☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2016

Or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-7183

TEJON RANCH CO.

(Exact name of

Registrant as specified in
its charter)

Delaware 77-0196136

(State or other jurisdiction of (IRS Employer
incorporation or organization) Identification No.)

P.O. Box 1000, Lebec, California 93243

(Address of principal executive offices)

Registrant's telephone number, including area code: (661) 248-3000

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class Name of Exchange of Which Registered

Common Stock New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web Site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T ((§232.405 of this chapter) during the preceding 12 months (or for shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒

Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The aggregate market value of registrant's Common Stock, par value \$.50 per share, held by persons other than those who may be deemed to be affiliates of registrant on June 30, 2016 was \$404,004,456 based on the last reported sale price on the New York Stock Exchange as of the close of business on that date.

The number of the Company's outstanding shares of Common Stock on February 28, 2017 was 20,823,789.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the Annual Meeting of Stockholders relating to the directors and executive officers of the Company are incorporated by reference into Part III.

Forward-Looking Statements

This annual report on Form 10-K contains forward-looking statements, including statements regarding strategic alliances, the almond, pistachio and grape industries, the future plantings of permanent crops, future yields and prices, water availability for our crops and real estate operations, future prices, production and demand for oil and other minerals, future development of our property, future revenue and income of our jointly-owned travel plaza and other joint venture operations, potential losses to the Company as a result of pending environmental proceedings, the adequacy of future cash flows to fund our operations, market value risks associated with investment and risk management activities and with respect to inventory, accounts receivable and our own outstanding indebtedness and other future events and conditions. In some cases these statements are identifiable through the use of words such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “plan,” “project,” “target,” “can,” “could,” “may,” “will,” “should,” “w” expressions. We caution you not to place undue reliance on these forward-looking statements. These forward-looking statements are not a guarantee of future performances and are subject to assumptions and involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the Company, or industry results, to differ materially from any future results, performance, or achievement implied by such forward-looking statements. These risks, uncertainties and important factors include, but are not limited to, market and economic forces, availability of financing for land development activities, competition and success in obtaining various governmental approvals and entitlements for land development activities. No assurance can be given that the actual future results will not differ materially from the forward-looking statements that we make for a number of reasons including those described above and in Part I, Item 1A, “Risk Factors” of this report.

As used in this annual report on Form 10-K, references to the “Company,” “Tejon,” “TRC,” “we,” “us,” and “our” refer to Tejon Ranch Co. and its consolidated subsidiaries. The following discussion should be read in conjunction with the consolidated financial statements and the accompanying notes appearing elsewhere in this annual report on Form 10-K.

ITEM 1. BUSINESS

Company Overview

We are a diversified real estate development and agribusiness company committed to responsibly using our land and resources to meet the housing, employment, and lifestyle needs of Californians and create value for our shareholders. Current operations consist of land planning and entitlement, land development, commercial sales and leasing, leasing of land for mineral royalties, water asset management and sales, grazing leases, income portfolio management, farming, and ranch operations.

These activities are performed through our five segments:

Our prime asset is approximately 270,000 acres of contiguous, largely undeveloped land that, at its most southerly border, is 60 miles north of Los Angeles and, at its most northerly border, is 15 miles east of Bakersfield. We create value by securing entitlements for our land, facilitating infrastructure development, strategic land planning, monetization of land through development, and conservation, in order to maximize the highest and best use for our land. We are involved in several joint ventures, which facilitate the development of portions of our land.

Business Objectives and Strategies

Our primary business objective is to maximize long-term shareholder value through the monetization of our land-based assets. A key element of our strategy is to entitle and then develop large-scale residential and master plan real estate communities to serve the growing populations of Southern and Central California. We are currently engaged in commercial sales and leasing at our fully operational commercial/industrial center Tejon Ranch Commerce Center, or TRCC. All of these efforts are supported by diverse revenue streams generated from other operations, including farming, mineral resources and our various joint ventures.

Percentage of Total Revenue and Other Income by Segment:

6

The following table shows the revenues from continuing operations, segment profits and identifiable assets of each of our continuing segments for the last three years:

FINANCIAL INFORMATION ABOUT SEGMENTS

(Amounts in thousands of dollars)

	Year Ended December 31,		
	2016	2015	2014
Revenues and Other Income			
Real estate—commercial/industrial (2)	\$9,438	\$8,272	\$7,845

Farming	36,895	32,542	34,464
Ranch operations	3,893	4,313	4,295
Corporate	44,594	53,425	65,556
Total assets	\$439,701	\$431,919	\$431,923

(1) Refer to Note 16, Operating Segments and Related Information of the Notes to the Consolidated Financial Statements for additional detail related to segment revenues.

(2) During the fourth quarter of 2015, the Company reclassified revenues and expenses previously classified as commercial/industrial into a new segment called Ranch Operations. Ranch operations comprise of grazing leases, game management and other ancillary services supporting the ranch.

(3) During the fourth quarter of 2014, the Company determined hay crop sales previously recorded in the resort/residential revenues segment fit most appropriately with our farming revenues segment. The Company has reclassified prior periods to conform to the current year presentation.

(4) Segment profits are revenues less operating expenses, excluding investment income and expense, corporate expenses, equity in earnings of unconsolidated joint ventures, and income taxes.

(5) Total Assets by Segment include both assets directly identified with those operations and an allocable share of jointly used assets. Corporate assets consist of cash and cash equivalents, refundable and deferred income taxes, land, buildings and improvements.

Real Estate Development Overview

Our real estate operations consist of the following activities: real estate development, commercial sales and leasing, land planning and entitlement, income portfolio management and conservation.

Interstate 5, one of the nation's most heavily traveled freeways, brings in excess of 75,000 vehicles per day through our land, which includes 16 miles of Interstate 5 frontage on each side of the freeway and the commercial land surrounding four interchanges. The strategic plan for real estate focuses on development opportunities along the Interstate 5 and State Road 138 corridors, which includes TRCC in Kern County, Centennial at Tejon Ranch, or Centennial, a master planned community on our land in Los Angeles County, Mountain Village at Tejon Ranch, or MV, a resort and residential community in Kern County, and Grapevine at Tejon Ranch, or Grapevine, a master planned community on our land in Kern County. TRCC includes developments east and west of Interstate 5 at TRCC-East and TRCC-West, respectively.

The chart below is a continuum of the real estate development process highlighting each project's current status and key milestones to be met in moving through the real estate development process in California. The real-estate development process may be subject to delays arising from California's regulatory environment and litigation.

Our real estate activities within our commercial/industrial segment include: entitling, planning, and permitting of land for development; construction of infrastructure; the construction of pre-leased buildings; the construction of buildings to be leased or sold; and the sale of land to third parties for their own development. The commercial/industrial segment also includes activities related to communications leases, and landscape maintenance fees. Our real estate operations within our resort/residential segment at this time include costs for land entitlement, land planning and pre-construction engineering, and land stewardship and conservation activities.

Operating Segments

Real Estate - Commercial/Industrial

Construction:

During 2016, our commercial retail activity continued to grow as new leases came on line with Habit Burger and Baja Fresh. In addition, our TA/Petro joint venture completed construction of a new Shell gas station and convenience store that commenced operations during the first quarter of 2016. Lastly, we have entered into two joint venture operating agreements with Majestic Realty Co., or Majestic, a Los Angeles based commercial/industrial developer, to pursue the development, construction, leasing, and management of an approximately 480,000 square foot industrial building on the Company's property at TRCC-East and to own and manage a 652,000 square foot, fully leased, industrial building in TRCC-West.

During 2015, we completed the construction of a multi-tenant commercial building within TRCC-East. The multi-tenant building was leased to Starbucks and Pieology, a quick service pizza offering. During 2015 we also completed construction on a real estate pad in TRCC-East and entered into a ground lease with Carl's Jr. All three restaurants were fully operational at December 31, 2015. We also began construction of a second multi-tenant building to be occupied by Habit Burger and Baja Fresh.

The following is a summary of the Company's retail and industrial real estate developments as of December 31, 2016: (\$ in thousands)

Project	Cost to Date	Estimated Cost to Complete	Total Estimated Cost at Completion	Estimated Completion Date
Tejon Ranch Commerce Center	\$78,386	\$69,881	\$148,267	TBD
Less: Reimbursements from TRPFFA ¹	64,862	60,450	125,312	TBD
TRCC Development Costs, net	\$13,524	\$9,431	\$22,955	

¹The Tejon Ranch Public Facilities Financing Authority, or TRPFFA, is a joint powers authority formed by Kern County and Tejon-Castac Water District, or TCWD, to finance public infrastructure within the Company's Kern County developments. TRPFFA,

through bond sales, will reimburse the Company for qualifying infrastructure costs at TRCC.

The following table summarizes total development entitlements for TRCC as of December 31, 2016:

(in square feet)	Industrial	Commercial Retail
Total entitlements received	19,300,941	1956,309
Total entitlements used	4,237,149	616,915
Entitlement available	15,063,792	339,394

Leasing:

Within our commercial/industrial segment, we lease land to various types of tenants. We currently lease land to two auto service stations with convenience stores, 13 fast-food operations, two full-service restaurants, one motel, an antique shop, and a United States Postal Service facility.

In addition, the Company leases several microwave repeater locations, radio and cellular transmitter sites, and fiber optic cable routes; and 32 acres of land to Pastoria Energy Facility, L.L.C., or PEF, for an electric power plant.

The sale and leasing of commercial/industrial real estate is very competitive, with competition coming from numerous and varied sources around California. Our most direct regional competitors are in the Inland Empire region of Southern California, Northern Los Angeles to include both the San Fernando Valley and Santa Clarita Valley, and areas north of us in the San Joaquin Valley of California. The principal factors of competition in this industry are price, availability of labor, proximity to the port complex of Los Angeles/Long Beach and customer base. A potential disadvantage to our development strategy is our distance from the ports of Los Angeles and Long Beach in comparison to the warehouses and distribution centers located in the Inland Empire, a large industrial area located east of Los Angeles which continues its expansion eastward beyond Riverside and San Bernardino to include Perris, Moreno Valley, and Beaumont. Strong demand for large distribution facilities is driving development farther east in a search for large entitled parcels. During 2016, vacancy rates in the Inland Empire approximated 4.1%, primarily due to an increase in the development of buildings for lease. Without this increase in new development in the Inland Empire the vacancy rate would have declined in that region. The low vacancy rates have also led to an increase in lease rates of 12% within the Inland Empire. As lease rates increase in the Inland Empire, we may begin to have greater pricing advantages due to our lower land basis.

The following table summarizes information with respect to lease expirations as of December 31, 2016.

Year of Lease Expiration	Number of Expiring Leases	RSF of Expiring Leases	Annualized Base Rent ¹	Percentage of Annual Minimum Rent
2017	8	52,314	\$335	6.29%
2018	3	55,321	\$134	2.51%
2019	—	—	—	—
2020	3	55,595	\$269	5.04%
2021	3	60,722	\$123	2.30%
2022	—	—	—	—
2023	2	4,640	\$193	3.63%
2024	—	—	—	—
2025	2	4,613	\$260	4.87%
2026	3	4,645	\$247	4.64%
2027	—	—	—	—
Thereafter ²	6	1,589,915	\$3,771	—

1 - Annualized base rent is calculated as monthly base rent (cash basis) per the lease, as of the reporting period, multiplied by 12. Annualized base rent shown in thousands.

2 - This amount includes 32 acres of the PEF ground lease.

Please refer to Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for information regarding our 2016 commercial/industrial activity.

For the year ended December 31, 2016 we had no leases that expired, nor did we have any material lease renewals.

Joint Ventures:

During 2016, we entered into a joint venture operating agreement with Majestic Realty Co., a Los Angeles based commercial/industrial developer to pursue the development, construction, leasing, and management of an approximately 480,000 square foot industrial building on the Company’s property at Tejon Ranch Commerce Center East. In addition, we entered into a second limited liability company agreement with Majestic Realty Co. for the purchase of, ownership of, and management of a fully leased, 651,909 square foot industrial building located at Tejon Ranch Commerce Center.

We are also involved in multiple joint ventures with several partners. Our joint venture with TravelCenters of America, or TA/Petro, owns and operates two travel and truck stop facilities, restaurants, and five separate gas stations with convenience stores within TRCC-West and TRCC-East. We are involved in three joint ventures with Rockefeller Development Group which includes the following: Five West Parcel LLC, which owns a 606,000 square foot building in TRCC-West that is fully leased to Dollar General, 18-19 West LLC, which owns 61.5 acres of land for future development within TRCC-West, and TRCC/Rock Outlet Center LLC that operates the Outlets at Tejon.

Real Estate - Resort/Residential

Our resort/residential segment activities include land entitlement, land planning and pre-construction engineering and land stewardship and conservation activities. We have three major resort/residential communities within this segment: MV, which has entitlement approvals and is in the tentative tract map process; Centennial, which received preliminary zoning within the Antelope Valley Area Plan, or AVAP, and has begun the specific plan process in LA County for approvals of phase one entitlement; and Grapevine, which is on land owned within Kern County that has entitlement approvals and is in the litigation and permitting phase of the process. The entitlement process precedes the regulatory approvals necessary for land development and routinely takes several years to complete. The Conservation Agreement we entered into with five major environmental organizations in 2008 is designed to minimize opposition from environmental groups to these projects and eliminate or reduce the time spent in litigation once governmental approvals are received. Litigation by environmental groups has been a primary cause of delay and loss of financial value for real estate development projects in California.

Mountain Village at Tejon Ranch:

MV is planned to be an exclusive, very low-density, resort-based community that will provide owners and guests with a wide variety of recreational opportunities, lodging and spa facilities, golf facilities, a range of housing options, and other exclusive services and amenities that are designed to distinguish MV as the resort community of choice for the Southern California market. MV is being developed by Tejon Mountain Village LLC, or TMV LLC, a wholly owned subsidiary of the Company. MV encompasses 5,082 acres for a mixed use development to include housing, retail, and commercial industrial components. MV is entitled for 3,450 homes, 160,000 square feet of commercial development, 750 hotel keys, and more than 21,335 acres of open space.

In November 2015, the Board of Directors of the Company approved a detailed business plan that will guide the ultimate development and marketing of MV. The Board also authorized the management team to move forward with the creation of Tentative Tract Maps, which is estimated to be completed in late 2017.

During July 2014, the Company acquired full ownership of TMV LLC through the purchase of DMB TMV LLC's interest in the former joint venture for \$70,000,000 in cash.

The Company's decision to obtain full ownership of MV reflects the Company's growth as a fully integrated real estate company and demonstrates our belief in the future success of the development.

MV is fully entitled and all necessary permits have been issued to begin development once the mapping process is complete. Timing of MV development in the coming years will be dependent on the continued improvement of the economy and an improvement in the second home real estate market. In moving the project forward we will focus on the completion of the mapping process, consumer and market research studies and fine tuning of development business plans as well as defining the capital funding sources for this development.

Centennial at Tejon Ranch:

The Centennial development is a large master-planned community development encompassing approximately 12,323 acres of our land within Los Angeles County. Upon completion of Centennial, it is estimated that the community will include approximately 19,333 homes, and 10.1 million square feet of commercial development. Centennial will also incorporate business districts, schools, retail and entertainment centers, medical facilities and other commercial office and light industrial businesses that, when complete, would create a substantial number of jobs. Centennial is being developed by Centennial Founders, LLC, a consolidated joint venture in which we have a 84.07% ownership interest as of December 31, 2016. In 2016, Lewis Investment Company withdrew from the joint venture. The surviving members (TRC, TRI Pointe Homes and CalAtlantic) absorbed the equity of Lewis Investment Company based on their respective proportionate interest in the joint venture at the time of the withdrawal. The withdrawal was deemed an equity transaction between members and had no earnings impact to the Company. Centennial is envisioned to be an ecologically friendly and commercially viable development.

During the fourth quarter of 2014, the Los Angeles County Board of Supervisors approved the Antelope Valley Area Plan, or AVAP. The AVAP is designed to guide future development and conservation in the northern-most region of unincorporated Los Angeles County. Centennial is included in the AVAP as part of the west Economic Opportunity Area, or EOA, where future development would be directed. This particular EOA is located along Highway 138 and encompasses the vast majority of Centennial's proposed boundaries. In June 2015, the Los Angeles County Board of Supervisors gave final approval for the AVAP. The AVAP provides Centennial with land use and zoning for residential and commercial development.

