal Control over Financial Reporting. The Company's management is responsible for establishing and maintaining effective internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities and Exchange Act of 1934). The Company's internal control over financial reporting is under the general oversight of the Board of Directors acting through the Audit Committee, which is composed entirely of independent directors. Beard Miller Company LLP, the Company's independent auditors, has direct and unrestricted access to the Audit Committee at all times, with no members of management present, to discuss its audit and any other matters that have come to its attention that may affect the Company's accounting, financial reporting or internal controls. The Audit Committee meets periodically with management, internal auditors and Beard Miller Company LLP to determine

that each is fulfilling its responsibilities and to support actions to identify, measure and control risk and augment internal control over financial reporting. Internal control over financial reporting, however, cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting as of December 31, 2007 based on the framework in "Internal Control- Integrated Framework" issued by the Committee of

Sponsoring Organizations of the Treadway Commission. Based upon that evaluation, management concluded that its internal control over financial reporting was effective as of December 31, 2007. Management's report on internal control over financial reporting is set forth in the Company's 2007 Annual Report, and is incorporated herein by reference. The Company's internal control over financial reporting has been audited by Beard Miller Company LLP, an independent, registered public accounting firm, as stated in its report, which is set forth in the Company's 2007 Annual Report and is incorporated herein by reference.

Changes in Internal Control Over Financial Reporting. No change in the Company's internal control over financial reporting occurred during the fourth quarter of the fiscal year ended December 31, 2007, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

new employees			
Total	737,841	\$6.39	(1)

⁽¹⁾ The amended plan includes an "evergreen formula" which provides that the maximum number of shares which may be issued is 1,540,000 shares plus an annual increase equal to the number of shares required to restore the maximum number of shares available for grant to 1,540,000 shares.

Item 13: Certain Relationships and Related Transactions, and Director Independence

Certain of the directors of the Company and/or their affiliates have loans outstanding from Republic. All such loans were made in the ordinary course of Republic's business; were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated persons; and, in the opinion of management, do not involve more than the normal risk of collectibility or present other unfavorable features. The information required by this Item is incorporated by reference from the definitive proxy materials of the Company to be filed with the Securities and Exchange Commission in connection with the Company's 2008 annual

meeting of share-holders scheduled for April 22, 2008.

Item 14. Principal Accountant Fees and Services

The information required by this Item is incorporated by reference from the definitive proxy materials of the Company to be filed with the Securities and Exchange Commission in connection with the Company's 2008 annual meeting of share–holders scheduled for April 22, 2008.

Management's Report on Internal Control Over Financial Reporting

Management of Republic First Bancorp, Inc. (the "Company") is responsible for establishing and maintaining effective internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Under the supervision and with the participation of management, including the principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation under the framework in Internal Control – Integrated Framework, management of the Company has concluded the Company maintained effective internal control over financial reporting, as such term is defined in Securities Exchange Act of 1934 Rules 13a-15(f), as of December 31, 2007.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting can also be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

Management is also responsible for the preparation and fair presentation of the consolidated financial statements and other financial information contained in this report. The accompanying consolidated financial statements were prepared in conformity with U.S. generally accepted accounting principles and include, as necessary, best estimates and judgments by management.

Beard Miller Company LLP, an independent registered public accounting firm, has audited the Company's consolidated financial statements as of and for the year ended December 31, 2007, and the effectiveness of the Company's internal control over financial reporting as of December 31, 2007, as stated in their reports, which are included herein.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders Republic First Bancorp, Inc.

We have audited Republic First Bancorp, Inc.'s (the "Company") internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Republic First Bancorp, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Republic First Bancorp, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance and the related consolidated statements of income, changes in shareholders' equity and cash flows of Republic First Bancorp, Inc. and our report dated March 10, 2008 expressed an unqualified opinion.

Beard Miller Company LLP Malvern, Pennsylvania March 10, 2008

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders Republic First Bancorp, Inc.

We have audited the accompanying consolidated balance sheets of Republic First Bancorp, Inc. and subsidiary as of December 31, 2007 and 2006, and the related consolidated related statements of income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2007. Republic First Bancorp, Inc.'s management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Republic First Bancorp, Inc. and subsidiary as of December 31, 2007 and 2006, and the results of their operations and its cash flows for each of the years in the three-year period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the consolidated financial statements, Republic First Bancorp, Inc. changed its method of Accounting for share-based compensation in 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Republic First Bancorp's internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 10, 2008 expressed an unqualified opinion.

REPUBLIC FIRST BANCORP, INC. AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Nature of Operations:

Republic First Bancorp, Inc. ("the Company") is a one-bank holding company organized and incorporated under the laws of the Commonwealth of Pennsylvania. It is comprised of one wholly owned subsidiary, Republic First Bank ("Republic"), a Pennsylvania state chartered bank. Republic offers a variety of banking services to individuals and businesses throughout the Greater Philadelphia and South Jersey area through its offices and branches in Philadelphia, Montgomery, Delaware and Camden Counties. The Company also has two unconsolidated subsidiaries for two trust preferred issuances.

Republic shares data processing, accounting, human resources and compliance services through BSC Services Corp. ("BSC"), which is a subsidiary of an unaffiliated company. BSC allocates its costs, on the basis of usage to Republic which classifies such costs to the appropriate non-interest expense categories.

The Company and Republic encounter vigorous competition for market share in the geographic areas they serve from bank holding companies, other community banks, thrift institutions and other non-bank financial organizations, such as mutual fund companies, insurance companies and brokerage companies.

The Company and Republic are subject to regulations of certain state and federal agencies. These regulatory agencies periodically examine the Company and its subsidiary for adherence to laws and regulations. As a consequence, the cost of doing business may be affected.

2. Summary of Significant Accounting Policies:

Basis of Presentation:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Republic. Such statements have been presented in accordance with accounting principles generally accepted in the United States of America or applicable to the banking industry. All significant inter-company accounts and transactions have been eliminated in the consolidated financial statements.

Risks and Uncertainties and Certain Significant Estimates:

The earnings of the Company depend primarily on the earnings of Republic. Earnings are dependent primarily upon the level of net interest income, which is the difference between interest earned on its interest-earning assets, such as loans and investments, and the interest paid on its interest-bearing liabilities, such as deposits and borrowings. Accordingly, the results of operations are subject to risks and uncertainties surrounding their exposure to change in the interest rate environment.

Prepayments on residential real estate mortgage and other fixed rate loans and mortgage backed securities vary significantly and may cause significant fluctuations in interest margins.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant estimates are made by management in determining the allowance for loan losses, carrying values of other real estate owned, assessment of other-than-temporary impairment, and income taxes. Consideration is given to a variety of factors in establishing these estimates. In estimating the allowance for loan losses, management considers current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, borrowers' perceived financial and managerial strengths, the adequacy of underlying collateral, if collateral dependent, or present value of future cash flows and other relevant factors. Since the allowance for loan losses and carrying value of other real estate owned are dependent, to a great extent, on the general economy and other conditions that may be beyond Republic's control, it is at least reasonably possible that the estimates of the allowance for loan losses and the carrying values of other real estate owned could differ materially in the near term.