We are currently preparing the project level Environmental Impact Report, or EIR, and specific plan for Los Angeles County and anticipate the filing of those documents during 2017.

Grapevine at Tejon Ranch:

Grapevine is an approximately 15,315-acre potential development area located on the San Joaquin Valley floor area of our lands, adjacent to TRCC. The 2008 Conservation Agreement allows for the development of up to 12,400 acres in this area. We are currently focusing on approximately 8,010 acres for a mixed use development to include housing, retail, and commercial industrial components. Grapevine has received approval for 12,000 to 14,000 homes, 5.1 million square feet for commercial development, and more than 3,367 acres of open space and parks. On December 6, 2016, the Kern County Board of Supervisors unanimously approved the EIR for the development of the Grapevine community. Subsequently, Kern County was sued related to the approval and we are working with Kern County to defend the approved EIR. The entire litigation and permitting process will take several years and the investment of

several million dollars to successfully complete.

The greatest competition for the Centennial and Grapevine communities will come from California developments in the Santa Clarita Valley, Lancaster, Palmdale, and Bakersfield. The developments in these areas will be providing similar housing product as our developments. The principal factors of competition in this industry are pricing of product, amenities offered, and location. We will attempt to differentiate our developments through our unique setting, land planning and different product offerings. MV will compete generally for discretionary dollars that consumers will allocate to recreation and second homes, so its competition will range over a greater area and variety of projects. As we embark on the aforementioned master planned communities, we understand that it can take up to 25 years, or greater, to complete from commencement of construction. The entitlement process for development of property in California is complex, lengthy (spanning multiple years) and costly, involving numerous state and county regulatory approvals. We are unable to determine anticipated completion dates for our real estate development projects with certainty because the time for completion is heavily dependent on the regulatory approvals necessary for land development. Also, as a real estate developer, we are cognizant of the micro- and macro-economic factors that have a significant influence on the real estate sector. As a developer, one would be at an economic disadvantage to bring product to market with no willing or able buyers. This ebb and flow of the economy also plays into the timing of our completion date. Costs will also fluctuate over the life of these projects as a result of the cost of labor and raw materials and the timing of approvals and other activity. The uncertainty of estimated costs to completion is compounded by the potential impact of inflation, which will fluctuate with the equally uncertain completion dates for our projects.

The following is a summary of the Company's residential real estate developments as of December 31, 2016:

Community:	Mountain Village	Grapevine	Centennial	Resort
Location:	Kern County	Kern County	Los Angeles	Residential
Entitlement Status ¹ :	Entitled	Entitled ²	In Progress	Total
Entitlement Area (acres):	26,417	8,010	12,323	46,750
Housing Units:	3,450	12,000	19,333	34,783
Commercial Development (sqft) ³ :	160,000	5,100,000	10,100,000	15,360,000
Open Areas (acres):	21,335	3,367	5,624	30,326
Costs to Date ⁴ :	\$126,096	\$23,917	\$89,381	\$239,394

(1) Estimated completion anticipated to be 25 years, or greater, from commencement of construction. To-date construction has not begun.

(2) Kern County was sued related to the approval of the EIR and we are working with Kern County to defend the approved EIR.

(3) MV also has approval for up to 750 lodging units and 350,000 square feet of facilities in support of two 18-hole golf courses.

(4) Total estimated project costs are difficult to accurately forecast with any certainty at this time due to finalization of entitlement and mapping processes, as well as final engineering for the developments, and capital funding structure selected. Dollars presented in thousands.

Mineral Resources

Mineral resources consist of oil and gas royalties, rock and aggregate royalties, royalties from a cement operation leased to National Cement, and the management of water assets and water infrastructure. We continue to look for opportunities to grow our mineral resource revenues through expansion of leasing and encouraging new exploration. Within our water assets we are expanding our resources through new well drilling programs, while at the same time looking for opportunities to continue to purchase water as we have in the past. We will look to sell excess water over our internal needs on a temporary basis until that water is needed by us in our real estate and agricultural operations. We are cautiously optimistic that we could see new production activity later in 2017 as oil prices stabilize in the mid-\$50 per barrel range. We expect the improved oil prices will provide some improvements to our 2017 royalty revenues as compared to 2016 royalty revenues. We however are not expecting water sales for 2017 to be comparable to prior years due to the large amount of rain and snow in California in late 2016 and early 2017. Water sales for 2017 could be significantly lower than 2016.

We lease certain portions of our land to oil companies for the exploration and production of oil and gas. We however do not engage in any oil exploration or extraction activities. As of December 31, 2016, approximately 7,300 acres

were committed to producing oil and gas leases from which the operators produced and sold approximately 301,000 barrels of oil and 238,000 MCF (each MCF being 1,000 cubic feet) of dry gas during 2016. Our share of production, based upon average royalty rates during the last three years, has been 114, 149, and 179, barrels of oil per day for 2016, 2015, and 2014, respectively. Approximately 273 active oil wells were located on the leased land as of December 31, 2016. Royalty rates on our leases averaged approximately 13% of oil production in 2016.

Estimates of oil and gas reserves on our properties are unknown to us. We do not make such estimates, and our lessees do not make information concerning reserves available to us.

We have approximately 2,000 acres under lease to National Cement Company of California, Inc., or National, for the purpose of manufacturing Portland cement from limestone deposits found on the leased acreage. National owns and operates a cement manufacturing plant on our property with a capacity of approximately 1,000,000 tons of cement per year. The amount of payment that we receive under the lease is based upon shipments from the cement plant, which increased during 2016 compared to 2015. The improvement in shipments is due to an increase in road construction activity as compared to the prior years. The term of this lease expires in 2026, but National has options to extend the term for successive periods of 20 and 19 years. Proceedings under environmental laws relating to the cement plant are in process. The Company is indemnified by the current and former tenants and at this time we have no cost related to the issues at the cement plant. See Item 3, "Legal Proceedings," for a further discussion.

We also lease 521 acres to Granite Construction and Griffith Construction for the mining of rock and aggregate product that is used in construction of roads and bridges. The royalty revenues we receive under these leases are based upon the amount of product produced at these sites.

Our royalty interests are contractually defined and based on a percentage of production and are received in cash. Our royalty revenues fluctuate based on changes in the market prices for oil, natural gas, and rock and aggregate product, the inevitable decline in production of existing wells and quarries, and other factors affecting the third-party oil and natural gas exploration and production companies that operate on our lands including the cost of development and production.

In August 2015, we entered into an agreement with PEF our current lessee under a power plant lease. Beginning in 2016, PEF may purchase from us up to 2,000 acre feet of water and from January 2017 through July 2030, PEF may purchase from us up to 3,500 acre feet of water per year, with an option to extend the term. PEF is under no obligation to purchase water from us in any year, but is required to pay us an annual option payment equal to 30% of the maximum annual payment. The price of the water under the agreement is \$1,056 per acre foot of annual water in 2017, subject to 3% annual increases for the duration of the lease agreement. The Company's commitments to sell water can be met through current water assets.

Farming Operations

In the San Joaquin Valley, we farm permanent crops including the following acreage: wine grapes—1,649; almonds—1,683; and pistachios—1,053. We manage the farming of alfalfa and forage mix on 775 acres in the Antelope Valley and we periodically lease 1,000 acres of land that is used for the growing of vegetables.

We sell our farm commodities to several commercial buyers. As a producer of these commodities, we are in direct competition with other producers within the United States, or U.S., and throughout the world. Prices we receive for our commodities are determined by total industry production and demand levels. We attempt to improve price margins by producing high quality crops through proven cultural practices and by obtaining better prices through marketing arrangements with handlers.

Sales of our grape crop typically occur in the third and fourth quarters of the calendar year, while sales of our pistachio and almond crops also typically occur in the third and fourth quarter of the calendar year, but can occur up to a year or more after each crop is harvested.

In 2016, we sold 47% of our grape crop to one winery, 23% to a second winery and the remainder to three other customers. These sales are under long-term contracts ranging from one to 12 years. In 2016, our almonds were sold to various commercial buyers, with the largest buyer accounting for 41% of our almond revenues. We sold pistachios to two customers with the largest accounting for 79% of our pistachio revenues. We do not believe that we would be adversely affected by the loss of any or all of these large buyers because of the markets for these commodities, the large number of buyers that would be available to us, and the fact that the prices for these commodities do not vary based on the identity of the buyer or the size of the contract.

Our almond, pistachio, and wine grape crop sales are highly seasonal with a majority of our sales occurring during the third and fourth quarters. Nut and grape crop markets are particularly sensitive to the size of each year's world crop and the demand for those crops. Large crops in California and abroad can rapidly depress prices. Crop prices, especially almonds, are also adversely affected by a strong U.S. dollar which makes U.S. exports more expensive and decreases demand for the products we produce. The value of the U.S. dollar in prior years has helped to maintain

strong almond prices in overseas markets, but we are now seeing this change as the U.S. dollar has strengthened against the Euro. The full potential impact of an increasing U.S. dollar to our pricing and revenue is not known at this time but we have seen a decline in almond prices.

Weather conditions, such as warmer than normal winter temperatures, could impact the number of tree and vine dormant hours, which are integral to tree and vine growth. We will not know if there has been a negative impact on 2017 production until late spring or early summer of 2017. We have also seen heavy rains and strong winds during the bloom period for almonds, which could negatively impact 2017 production.

Our water entitlement for 2017, available from the California State Water Project, or SWP, when combined with supplemental water, is adequate for our farming needs. The State Department of Water Resources, or DWR, has announced its estimated water supply delivery at 60% of full entitlement. We expect 2017 rainfalls to provide some relief from the drought California has been experiencing. However, we are cognizant that rainfall in 2017 may not be sufficient to compensate for the drought we have experienced in California over the last several years. The current 60% allocation of state SWP water is not enough for us to farm our crops, but our additional water resources, such as groundwater and surface sources, and those of the water districts we are in, should allow us to have sufficient water for our farming needs. It is too early in the year to determine the impact of improved 2017 water supplies and the effects of 2016 drought on 2017 California crop production for almonds, pistachios, and wine grapes. See discussion of water contract entitlement and long-term outlook for water supply under Item 2, "Properties." Also see Note 6, (Long-Term Water Assets) of the Notes to Consolidated Financial Statements for additional information regarding our water assets.

Ranch Operations

During the fourth quarter of 2015, the Company reclassified certain revenues and expenses previously classified as commercial/industrial into a new segment called Ranch Operations.

Ranch operations consist of game management revenues and ancillary land uses such as grazing leases and filming. Within game management we operate our High Desert Hunt Club, a premier upland bird hunting club. The High Desert Hunt Club offers over 6,400 acres and 35 hunting fields, each field providing different terrain and challenges. The hunting season runs from mid-October through March. We sell individual hunting packages as well as memberships.

Ranch operations also includes Hunt at Tejon, which offers a wide variety of guided big game hunts including trophy Rocky Mountain elk, deer, turkey and wild pig. We offer guided hunts and memberships for both the Spring and Fall hunting seasons. At December 31, 2016, game management accounts for 39% of the total revenue from ranch operations.

In addition, the ranch operations segment is in charge of upkeep, maintenance, and security of all 270,000 acres of land.

Approximately 256,000 acres are used for two grazing leases, which account for 36% of total revenues from ranch operations at December 31, 2016.

General Environmental Regulation

Our operations are subject to federal, state and local environmental laws and regulations including laws relating to water, air, solid waste and hazardous substances. Although we believe that we are in material compliance with these requirements, there can be no assurance that we will not incur costs, penalties, and liabilities, including those relating to claims for damages to property or natural resources, resulting from our operations. Environmental liabilities may also arise from claims asserted by adjacent landowners or other third parties. We also expect continued legislation and regulatory development in the area of climate change and greenhouse gases. It is unclear as of this date how any such developments will affect our business. Enactment of new environmental laws or regulations, or changes in existing laws or regulations or the interpretation of these laws or regulations, might require expenditures in the future. We historically have not had material environmental liabilities.

Customers

We had no customers account for 10% or more of our revenues from continuing operations in 2016 and 2015. In 2016, 2015, and 2014 the PEF power plant lease generated approximately 8%, 7%, and 7% of our total revenues. No other client tenant represents 5% or more of our revenues in 2016 and 2015.

Organization

Tejon Ranch Co. is a Delaware corporation incorporated in 1987 to succeed the business operated as a California corporation since 1936.

Employees

At December 31, 2016, we had 152 full-time employees. We believe that we have good relations with our employees. We have adopted a Compliance with State and Federal Statutes, Rules and Regulations Reporting Policy that applies to all of our employees. Its receipt and review by each employee is documented and verified quarterly. None of our employees are covered by a collective bargaining agreement.

Reports

We make available free of charge through our Internet website, www.tejonranch.com, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports filed or to be furnished pursuant to Section 13(a) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after we electronically file such material with or furnish it to the SEC. We also make available on our website our corporate governance guidelines, charters of our key Board of Directors' Committees (audit, compensation, nominating and corporate governance, and real estate), and our Code of Business Conduct and Ethics for Directors, Officers, and Employees. These items are also available in printed copy upon request. We intend to disclose in the future any amendments to our Code of Business Conduct and Ethics for Directors, Officers, and Employees, or waivers of such provisions granted to executive officers and directors, on the web site within four business days following the date of such amendment or waiver. Any document we file with the Securities and Exchange Commission, or SEC, may be inspected, without charge, at the SEC's public reference room at 100 F Street, N.E. Washington, D.C. 20549 or at the SEC's internet site address at <http://www.sec.gov>. Information related to the operation of the SEC's public reference room may be obtained by calling the SEC at 1-800-SEC-0330.

Executive Officers of the Registrant

The following table shows each of our executive officers and the offices held as of March 1, 2017, the period the offices have been held, and the age of the executive officer.

Name	Office	Held since	Age
Gregory S. Bielli	President and Chief Executive Officer, Director	2013	56
Dennis J. Atkinson	Senior Vice President, Agriculture and Water	1998	66
Allen E. Lyda	Executive Vice President, Chief Financial Officer	1990	59
Hugh McMahon	Executive Vice President, Commercial/Industrial Development	2014	50
Joseph N. Rentfro	Executive Vice President, Real Estate	2015	48
Robert D. Velasquez	Vice President of Finance and Chief Accounting Officer	2015	50
Michael R.W. Houston	Senior Vice President, General Counsel	2016	42

A description of present and prior positions with us, and business experience for the past five years is given below.

Mr. Bielli has been employed by the Company since September 2013. Mr. Bielli joined the Company as President and Chief Operating Officer and became President and Chief Executive Officer on December 17, 2013. Prior to joining the Company Mr. Bielli was President of Newland Communities' Western Region and was responsible for overseeing management of all operational aspects of Newland's real estate projects in the region. Mr. Bielli worked with Newland Communities from 2006 through August 2013.

Mr. Atkinson has been employed by us since July 1998, serving as Vice President, Agriculture, until 2008 when he was promoted to Senior Vice President, Agriculture. Mr. Atkinson's title was subsequently changed to Senior Vice President, Agriculture and Water to more accurately describe the responsibilities of his office.

Mr. Lyda has been employed by us since 1990, serving as Vice President, Finance and Treasurer. He was elected Assistant Secretary in 1995 and Chief Financial Officer in 1999. Mr. Lyda was promoted to Senior Vice President in 2008, and Executive Vice President in 2012. Mr. Lyda's title was subsequently changed to Executive Vice President and Chief Financial Officer to more accurately describe the responsibilities of his office.

Mr. McMahon joined the Company in November 2001 as Director of Financial Analysis. In 2008, Mr. McMahon became Vice President of Commercial/Industrial Development and in December of 2014, was promoted to Senior Vice President of Commercial/Industrial Development and elected as an officer of the Company. In 2015, he was promoted to Executive Vice President.

Mr. Rentfro joined the Company on February 27, 2015 and was elected Executive Vice President of Real Estate on March 9, 2015. For the last five years, Mr. Rentfro directed development efforts for a number of major projects within the Emirate of Abu Dhabi in the United Arab Emirates. Notable developments include the Westin Abu Dhabi Golf Resort & Spa, Monte Carlo Beach Club-Saadiyat, Eastern Mangroves Resort and Residences, St. Regis Saadiyat Island Residences, and the Al Yamm and Al Sahel Villas at the Desert Islands Resort & Spa by Anantara. Prior to his work in the Middle East, Mr. Rentfro held executive positions at The St. Joe Company (NYSE: JOE), ascending ultimately to Regional Vice President and General Manager. There he led all efforts related to planning, design, entitlement, development, construction, asset management, marketing and sales for real estate operations within a 330,000-acre region along the Gulf Coast of Northwest Florida.

Mr. Velasquez joined the Company as Vice President of Finance of Tejon Ranchcorp, or TRC, a subsidiary of the Company, in November 2014. Mr. Velasquez's title was subsequently changed to Vice President of Finance and Chief Accounting Officer to more accurately describe the responsibilities of his office. Prior to joining TRC, Mr. Velasquez served as an Executive Director at Ernst & Young in their audit and assurance practice section. Mr. Velasquez worked with Ernst & Young from 1999 through 2014. Mr. Velasquez holds a B.S. in Business Administration with an option in Accounting from California State University, Los Angeles. Mr. Velasquez is a Certified Public Accountant in the state of California.

Mr. Houston joined the Company in May 2016 as the Senior Vice President, General Counsel. He previously worked for the City of Anaheim, where he served as City Attorney from 2013 – 2016. His background involves extensive experience in corporate governance, municipal law, real estate, land use and environmental issues. Prior to working for the City of Anaheim, he served as a partner for a Newport Beach, CA-based law firm of Cummins & White from 2011 to 2013, and prior to that, was a partner at Rutan & Tucker, LLP, Costa Mesa, CA.

ITEM 1A. RISK FACTORS

The risks and uncertainties described below are not the only ones facing the Company. If any of the following risks occur, our business, financial condition, results of operations or future prospects could be materially adversely affected. Our strategy, focused on more aggressive development of our land, involves significant risk and could result in operating losses. The risks that we describe in our public filings are not the only risks that we face. Additional risks and uncertainties not presently known to us, or that we currently consider immaterial, also may materially adversely affect our business, financial condition, and results of operations.

We are involved in a cyclical industry and are affected by changes in general and local economic conditions. The real estate development industry is cyclical and is significantly affected by changes in general and local economic conditions, including:

- Employment levels
- Availability of financing
- Interest rates
- Consumer confidence
- Demand for the developed product, whether residential or industrial
- Supply of similar product, whether residential or industrial

The process of development of a project begins and financial and other resources are committed long before a real estate project comes to market, which could occur at a time when the real estate market is depressed. It is also possible in a rural area like ours that no market for the project will develop as projected.

Adverse changes in economic conditions in markets where we conduct our operations and where prospective purchasers of our future homes and commercial products live could reduce the demand for our products and, as a result, could adversely affect our business, results of operations, and financial condition. Adverse changes in economic conditions in markets where we conduct our operations and where prospective purchasers of our real estate products live have had and may in the future have a negative impact on our business. Adverse changes in employment levels, job growth, consumer confidence, interest rates, and population growth, or an oversupply of product for sale or lease may reduce demand and depress prices and cause buyers to cancel their purchase agreements. This, in turn, could adversely affect our results of operations and financial condition.

Higher interest rates and lack of available financing can have significant impacts on the real estate industry. Higher interest rates generally impact the real estate industry by making it harder for buyers to qualify for financing, which can lead to a decrease in the demand for residential, commercial or industrial sites. Any decrease in demand will negatively impact our proposed developments. Lack of available credit to finance real estate purchases can also negatively impact demand. Any downturn in the economy or consumer confidence can also be expected to result in reduced housing demand and slower industrial development, which would negatively impact the demand for land we are developing.

The inability of a client tenant to pay us rent could adversely affect our business. Our commercial revenues are derived primarily from rental payments and reimbursement of operating expenses under our leases. If our client tenants fail to make rental payments under their leases, our financial condition and cash flows could be adversely affected.

Our inability to renew leases or re-lease space on favorable terms as leases expire may significantly affect our business. Some of our revenues are derived from rental payments and reimbursement of operating expenses under our leases. If a client tenant experiences a downturn in its business or other types of financial distress, it may be unable to make timely payments under its lease. Also, if our client tenants terminate early or decide not to renew their leases, we may not be able to re-lease the space. Even if client tenants decide to renew or lease space, the terms of renewals or new leases, including the cost of any tenant improvements, concessions, and lease commissions, may be less favorable to us than current lease terms. Consequently, we could generate less cash flow from the affected properties than expected, which could negatively impact our business. We may have to divert cash flow generated by other properties to meet our debt service payments, if any, or to pay other expenses related to owning the affected properties.

We may experience increased operating costs, which may reduce profitability to the extent that we are unable to pass those costs on to client tenants. Our properties are subject to increases in operating expenses including insurance, property taxes, utilities, administrative costs, and other costs associated with security, landscaping, and repairs and maintenance of our properties. Our leases allow us to pass along real estate taxes, insurance, utilities, common area, and other operating expenses (including increases thereto) in addition to base rent. However, we cannot be certain that our client tenants will be able to bear the full burden of these higher costs, or that such increased costs will not lead them, or other prospective client tenants, to seek space elsewhere. If operating expenses increase, the availability of other comparable space in the markets we operate in may hinder or limit our ability to increase our rents if operating expenses increase without a corresponding increase in revenues, our profitability could diminish.

We are subject to various land use regulations and require governmental approvals and permits for our developments that could be denied. In planning and developing our land, we are subject to various local, state, and federal statutes, ordinances, rules and regulations concerning zoning, infrastructure design, subdivision of land, and construction. All of our new developments require amending existing general plan and zoning designations, so it is possible that our entitlement applications could be denied. In addition, the zoning that ultimately is approved could include density provisions that would limit the number of homes and other structures that could be built within the boundaries of a particular area, which could adversely impact the financial returns from a given project. Many states, cities and counties (including neighboring Ventura County) have in the past approved various “slow growth” or “urban limit line” measures. If that were to occur in the jurisdictions governing the Company’s land use, our future real estate development activities could be significantly adversely affected.

Third-party litigation could increase the time and cost of our development efforts. The land use approval processes we must follow to ultimately develop our projects have become increasingly complex. Moreover, the statutes, regulations and ordinances governing the approval processes provide third parties the opportunity to challenge the proposed plans and approvals. As a result, the prospect of third-party challenges to planned real estate developments provides additional uncertainties in real estate development planning and entitlements. Third-party challenges in the form of litigation could result in denial of the right to develop, or would, by their nature, adversely affect the length of time and the cost required to obtain the necessary approvals. In addition, adverse decisions arising from any litigation would increase the costs and length of time to obtain ultimate approval of a project and could adversely affect the design, scope, plans and profitability of a project.

We are subject to environmental regulations and opposition from environmental groups that could cause delays and increase the costs of our development efforts or preclude such development entirely. Environmental laws that apply to a given site can vary greatly according to the site's location and condition, present and former uses of the site, and the presence or absence of sensitive elements like wetlands and endangered species. Federal and state environmental laws also govern the construction and operation of our projects and require compliance with various environmental regulations, including analysis of the environmental impact of our projects and evaluation of our reduction in the projects' carbon footprint and greenhouse gas emissions. Environmental laws and conditions may result in delays, cause us to incur additional costs for compliance, mitigation and processing land use applications, or preclude development in specific areas. In addition, in California, third parties have the ability to file litigation challenging the approval of a project which they usually do by alleging inadequate disclosure and mitigation of the environmental impacts of the project. Certain groups opposed to development have made clear they intend to oppose our projects vigorously, so litigation challenging their approval is expected. Currently, the Grapevine entitlement approval has been opposed and litigation has been filed against Kern County as the approving governmental entity. The issues most commonly cited in opponents' public comments include the poor air quality of the San Joaquin Valley air basin, potential impacts of projects on the California condor and other species of concern, the potential for our lands to function as wildlife movement corridors, potential impacts of our projects on traffic and air quality in Los Angeles County, emissions of greenhouse gases, water availability and criticism of proposed development in rural areas as being "sprawl". In addition, California has a specific statutory and regulatory scheme intended to reduce greenhouse gas emissions in the state and efforts to enact federal legislation to address climate change concerns could require further reductions in our projects' carbon footprint in the future.

Constriction of the credit markets or other adverse changes in capital market conditions could limit our ability to access capital and increase our cost of capital. During past economic downturns, we relied principally on positive operating cash flow, cash and investments, and equity offerings to meet current working capital needs, entitlement investment, and investment within our developments. While the current economy has seen improvement, any slowdown in the economy could negatively impact our access to credit markets and may limit our sources of liquidity in the future and potentially increase our costs of capital.

We regularly assess our projected capital requirements to fund future growth in our business, repay our debt obligations, and support our other general corporate and operational needs, and we regularly evaluate our opportunities to raise additional capital. As market conditions permit, we may issue new equity securities through the public capital markets or obtain additional bank financing to fund our projected capital requirements or provide additional liquidity. Adverse changes in economic, or capital market conditions could negatively affect our business, liquidity and financial results.

Until governmental entitlements are received, we will have a limited inventory of real estate. Each of our four current and planned real estate projects, TRCC, Centennial, MV, and Grapevine involve obtaining various governmental permits and/or entitlements. A delay in obtaining governmental approvals could lead to additional costs related to these developments and potentially lost opportunities for the sale of lots to developers and land users.

We are in competition with several other developments for customers and residents. Within our real estate activities, we are in direct competition for customers with other industrial sites in Northern, Central, and Southern California. We are also in competition with other highway interchange locations using Interstate 5 and State Route 99 for commercial leasing opportunities. Once they receive all necessary permits, approvals and entitlements, Centennial and Grapevine will ultimately compete with other residential housing options in the region, such as developments in the Santa Clarita Valley, Lancaster, Palmdale, and Bakersfield. MV will compete generally for discretionary dollars that consumers will allocate to recreation and second homes, so its competition will include a greater area and range of projects. Intense competition may decrease our sales and harm our results of operations.

Our developable land is concentrated entirely in California. All of our developable land is in California and our business is especially sensitive to the economic conditions within California. Any adverse change in the economic climate of California, or our regions of that state, and any adverse change in the political or regulatory climate of California, or the counties where our land is located could adversely affect our real estate development activities. Ultimately, our ability to sell or lease lots may decline as a result of weak economic conditions or restrictive regulations.

Increases in taxes or government fees could increase our cost, and adverse changes in tax laws could reduce demand for homes in our future residential communities. Increases in real estate taxes and other local government fees, such as fees imposed on developers to fund schools, open space, and road improvements, could increase our costs and have an adverse effect on our operations. In addition, any changes to income tax laws that would reduce or eliminate tax deductions or incentives to homeowners, such as a change limiting the deductibility of real estate taxes or interest on home mortgages, could make housing less affordable or otherwise reduce the demand for housing, which in turn could reduce future sales.

Within our real estate projects we incur significant costs before we can begin development or construction of our projects, sell and deliver units to our customers or begin the collection of rent and recover our costs. We may be subject to delays in the entitlement process and construction, which could lead to higher costs, which could adversely affect our operating results. Changing market conditions during the entitlement and construction periods could negatively impact selling prices and rents, which could adversely affect our operating results. Before any of our real estate projects can generate revenues we make material expenditures to obtain entitlements, permits, and development approvals. It generally takes several years to complete this process and completion times vary based on complexity of the project and the community and regulatory issues involved. As a result of the time and complexity involved in getting approvals for our projects we face the risk that demand for housing, retail and industrial product may decline and we may be forced to sell or lease product at a loss or for prices that generate lower profit margins than we anticipated. If values decline, we may be required to make material write-downs of the book value of real estate projects in accordance with general accepted accounting principles.

If we experience shortages or increased costs of labor and supplies or other circumstances beyond our control, there could be delays or increased costs within our industrial development, which could adversely affect our operating results. Our ability to develop our current industrial development may be adversely affected by circumstances beyond our control including: work stoppages, labor disputes and shortages of qualified trades people; changes in laws relating to union organizing activity; and shortages, delays in availability, or fluctuations in prices of building materials. Any of these circumstances could give rise to delays in the start or completion of, or could increase the cost of, developing infrastructure and buildings within our industrial development. If any of the above happens, our operating results could be harmed.

We are dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect our prospects. Our future success depends, to a significant degree, on the efforts of our senior management. The loss of key personnel could materially and adversely affect our results of operations, financial condition, or our ability to pursue land development. Our success will also depend in part on our ability to attract and retain additional qualified management personnel.

Our business model is very dependent on transactions with strategic partners. We may not be able to successfully (1) attract desirable strategic partners; (2) complete agreements with strategic partners; and/or (3) manage relationships with strategic partners going forward, any of which could adversely affect our business. A key to our development and value creation strategies has been the use of joint ventures and strategic relationships. These joint venture partners bring development experience, industry expertise, financial resources, financing capabilities, brand recognition and credibility or other competitive assets.

A complicating factor in any joint venture is that strategic partners may have economic or business interests or goals that are inconsistent with ours or that are influenced by factors related to our business. These competing interests lead to the difficult challenges of successfully managing the relationship and communication between strategic partners and monitoring the execution of the partnership plan. We may also be subject to adverse business consequences if the market reputation or financial position of the strategic partner deteriorates. If we cannot successfully execute transactions with strategic partners, our business could be adversely affected.

Only a limited market exists for our Common Stock, which could lead to price volatility. The limited trading market for our Common Stock may cause fluctuations in the market value of our Common Stock to be exaggerated, leading to price volatility in excess of that which would occur in a more active trading market of our Common Stock. Concentrated ownership of our Common Stock creates a risk of sudden change in our share price. As of February 28, 2016, directors and members of our executive management team beneficially owned or controlled approximately 30% of our Common Stock. Investors who purchase our Common Stock may be subject to certain risks due to the concentrated ownership of our Common Stock. The sale by any of our large shareholders of a significant portion of that shareholder's holdings could have a material adverse effect on the market price of our Common Stock. In addition, the registration and sale of any significant amount of additional shares of our Common Stock will have the immediate effect of increasing the public float of our Common Stock and any such increase may cause the market price of our Common Stock to decline or fluctuate significantly.

Decreases in the market value of our investments in marketable securities could have an adverse impact on our results of operations. We have a significant amount of funds invested in marketable securities, the market value of which is

subject to changes from period to period. Decreases in the market value of our marketable securities could have an adverse impact on our results of operations.

Inflation can have a significant adverse effect on our operations. Inflation can have a major impact on our farming operations. The farming operations are most affected by escalating costs, unpredictable revenues and very high irrigation water costs. High fixed water costs related to our farm lands will continue to adversely affect earnings. Prices received for many of

our products are dependent upon prevailing market conditions and commodity prices. Therefore, it is difficult for us to accurately predict revenue, just as we cannot pass on cost increases caused by general inflation, except to the extent reflected in market conditions and commodity prices.

Inflation can adversely impact our real estate operations, by increasing costs of material and labor as well as the cost of capital, which can impact operating margins. In an inflationary environment, we may not be able to increase prices at the same pace as the increase in inflation, which would further erode operating margins.

A prolonged downturn in the real estate market or instability in the mortgage and commercial real estate financing industry, could have an adverse effect on our real estate business. Our residential housing projects, Centennial, MV, and Grapevine, are currently in the entitlement phase, permitting phase, or are fully entitled and waiting for development to begin. If a downturn in the real estate market or an instability in the mortgage and commercial real estate financing industry exists at the time these projects move into their development and marketing phases, our resort/residential business could be adversely affected. An excess supply of homes available due to foreclosures or the expectation of deflation in housing prices could also have a negative impact on our ability to sell our inventory when it becomes available. The inability of potential commercial/industrial clients to get adequate financing for the expansion of their businesses could lead to reduced lease revenues and sales of land within our industrial development.