The Company and Republic are subject to federal and state regulations governing virtually all aspects of their activities, including but not limited to, lines of business, liquidity, investments, the payment of dividends, and others. Such regulations and the cost of adherence to such regulations can have a significant impact on earnings and financial condition.

Cash and Cash Equivalents:

For purposes of the statements of cash flows, the Company considers all cash and due from banks, interest-bearing deposits with an original maturity of ninety days or less and federal funds sold, maturing in ninety days or less, to be cash and cash equivalents.

Restrictions on Cash and Due From Banks:

Republic is required to maintain certain average reserve balances as established by the Federal Reserve Board. The amounts of those balances for the reserve computation periods that include December 31, 2007 and 2006 were approximately \$700,000 and \$400,000, respectively. These requirements were satisfied through the restriction of vault cash and a balance at the Federal Reserve Bank of Philadelphia.

Investment Securities:

Debt and equity investment securities are classified and accounted for as follows:

Held to Maturity – Debt securities that management has the positive intent and ability to hold until maturity are classified as held to maturity and are carried at their remaining unpaid principal balances, net of unamortized premiums or unaccreted discounts. Premiums are amortized and discounts are accreted using the interest method over the estimated remaining term of the underlying security.

Available for Sale – Debt and equity securities that will be held for indefinite periods of time, including securities that may be sold in response to changes in market interest or prepayment rates, needs for liquidity, and changes in the availability of and in the yield of alternative investments, are classified as available for sale. These assets are carried at fair value. Fair value is determined using published quotes as of the close of business. Unrealized gains and losses are excluded from earnings and are reported net of tax as a separate component of stockholders' equity until realized. Realized gains and losses on the sale of investment and mortgage-backed securities are reported in the consolidated statements of income and determined using the adjusted cost of the specific security sold.

Other-Than-Temporary Impairment of Securities:

Securities are evaluated on at least a quarterly basis, and more frequently when market conditions warrant such an evaluation, to determine whether a decline in their value is other-than-temporary. To determine whether a loss in value is other-than-temporary, management utilizes criteria such as the reasons underlying the decline, the magnitude and duration of the decline and the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for an anticipated recovery in the fair value. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized. No impairment charge was recognized during the years ended December 31, 2007, 2006 and 2005.

Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2)

the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Loans and Allowance for Loan Losses:

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the amount of unpaid principal, reduced by unearned income and an allowance for loan losses. Interest on loans is calculated based upon the principal amounts outstanding. The Company defers and amortizes certain origination and commitment fees,

and certain direct loan origination costs over the contractual life of the related loan. This results in an adjustment of the related loans yield.

The Company accounts for amortization of premiums and accretion of discounts related to loans purchased and investment securities based upon the effective interest method. If a loan prepays in full before the contractual maturity date, any unamortized premiums, discounts or fees are recognized immediately as an adjustment to interest income.

Loans are generally classified as non-accrual if they are past due as to maturity or payment of principal or interest for a period of more than 90 days, unless such loans are well-secured and in the process of collection. Loans that are on a current payment status or past due less than 90 days may also be classified as non-accrual if repayment in full of principal and/or interest is in doubt. Loans may be returned to accrual status when all principal and interest amounts contractually due are reasonably assured of repayment within an acceptable period of time, and there is a sustained period of repayment performance of interest and principal by the borrower, in accordance with the contractual terms. Generally, in the case of non-accrual loans, cash received is applied to reduce the principal outstanding.

The allowance for loan losses is established through a provision for loan losses charged to operations. Loans are charged against the allowance when management believes that the collectibility of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance.

The allowance is an amount that represents management's best estimate of known and inherent loan losses. Management's evaluations of the allowance for loan losses consider such factors as an examination of the portfolio, past loss experience, the results of the most recent regulatory examination, current economic conditions and other relevant factors.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as either doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment, include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration of all the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment disclosures, unless such loans are the subject of a restructuring agreement.

The Company accounts for the transfers and servicing financial assets in accordance with SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities. SFAS No. 140 revises the standards

for accounting for the securitizations and other transfers of financial assets and collateral.

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

The Company accounts for guarantees in accordance with FIN 45 Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others. FIN 45 requires a guarantor entity, at the inception

of a guarantee covered by the measurement provisions of the interpretation, to record a liability for the fair value of the obligation undertaken in issuing the guarantee. The Company has financial and performance letters of credit. Financial letters of credit require the Company to make payment if the customer's financial condition deteriorates, as defined in the agreements. Performance letters of credit require the Company to make payments if the customer fails to perform certain non-financial contractual obligation. The maximum potential undiscounted amount of future payments of these letters of credit as of December 31, 2007 is \$4.6 million and they expire as follows: \$4.5 million in 2008, \$54,000 in 2009, \$6,000 in 2011 and \$103,000 in 2012. Amounts due under these letters of credit would be reduced by any proceeds that the Company would be able to obtain in liquidating the collateral for the loans, which varies depending on the customer.

The Company accounts for loan commitments in accordance with SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. SFAS No. 149 clarifies and amends SFAS No. 133 for implementation issues raised by constituents or includes the conclusions reached by the FASB on certain FASB Staff Implementation Issues. SFAS No. 149 also amends SFAS No. 133 to require a lender to account for loan commitments related to mortgage loans that will be held for sale as derivatives. The Company periodically enters into commitments with its customers, which it intends to sell in the future.

Premises and Equipment:

Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation of furniture and equipment is calculated over the estimated useful life of the asset using the straight-line method. Leasehold improvements are amortized over the shorter of their estimated useful lives or terms of their respective leases, using the straight-line method. Repairs and maintenance are charged to current operations as incurred, and renewals and betterments are capitalized.

Other Real Estate Owned:

Other real estate owned consists of assets acquired through, or in lieu of, loan foreclosure. They are held for sale and are initially recorded at fair value at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value, less the cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in net expenses from foreclosed assets. At December 31, 2007, the Company had assets classified as other real estate owned with a value of \$3.7 million comprised of a tract development project for single family homes with a value of \$3.5 million, a commercial building with a value of \$109,000 and a parcel of land with a value of \$42,000. At December 31, 2006, the Company had parcels of land classified as other real estate owned with a value of \$572,000, of which assets valued at \$530,000 were sold in 2007.

Bank Owned Life Insurance:

The Company invests in bank owned life insurance ("BOLI") as a source of funding to purchase life insurance on certain employees. The Company is the owner and beneficiary of the policies. This life insurance investment is carried at the cash surrender value of the underlying policies. Income from the increase in cash surrender value of the policies is included in other income on the income statement. At December 31, 2007 and 2006, the Company owned \$11.7 million and \$11.3 million, respectively, in BOLI. In 2007, 2006, and 2005 the Company recognized \$424,000, \$368,000, and \$331,000, respectively in related income.

Advertising Costs:

It is the Company's policy to expense advertising costs in the period in which they are incurred.