We have increased our long-term debt significantly from past years and any future inability to comply with related covenants, restrictions or limitations could adversely affect our financial condition. Our ability to meet our debt service and other obligations and the financial covenants under our credit facility will depend, in part, upon our future financial performance. Our future results are subject to the risks and uncertainties described in this report. Our revenues and earnings vary with the level of general economic activity in the markets we serve and the level of commodity prices related to our farming and mineral resource activities. The factors that affect our ability to generate cash can also affect our ability to raise additional funds for these purposes through the addition of debt, the sale of equity, refinancing existing debt, or the sale of assets.

Our credit facility contains financial covenants requiring the maintenance of a maximum total liabilities to tangible net worth not greater than .75 to 1 at each quarter end, a debt service coverage ratio not less than 1.25 to 1.00, and a minimum level of liquidity of \$20,000,000, including any unused portion of our revolving credit facility. A failure to comply with these requirements could allow the lending bank to terminate the availability of funds under our revolving credit facility and/or cause any outstanding borrowings to become due and payable prior to maturity.

Volatile oil and natural gas prices could adversely affect our cash flows and results of operations. Our cash flows and results of operations are dependent in part on oil and natural gas prices, which are volatile. Oil and natural gas prices also impact the amount we receive for selling and renewing our mineral leases. Moreover, oil and natural gas prices depend on factors we cannot control, such as: changes in foreign and domestic supply and demand for oil and natural gas; actions by the Organization of Petroleum Exporting Countries; weather; political conditions in other oil-producing countries, including the possibilities of insurgency or war in such areas; prices of foreign exports; domestic and international drilling activity; price and availability of alternate fuel sources; the value of the U.S. dollar relative to other major currencies; the level and effect of trading in commodity markets; and the effect of worldwide energy conservation measures and governmental regulations. Any substantial or extended decline in the price of oil and gas could have a negative impact on our business, liquidity, financial condition and results of operations.

Substantial or extended declines in future natural gas or crude oil prices would have a material adverse effect on our future business, financial condition, results of operations, cash flows, liquidity or ability to finance planned capital expenditures and commitments. Furthermore, substantial, extended decreases in natural gas and crude oil prices may cause us to delay development projects and could negatively impact our ability to borrow, our cost of capital and our ability to access capital markets, increase our costs under our revolving credit facility, and limit our ability to execute aspects of our business plans.

Our reserves and production will decline from their current levels. The rate of production from oil and natural gas properties generally decline as reserves are produced. Any decline in production or reserves could materially and adversely affect our future cash flow, liquidity and results of operations.

Water delivery and water availability continues to be a long-term concern within California. Any limitation of delivery of SWP water, limitations on our ability to move our water resources, and the absence of available reliable

alternatives during drought periods could potentially cause permanent damage to orchards and vineyards and possibly impact future development opportunities.

Our future revenue and profitability related to our water resources will primarily be dependent on our ability to acquire and sell water assets. In light of the fact that our water resources represent a portion of our overall business at present, our long-term profitability will be affected by various factors, including the availability and timing of water resource acquisitions, regulatory approvals and permits associated with such acquisitions, transportation arrangements, and changing technology. We may also encounter unforeseen technical or other difficulties which could result in cost increases with respect to our water resources. Moreover, our profitability is significantly affected by changes in the market price of water. Future sales and prices of water may fluctuate widely as demand is affected by climatic, economic, demographic and technological factors as well as the relative strength of the residential, commercial, financial, and industrial real estate markets. The factors described above are not within our control. Terrorist attacks may have an adverse impact on our business and operating results and could decrease the value of our assets. Terrorist attacks such as those that have taken place in recent years, could have a material adverse impact on our business, our operating results, and the market price of our common stock. Future terrorist attacks may result in declining economic activity, which could reduce the demand for and the value of our properties. To the extent that future terrorist attacks impact our client tenants, their businesses similarly could be adversely affected, including their ability to continue to honor their lease obligations.

We may encounter other risks that could impact our ability to develop our land. We may also encounter other difficulties in developing our land, including:

- Difficulty in securing adequate water resources for future developments;
- Natural risks, such as geological and soil problems, earthquakes, fire, heavy rains and flooding, and heavy winds;
- Shortages of qualified trades people;
- Reliance on local contractors, who may be inadequately capitalized;
- Shortages of materials; and
- Increases in the cost of materials.

Information technology failures and data security breaches could harm our business. We use information technology and other computer resources to carry out important operational and marketing activities and to maintain our business records. These information technology systems are dependent upon global communications providers, web browsers, telephone systems and other aspects of the Internet infrastructure that have experienced security breaches, cyber-attacks, significant systems failures and electrical outages in the past. A material network breach in the security of our information technology systems could include the theft of customer, employee or company data. The release of confidential information as a result of a security breach may also lead to litigation or other proceedings against us by affected individuals or business partners, or by regulators, and the outcome of such proceedings, which could include penalties or fines, could have a significant negative impact on our business. We may also be required to incur significant costs to protect against damages caused by these information technology failures or security breaches in the future. However, we cannot provide assurance that a security breach, cyber-attack, data theft or other significant systems failure will not occur in the future, and such occurrences could have a material and adverse effect on our consolidated results of operations or financial position.

Failure to maintain effective internal control over financial reporting could have a material adverse effect on our business, results of operations, financial condition, and stock price. Pursuant to the Sarbanes-Oxley Act of 2002, we are required to provide a report by management on internal control over financial reporting, including management's assessment of the effectiveness of internal control. Changes to our business will necessitate ongoing changes to our internal control systems and processes. Internal control over financial reporting may not prevent or detect misstatement because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If we fail to maintain the adequacy of our internal controls, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business, results of operations, and financial condition could be materially harmed, and we could fail to meet our reporting obligations and there could be a material adverse effect on our stock price.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Land

Our approximate 270,000 acres include portions of the San Joaquin Valley, portions of the Tehachapi Mountains and portions of the western end of the Antelope Valley. Each of our five major segments use various portions of this land. A number of key transportation and utility facilities cross our land, including Interstate 5, California Highways 58, 138 and 223, the California Aqueduct (which brings water from Northern California), and various transmission lines for electricity, oil, natural gas and communication systems. Our corporate offices are located on our property.

Approximately 247,000 acres of our land are located in Kern County, California. The Kern County general plan, or the “General Plan”, for this land contemplates continued commercial, resource utilization, farming, grazing and other agricultural uses, as well as certain new developments and uses, including residential and recreational facilities. While the General Plan is intended to provide guidelines for land use and development, it is subject to amendment to accommodate changing circumstances and needs. We have three major master planned real estate projects in Kern County that have received entitlement approvals from Kern County: Mountain Village, TRCC and Grapevine. The remainder of our land, approximately 23,000 acres, is in Los Angeles County. This area is accessible from Interstate 5 via Highway 138. Los Angeles County has adopted general plan policies that contemplate future residential development of portions of this land, subject to further assessments of environmental and infrastructure constraints. We are currently pursuing specific plan entitlement for phase one entitlement for Centennial on approximately 12,323 acres of this land. See Item 1, “Business—Real Estate Development Overview.”

Portions of our land consist of mountainous terrain, much of which is not presently served by paved roads or by utility or water lines. Much of this property is included within the Conservation Agreement we entered into with five of the major environmental organizations in June 2008. As we receive entitlement approvals over the life span of our developments we will dedicate conservation easements on 145,000 acres of this land, which will preclude future development of the land. This acreage includes many of the most environmentally sensitive areas of our property and is home to many plant and wildlife species whose environments will remain undisturbed.

Any significant development on our currently undeveloped land would involve the construction of roads, utilities and other expensive infrastructure and would have to be done in a manner that accommodates a number of environmental concerns, including endangered species, wetlands issues, and greenhouse gas emissions. Accommodating these environmental concerns, could possibly limit development of portions of the land or result in substantial delays or certain changes to the scope of development in order to obtain governmental approval.

Water Operations

Our existing long-term water contracts with the Wheeler Ridge-Maricopa Water Storage District, or WRMWSD, provide for water entitlements and deliveries from the SWP, to our agricultural and municipal/industrial operations in the San Joaquin Valley. The terms of these contracts extend to 2035. Under the contracts, we are entitled to annual water for 5,496 acres of land, or 15,547 acre-feet of water subject to SWP allocations, which is adequate for our present farming operations. It is assumed, that at the end of the current contract period all water contracts will be extended for approximately the same amount of annual water.

In addition to the WRMWSD contract water entitlements, we have an additional water entitlement from the SWP sufficient to service a substantial amount of future residential and/or commercial development in Kern County. The Tejon-Castac Water District, or TCWD, a local water district serving our land in the district and land we have sold in TRCC, has 5,749 acre-feet of SWP entitlement (also called Table A amount), subject to SWP allocations. In addition, TCWD has approximately 33,390 acre-feet of water stored in Kern County water banks. Both the entitlement and the banked water are the subject of a long-term water supply contract extending to 2035 between TCWD and our Company. TCWD is the water supplier to TRCC, and will be the principal water supplier for any significant residential and recreational development in MV. TCWD will also be the water district that provides services to Grapevine.

We have a 150-acre water bank consisting of nine ponds on our land in southern Kern County. Water is pumped into these ponds and then percolates into underground aquifers. Since 2006, we have banked 17,287 acre feet of water from the Antelope Valley-East Kern Water Agency, or AVEK, which has been pumped from the California aqueduct and is currently retained in this water bank. In 2007 and 2008 we contracted for 2,362 additional acre-feet of water from AVEK, but have deferred delivery of the water to a future year. We anticipate adding additional water to the

water bank in the future, as water is available. In 2010 we began participating with AVEK in a water-banking program and we have approximately 13,033 acre-feet of water to our credit in this program.

Over time we have also purchased water for our future use or sale. In 2008 we purchased 8,393 acre-feet of transferable water and in 2009 we purchased an additional 6,393 acre-feet of transferable water, all of which is currently held on our behalf by AVEK or has been placed in our water bank. We also have secured SWP entitlement under long-term SWP water contracts within the Tulare Lake Basin Water Storage District and the Dudley-Ridge Water District, totaling 3,444 acre-feet of SWP entitlement annually, subject to SWP allocations. These contracts extend through 2035. On November 6, 2013, the Company completed the acquisition of a water purchase agreement that will allow and require the Company to purchase 6,693 acre feet of water each year from the Nickel Family, LLC, or Nickel, through the Kern County Water Agency. The aggregate purchase price was approximately \$18,700,000 and was paid one-half in cash and one-half in shares of Company Common Stock. The number of shares of Common Stock delivered was determined based on the volume weighted average price of Common Stock for the ten trading days that ended two days prior to closing, which calculated to be 251,876 shares of Common Stock.

The initial term of the water purchase agreement with Nickel runs through 2044 and includes a Company option to extend the contract for an additional 35 years. This contract allows us to purchase water each year. The purchase cost of water in 2016 was \$695 per acre-foot. Purchase costs in 2016 and beyond are subject to annual cost increases based on the greater of the consumer price index and 3%, resulting in a 2017 purchase cost of \$717 per acre-foot.

The water purchased will ultimately be used in the development of the Company's land for commercial/industrial development, residential development, and farming. Interim uses may include the sale of portions of this water to third party users on an annual basis until the water is fully used for the Company's internal uses.

During 2016, SWP allocations were approximately 60% of contract levels, and WRMWSD was able to supply us with water from various sources that when combined with our water sources provided sufficient water to meet our farming and real estate demands. In some years, there is also sufficient runoff from local mountain streams to allow us to capture some of this water in reservoirs and utilize it to offset some of the SWP water. In years where the supply of water is sufficient, both WRMWSD and TCWD are able to bank (percolate into underground aquifers) some of their excess supplies for future use. At this time, Wheeler Ridge expects to be able to deliver our entire contract water entitlement in any year that the SWP allocations exceed 30% by drawing on its ground water wells and water banking assets. Based on historical records of water availability, we do not believe we have material problems with our water supply. However, if SWP allocations are less than 30% of our entitlement in any year, or if shortages continue for a sustained period of several years, then WRMWSD may not be able to deliver 100% of our entitlement and we will have to rely on our own ground water sources, mountain stream runoff, water transfer from others, and water banking assets to supply the needs of our farming and development activities. Water from these sources may be more expensive than SWP water because of pumping costs and/or transfer costs. A 60% preliminary SWP water allocation has been made by the DWR for 2017. The current 60% allocation of SWP water is not enough for us to farm our crops, but our additional water resources, such as groundwater and surface sources, and those of the water districts we are in, should allow us to have sufficient water for our farming needs.

All SWP water contracts require annual payments related to the fixed and variable costs of the SWP and each water district, whether or not water is used or available. WRMWSD and TCWD contracts also establish a lien on benefited land.

Portions of our property also have available groundwater, which we believe would be sufficient to supply commercial development in the Interstate 5 corridor and support current agricultural operations. Ground water in the Antelope Valley Basin is the subject of litigation. See Item 3, "Legal Proceedings" for additional information about this litigation. Please refer to "Note 14. Commitments and Contingencies" for further discussion.

A new development with respect to groundwater is the Sustainable Groundwater Management Act, or SGMA, which became effective January 1, 2015. For the water districts in which the Company participates in the San Joaquin Valley, Groundwater Sustainability Plans are to be developed by 2020. Through those plans it will have to be demonstrated to the satisfaction of the Department of Water Resources, that the basins are "sustainable" and in balance by 2040, which could ultimately lead to restrictions on the use of groundwater. The Company's lands are located in the White Wolf Basin, which is a basin that is currently not over-drafted, so there is no anticipation at this time of any restriction related to manageable uses of ground water. However, the Company's lands are in relatively good condition because of the diverse inventory of surface water supplies and banked water that the Company has access to as mentioned above.

There have been many environmental challenges regarding the movement of SWP water through the Sacramento Delta. Operation of the Delta pumps are of primary importance to the California water system because these pumps are part of the system that moves water from Northern California to Southern California. Biological Opinions, or BOs, issued by the U.S. Fish and Wildlife Service and National Marine Fisheries Service in 2008 and 2009 contain restrictions on pumping from the Delta. These BOs are being challenged in the courts by both water agencies and environmental groups, which challenges were for the most part unsuccessful. There are many groups, governmental and private, working together to develop a solution in the future to mitigate the curtailment of water from the Delta.

Historic SWP restrictions on the right to use agricultural water entitlement for municipal purposes were removed in 1995. For this purpose, “municipal” use includes residential and industrial use. Therefore, although only 2,000 of TCWD's 5,749 acre feet of entitlement are labeled for municipal use, there is no practical restriction on TCWD's ability to deliver the remaining water to residential or commercial/industrial developments.

Other Activities

The Tejon Ranch Public Facilities Financing Authority, or TRPFFA, is a joint powers authority formed by Kern County and TCWD to finance public infrastructure within the Company's Kern County developments. TRPFFA has created two Community Facilities Districts, or CFDs, the West CFD and the East CFD. The West CFD has placed liens on 420 acres of the Company's land to secure payment of special taxes related to \$28,620,000 of bond debt sold by TRPFFA for TRCC-West. The East CFD has placed liens on 1,931 acres of the Company's land to secure payments of special taxes related to \$55,000,000 of bond debt sold by TRPFFA for TRCC-East. At TRCC-West, the West CFD has no additional bond debt approved for issuance. At TRCC-East, the East CFD has approximately \$65,000,000 of additional bond debt authorized by TRPFFA. Proceeds from the sales of these bonds are to reimburse the Company for public infrastructure related to TRCC-East. During 2016, we received \$6,155,000 in reimbursement from the East CFD bonds.

In 2016 and 2015, we paid approximately \$2,585,000 and \$1,926,000 in special taxes related to the CFDs. As development continues to occur at TRCC, new owners of land and new lease tenants, through triple net leases, will bear an increasing portion of the assessed special tax. It is expected that we will have special tax payments in 2017 of approximately \$2,585,000, but this could change in the future based on the amount of bonds outstanding within each CFD and the amount of taxes paid by other owners and tenants. The assessment of each individual property sold or leased is not determinable at this time because it is based on the current tax rate and the assessed value of the property at the time of sale or on its assessed value at the time it is leased to a third-party. Accordingly, the Company is not required to recognize an obligation at December 31, 2016.