Income Taxes:

The Company accounts for income taxes under the liability method of accounting. Deferred tax assets and liabilities are established for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities at the tax rates expected to be in effect when the temporary differences are realized or settled. In addition, a deferred tax asset is recorded to reflect the future benefit of net operating loss carryforwards. The deferred tax assets may be reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Shareholders' Equity:

On March 19, 2007, the Company's Board of Directors declared a 10% stock dividend to shareholders of record on April 5, 2007, which was paid on April 17, 2007. On April 24, 2006, the Company's Board of Directors declared a 10% stock dividend to shareholders of record on May 5, 2006, which was paid on May 17, 2006. On May 17, 2005, the Company's Board of Directors declared a 12% stock dividend to shareholders of record on May 23, 2005, which was paid on June 7, 2005. All weighted average share and per share information has been retroactively restated.

On June 13, 2007, the Company implemented a stock repurchase program. The repurchase program will be in effect from time to time for carrying periods from and after June 14, 2007, through and including June 30, 2008. The aggregate amount of the Company stock to be repurchased will be determined by market conditions but will not exceed 5%, or approximately 500,000 shares, of the Company's issued and outstanding stock. The Company is executing the program through open market purchases. Stock repurchased under the repurchase program will be retired. Through December 31, 2007, 140,700 shares were repurchased.

Earnings Per Share:

(In thousands, except per share data)

Earnings per share ("EPS") consists of two separate components, basic EPS and diluted EPS. Basic EPS is computed by dividing net income by the weighted average number of common shares outstanding for each period presented. Diluted EPS is calculated by dividing net income by the weighted average number of common shares outstanding plus dilutive common stock equivalents ("CSE"). CSEs consist of dilutive stock options granted through the Company's stock option plan. The following table is a reconciliation of the numerator and denominator used in calculating basic and diluted EPS. CSEs which are anti-dilutive are not included in the following calculation. At December 31, 2007 and 2006, there were 264,842 and 12,100 stock options, respectively, to purchase common stock, which were excluded from the computation of earnings per share because the option price was greater than the average market price. No stock options were anti-dilutive at December 31, 2005. The following table is a comparison of EPS for the years ended December 31, 2007, 2006 and 2005. EPS has been restated for a stock dividend paid on April 17, 2007.

2007

Stock Based Compensation:

In December 2004, the Financial Accounting Standards Board ("FASB") issued SFAS No. 123R (revised 2004), "Share-Based Payment", which revises SFAS No. 123, "Accounting for Stock-Based Compensation", and supersedes Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees". This statement requires an entity to recognize the cost of employee services received in share-based payment transactions and measure the cost on the grant-date fair value of the award. That cost will be recognized over the period during which an employee is required to provide service in exchange for the award. The provisions of SFAS No. 123R were effective January 1, 2006.

In March 2005, the Securities and Exchange Commission (the "SEC") issued Staff Accounting Bulletin ("SAB") No. 107 which expressed the views of the SEC regarding the interaction between SFAS No. 123R and certain SEC rules and

regulations. SAB No. 107 provides guidance related to the valuation of share-based payment arrangements for public companies, including assumptions such as expected volatility and expected term.

In 2005, the Company vested all previously issued unvested options. As a result the impact of the adoption of SFAS No. 123 on operations in future periods will be the value imputed on future options grants using the methods prescribed in SFAS No. 123R.

At December 31, 2007, the Company maintains a Stock Option Plan (the "Plan") under which the Company grants options to its employees and directors. Under terms of the plan, 1.5 million shares of common stock, plus an annual increase equal to the number of shares needed to restore the maximum number of shares that may be available for grant under the plan to 1.5 million shares, are reserved for such options. The Plan provides that the exercise price of each option granted equals the market price of the Company's stock on the date of grant. Any options granted vest within one to five years and have a maximum term of 10 years.

For the year ended December 31, 2007, \$125,000 was recognized in compensation expense, with a 35% assumed tax benefit, for the Stock Option Plan. For the year ended December 31, 2006, \$15,000 was recognized in compensation expense for the Stock Option Plan. Prior to January 1, 2006, the Company accounted for the Stock Option Plan under the recognition and measurement principles of APB No. 25 and related interpretations. Share-based employee compensation costs were not reflected in net income, as all options granted under the plan had an exercise price equal to the market value of the underlying common stock on the date of the grant. In 2005, the Company vested all previously issued unvested options and the Company granted 99,000 and 12,100 options, respectively, during the years ended December 31, 2007 and 2006. Compensation expense is recognized in the income statement for only the options granted during the years ended December 31, 2007 and 2006.

Prior to the adoption of SFAS No. 123(R), the Company presented tax benefits of deductions resulting from the exercise of stock options as operating cash flows in the Statement of Cash Flows. SFAS No. 123(R) requires the cash flows resulting from all tax benefits resulting from tax deductions in excess of compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. The excess tax benefits of \$348,000 and \$260,000, respectively, for the years ended December 31, 2007 and 2006 classified as a financing cash inflow were classified as an operating cash flow prior to the adoption of 123 (R).

In accordance with SFAS No. 123, the following table shows pro forma net income and earnings per share assuming stock options had been expensed based on the fair value of the options granted along with the significant assumptions used in the Black-Scholes option valuation model (dollars in thousands, except per share data):

	Dec	r Ended cember , 2005
Net Income	\$	8,893
Stock-based employee compensation costs determined		
if the fair value method had been applied to all awards,		
net of tax		(603)
Pro forma net income	\$	8,290
Basic Earnings per Common Share:		
As reported:	\$	0.88
Pro forma:	\$	0.82
Diluted Earnings per Common Share:		
As reported:	\$	0.84
Pro forma:	\$	0.79

The proforma compensation expense is based upon the fair value of the option at grant date. The fair value of each option is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions used for grants in 2005: dividend yield of 0%; expected volatility of 21%; risk-free interest rate of 4.08% and an expected life of 9.0 years.

Comprehensive Income:

The Company presents as a component of comprehensive income the amounts from transactions and other events which currently are excluded from the consolidated statements of income and are recorded directly to stockholders' equity. These amounts consist of unrealized holding gains (losses) on available for sale securities.

The components of comprehensive income, net of related tax, are as follows (in thousands):

	Year Ended December 31								
		2007	2006	2005					
Net income	\$	6,885 \$	10,118	\$ 8,893					
Other comprehensive income/(loss):									
Unrealized gains/(losses) on securities:									
Arising during the period, net of tax/(benefit) of \$(6), \$103,									
and \$(86)		(12)	201	(163)					
Less: reclassification adjustment for gains included in net income,									
net of tax expense of \$ -, \$ - and \$33		-	-	(64)					
O ther comprehensiv	e								
income/(loss)		(12)	201	(227)					
Comprehensive income	\$	6,873 \$	10,319	\$ 8,666					

Variable Interest Entities:

Republic First Capital Trust I ("RFCT") originally issued \$6,000,000 of pooled mandatorily redeemable preferred stock to investors and loaned the proceeds to the Company. The securities were subsequently reissued via a call during 2006 by Republic First Capital Trust II. Republic First Capital Trust II holds, as its sole asset, subordinated debentures issued by the Company in 2006. The Company issued an additional \$5,000,000 of pooled trust preferred securities in June 2007. Republic First Capital Trust III holds, as its sole asset, the subordinated debentures issued by the Company in 2007.

The Company does not consolidate the RFCTs. FIN 46(R) precludes consideration of the call option embedded in the preferred stock when determining if the Company has the right to a majority of the RFCTs' expected residual returns. The non-consolidation results in the investment in the common stock of the RFCTs to be included in other assets with a corresponding increase in outstanding debt of \$341,000 and \$186,000 at December 31, 2007 and 2006, respectively. In addition, the income received on the Company's common stock investment is included in other income. The Federal Reserve has issued final guidance on the regulatory capital treatment for the trust-preferred securities issued by the RFCTs as a result of the adoption of FIN 46(R). The final rule would retain the current maximum percentage of total capital permitted for trust preferred securities at 25%, but would enact other changes to the rules governing trust preferred securities that affect their use as part of the collection of entities known as "restricted core capital elements". The rule would take effect March 31, 2009; however, a five-year transition period starting March 31, 2004 and leading up to that date would allow bank holding companies to continue to count trust preferred securities as Tier 1 Capital after applying FIN-46(R). Management has evaluated the effects of the final rule and does not anticipate a material impact on its capital ratios.

Recent Accounting Pronouncements:

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments. This statement amends FASB Statements No. 133, Accounting for Derivative Instruments and Hedging Activities, and No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. This statement resolves issues addressed in Statement 133 Implementation Issue No. D1, Application of Statement 133 to Beneficial

Interest in Securitized Financial Assets. This statement is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company adopted this guidance on January 1, 2007. The adoption did not have any effect on the Company's consolidated financial position or results of operations.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Asset- An Amendment of FASB Statement No. 140. This statement amends SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities, with respect to the accounting for separately recognized servicing assets and servicing liabilities. This statement requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable. It also permits, but does not require, the subsequent measurement of servicing assets and servicing

liabilities at fair value. The Company adopted this statement effective January 1, 2007. The adoption did not have a material effect on the Company's consolidated financial position or results of operations.

In July 2006, the FASB issued FASB Interpretation ("FIN") No. 48, Accounting for Uncertainty in Income Taxes. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. This Interpretation is effective for fiscal years beginning after December 15, 2006. The adoption did not have any impact on the Company's consolidated financial position or results of operations.

In September 2006, the FASB ratified the consensus reached by the Emerging Issues Task Force ("EITF") in Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. EITF 06-4 applies to life insurance arrangements that provide an employee with a specified benefit that is not limited to the employee's active service period, including certain bank-owned life insurance ("BOLI") policies. EITF 06-4 requires an employer to recognize a liability and related compensation costs for future benefits that extend to postretirement periods. EITF 06-4 is effective for fiscal years beginning after December 15, 2007, with earlier application permitted. The Company is continuing to evaluate the impact of this consensus, which may require the Company to recognize an additional liability and compensation expense related to its deferred compensation agreements.

In September 2006, the FASB ratified the consensus reached by the EITF in Issue 06-5, Accounting for Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance. Technical Bulletin No. 85-4 states that an entity should report as an asset in the statement of financial position the amount that could be realized under the insurance contract. EITF 06-5 clarifies certain factors that should be considered in the determination of the amount that could be realized. EITF 06-5 is effective for fiscal years beginning after December 15, 2006, with earlier application permitted under certain circumstances. The Company adopted this guidance on January 1, 2007. The adoption did not have any effect on the Company's consolidated financial position or results of operations.

In September 2006, the FASB issued FASB Statement No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. FASB Statement No. 157 applies to other accounting pronouncements that require or permit fair value measurements. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim periods within those fiscal years. The Company does not anticipate any material impact on its consolidated financial position or results of operations.

In December 2007, the FASB issued proposed FASB Staff Position (FSP) 157-b, Effective Date of FASB Statement No. 157, that would permit a one-year deferral in applying the measurement provisions of statement No. 157 to non-financial assets and non-financial liabilities (non-financial items) that are not recognized or disclosed at fair value in an entity's financial statements on a recurring basis (at least annually). Therefore, if the change in fair value of a non-financial item is not required to be recognized or disclosed in the financial statements on an annual basis or more frequently, the effective date of application of statement 157 to that item is deferred until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. This deferral does not apply, however, to an entity that applies statement 157 in interim or annual financial statements before proposed FSP 157-b is finalized. The Company is currently evaluating the impact, if any, that the adoption of FSP 157-b will have on the Company's consolidated financial position or results of operations.

In September 2006, the SEC issued SAB No. 108, Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides interpretive guidance on

how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a potential current year misstatement. Prior to SAB No. 108, companies might evaluate the materiality of financial-statement misstatements using either the income statement or balance sheet approach, with the income statement approach focusing on new misstatements added in the current year, and the balance sheet approach focusing on the cumulative amount of misstatement present in a company's balance sheet. Misstatements that would be material under one approach could be viewed as immaterial under another approach, and not be corrected. SAB No. 108 now requires that companies view financial statement misstatements as material if they are material according to either the income statement or balance sheet approach. The Company adopted this guidance on January 1, 2007. The adoption did not have any effect on the Company's consolidated financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. This statement permits entities to choose to measure many financial instruments and certain other items at fair value. An entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. This statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company does not anticipate any material impact on its consolidated financial position or results of operations.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10, Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements (EITF 06-10). EITF 06-10 provides guidance for determining a liability for the postretirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The Company is currently assessing the impact of EITF 06-10 on its consolidated financial position and results of operations.

In December 2007, the FASB issued SFAS No. 141 (R), Business Combinations. This statement establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. This new pronouncement will impact the Company's accounting for business combinations completed beginning January 1, 2009.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51. This statement establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In December 2007, the SEC issued SAB No. 110 which amends and replaces Question 6 of Section D.2 of Topic 14, Share-Based Payment, of the Staff Accounting Bulletin series. Question 6 of Section D.2 of Topic 14 expresses the views of the staff regarding the use of the "simplified" method in developing an estimate of expected term of "plain vanilla" share options and allows usage of the "simplified" method for share option grants prior to December 31, 2007. SAB 110 allows public companies which do not have historically sufficient experience to provide a reasonable estimate to continue use of the "simplified" method for estimating the expected term of "plain vanilla" share option grants after December 31, 2007. SAB 110 is effective January 1, 2008. The Company does not anticipate any material impact on its consolidated financial position or results of operations.

In December 2007, the SEC issued SAB No. 109, Written Loan Commitments Recorded at Fair Value Through Earnings expresses the views of the staff regarding written loan commitments that are accounted for at fair value through earnings under generally accepted accounting principles. To make the staff's views consistent with current authoritative accounting guidance, the SAB revises and rescinds portions of SAB No. 105, Application of Accounting Principles to Loan Commitments. Specifically, the SAB revises the SEC staff's views on incorporating expected net future cash flows related to loan servicing activities in the fair value measurement of a written loan commitment. The SAB retains the staff's views on incorporating expected net future cash flows related to internally-developed intangible assets in the fair value measurement of a written loan commitment. The staff expects registrants to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The Company does not expect SAB 109 to have a material impact on its consolidated financial statements.