ITEM 3. LEGAL PROCEEDINGS

The Company is involved in various legal matters arising out of its operations in the normal course of business. None of these matters are expected, individually or in the aggregate, to have a material adverse effect on the Company. For a discussion of legal proceedings, see Note 14 Commitments and Contingencies of the Notes to the Consolidated Financial Statements.

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND
5. ISSUER PURCHASES OF EQUITY SECURITIES

The following table shows the high and low sale prices for our Common Stock, which trades under the symbol TRC on the New York Stock Exchange, for each calendar quarter during the last two years:

	2016		2015	
Quarter	High	Low	High	Low
First	\$21.58	\$16.85	\$29.74	\$23.57
Second	\$24.90	\$19.50	\$27.10	\$23.84
Third	\$26.99	\$22.00	\$28.00	\$21.50
Fourth	\$27.99	\$21.13	\$24.28	\$18.12

As of February 28, 2017, there were 303 registered owners of record of our Common Stock.

No cash dividends were paid in 2016 or 2015 and at this time there is no intention of paying cash dividends in the future. During 2013, the Company did provide a dividend consisting of warrants to our shareholders. Please see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity and Capital Resources, Capital Structure and Financial Condition" for information concerning the warrant dividend program.

On October 13, 2014, the Tejon Ranchcorp, a subsidiary of the Company, entered into an Amended and Restated Credit Agreement, a Term Note and a Revolving Line of Credit Note. This new credit facility contains customary negative covenants that limit the ability of the Company to, among other things, pay dividends or repurchase stock to the extent that immediately following any such dividend or repurchase of stock, total liabilities divided by tangible net worth (Stockholders Equity) is not greater than 0.75 to 1.0.

For information regarding equity compensation plans pursuant to Item 201(d) of Regulation S-K, please see Item 11, "Executive Compensation" and Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" of this Form 10-K, below.

The annual stockholder performance graph will be provided separately in our annual report to stockholders.

ITEM 6. SELECTED FINANCIAL DATA

	2016	2015	2014	2013	2012
Total revenues from operations, including interest and other income	\$47,236	\$52,056	\$52,291	\$46,345	\$48,444
Income (loss) from operations before equity in earnings of unconsolidated joint ventures	\$(6,247)	\$(2,287)	\$3,165	\$2,183	\$4,471
Equity in earnings of unconsolidated joint ventures	\$7,098	\$6,324	\$5,294	\$4,006	\$2,535
Net income	\$515	\$2,912	\$5,762	\$4,103	\$4,283
Net (loss) income attributable to noncontrolling interests	\$(43)	\$(38)	\$107	\$(62)	\$(158)
Net income attributable to common stockholders	\$558	\$2,950	\$5,655	\$4,165	\$4,441
Total assets	\$439,701	\$431,919	\$431,923	\$342,879	\$327,856
Long-term debt, less current portion	\$69,853	\$73,223	\$74,023	\$4,459	\$212
Equity	\$334,467	\$331,308	\$324,333	\$320,187	\$308,259
Net income attributable to common stockholders per share, diluted	\$0.03	\$0.14	\$0.27	\$0.20	\$0.22

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
7. OPERATIONS

See Part I, "Forward-Looking Statements" for our cautionary statement regarding forward-looking information.

This discussion and analysis is based on, should be read together with, and is qualified in its entirety by, the consolidated financial statements and notes thereto included in Item 15(a)1 of this Form 10-K, beginning at page F-1. It also should be read in conjunction with the disclosure under “Forward-Looking Statements” in Part 1 of this Form 10-K. When this report uses the words “we,” “us,” “our,” “Tejon,” “TRC,” and the “Company,” they refer to Tejon Ranch Co. its subsidiaries, unless the context otherwise requires. References herein to fiscal year refer to our fiscal years ended or ending December 31.

OVERVIEW

Our Business

We are a diversified real estate development and agribusiness company committed to responsibly using our land and resources to meet the housing, employment, and lifestyle needs of Californians and to create value for our shareholders. In support of these objectives, we have been investing in land planning and entitlement activities for new industrial and residential land developments and in infrastructure improvements within our active industrial development. Our prime asset is approximately 270,000 acres of contiguous, largely undeveloped land that, at its most southerly border, is 60 miles north of Los Angeles and, at its most northerly border, is 15 miles east of Bakersfield. Our business model is designed to create value through the entitlement and development of land for commercial/industrial and resort/residential uses while at the same time protecting significant portions of our land for conservation purposes. We operate our business near one of the country’s largest population centers, which is expected to continue to grow well into the future.

We currently operate in five operating segments: commercial/industrial real estate development; resort/residential real estate development; mineral resources; farming; and ranch operations.

Our commercial/industrial real estate development segment generates revenues from building, land lease activities, and land and building sales. The primary commercial/industrial development is TRCC. The resort/residential real estate development segment is actively involved in the land entitlement and development process internally and through joint venture entities. Within our resort/residential segment, the three active developments are MV, Centennial, and Grapevine. During the last quarter of 2016, the Kern County Board of Supervisors granted entitlement approval for our land planning activities for Grapevine, which is an approximately 8,010 acre development area located on the San Joaquin Valley floor area of our lands, adjacent to TRCC. These approvals included certification of our final environmental impact report and related findings, approval of associated general plan amendments, and adoption of associated zoning maps. Our mineral resources segment generates revenues from oil and gas royalty leases, rock and aggregate mining leases, a lease with National Cement and sales of water. The farming segment produces revenues from the sale of wine grapes, almonds, and pistachios. Lastly, the ranch operation segment consists of game management revenues and ancillary land uses such as grazing leases and filming.

Financial Highlights

For 2016, net income attributable to common stockholders was \$558,000 compared to \$2,950,000 in 2015. Factors driving the change include: a decline in farming revenues of \$5,188,000 resulting from declines in commodity prices and a decline of mineral resource revenues of \$963,000 resulting from falling oil prices in 2016. Offsetting the decline in net income were the following factors: an increase in commercial real estate revenues of \$1,166,000 resulting from a land sale, and increased rents, a gain on sale of building and land located in Rancho Santa Fe, California of \$1,044,000, an overall reduction in total expenses of \$860,000, and an increase in income from unconsolidated joint ventures of \$774,000.

For 2015, net income attributable to common stockholders was \$2,950,000 compared to \$5,655,000 in 2014. The change was driven by a decline in mineral resource revenues of \$1,139,000 resulting from deteriorating oil prices in 2015, a \$2,162,000 increase in corporate expenses of which a majority relates to pension and staffing costs, and a decline in pistachio revenues of \$1,160,000 resulting from the poor yields caused by the mild winter of 2015. Income from our joint ventures increased by \$1,030,000, partially offsetting the declines in net income noted above. Our joint venture with TA/Petro largely contributed to this increase which is further discussed in the Results of Operations.

For the year ended December 31, 2016 we had no material lease renewals.

During 2017, we will continue to invest funds toward the achievement of entitlements, permits, and maps for our land and for master project infrastructure and vertical development within our active commercial and industrial development. Securing entitlements for our land is a long, arduous process that can take several years and often

involves litigation. During the next few years, our net income will fluctuate from year-to-year based upon commodity prices, production within our farming segment, and the timing of sales of land and the leasing of land within our industrial developments.

During the fourth quarter of 2015, the Company reclassified revenues and expenses previously classified as commercial/industrial into a new segment called Ranch Operations. Ranch Operations is comprised of grazing leases, game management, and other ancillary services supporting the ranch.

This Management's Discussion and Analysis of Financial Condition and Results of Operations provides a narrative discussion of our results of operations. It contains the results of operations for each operating segment of the business and is followed by a discussion of our financial position. It is useful to read the business segment information in conjunction with Note 16 (Operating Segments and Related Information) of the Notes to Consolidated Financial Statements.

Critical Accounting Policies

The preparation of our consolidated financial statements in accordance with generally accepted accounting principles, or GAAP, requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We consider an accounting estimate to be critical if: (1) the accounting estimate requires us to make assumptions about matters that were highly uncertain at the time the accounting estimate was made, and (2) changes in the estimates that are likely to occur from period to period, or use of different estimates that we reasonably could have used in the current period, would have a material impact on our financial condition or results of operations. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, impairment of long-lived assets, capitalization of costs, profit recognition related to land sales, stock compensation, our future ability to utilize deferred tax assets, and defined benefit retirement plans. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management has discussed the development and selection of these critical accounting estimates with the Audit Committee of our Board of Directors and the Audit Committee has reviewed the foregoing disclosure. In addition, there are other items within our financial statements that require estimation, but are not deemed critical as defined above. Changes in estimates used in these and other items could have a material impact on our financial statements. See also Note 1 (Summary of Significant Accounting Policies) of the Notes to Consolidated Financial Statements, which discusses accounting policies that we have selected from acceptable alternatives.

We believe the following critical accounting policies reflect our more significant judgments and estimates used in the preparation of the consolidated financial statements:

Revenue Recognition – The Company's revenue is primarily derived from lease revenue from our rental portfolio, royalty revenue from mineral leases, sales of farm crops, sales of water, and land sales. Revenue from leases with rent concessions or fixed escalations is recognized on a straight-line basis over the initial term of the related lease unless there is a considerable risk as to collectability. The financial terms of leases are contractually defined. Lease revenue is not accrued when a tenant vacates the premises and ceases to make rent payments or files for bankruptcy. Royalty revenues are contractually defined as to the percentage of royalty and are tied to production and market prices. Our royalty arrangements generally require payment on a monthly basis with the payment based on the previous month's activity. We accrue monthly royalty revenues based upon estimates and adjust to actual as we receive payments. From time to time the Company sells easements over its land. The easements are either in the form of rights of access granted for such things as utility corridors or are in the form of conservation easements that generally require the Company to divest its rights to commercially develop a portion of its land, but do not result in a change in ownership of the land or restrict the Company from continuing other revenue generating activities on the land. Sales of conservation easements are accounted for in accordance with Staff Accounting Bulletin Topic 13 - Revenue Recognition, or SAB Topic 13.

Since conservation easements generally do not impose any significant continuing performance obligations on the Company, revenue from conservation easement sales have been recognized when the four criteria outlined in SAB Topic 13 have been met, which generally occurs in the period the sale has closed and consideration has been received. In recognizing revenue from land sales, the Company follows the provisions in Accounting Standards Codification 976, or ASC 976, "Real Estate – Retail Land" to record these sales. ASC 976 provides specific sales recognition criteria to determine when land sales revenue can be recorded. For example, ASC 976 requires a land sale to be consummated

with a sufficient down payment of at least 20% to 25% of the sales price depending upon the type and timeframe for development of the property sold, and that any receivable from the sale cannot be subject to future subordination. In addition, the seller cannot retain any material continuing involvement in the property sold or be required to develop the property in the future.

At the time farm crops are harvested, contracted, and delivered to buyers and revenues can be estimated, revenues are recognized and any related inventoried costs are expensed, which traditionally occurs during the third and fourth quarters of each year. It is not unusual for portions of our almond or pistachio crop to be sold in the year following the harvest. Orchard (almond and pistachio) revenues are based upon the contract settlement price or estimated selling price, whereas vineyard revenues are typically recognized at the contracted selling price. Estimated prices for orchard crops are based upon the quoted estimate of what the final market price will be by marketers and handlers of the orchard crops. These market price estimates are updated through the crop payment cycle as new information is received as to the final settlement price for the crop sold. These estimates are adjusted to actual upon receipt of final payment for the crop. This method of recognizing revenues on the sale of orchard crops is a standard practice within the agribusiness community.

Actual final crop selling prices are not determined for several months following the close of our fiscal year due to supply and demand fluctuations within the orchard crop markets. Adjustments for differences between original estimates and actual revenues received are recorded during the period in which such amounts become known.

Capitalization of Costs - The Company capitalizes direct construction and development costs, including predevelopment costs, interest, property taxes, insurance, and indirect project costs that are clearly associated with the acquisition, development, or construction of a project. Costs currently capitalized that in the future would be related to any abandoned development opportunities will be written off if we determine such costs do not provide any future benefits. Should development activity decrease, a portion of interest, property taxes, and insurance costs would no longer be eligible for capitalization, and would be expensed as incurred.

Allocation of Costs Related to Land Sales and Leases – When we sell or lease land within one of our real estate developments, currently TRCC, and we have not completed all infrastructure development related to the total project, we follow ASC 976 to determine the appropriate costs of sales for the sold land and the timing of recognition of the sale. In the calculation of cost of sales or allocations to leased land, we use estimates and forecasts to determine total costs at completion of the development project. These estimates of final development costs can change as conditions in the market and costs of construction change.

In preparing these estimates, we use internal budgets, forecasts, and engineering reports to help us estimate future costs related to infrastructure that has not been completed. These estimates become more accurate as the development proceeds forward, due to historical cost numbers and to the continued refinement of the development plan. These estimates are updated periodically throughout the year so that, at the ultimate completion of development, all costs have been allocated. Any increases to our estimates in future years will negatively impact net profits and liquidity due to an increased need for funds to complete development. If, however, this estimate decreases, net profits as well as liquidity will improve.

We believe that the estimates used related to cost of sales and allocations to leased land are critical accounting estimates and will become even more significant as we continue to move forward as a real estate development company. The estimates used are very susceptible to change from period to period, due to the fact that they require management to make assumptions about costs of construction, absorption of product, and timing of project completion, and changes to these estimates could have a material impact on the recognition of profits from the sale of land within our developments.

Impairment of Long-Lived Assets – We evaluate our property and equipment and development projects for impairment when events or changes in circumstances indicate that the carrying value of assets contained in our financial statements may not be recoverable. The impairment calculation compares the carrying value of the asset to the asset's estimated future cash flows (undiscounted). If the estimated future cash flows are less than the carrying value of the asset, we calculate an impairment loss. The impairment loss calculation compares the carrying value of the asset to the asset's estimated fair value, which may be based on estimated future cash flows (discounted). We recognize an impairment loss equal to the amount by which the asset's carrying value exceeds the asset's estimated fair value. If we recognize an impairment loss, the adjusted carrying amount of the asset will be its new cost basis. For a depreciable long-lived asset, the new cost basis will be depreciated (amortized) over the remaining useful life of that asset.

Restoration of a previously recognized impairment loss is prohibited.

We currently operate in five segments, commercial/industrial real estate development, resort/residential real estate development, mineral resources, farming, and ranch operations. At this time, there are no assets within any of our

segments that we believe are in danger of being impaired due to market conditions.

We believe that the accounting estimate related to asset impairment is a critical accounting estimate because it is very susceptible to change from period to period; it requires management to make assumptions about future prices, production, and costs, and the potential impact of a loss from impairment could be material to our earnings.

Management's assumptions regarding future cash flows from real estate developments and farming operations have fluctuated in the past due to changes in prices, absorption, production and costs and are expected to continue to do so in the future as market conditions change.

In estimating future prices, absorption, production, and costs, we use our internal forecasts and business plans. We develop our forecasts based on recent sales data, historical absorption and production data, input from marketing consultants, as well as discussions with commercial real estate brokers and potential purchasers of our farming products.

If actual results are not consistent with our assumptions and judgments used in estimating future cash flows and asset fair values, we may be exposed to impairment losses that could be material to our results of operations.

Defined Benefit Retirement Plans – The plan obligations and related assets of our defined benefit retirement plan are presented in Note 15 (Retirement Plans) of the Notes to Consolidated Financial Statements. Plan assets, which consist primarily of marketable equity and debt instruments, are valued using level one and level two indicators, which are quoted prices in active markets and quoted prices for similar types of assets in active markets for the investments. Pension benefit obligations and the related effects on operations are calculated using actuarial models. The estimation of our pension obligations, costs and liabilities requires that we make use of estimates of present value of the projected future payments to all participants, taking into consideration the likelihood of potential future events such as salary increases and demographic experience. These assumptions may have an effect on the amount and timing of future contributions.