In June 2007, the EITF reached a consensus on Issue No. 06-11, Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards (EITF 06-11). EITF 06-11 states that an entity should recognize a realized tax benefit associated with dividends on nonvested equity shares, nonvested equity share units and outstanding equity share options charged to retained earnings as an increase in additional paid in capital. The amount recognized in additional paid in capital should be included in the pool of excess tax benefits available to absorb potential future tax deficiencies on share-based payment awards. EITF 06-11 should be applied prospectively to income tax benefits of dividends on equity-classified share-based payment awards that are declared in fiscal years beginning after December 15, 2007. The Company expects that EITF 06-11 will not have an impact on its consolidated financial statements.

In May 2007, the FASB issued FASB Staff Position (FSP) FIN 48-1, Definition of Settlement in FASB Interpretation No. 48 (FSP FIN 48-1). FSP FIN 48-1 provides guidance on how to determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. FSP FIN 48-1 is effective retroactively to January 1, 2007. The implementation of this standard did not have a material impact on the Company's consolidated financial position or results of operations.

In February 2007, the FASB issued FASB Staff Position (FSP) FAS 158-1, Conforming Amendments to the Illustrations in FASB Statements No. 87, No. 88, and No 106 and to the Related Staff Implementation Guides. This FSP makes conforming amendments to other FASB statements and staff implementation guides and provides technical corrections to SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans. The conforming amendments in this FSP were adopted as of the effective date of SFAS No. 158. The adoption did not have a material impact on the Company's consolidated financial statements or disclosures.

Reclassifications:

Certain reclassifications have been made to the 2006 and 2005 information to conform to the current year's presentation. The reclassifications had no effect on net income.

3. Investment Securities:

Investment securities available for sale as of December 31, 2007 are as follows:

(Dollars in thous	sanc	is)									A	mortized Cost	U	Gross nrealized Gains	Un	Gross realized Losses	Fair Value
U . S .		G	O	V	e	r	n	m	e	n	t

maturity			_		- 40	40		
Total			\$ 83,250	\$ 83,659	\$ 282	\$ 285		

Expected maturities will differ from contractual maturities because borrowers have the right to call or prepay obligations with or without prepayment penalties.

The Company realized gross gains on the sale of securities of \$0 in 2007; \$0 in 2006 and \$97,000 in 2005. The tax provision applicable to gross gains in 2005 amounted to approximately \$33,000. No securities were sold at a loss in 2007, 2006, or 2005.

At December 31, 2007 and 2006, investment securities in the amount of approximately \$1.5 million and \$637,000 respectively, were pledged as collateral for public deposits and certain other deposits as required by law.

Temporarily impaired securities as of December 31, 2007 are as follows:

(Dollars in thousands)	Less than 12 months				12 Month	more	Total				
		Fair	U	Inrealized	Fair	U	nrealized		Fair	Ur	nrealized
Description of Securities	7	/alue		Losses	Value		Losses		Value	1	Losses

Other Securities		-		-	20,452		507		20,452		507
Total Temporarily Impaired											
Securities	\$	-	\$	-	\$ 20,589	\$	510	\$	20,589	\$	510

The impairment of the investment portfolio at December 31, 2007 totaled \$510,000 in 43 securities (4 mortgage backed securities, and 39 other securities) with a total fair value of \$20.6 million at December 31, 2007. The unrealized loss is due to changes in market value resulting from changes in market interest rates and is considered temporary.

Temporarily impaired securities as of December 31, 2006 are as follows:

(Dollars in thousands)	Less than	12 months	12 Mont	ths or more	Total			
	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized		
Description of Securities	Value	Losses	Value	Losses	Value	Losses

Total Temporarily Impaired						
Securities	\$ 18,488 \$	82 \$	9,524 \$	78	\$ 28,012	\$ 160

The impairment of the investment portfolio at December 31, 2006 totaled \$160,000 in 22 securities (one US government agency security, 4 mortgage backed securities, and 17 other securities) with a total fair value of \$28.0 million at December 31, 2006. The unrealized loss is due to changes in market value resulting from changes in market interest rates and is considered temporary.

4. Loans Receivable:

Loans receivable consist of the following at December 31,

(Dollars in thousands)	2007	2006
Commercial		
Real estate secured	\$ 477,678	\$ 466,636
Construction and land development	228,616	218,671
Non real estate secured	77,347	71,816
Non real estate unsecured	8,451	8,598
Total commercial	792,092	765,721
Residential real estate (1)	5,960	6,517
Consumer and other	24,302	20,952
Loans receivable	822,354	793,190
Less deferred loan fees	(805)	(1,130)
Less allowance for loan losses	(8,508)	(8,058)
Total loans receivable, net	\$ 813,041	\$ 784,002

(1) Residential real estate is comprised of jumbo residential first mortgage loans for both years presented.

The recorded investment in loans which are impaired in accordance with SFAS No. 114, totaled \$22.3 million and \$6.9 million at December 31, 2007 and 2006 respectively. The amounts of related valuation allowances were \$1.6 million and \$1.8 million respectively at those dates. For the years ended December 31, 2007, 2006 and 2005, the average recorded investment in impaired loans was approximately \$16.1 million, \$5.3 million and \$3.5 million respectively. Republic did not realize any interest on impaired loans during 2007, 2006 or 2005. There were no commitments to extend credit to any borrowers with impaired loans as of the end of the periods presented herein.

As of December 31, 2007 and 2006, there were loans of approximately \$22.3 million and \$6.9 million respectively, which were classified as non-accrual. If these loans were performing under their original contractual rate, interest income on such loans would have increased approximately \$1.4 million, \$479,000 and \$165,000 for 2007, 2006 and 2005 respectively. There were no loans past due 90 days and accruing at December 31, 2007 and December 31, 2006.

The majority of loans outstanding are with borrowers in the Company's marketplace, Philadelphia and surrounding suburbs, including southern New Jersey. In addition the Company has loans to customers whose assets and businesses are concentrated in real estate. Repayment of the Company's loans is in part dependent upon general economic conditions affecting the Company's market place and specific industries. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained is based on management's credit evaluation of the customer. Collateral varies but primarily includes residential, commercial and income-producing properties. At December 31, 2007, the Company had no foreign loans and no loan concentrations exceeding 10% of total loans except for credits extended to real estate operators and lessors in the aggregate amount of \$261.9 million, which represented 31.9% of gross loans receivable at December 31, 2007. Various types of real estate are included in this category, including industrial, retail shopping centers, office space, residential multi-family and others. In addition, credits were extended for single family construction in the amount of \$101.6 million, which represented 12.4% of gross loans receivable at December 31, 2007. Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers engaged in similar activities that management believes would cause them to be similarly impacted by economic or other conditions.

Included in loans are loans due from directors and other related parties of \$13.9 million and \$18.0 million at December 31, 2007 and 2006, respectively. All loans made to directors have substantially the same terms and interest rates as other bank borrowers. The Board of Directors approves loans to individual directors to confirm that collateral requirements, terms and rates are comparable to other borrowers and are in compliance with underwriting policies. The following presents the activity in amounts due from directors and other related parties for the years ended December 31, 2007 and 2006.

(Dollars in thousands)		2007		2006
Balance at beginning of year Additions Repayments Balance at end of year	\$ \$	18,033 4,807 (8,966) 13,874	\$ \$	25,054 2,969 (9,990) 18,033

5. Allowance for Loan Losses:

Changes in the allowance for loan losses for the years ended December 31, are as follows:

(Dollars in thousands)	2007	2006	2005	
Balance at beginning of				
	\$ 8,058 \$	7,617 \$	6,684	
Charge-offs Charge-offs	(1,506)	(1,887)	(1,163)	
Recoveries	366	964	910	
Provision for loan losses	1,590	1,364	1,186	
Balance at end of year	\$ 8,508 \$	8,058 \$	7,617	

6. Premises and Equipment:

A summary of premises and equipment is as follows:

(Dollars in thousands)				Useful lives	2007	2006	
Land F u r n i	t u r	e	a n	Indefinite d	\$ 200	\$ 200	
equipment Bank building				3 to 13 years 40 years	11,247 845	8,814 809	
L e a	s e	h o	1	d			
improvements				1 to 30 years	8,760 21,052		
L e s s a depreciation	c c u m	u 1	a t e	d	(9,764)		
N e t p r equipment	e m i s	e s	a n	d	\$ 11,288	\$ 5,648	

Depreciation expense on premises, equipment and leasehold improvements amounted to \$1.4 million, \$1.0 million and \$1.0 million in 2007, 2006 and 2005 respectively.

7. Borrowings:

Republic has a line of credit for \$15.0 million available for the purchase of federal funds from a correspondent bank. At December 31, 2007 and 2006, Republic had \$0 outstanding on this line.

Republic has a line of credit with the Federal Home Loan Bank of Pittsburgh, collateralized by loans and securities, with a maximum borrowing capacity of \$211.5 million as of December 31, 2007. This maximum borrowing capacity is subject to change on a monthly basis. As of December 31, 2007 and 2006, there were no term advances outstanding on this line of credit. As of December 31, 2007 and 2006, there were \$113.4 million and \$139.7 million of overnight advances outstanding against these lines. The interest rates on overnight advances at December 31, 2007 and 2006 were 3.81% and 5.41%, respectively. The maximum amount of term advances outstanding at any month-end was \$0 in 2007 and \$0 in 2006. The maximum amount of overnight borrowings outstanding at any month-end was \$186.7 million in 2007 and \$164.7 million in 2006. Average amounts outstanding of term advances for 2007, 2006 and 2005 were \$0, \$0 and \$3.8 million, respectively; and the related weighted average interest rates for 2007, 2006 and 2005 were \$110.3 million, \$72.1 million and \$65.7 million, respectively; and the related weighted average interest rates for 2007, 2006 and 2005 were \$1207, 2006 and 2005 were \$122%, 528% and 3.61%, respectively.

Republic had uncollateralized overnight advances with a depository institution respectively at December 31, 2007 and 2006, of \$20.0 million and \$20.0 million. The respective interest rates on overnight advances at December 31, 2007 and 2006 were 3.50% and 5.22%. The maximum amount of such overnight advances outstanding at any month-end was \$20.0 million in 2007 and \$20.0 million in 2006. Average amounts outstanding of overnight advances for 2007, 2006, and 2005 were \$14.0 million, \$10.7, and \$0, respectively; and the related weighted average interest rates for 2007, 2006, and 2005 were 5.25%, 5.27%, and 0%, respectively.

Subordinated debt and corporation-obligated-mandatorily redeemable capital securities of subsidiary trust holding solely junior obligations of the corporation:

In 2001, the Company, through a pooled offering, issued \$6.2 million of corporation-obligated mandatorily redeemable capital securities of the subsidiary trust holding solely junior subordinated debentures of the corporation more commonly known as Trust Preferred Securities. The purpose of the issuance was to increase capital as a result of the Company's continued loan and core deposit growth. The trust preferred securities qualify as Tier 1 capital for regulatory purposes in amounts up to 25% of total Tier 1 capital. The Company had the ability to call the securities on any interest payment date after five years, without a prepayment penalty, notwithstanding their final 30 year maturity. The interest rate was variable and adjustable semi-annually at 3.75% over the 6 month London Interbank Offered Rate ("Libor"). The Company did call the securities in December 2006 and then issued \$6.2 million in Trust Preferred Securities at a variable interest rate, adjustable quarterly, at 1.73% over the 3 month Libor. The Company may call the securities on any interest payment date after five years. The interest rates at December 31, 2007 and 2006 were 6.85% and 7.08%, respectively.

In 2007, the Company, through a pooled offering, issued an additional \$5.2 million of corporation-obligated mandatorily redeemable capital securities of the subsidiary trust holding solely junior subordinated debentures of the corporation more commonly known as Trust Preferred Securities for the same purpose as the 2001 issuance. The Company has the ability to call the securities or any interest payment date after five years, without a prepayment penalty, notwithstanding their final 30 year maturity. The interest rate is variable, adjustable quarterly, at 1.55% over the 3 month Libor. The interest rate at December 31, 2007 was 6.67%.

8. Deposits:

The following is a breakdown, by contractual maturities of the Company's time certificate of deposits for the years 2008 through 2012, which includes brokered certificates of deposit of approximately \$125.0 million with original terms of one to two months.

(Dollars in thousands)	2008		2009		2010	2011	2012	Tl	hereafter	Total	
Time Certificates of Deposit	\$ 406,945	\$	12,769	\$	2,430	\$ 288	\$ 448	\$	55	\$	422,935

9. Income Taxes:

The following represents the components of income tax expense (benefit) for the years ended December 31, 2007, 2006 and 2005, respectively.

(Dollars in thousands)		2007	2006	2005
Current provision				
Federal:				
Current	\$	3,429	\$ 5,429	\$ 4,808
Deferred		(156)	(222)	(322)
Total provision for incom	e			
taxes	\$	3,273	\$ 5,207	\$ 4,486

The following table accounts for the difference between the actual tax provision and the amount obtained by applying the statutory federal income tax rate of 35.0% for the years ended December 31, 2007 and 2006 and 34.0% for the year ended December 31, 2005.

(Dollars	in	tho	usa	nds	s)																	2007	2006	2005
Tax	p	r o	v	i s	i	o n	. (e o	m	p	u t	e d		a t	S	t	a	tι	ı t	0 1	у			
rate																						\$ 3,556	\$ 5,364	\$ 4,549
E f	f	e	(2	t		O		f		3	5	í	%			r	á	a	t	e			
bracket																						(75)	(75)	-
Other																						(208)	(82)	(63)
T o t	a	1	1) :	r (o v	i	S	i	o	n	f	o	r	i	. 1	n	c	o	m	e			
taxes			•																			\$ 3,273	\$ 5,207	\$ 4,486

The approximate tax effect of each type of temporary difference that gives rise to net deferred tax assets included in other assets in the accompanying consolidated balance sheets at December 31, 2007 and 2006 are as follows:

		2007	2006	
Allowance for loan losses	\$	2,866	\$ 2,71	3
Deferred compensation		664	67	4
Unrealized gain on securities available	f o r			
sale		(139)	(14	:5)
Deferred loan costs		(543)	(53	5)
Other		(9)	(3	(0)
Net deferred tax asset	\$	2,839	\$ 2,67	7

The realizability of the deferred tax asset is dependent upon a variety of factors, including the generation of future taxable income, the existence of taxes paid and recoverable, the reversal of deferred tax liabilities and tax planning strategies. Based upon these and other factors, management believes that it is more likely than not that the Company will realize the benefits of these deferred tax assets. All tax years for which the Internal Revenue Service has statutory authority to conduct audits are open, and there are no audits in progress for any years. The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes on January 1, 2007. As a result of the implementation of FIN 48, the Company maintains a \$193,000 liability for unrecognized tax benefits related to tax positions associated with tax positions related to the current year and prior years. The Company recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in operating expenses. At December 31, 2007, \$75,000 is accrued for interest and penalties.