The assumptions used in developing the required estimates include the following key factors:

• Discount rates;

• Salary growth;

• Retirement rates;

• Expected contributions;

• Inflation;

• Expected return on plan assets; and

• Mortality rates

The discount rate enables us to state expected future cash flows at a present value on the measurement date. In determining the discount rate, the Company utilizes the yield on high-quality, fixed-income investments currently available with maturities corresponding to the anticipated timing of the benefit payments. Salary increase assumptions are based upon historical experience and anticipated future management actions. To determine the expected long-term rate of return on pension plan assets, we consider the current and expected asset allocations, as well as historical and expected returns on various categories of plan assets. At December 31, 2016, the weighted-average actuarial assumption of the Company's defined benefit plan consisted of a discount rate of 4.3%, a long-term rate of return on plan assets of 7.5%, and assumed salary increases of 3.5%. The effects of actual results differing from our assumptions and the effects of changing assumptions are recognized as a component of other comprehensive income, net of tax. Amounts recognized in accumulated other comprehensive income are adjusted as they are subsequently recognized as components of net periodic benefit cost. If we were to assume a 50 basis point change in the discount rate used, our projected benefit obligation would change approximately \$900,000.

Stock-Based Compensation - We apply the recognition and measurement principles of ASC 718, "Compensation – Stock Compensation" in accounting for long-term stock-based incentive plans. Our stock-based compensation plans include both restricted stock units and restricted stock grants. We have not issued any stock options to employees or directors since January 2003, and our 2016 financial statements do not reflect any compensation expenses for stock options. All stock options issued in the past have been exercised or forfeited.

We make stock awards to employees based upon time-based criteria and through the achievement of performance-related objectives. Performance-related objectives are either stratified into threshold, target, and maximum goals or based on the achievement of a milestone event. These stock awards are currently being expensed over the expected vesting period based on each performance criterion. We make estimates as to the number of shares that will actually be granted based upon estimated ranges of success in meeting the defined performance measures. If our estimates of performance shares vesting were to change by 25%, stock compensation expense would increase or decrease by approximately \$400,000 depending on whether the change in estimate increased or decreased shares vesting.

See Note 11, Stock Compensation - Restricted Stock and Performance Share Grants, of the Notes to Consolidated Financial Statement for total 2016 stock compensation expense related to stock grants.

Fair Value Measurements – The Financial Accounting Standards Board's, or FASB, authoritative guidance for fair value measurements of certain financial instruments defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Fair value is defined as the exchange (exit) price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This guidance establishes a three-level hierarchy for fair value measurements based upon the inputs to the valuation of an asset or liability.

Observable inputs are those which can be easily seen by market participants while unobservable inputs are generally developed internally, utilizing management's estimates and assumptions:

Level 1 – Valuation is based on quoted prices in active markets for identical assets and liabilities.

Level 2 – Valuation is determined from quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar instruments in markets that are not active, or by model-based techniques in which all significant inputs are observable in the market.

Level 3 – Valuation is derived from model-based techniques in which at least one significant input is unobservable and based on our own estimates about the assumptions that market participants would use to value the asset or liability. When available, we use quoted market prices in active markets to determine fair value. We consider the principal market and nonperformance risk associated with our counterparties when determining the fair value measurement. Fair value measurements are used for marketable securities, investments within the pension plan and hedging instruments.

Recent Accounting Pronouncements

For discussion of recent accounting pronouncements, see Note 1 (Summary of Significant Accounting Policies) of the Notes to Consolidated Financial Statements.

Results of Operations by Segment

We evaluate the performance of our operating segments separately to monitor the different factors affecting financial results. Each segment is subject to review and evaluation as we monitor current market conditions, market opportunities, and available resources. The performance of each segment is discussed below:

Real Estate – Commercial/Industrial

During 2016, commercial/industrial segment revenues increased \$1,166,000, or 14% when compared to 2015. In October 2016, we sold unimproved real property located at TRCC-East for \$1,193,000. We recognized \$710,000 of the revenues in 2016 and will recognize the remainder upon the completion of certain on-site land improvements, which are expected to be completed during the first half of 2017. Also in 2016, we placed into service a multi-tenant building leased to Baja Fresh and Habit Burger increasing lease revenue by \$266,000. Lastly, we recognized additional leasing revenues of \$48,000 from Starbucks and Pieology given that they were not placed into service until the latter part of the second quarter of 2015.

Commercial/industrial real estate segment expenses were \$7,100,000 during 2016, an increase of \$406,000, or 6%, compared to the same period in 2015. During 2016, there were increases in professional services and repairs and maintenance of \$126,000 and \$108,000, respectively. Additionally, the basis in the land sold was \$95,000.

During 2015, commercial/industrial segment revenues increased \$427,000, or 5% when compared to 2014. This improvement is primarily attributable to an increase of \$249,000 relating to percentage and base rent from the power plant lease, specifically related to the expiration in January 2015 of credits issued in 2014 in conjunction with the power plant lease amendment. The amendment related to percentage rent collected on greenhouse gas assessment taxes. The percentage rent calculation was modified to exclude the greenhouse gas assessment taxes that are collected by the tenant and passed on to the State of California and in connection therewith the Company issued the tenant a one-time credit of \$467,000 in 2014. In addition, we recognized an additional \$215,000 and \$412,000 in property management fees and common area maintenance fee reimbursements, respectively, from our joint venture properties, most noticeably the Outlets at Tejon, which opened in August 2014. Lastly, in 2015 we placed into service a land lease with Carl's Jr and operating leases with Pieology and Starbucks at TRCC East, contributing an additional \$428,000 in lease revenues. In 2015, we recognized \$225,000 in additional landscaping revenues on services rendered to new and existing tenants. The 2015 improvements were partially offset by two non-recurring revenue streams occurring in 2014. In 2014, we sold land to our TA/Petro unconsolidated joint venture partner of which \$458,000 was recognized during 2014 with the remaining \$687,000 deferred until the time we exit the joint venture or the joint

venture is terminated. Additionally, in 2014, we recognized \$587,000 in additional development fees from the development of the Outlets at Tejon.

Commercial/industrial real estate segment expenses were \$6,694,000 during 2015, a decrease of \$512,000, or 7%, compared to the same period in 2014, primarily due to a \$591,000 decrease in Tejon-Castac Water District, or TCWD, fixed water assessments during 2015. TCWD decreased water assessment taxes as a result of an increase in TCWD water sales to parties outside of the district, which provided additional funds to TCWD. The decrease in commercial/industrial expenses was partially offset by a \$173,000 increase in landscape maintenance costs resulting from a full year of operations from the Outlets at Tejon along with our three new tenants discussed above.

The logistics operators currently located within our Commerce Center have demonstrated success in serving all of California and the western region of the United States, and we are building from their success in our marketing efforts. We will continue to focus our marketing strategy for TRCC-East and TRCC-West on the significant labor and logistical benefits of our site, the pro-business approach of Kern County, and the demonstrated success of the current tenants and owners within our development. Our strategy fits within the logistics model that many companies are using, which favors large, centralized distribution facilities which have been strategically located to maximize the balance of inbound and outbound efficiencies, rather than a number of decentralized smaller distribution centers. The world class logistics operators located within TRCC have demonstrated success through utilization of this model. With access to markets of over 40 million people for next-day delivery service, they are also demonstrating success with e-commerce fulfillment. We believe that our ability to provide fully-entitled, shovel-ready land parcels to support buildings of any size, especially buildings 1.0 million feet or larger, can provide us with a potential marketing advantage in the future. We are also expanding our marketing efforts to include industrial users in the Santa Clarita Valley of northern Los Angeles County, and the northern part of the San Fernando Valley due to the limited availability of new product and high real estate costs in these locations. Tenants in these geographic areas are typically users of relatively smaller facilities. In pursuit of such opportunities, the Company has partnered with Majestic Realty Co. in the speculative development of a 480,000 square foot, state-of-the-art distribution facility. Construction of the facility is underway, and is scheduled to be complete in the late third quarter of 2017.

A potential disadvantage to our development strategy is our distance from the ports of Los Angeles and Long Beach in comparison to the warehouse/distribution centers located in the Inland Empire, a large industrial area located east of Los Angeles, which continues its expansion eastward beyond Riverside and San Bernardino, to include Perris, Moreno Valley, and Beaumont. As development in the Inland Empire continues to move east and farther away from the ports, our potential disadvantage of our distance from the ports is being mitigated. Strong demand for large distribution facilities is driving development farther east in a search for large entitled parcels. At year-end 2016, vacancy rates in the Inland Empire approximated 4.1%; primarily due to demand keeping pace with the development of new buildings for lease. Without the increase in new development, the vacancy rate would have declined. As lease rates increase in the Inland Empire and northern Los Angeles County, we may begin to have a greater pricing advantage due to our low land basis.

We expect the commercial/industrial segment to continue to experience costs, net of amounts capitalized, primarily related to professional service fees, marketing costs, commissions, planning costs, and staffing costs as we continue to pursue development opportunities. These costs are expected to remain consistent with current levels of expense with any variability in the future tied to specific absorption transactions in any given year.

The actual timing and completion of development is difficult to predict due to the uncertainties of the market. Infrastructure development and marketing activities and costs could continue over several years as we develop our land holdings. We will also continue to evaluate land resources to determine the highest and best uses for our land holdings. Future sales of land are dependent on market circumstances and specific opportunities. Our goal in the future is to increase land value and create future revenue growth through planning and development of commercial and industrial properties.

Real Estate – Resort/Residential

Resort/residential segment expenses declined \$719,000 primarily due to additional capitalization of payroll and overhead costs of \$475,000 that were identified to be incremental to our master plan development projects. In addition, there were decreases in professional service and fees of \$261,000.

In 2015, resort/residential segment expenses declined \$259,000 primarily due to additional capitalization of payroll and benefits more than offsetting the increase in compensation costs. In 2014, we brought in-house full management responsibility for both the MV and Grapevine developments and the full impact of that decision resulted in an increase

in compensation costs of \$764,000 in 2015. An offsetting benefit to the compensation cost increase from internalizing management was a decrease in professional service fees of \$206,000.

Our resort/residential segment activities include land entitlement, land planning and pre-construction engineering and conservation activities. We have three major resort/residential communities within this segment: Centennial, Grapevine, and MV. We are in the process of achieving entitlements and expect to file the EIR and specific plan for Los Angeles County during 2017 for Centennial, we do not have a fully approved project and therefore we do not have inventory for sale. As it relates to Grapevine, we are working with Kern County to defend the approved EIR. The entire litigation and permitting process will take several years and the investment of several million dollars to successfully complete. For MV, we have a fully permitted and entitled project and, we are in the process of getting approval for tentative tract maps, which we believe will be complete in late 2017. We are also completing land plans and engineering studies in preparation for development in the future as the economy improves and the second home market improves.

The resort/residential segment will continue to incur costs in the future related to professional service fees, public relations costs, and staffing costs as we continue forward with entitlement and permitting activities for the above communities and continue to meet our obligations under the Conservation Agreement. We expect these expenses to remain consistent with current years cost in the near term and only begin to increase as we move forward with development. The actual timing and completion of entitlement-related activities and the beginning of development is difficult to predict due to the uncertainties of the approval process, the possibility of litigation upon approval of our entitlements in the future, and the status of the economy. We will also continue to evaluate land resources to determine the highest and best use for our land holdings. Our long-term goal through this process is to increase the value of our land and create future revenue opportunities through resort and residential development.

We are continuously monitoring the markets in order to identify the appropriate time in the future to begin infrastructure improvements and lot sales. Our long-term business plan of developing the communities of MV, Centennial, and Grapevine remains unchanged. As the California economy continues to improve we believe the perception of land values will also begin to improve and the long-term fundamentals that support housing demand in our region, primarily California population growth and household formation will also improve. California also has a significant housing shortage, which we believe our communities will help ease as the population base within California continues to grow.

See Item 1, “Business – Real Estate Development Overview” for a further discussion of real estate development activities.

Mineral Resources

Revenues from our mineral resources segment decreased \$963,000, or 6%, to \$14,153,000 in 2016 compared to \$15,116,000 in 2015. The decrease is primarily due to a \$1,112,000 decrease in oil royalty revenues driven by lower average prices for a barrel of oil, which then led to declines in production. Please refer to below table for current and historical production volume and pricing. Also in 2016, we sold 7,285 acre feet of water compared to 7,922 acre feet in 2015 reducing water revenues by \$570,000. Offsetting those amounts were improvements in cement, sand, and rock royalties of \$330,000 and reimbursable costs and other of \$364,000. We now expect that water sales for 2017 could be significantly lower than 2016, due to the winter rains and snow that are at historical levels.

Mineral resources expenses during 2016 increased \$400,000 compared to 2015, primarily due to increases in payroll and salaries of \$125,000 and fuel costs of \$94,000 related to transferring and banking water. The remainder of the increase can be attributed to increases in other expenses including property taxes, professional services, and fees. Revenues from our mineral resources segment decreased \$1,139,000, or 7%, to \$15,116,000 during 2015 compared to 2014. The \$1,139,000 decrease is primarily due to a decrease in oil royalty revenues driven by lower average prices for a barrel of oil. The average price per barrel of oil decreased by 50% to approximately \$45 per barrel during 2015 from approximately \$90 per barrel during 2014. The price decline also led to a decrease in production as compared to the same period in 2014. The overall impact was a \$3,348,000 decrease in oil royalty revenue. The decrease was partially offset by a \$2,323,000 increase in water sales revenue from the sale of 7,922 acre feet of water. During the first quarter of 2015, we determined we had excess water supply for our 2015 needs, thus we sold the entire allotment of the 2015 Nickel water we purchased plus carry forward inventory from 2014.

Mineral resources expenses during 2015 increased \$978,000 compared to 2014, primarily due to the sale of an additional 1,672 acre feet of water in 2015 increasing water cost of sales by \$960,000.

Oil and gas production numbers and average pricing were as follows for the years ended December 31:

	2016	2015	2014
Oil production (barrels)	301,000	445,000	499,000
Average price per barrel for each year	\$ 37.00	\$ 45.00	\$ 90.00
Natural gas production (millions of cubic feet)	238,000	315,000	230,000
Average price per thousand cubic feet	\$ 0.56	\$ 1.58	\$ 2.40

Please refer to Item 1, "Business - Mineral Resources" for additional information regarding oil barrels per day production.

Although oil prices improved during the fourth quarter of 2016, we expect our largest tenant, California Resources Corporation, or CRC, to continue its 2016 program of producing from current active wells at lower levels with no near term intent to begin new drilling programs until oil prices increase and stabilize at higher levels. CRC has approved permits and drill sites on our land and has delayed the start of drilling as it evaluates the market. A positive aspect of our lease with CRC is that the approved drill sites are in an area of the ranch where the development and production costs are moderate due to the depths being drilled. With the overall improvement in prices, we could see an improvement in royalty revenue. Thus far in 2017, oil prices have improved and are approximately 7% to 10% below West Texas Intermediate pricing.

Since we only receive royalties based on tenant production and market prices and do not produce oil, we do not have information as to the potential size of oil reserves.

Our royalty revenues are contractually defined and based on a percentage of production and are received in cash. Royalty revenues fluctuate based on changes in market price for oil, gas, rock and aggregate, and Portland cement. In addition, royalty revenue is impacted by new production, the inevitable decline in production in existing wells and rock and limestone quarries, and the cost of development and production.

Farming

During 2016, farming revenues decreased by \$5,188,000 from \$23,836,000 in 2015 to \$18,648,000 in 2016. The below table reflects crop revenues in thousands for the previous two years by variety of product and crop year.

Key highlights include:

An overall reduction in market price for current year almonds along with management's decision to sell more crops in 2015, taking advantage of higher prices, reduced almond revenues by \$4,865,000. In 2016, the California almond industry had strong yields, driving prices downward.

We recovered from the mild winter of 2015 that adversely affected our 2015 pistachio crop yields. Total 2016 crop yield was at a recent historical high of 3,200,000 pounds. Despite the robust 2016 yields, a decline in market prices lowered pistachio revenues by \$226,000 when compared to 2015 revenues, which were primarily generated through insurance proceeds and market price adjustments. In 2016, the California pistachio industry had strong yields, driving prices downward.

Improvement in other revenues is driven by a new farm land lease and recoverable costs.

(\$ in thousands)	December 31, 2016			December 31, 2015			Change

Other farming revenues	812			86			726		
Total farming revenues	\$18,648			\$23,836			\$(5,188)		

¹ Average price calculation reflects sale of almond and pistachio crops during the calendar reported year exclusive of any price adjustments.

² Almond and pistachio units are presented in thousands of pounds while wine grapes are presented in tons.

Farming expenses decreased \$311,000, or 2% during 2016 compared to 2015. In 2016, almond costs decreased \$1,019,000 or 15% as we spent less time pruning trees, applying pesticides, and removing mummies, all of which are time and labor intensive. The decrease in almond costs were offset by an increase in wine grape costs of \$260,000 as a result of a 10% increase in the number of acres farmed and an increase in fixed water costs of \$256,000 paid to WRMWSD.

During 2015, farming revenues increased by \$401,000 from \$23,435,000 in 2014 to \$23,836,000 in 2015. The below table reflects crop revenues in thousands for the previous two years by variety of product and crop year.

Hay	\$749			\$1,361			\$(612)		
Other farming revenues	86			475			(389)		
Total farming revenues	\$23,836			\$23,435			\$401		

¹ Average price calculation reflects sale of almond and pistachio crops during the calendar reported year exclusive of any price adjustments.

² Almond and pistachio units are presented in thousands of pounds while wine grapes are presented in tons.

The revenue increase resulted from a \$2,202,000 improvement in almond revenues resulting from an increase in sales price and units sold. Also contributing to the revenue increase was the sale of an additional 1.8 tons of wine grapes, which resulted from improved crop yields. Offsetting the revenue increases was a \$1,160,000 decrease in pistachio revenues. Pistachio revenues decreased because our pistachio crop yield was severely impacted by the mild 2015 winter. A mild winter decreases the number of hours the pistachio trees are dormant, adversely impacting the pollination of the pistachio tree. We typically expect 5% - 10% of our crops to produce blanks or hollow shells. However, we experienced blanks in 90% of our pistachio crop, which is unprecedented compared to historical trends. The impact to pistachio production as a result of the mild winter is not a phenomenon specific to Tejon Ranch but has impacted a large majority of the pistachio production in California. We purchased crop insurance to mitigate weather-related catastrophic crop losses which ultimately paid \$2,700,000 for losses and partially offset lost revenues. Farming expenses increased \$2,734,000, or 17% during 2015 compared to 2014. The drivers of this increase are as follow:

Wine grape cost of sales increased \$906,000 which resulted from 1.8 tons in additional wine grape sales.

Almond cost of sales increased \$816,000, of which approximately \$638,000 relates to a 375,000 pound improvement in current crop year sales. The remainder of the increase, resulted from a 162,000 pound increase in carryover almond sales.

Pistachio cost of sales increased \$477,000 which we attribute to the 2015 crop write-off caused by the mild winter discussed above. As a result, there was no carryover crop since all crop costs were recognized during the current fiscal year.

In 2015, fixed water costs paid to WRMWSD increased by \$521,000 resulting from increases in state water costs resulting from the drought.

Thus far in 2017, the prices for our crops, especially almonds and pistachios, have seen some stabilization at the lower levels seen at the end of 2016. The decline in prices was driven by higher almond production and larger pistachio inventories. All of our crops are sensitive to the size of each year's world crop. Large crops in California and abroad can depress prices. Our long-term projection is that crop production, especially of almonds and pistachios will continue to increase on a statewide basis over time because of new plantings, which could negatively impact future prices if the growth in demand does not keep pace with production.

An unknown factor related to future statewide production and the continuation of new plantings will be how new state ground water management laws impact the amount of farming land in production over the next five to ten years, which could eventually reduce production. The rains and snow of 2017 are not expected to significantly impact the ground water basins within the Central Valley of California, and therefore could still lead to a reduction in crop production. We are less impacted due to our water sources and the ground water basin we are in. We have had a relatively mild winter thus far, which could possibly impact our almond and pistachio production due to a low level of dormant hours. Dormant hours allow the trees to rest, which enhances the growth of the tree and production. It is too early to project 2017 crop yields and what impact that may have on prices later in 2017.

Water delivery and water availability continues to be a long-term concern within California. Any limitation of delivery of SWP water and the absence of available alternatives during drought periods could potentially cause permanent damage to orchards and vineyards throughout California. While this could impact us, we believe we have sufficient water resources available to meet our requirements in 2017. Please see our discussion on water in Item 2, "Properties - Water Operations."

The DWR announced its 2017 estimated water supply delivery at 60% of full entitlement. We expect this number to increase by late spring due to continued rains during February 2017. The current 60% allocation of SWP water is not enough for us to farm our crops, but our additional water resources, such as groundwater and surface sources, and those of the water districts we are in should allow us to have sufficient water for our farming needs. See Note 6 (Long-Term Water Assets) of the Notes to Consolidated Financial Statements for additional information regarding our water assets.

For further discussion of the farming operations, refer to Item I "Business—Farming Operations."

Ranch Operations

Revenues from ranch operations decreased \$585,000 from \$3,923,000 in 2015 to \$3,338,000 in 2016. The decline is attributed to a \$362,000 decrease in game management revenues. The on-going California drought has had an adverse effect on the quality and availability of harvestable game due to shortages in food supplies. Also contributing to the decrease is a drought clause within our grazing leases taking effect amidst the California drought, which reduced revenues by \$297,000. Improvements from other revenue sources, such as filming location fees offset the declines noted by \$67,000.

Ranch operations expenses decreased \$378,000 to \$5,734,000 in 2016 from \$6,112,000 in 2015. The drought as discussed above, has reduced hunt volume in 2016, thus reducing related costs such as payroll, supplies, fuel, and other services.

Revenues from ranch operations increased \$389,000 from \$3,534,000 in 2014 to \$3,923,000 in 2015. The increase is attributed to an increase in grazing lease revenues of \$330,000. The increase is driven by an overall increase in the price per head of cattle. All other business lines including game management and High Desert Hunt Club remained flat. Ranch operation expenses increased by \$114,000 from \$5,998,000 in 2014 to \$6,112,000 in 2015. The expense increase is comprised of the ongoing costs necessary to maintain the ranch and include items such as payroll, supplies, and other necessary costs.

Other Income

Total other income increased \$750,000 to \$1,659,000, or 83%, during 2016 from \$909,000 in 2015. In November 2016, we sold building and land located in Rancho Santa Fe California for \$4,700,000, recognizing a gain of \$1,044,000. Offsetting the gain from Rancho Santa Fe California is a reduction of interest and other income of \$294,000.

Total other income declined \$313,000, or 26%, during 2015 when compared to 2014. Investment income also declined \$245,000, or 26% during 2014. The decline in both periods is primarily attributable to lower average investment balances and a decline in overall yield on the portfolio as higher yielding securities matured through the

year. The above interest income relates to our marketable securities portfolio as further disclosed in Note 3, Marketable Securities of the Notes to Consolidated Financial Statements.

Corporate Expenses

Corporate general and administrative costs decreased \$258,000, or 2%, during 2016 when compared to 2015. In 2016, we did not recognize a one-time-non-cash pension settlement charge of \$536,000 as we did in 2015, which is discussed below. In addition, personnel levels decreased resulting in decreased payroll and salaries of \$415,000. Offsetting the decreases include an increase in stock compensation of \$532,000 resulting from meeting performance milestones and issuing new performance grants.

Corporate general and administrative costs increased \$2,162,000, or 20%, during 2015 when compared to 2014. We attribute \$2,077,000 of the increase to payroll, severance and benefit costs. In 2015, the Company experienced an increase of \$527,000 in workers compensation and health insurance costs. Workers compensation typically increases as total payroll increases while health insurance increased as a result of the Affordable Care Act. Also, during 2015 we recognized a one-time charge related to employee severance of \$633,000. Lastly, we experienced an increase in pension and retirement charges of \$917,000. Included in this amount is a one-time non-cash pension settlement charge of \$536,000.

Equity in Earnings of Unconsolidated Joint Ventures

Equity in earnings of unconsolidated joint ventures is an important and growing component of our commercial/industrial activities and in the future, equity in earnings of unconsolidated joint ventures will become a significant part of our operational activity within the resort/residential segment. As we expand our current ventures and add new joint ventures, these investments will become a growing revenue source for the Company.

During 2016, equity in earnings from unconsolidated joint ventures grew to \$7,098,000, or an increase of \$774,000, compared to \$6,324,000 in 2015. TA/Petro, when compared to 2015, contributed an additional \$868,000 in earnings from unconsolidated joint ventures. The improvement in operations within the TA/Petro joint venture was driven by an increase in diesel volumes of 1.5 million gallons and gas volumes of 1.0 million gallons.

During 2015, equity in earnings from unconsolidated joint ventures grew to \$6,324,000, or an increase of \$1,030,000, compared to 2014. TA/Petro, when compared to 2014, contributed an additional \$1,440,000 in earnings from unconsolidated joint ventures. The improvement in operations within the TA/Petro joint venture was driven by an increase in diesel volumes of 2.4 million gallons and gas volumes of 1.2 million gallons. Due to the addition of a new restaurant at the end of 2014 and the increase in the volume of activity the TA/Petro joint venture also saw an increase in non-fuel revenue margins during 2015.

The improvement in the volumes of fuel sales for 2016 and 2015 continued to be driven by the growing amount of traffic along Interstate 5 and the expansion of offerings at TRCC such as the Outlets at Tejon and new restaurants. We expect the trend of increased volumes of fuel sales to continue into 2017.

Income Taxes

For the twelve months ended December 31, 2016, the Company incurred a net income tax expense of \$336,000 compared to a net income tax expense of \$1,125,000 for the twelve months ended December 31, 2015. These represent effective income tax rates of approximately 39% and 28% for the twelve months ended December 31, 2016 and, 2015, respectively. The effective tax rate is impacted by the noncontrolling interest held in the Centennial joint venture and the impact of depletion allowances. During 2016, permanent tax differences declined due to lower depletion allowances. Depletion allowances declined due to a reduction in oil and gas revenues. As of December 31, 2016 and 2015 we had an income tax receivable and payable of \$468,000 and \$1,237,000, respectively.

As of December 31, 2016, we had net deferred tax assets of \$2,282,000. Our largest deferred tax assets were made up of temporary differences related to the capitalization of costs, pension adjustments, and stock grant expense. Deferred tax liabilities consist of depreciation, deferred gains, cost of sale allocations, and straight-line rent. Due to the nature of most of our deferred tax assets, we believe they will be used in future years and an allowance is not necessary.

The Company classifies interest and penalties incurred on tax payments as income tax expenses. The Company made total income tax payments of \$1,750,000 in 2016 and \$2,100,000 during 2015. The Company received refunds of \$615,000 in 2016 and \$283,000 in 2015.

Liquidity and Capital Resources

Cash Flow and Liquidity

Our financial position allows us to pursue our strategies of land entitlement, development, and conservation.

Accordingly, we have established well-defined priorities for our available cash, including investing in core operating segments to achieve profitable future growth. We have historically funded our operations with cash flows from operating activities, investment proceeds, and short-term borrowings from our bank credit facilities. In the past, we have also issued common stock and used the proceeds for capital investment activities. In 2014, our use of long-term debt to finance capital needs increased significantly.

To enhance shareholder value, we will continue to make investments in our real estate segments to secure land entitlement approvals, build infrastructure for our developments, ensure adequate future water supplies, and provide funds for general land development activities. Within our farming segment, we will make investments as needed to improve efficiency and add capacity to its operations when it is profitable to do so.

Our cash and cash equivalents and marketable securities totaled approximately \$27,933,000 at December 31, 2016, a decrease of \$6,812,000, or 20%, from the corresponding amount at the end of 2015. Cash and cash equivalents and marketable securities decreased during 2016 due to the sale and maturity of \$11,750,000 in marketable securities of which we reinvested \$5,983,000. We used cash from operations, net proceeds from marketable securities as well as the use of our line-of-credit to finance our real estate development projects at Grapevine, MV, Centennial, and TRCC. The following table summarizes the cash flow activities for the following years ended December 31:

(\$ in thousands)	2016	2015	2014
Operating activities	\$5,585	\$16,968	\$13,218
Investing activities	\$(10,242)	\$(12,661)	\$(92,592)
Financing activities	\$3,985	\$(8,015)	\$75,981

During 2016, our operations provided \$5,585,000 of cash primarily attributable to operating results from mineral resources, and commercial real estate activities. We also received a \$4,500,000 distribution from our TA/Petro joint venture. Please refer to "Results of Operations by Segment" for further discussion on our operating results.

During 2015, our operations provided \$16,968,000 of cash primarily attributable to operating results mainly from farming, mineral resource, and leasing revenues. We also received a distribution of \$7,200,000 from the TA/Petro joint venture.

During 2016, investing activities used \$10,242,000 of cash primarily as a result of \$26,380,000 in real estate and equipment expenditures. Of the \$26,380,000 we spent \$5,253,000, \$5,244,000, \$5,516,000 on pre-development and entitlement costs on our Centennial, MV, and Grapevine projects, respectively. At TRCC we used \$5,196,000 for supporting infrastructure projects. Our farming segment cash outlay was \$2,006,000 for developing new almond crops and acquiring farm equipment. We invested \$2,161,000 into our mineral resources division primarily to develop two new water wells. The remainder of the capital investments primarily relate to capital equipment used as part of our ranch operations and corporate segments. Outside of capital projects, we acquired \$5,983,000 in marketable securities and contributed \$2,000,000 to joint ventures with Majestic. Offsetting our cash outlays are maturities and sales of marketable securities of \$11,750,000, distributions from our joint venture partners of \$1,600,000, and reimbursements from TRPFFA for qualifying infrastructure projects of \$6,155,000,

During 2015, investing activities used \$12,661,000 of cash primarily as a result of \$28,048,000 in real estate and equipment expenditures. Of the \$28,048,000 we spent \$5,317,000, \$5,585,000, \$5,667,000 on pre-development and entitlement costs on our Centennial, MV, and Grapevine projects, respectively. We used \$7,023,000 for the development of two multi-tenant buildings along with supporting infrastructure projects over at TRCC. We invested \$2,583,000 into our farming segment for the development of new almond and wine grape crops along with acquiring new farming equipment. We invested \$1,199,000 into water related projects including water turnouts and wells that will ultimately support our real estate and farming operations. The remainder of the capital investments primarily relate to capital equipment used as part of our ranch operations and corporate segments. Outside of capital projects, we acquired \$15,574,000 in marketable securities. Offsetting our cash outlays are maturities and sales of marketable securities of \$24,157,000, distributions from our joint venture partners of \$1,100,000, and reimbursements from TRPFFA for qualifying infrastructure projects of \$4,971,000,

Our estimated capital investment for 2017 is primarily related to our real estate projects as it was in 2016. These estimated investments include approximately \$8,430,000 of infrastructure development at TRCC-East and West to support continued commercial retail and industrial development and to expand water facilities to support future anticipated absorption. It is assumed we will invest up to \$1,600,000 into the Majestic joint venture as equity for completion of a new building. We are also investing approximately \$1,420,000 to begin development of a new almond orchard and the acquisition of new farming equipment. The farm investments are part of a long-term farm management program to redevelop declining orchards and vineyards to maintain and improve future farm revenues. We expect to possibly invest up to \$19,950,000 for land planning, entitlement activities, and development activities at MV, Centennial, and Grapevine during 2017. The timing of these investments is dependent on our coordination efforts with Los Angeles County regarding entitlement efforts for Centennial, litigation and permitting activities for Grapevine, and tentative tract maps for MV. Our plans also call for the potential investment of up to \$1,300,000 in water infrastructure and as opportunities arise to help secure additional water assets for real estate, farming, and as an investment. We are also planning to potentially invest up to \$900,000 in the normal replacement of operating equipment, such as ranch equipment, and updates to our information technology systems.

During 2016, financing activities provided \$3,985,000 through \$20,700,000 in drawdowns from our line of credit offset by paydowns of \$13,815,000 on our line of credit and long-term borrowings.