10. Financial Instruments with Off-Balance Sheet Risk:

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements.

Credit risk is defined as the possibility of sustaining a loss due to the failure of the other parties to a financial instrument to perform in accordance with the terms of the contract. The maximum exposure to credit loss under commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Company uses the same underwriting standards and policies in making credit commitments as it does for on-balance-sheet instruments.

Financial instruments whose contract amounts represent potential credit risk are commitments to extend credit of approximately \$160.2 million and \$163.2 million and standby letters of credit of approximately \$4.6 million and \$7.3 million

at December 31, 2007 and 2006, respectively. Commitments often expire without being drawn upon. Of the \$160.2 million of commitments to extend credit at December 31, 2007, substantially all were variable rate commitments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and many require the payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include real estate, marketable securities, pledged deposits, equipment and accounts receivable.

Standby letters of credit are conditional commitments issued that guarantee the performance of a customer to a third party. The credit risk and collateral policy involved in issuing letters of credit is essentially the same as that involved in extending loan commitments. The amount of collateral obtained is based on management's credit evaluation of the customer. Collateral held varies but may include real estate, marketable securities, pledged deposits, equipment and accounts receivable. Management believes that the proceeds obtained through a liquidation of such collateral would be sufficient to cover the maximum potential amount of future payments required under the corresponding guarantees. The current amount of liability as of December 31, 2007 and 2006 for guarantees under standby letters of credit issued is not material.

Contingencies also include a standby letter of credit issued by an unrelated bank in the amount of \$170,000 which was required by a lessor.

11. Commitments:

Lease Arrangements:

As of December 31, 2007, the Company had entered into non-cancelable leases expiring through August 31, 2037, including renewal options. The leases are accounted for as operating leases. The minimum annual rental payments required under these leases are as follows:

(Dollars in thousands)

Year Ended	An	nount
2008	\$	1,394
2009		1,538
2010		1,888
2011		1,947
2012		2,000
Thereafter	30	6,159
Total	\$ 4	4,926

The Company incurred rent expense of \$1.4 million, \$1.1 million and \$922,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Republic entered into a lease agreement that commenced June 1, 2007 for approximately 53,275 square feet on two floors of Two Liberty Place, 1601 Chestnut St., Philadelphia, Pennsylvania, as its new headquarter facilities. The space is occupied by the Company, the executive offices of Republic and an unaffiliated company which assumes its proportionate share of related costs. Back office operations of Republic and commercial bank lending of Republic is also located therein. The initial thirteen year, seven month lease term contains two five year renewal options and the initial lease term will expire on December 31, 2020. Annual rent expense commenced at \$750,245 less the following

abatement periods: (1) the first twenty-eight months for 5,815 square feet of space and (2) the following periods for the remaining rentable area: (a) the first six months of the first lease year, (b) the first four months of the second lease year, and (c) the first four months of the third lease year.

Employment Agreements:

The Company has entered into an employment agreement with the CEO of the Company which provides for the payment of base salary and certain benefits through the year 2009. The aggregate commitment for future salaries and benefits under this employment agreement at December 31, 2007, is approximately \$1.0 million.

The Company has entered into an employment agreement with the President of Republic which provides for the payment of base salary and certain benefits through the year 2009. The aggregate commitment for future salaries and benefits under this employment agreement at December 31, 2007, is approximately \$700,000.

Other:

The Company's CEO was of counsel to a law firm effective January 2, 2002 until June 30, 2005. In 2005 the Company paid \$272,000 in legal fees to that firm which were primarily for loan workout and collection matters.

The Company and Republic are from time to time a party (plaintiff or defendant) to lawsuits that are in the normal course of business. While any litigation involves an element of uncertainty, management, after reviewing pending actions with its legal counsel, is of the opinion that the liability of the Company and Republic, if any, resulting from such actions will not have a material effect on the financial condition or results of operations of the Company and Republic.

12. Regulatory Capital:

Dividend payments by Republic to the Company are subject to the Pennsylvania Banking Code of 1965 (the "Banking Code and the Federal Deposit Insurance Act (the "FDIA"). Under the Banking Code, no dividends may be paid except from "accumulated net earnings" (generally, undivided profits). Under the FDIA, an insured bank may pay no dividends if the bank is in arrears in the payment of any insurance assessment due to the FDIC. Under current banking laws, Republic would be limited to \$56.8 million of dividends plus an additional amount equal to its net profit for 2008, up to the date of any such dividend declaration. However, dividends would be further limited in order to maintain capital ratios. The Company may consider dividend payments in 2008.

State and Federal regulatory authorities have adopted standards for the maintenance of adequate levels of capital by Republic. Federal banking agencies impose three minimum capital requirements on the Company's risk-based capital ratios based on total capital, Tier 1 capital, and a leverage capital ratio. The risk-based capital ratios measure the adequacy of a bank's capital against the riskiness of its assets and off-balance sheet activities. Failure to maintain adequate capital is a basis for "prompt corrective action" or other regulatory enforcement action. In assessing a bank's capital adequacy, regulators also consider other factors such as interest rate risk exposure; liquidity, funding and market risks; quality and level or earnings; concentrations of credit; quality of loans and investments; risks of any nontraditional activities; effectiveness of bank policies; and management's overall ability to monitor and control risks.

Management believes that Republic meets, as of December 31, 2007, all capital adequacy requirements to which it is subject. As of December 31, 2007, the FDIC categorized Republic as well capitalized under the regulatory framework for prompt corrective action provisions of the Federal Deposit Insurance Act. There are no calculations or events since that notification that management believes have changed Republic's category.

The following table presents the Company's and Republic's capital regulatory ratios at December 31, 2007 and 2006:

	Act	ual	For Ca Adequacy	•	To be well capitalized under regulatory capital guidelines		
(Dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio	
At December 31, 2007 Total risk based capital

13. Benefit Plans:

Supplemental Retirement Plan:

The Company maintains a Supplemental Retirement Plan for its former Chief Executive Officer which provides for payments of approximately \$100,000 a year. At December 31, 2007, approximately \$143,000 remained to be paid. A life insurance contract has been purchased to insure the payments.

Defined Contribution Plan:

The Company has a defined contribution plan pursuant to the provision of 401(k) of the Internal Revenue Code. The Plan covers all full-time employees who meet age and service requirements. The plan provides for elective employee contributions with a matching contribution from the Company limited to 4% of total salary. The total expense charged to Republic, and included in salaries and employee benefits relating to the plan was \$249,000 in 2007, \$255,000 in 2006 and \$245,000 in 2005.

Directors' and Officers' Plans:

The Company has agreements with insurance companies to provide for an annuity payment upon the retirement or death of certain Directors and Officers, ranging from \$15,000 to \$25,000 per year for ten years. The agreements were modified for most participants in 2001, to establish a minimum age of 65 to qualify for the payments. All participants are fully vested. The accrued benefits under the plan at December 31, 2007, 2006 and 2005 totaled \$1.5 million, \$1.6 million, and \$1.5 million, respectively. The expense for the years ended December 31, 2007, 2006 and 2005, totaled \$71,000, \$108,000, and \$172,000, respectively. The Company funded the plan through the purchase of certain life insurance contracts. The cash surrender value of these contracts (owned by the Company) aggregated \$2.1 million and \$2.0 million at December 31, 2007 and 2006, respectively, which is included in other assets.

The Company maintains a deferred compensation plan for certain officers, wherein a percentage of base salary is contributed to the plan, and utilized to buy stock of the Company. To promote officer retention, a three year vesting period applies for each contribution. As of December 31, 2007 \$125,000 was vested. Expense for 2007, 2006, and 2005 was \$194,000, \$95,000 and \$43,000, respectively. During 2005, the Company established a rabbi trust to fund the deferred compensation plans. An administrator has been designated as Trustee of the trust. Also, certain of the obligations to participants are satisfied with contracts through a counterparty, BNP Parabas. Approximately 38,000, 21,062 and 44,893 respective shares of the Company's common stock were purchased for \$355,000, \$237,000 and \$573,000 by this trust in 2007, 2006 and 2005, respectively, for the benefit of certain officers and directors that acquired shares through our deferred compensation plan. As of December 31, 2007, the trust holds approximately 108,224 shares of the Company's common stock as well as an additional \$12,000 in cash. The assets of the trust and BNP Parabas contracts are sufficient to cover the liabilities of the Company's deferred compensation plan.

14. Fair Value of Financial Instruments:

The disclosure of the fair value of all financial instruments is required, whether or not recognized on the balance sheet, for which it is practical to estimate fair value. In cases where quoted market prices are not available, fair values are based on assumptions including future cash flows and discount rates. Accordingly, the fair value estimates cannot be substantiated, may not be realized, and do not represent the underlying value of the Company.

The Company uses the following methods and assumptions to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash, Cash Equivalents, Accrued Interest Receivable and Payable:

The carrying value is a reasonable estimate of fair value.

Investment Securities Held to Maturity and Available for Sale:

For investment securities with a quoted market price, fair value is equal to quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Restricted Stock:

Restricted stock represents equity interest in FHLB Stock and ACBB Stock, and is carried at costs because it does not have a readily determinable fair value as its ownership is restricted and it lacks a market. The carrying value is a reasonable estimate of fair value.

Loans:

For variable-rate loans that reprice frequently and with no significant change in credit risk, fair value is the carrying value. For other categories of loans such as commercial and industrial loans, real estate mortgage and consumer loans, fair value is estimated based on the present value of the estimated future cash flows using the current rates at which similar loans would be made to borrowers with similar collateral and credit ratings and for similar remaining maturities.

80

Bank Owned Life insurance:

The fair value of bank owned life insurance is based on the estimated realizable market value of the underlying investments and insurance reserves.

Deposit Liabilities:

For checking, savings and money market accounts, fair value is the amount payable on demand at the reporting date. For time deposits, fair value is estimated using the rates currently offered for deposits of similar remaining maturities.

Borrowings:

Fair values of borrowings are based on the present value of estimated cash flows, using current rates, at which similar borrowings could be obtained by Republic or the Company with similar maturities.

Commitments to Extend Credit and Standby Letters of Credit:

The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparts. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar arrangements.

At December 31, 2007 and December 31, 2006, the carrying amount and the estimated fair value of the Company's financial instruments are as follows:

15. Stock Based Compensation:

The Company maintains a Stock Option Plan (the "Plan") under which the Company grants options to its employees and directors. Under the terms of the plan, 1.5 million shares of common stock, plus an annual increase equal to the number of shares needed to restore the maximum number of shares that may be available for grant under the plan to 1.5 million shares, are reserved for such options. The Plan provides that the exercise price of each option granted equals the market price of the Company's stock on the date of grant. Any option granted vests within one to five years and has a maximum term of ten years. The Black-Scholes option pricing model is utilized to determine the fair value of stock options. In 2007 the following assumptions were utilized: a dividend yield of 0%; expected volatility of 25.24%; risk-free interest rate of 4.70% and an expected life of 7.0 years. In 2006 the following assumptions were utilized: a dividend yield of 0%; expected volatility of 29.03%; risk-free interest rate of 4.83% and an expected life of 7.0 years. A dividend yield of 0% is utilized, because cash dividends have never been paid. The expected life reflects a 3 to 4 year "all or nothing" vesting period, the maximum ten year term and review of historical behavior. The volatility was based on Bloomberg's seven year volatility calculation for "FRBK" stock. The risk-free interest rate is based on the seven year Treasury bond. No shares vested in 2007, but expense is recognized ratably over the period required to vest. There were 12,100 unvested options at January 1, 2007 with a fair value of \$61,710 with \$46,282 of that amount remaining to be recognized as expense. At December 31, 2007 there were 105,050 unvested options with a fair value of \$486,885 with \$346,012 of that amount remaining to be recognized as expense. At that date, the intrinsic value of the 737,841 options outstanding was \$413,191 while the intrinsic value of the 632,791 exercisable (vested) options was \$923,875. During 2007, 6,050 options were forfeited with a weighted average grant fair value of \$30,855.

A summary of the status of the Company's stock options under the Plan as of December 31, 2007, 2006 and 2005 and changes during the years ended December 31, 2007, 2006, and 2005 are presented below:

During the year ended December 31, 2007, \$125,000 was recognized in compensation expense, with a 35% assumed tax benefit, for the Plan. During the year ended December 31, 2006, \$15,000 was recognized in compensation expense for the Plan.

16. Segment Reporting:

The Company has one reportable segment: community banking. The community bank segments primarily encompasses the commercial loan and deposit activities of Republic, as well as consumer loan products in the area surrounding its branches.

17. Transactions with Affiliate:

At December 31, 2007 and 2006, Republic had outstanding balances of \$24.1 million and \$21.6 million, respectively, of commercial loans, which had been participated to FBD, a wholly owned subsidiary prior to January 1, 2005. FBD also sold its tax refund loans to Republic in 2006. Such loans were repaid by U.S. Treasury-issued tax refunds paid directly to FBD in the first and second quarters of that year. Accordingly, there were no such loans outstanding at December 31, 2006. FBD did not offer tax refund loans in 2007. As of December 31, 2007 and 2006 Republic had outstanding balances of \$42.0 million and \$40.9 million of commercial loan balances it had purchased from FBD. The above loan participations and sales were made at arms length. They are made as a result of lending limit

and other regulatory requirements.

83