During 2015, financing activities used \$8,015,000 resulting from borrowing \$17,540,000 on our line of credit offset by payments of \$24,390,000 on our line of credit and long-term borrowings.

It is difficult to accurately predict cash flows due to the nature of our businesses and fluctuating economic conditions. Our earnings and cash flows will be affected from period to period by the commodity nature of our farming and mineral operations, the timing of sales and leases of property within our development projects, and the beginning of development within our residential projects. The timing of sales and leases within our development projects is difficult to predict due to the time necessary to complete the development process and negotiate sales or lease contracts. Often, the timing aspect of land development can lead to particular years or periods having more or less earnings than comparable periods. Based on our experience, we believe we will have adequate cash flows, cash balances, and availability on our line of credit over the next twelve months to fund internal operations. As we move forward with the completion of the entitlement process for our master planned communities and prepare to move into the development stage, we will need to secure additional funding through the issuance of equity and secure other forms of financing such as joint ventures and possibly debt financing.

Capital Structure and Financial Condition

At December 31, 2016, total capitalization at book value was \$415,873,000 consisting of \$81,406,000 of debt, net of deferred financing costs, and \$334,467,000 of equity, resulting in a debt-to-total-capitalization ratio of approximately 19.6%, which is an increase when compared to the debt-to-total-capitalization ratio of 18.2% at December 31, 2015. On October 13, 2014, the Company as borrower, entered into an Amended and Restated Credit Agreement, a Term Note and a Revolving Line of Credit Note, with Wells Fargo, or collectively the Credit Facility. The Credit Facility adds a \$70,000,000 term loan, or Term Loan, to the existing \$30,000,000 revolving line of credit, or RLC. Funds from the Term Loan were used to finance the Company's purchase of DMB TMV LLC's interest in MV as disclosed in the Current Report on Form 8-K filed on July 16, 2014. The Term Loan had a \$69,439,000 balance as of December 31, 2016. Any future borrowings under the RLC will be used for ongoing working capital requirements and other general corporate purposes. To maintain availability of funds under the RLC, undrawn amounts under the RLC will accrue a commitment fee of 10 basis points per annum. The Company's ability to borrow additional funds in the future under the RLC is subject to compliance with certain financial covenants and making certain representations and warranties. At the Company's option, the interest rate on the RLC can float at 1.50% over a selected LIBOR rate or can be fixed at 1.50% above LIBOR for a fixed rate term. During the term of this credit facility (which matures in September 2019), we can borrow at any time and partially or wholly repay any outstanding borrowings and then re-borrow, as necessary. The outstanding balance on the RLC was \$7,700,000 and \$0 as of December 31, 2016 and 2015, respectively. The interest rate per annum applicable to the Term Loan is LIBOR (as defined in the Term Note) plus a margin of 170 basis points. The interest rate for the term of the note has been fixed through the use of an interest rate swap at a rate of 4.11%. We utilize an interest rate swap agreement to hedge our exposure to variable interest rates associated with our term loan. The Term Loan requires interest only payments for the first two years of the term and thereafter

requires monthly amortization payments pursuant to a schedule set forth in the Term Note, with the final outstanding principal amount due October 5, 2024. TRC may make voluntary prepayments on the Term Loan at any time without penalty (excluding any applicable LIBOR or interest rate swap breakage costs). Each optional prepayment will be applied to reduce the most remote principal payment then unpaid. The Credit Facility is secured by TRC's farmland and farm assets, which include equipment, crops and crop receivables and the power plant lease and lease site, and related accounts and other rights to payment and inventory.

The Credit Facility requires compliance with three financial covenants: (a) total liabilities divided by tangible net worth not greater than 0.75 to 1.0 at each quarter end; (b) a debt service coverage ratio not less than 1.25 to 1.00 as of each quarter end on a rolling four quarter basis; and (c) maintain liquid assets equal to or greater than \$20,000,000. At December 31, 2016, we were in compliance with the financial covenants.

The Credit Facility also contains customary negative covenants that limit the ability of TRC to, among other things, make capital expenditures, incur indebtedness and issue guaranties, consummate certain assets sales, acquisitions or mergers, make investments, pay dividends or repurchase stock, or incur liens on any assets.

The Credit Facility contains customary events of default, including: failure to make required payments; failure to comply with terms of the Credit Facility; bankruptcy and insolvency; and a change in control without consent of bank (which consent will not be unreasonably withheld). The Credit Facility contains other customary terms and conditions, including representations and warranties, which are typical for credit facilities of this type.

We also have a \$4,750,000 promissory note agreement with principal and interest due monthly starting on October 1, 2013. The interest rate on this promissory note is 4.25% per annum, with principal and interest payments ending on September 1, 2028. The balance as of December 31, 2016 is \$3,961,000. The proceeds from this promissory note were used to eliminate debt that had been previously used to provide long-term financing for a building being leased to Starbucks and provide additional working capital for future investment.

Our current and future capital resource requirements will be provided primarily from current cash and marketable securities, cash flow from on-going operations, proceeds from the sale of developed and undeveloped parcels, potential sales of assets, additional use of debt, proceeds from the reimbursement of public infrastructure costs through CFD bond debt (described below under "Off-Balance Sheet Arrangements"), and the issuance of common stock. In April 2016, we filed an updated shelf registration statement on Form S-3 that went effective in May 2016. Under the shelf registration statement, we may offer and sell in the future one or more offerings, common stock, preferred stock, debt securities, warrants or any combination of the foregoing. The shelf registration allows for efficient and timely access to capital markets and when combined with our other potential funding sources just noted, provides us with a variety of capital funding options that can then be used and appropriately matched to the funding need.

On August 7, 2013, the Company announced that its Board of Directors declared a dividend of 3,000,000 warrants to purchase shares of Company common stock, par value \$0.50 per share, or Warrants, to holders of record of Common Stock as of August 21, 2013, the Record Date. The Warrants were distributed to shareholders on August 28, 2013. Each Warrant entitled the holder to purchase one share of Common Stock at an initial exercise price of \$40.00 per share and expired unexercised on August 31, 2016.

As noted above, at December 31, 2016, we had \$27,933,000 in cash and securities and as of the filing date of this Form 10-K, we have \$22,300,000 available on credit lines to meet any short-term liquidity needs.

We continue to expect that substantial investments will be required in order to develop our land assets. In order to meet these capital requirements, we may need to secure additional debt financing and continue to renew our existing credit facilities. In addition to debt financing, we will use other capital alternatives such as joint ventures with financial partners, sales of assets, and the issuance of common stock. We will use a combination of the above funding sources to properly match funding requirements with the assets or development project being funded. There is no assurance that we can obtain financing or that we can obtain financing at favorable terms. We believe we have adequate capital resources to fund our cash needs and our capital investment requirements in the near-term as described earlier in the cash flow and liquidity discussions.

Contractual Cash Obligations

The following table summarizes our contractual cash obligations and commercial commitments as of December 31, 2016, to be paid over the next five years:

(\$ in thousands)	Payments Due by Period				
	Total	Less than a year	1-3 years	3-5 years	More than 5 years
Contractual Obligations:					
Estimated water payments	\$271,135	\$8,240	\$16,917	\$17,527	\$228,451
Long-term debt	73,867	3,854	8,116	8,549	53,348
Interest on long-term debt	18,767	2,954	5,439	4,764	5,610
Cash contract commitments	4,650	2,441	1,138	—	1,071
Defined Benefit Plan	3,252	181	424	526	2,121
SERP	5,023	503	991	970	2,559
Tejon Ranch Conservancy	4,000	800	1,600	1,600	—
Financing fees	163	163	—	—	—
Total contractual obligations	\$380,857	\$19,136	\$34,625	\$33,936	\$293,160

The categories above include purchase obligations and other long-term liabilities reflected on our balance sheet under GAAP. A “purchase obligation” is defined in Item 303(a)(5)(ii)(D) of Regulation S-K as “an agreement to purchase goods or services that is enforceable and legally binding the registrant that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction.” Based on this definition, the table above includes only those contracts that include fixed or minimum obligations. It does not include normal purchases, which are made in the ordinary course of business.

Our financial obligations to the Tejon Ranch Conservancy are prescribed in the Conservation Agreement. Our advances to the Tejon Ranch Conservancy are dependent on the occurrence of certain events and their timing, and are therefore subject to change in amount and period. The amounts included above are the minimum amounts we anticipate contributing through the year 2021, at which time our current contractual obligation terminates.

As discussed in Note 15 (Retirement Plans) of the Notes to Consolidated Financial Statements, we have long-term liabilities for deferred employee compensation, including pension and supplemental retirement plans. Payments in the above table reflect estimates of future defined benefit plan contributions from the Company to the plan trust, estimates of payments to employees from the plan trust, and estimates of future payments to employees from the Company that are in the SERP program. During 2016, we did not make any pension contributions and it is projected that there will be no required contributions in 2017.

Our cash contract commitments consist of contracts in various stages of completion related to infrastructure development within our industrial developments and entitlement costs related to our industrial and residential development projects. Also, included in the cash contract commitments are estimated fees earned during the second quarter of 2014 by a consultant, related to the entitlement of the Grapevine Development Area. The Company exited a consulting contract during the second quarter of 2014 related to the Grapevine Development and is obligated to pay an earned incentive fee at the time of successful receipt of litigated project entitlements and at a value measurement date five-years after entitlements have been achieved for Grapevine. The final amount of the incentive fees will not be finalized until the future payment dates. The Company believes that net savings from exiting the contract over this future time period will more than offset the incentive payment costs.

Estimated water payments include SWP contracts with Wheeler Ridge Maricopa Water Storage District, Tejon-Castac Water District, Tulare Lake Basin Water Storage District, and Dudley-Ridge Water Storage District. These contracts for the supply of future water run through 2035. In addition, in late 2013 we purchased the assignment of a contract to purchase water. The assigned water contract is with Nickel Family, LLC and obligates us to purchase 6,693 acre-feet of water starting in 2014 and running through 2044. Please refer to Note 6 (Long-Term Water Assets) of the Notes to Consolidated Financial Statements for additional information regarding water assets.

Our operating lease obligations are for office equipment, several vehicles, and a temporary trailer providing office space and average approximately \$25,000 per month. At the present time, we do not have any capital lease obligations

or purchase obligations outstanding.

42

Off-Balance Sheet Arrangements

The following table shows contingent obligations we have with respect to the CFDs.

(\$ in thousands)	Amount of Commitment Expiration Per Period				
	Total	< 1 year	2 -3 Years	4 -5 Years	After 5 Years
Other Commercial Commitments:

Total other commercial commitments	\$4,921	\$4,921	\$ —	\$ —	\$ —

TRPFFA is a joint powers authority formed by Kern County and TCWD to finance public infrastructure within the Company's Kern County developments. TRPFFA created two CFDs, the West CFD and the East CFD. The West CFD has placed liens on 420 acres of the Company's land to secure payment of special taxes related to \$28,620,000 of bond debt sold by TRPFFA for TRCC-West. The East CFD has placed liens on 1,931 acres of the Company's land to secure payments of special taxes related to \$55,000,000 of bond debt sold by TRPFFA for TRCC-East. At TRCC-West, the West CFD has no additional bond debt approved for issuance. At TRCC-East, the East CFD has approximately \$65,000,000 of additional bond debt authorized by TRPFFA.

In connection with the sale of bonds there is a standby letter of credit for \$4,921,000 related to the issuance of East CFD bonds. The standby letter of credit is in place to provide additional credit enhancement and cover approximately two year's worth of interest on the outstanding bonds. This letter of credit will not be drawn upon unless the Company, as the largest landowner in the CFD, fails to make its property tax payments. As development occurs within TRCC-East there is a mechanism in the bond documents to reduce the amount of the letter of credit. The Company believes that the letter of credit will never be drawn upon. This letter of credit is for a two-year period of time and will be renewed in two-year intervals as necessary. The annual cost related to the letter of credit is approximately \$83,000. The assessment of each individual property sold or leased within each CFD is not determinable at this time because it is based on the current tax rate and the assessed value of the property at the time of sale or on its assessed value at the time it is leased to a third-party. Accordingly, the Company is not required to recognize an obligation at December 31, 2015.

At December 31, 2016, aggregate outstanding debt of unconsolidated joint ventures was \$97,318,000. We guarantee \$82,043,000 of this debt, relating to our joint ventures with Rockefeller and Majestic. Because of positive cash flow generation within the Rockefeller and Majestic joint ventures, we do not expect the guarantee to ever be called upon. We do not provide a guarantee on the \$15,275,000 of debt related to our joint venture with TA/Petro.

Non-GAAP Financial Measures

EBITDA represents earnings before interest, taxes, depreciation, and amortization, a non-GAAP financial measure, and is used by us and others as a supplemental measure of performance. We use Adjusted EBITDA to assess the performance of our core operations, for financial and operational decision making, and as a supplemental or additional means of evaluating period-to-period comparisons on a consistent basis. Adjusted EBITDA is calculated as EBITDA, excluding stock compensation expense. We believe Adjusted EBITDA provides investors relevant and useful information because it permits investors to view income from our operations on an unleveraged basis before the effects of taxes, depreciation and amortization, and stock compensation expense. By excluding interest expense and income, EBITDA and Adjusted EBITDA allow investors to measure our performance independent of our capital structure and indebtedness and, therefore, allow for a more meaningful comparison of our performance to that of other companies, both in the real estate industry and in other industries. We believe that excluding charges related to share-based compensation facilitates a comparison of our operations across periods and among other companies without the variances caused by different valuation methodologies, the volatility of the expense (which depends on market forces outside our control), and the assumptions and the variety of award types that a company can use. EBITDA and Adjusted EBITDA have limitations as measures of our performance. EBITDA and Adjusted EBITDA do not reflect our historical cash expenditures or future cash requirements for capital expenditures or contractual commitments. While EBITDA and Adjusted EBITDA are relevant and widely used measures of performance, they do not represent net income or cash flows from operations as defined by GAAP, and they should not be considered as alternatives to those indicators in evaluating performance or liquidity. Further, our computation of EBITDA and Adjusted EBITDA may not be comparable to similar measures reported by other companies.

	Year-Ended December 31,		
(\$ in thousands)	2016	2015	2014
Net income	\$515	\$2,912	\$5,762
Net income (loss) attributed to non-controlling interest	(43) (38) 107
Interest, net			
Consolidated	(457) (528) (696
Our share of interest expense from unconsolidated joint ventures	1,449	1,113	662
Total interest, net	992	585	(34
Income taxes	336	1,125	2,697
Depreciation and amortization:			
Consolidated	4,549	5,090	4,871
Our share of depreciation and amortization from unconsolidated joint ventures	3,630	2,878	2,390
Total deprecation and amortization	8,179	7,968	7,261
EBITDA	10,065	12,628	15,579
Stock compensation expense	4,585	3,757	3,534
Adjusted EBITDA	\$14,650	\$16,385	\$19,113

The Company utilizes net operating income (NOI) for its unconsolidated joint ventures as a measure of financial or operating performance that is not specifically defined by GAAP in the United States. We believe NOI of unconsolidated joint ventures provides investors with additional information concerning operating performance of our unconsolidated joint ventures. We also use this measure internally to monitor the operating performance of our unconsolidated joint ventures. Our computation of this non-GAAP measure may not be the same as similar measures reported by other companies. This non-GAAP financial measure should not be considered as an alternative to net income as a measure of the operating performance of our unconsolidated joint ventures or to cash flows computed in accordance with GAAP as a measure of liquidity nor are they indicative of cash flows from operating and financial activities of our unconsolidated joint ventures.

The following schedule reconciles net income from unconsolidated joint ventures to NOI.

(\$ in thousands)	Year-Ended December 31,		
	2016	2015	2014
Net income of unconsolidated joint ventures	\$11,782	\$10,523	\$8,944
Interest expense of unconsolidated joint ventures	2,757	2,135	1,227
Operating income of unconsolidated joint ventures	14,539	12,658	10,171
Depreciation and amortization of unconsolidated joint ventures	6,832	5,425	4,891
Net operating income of unconsolidated joint ventures	\$21,371	\$18,083	\$15,062

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact the financial position, results of operations, or cash flows of the Company due to adverse changes in financial or commodity market prices or rates. We are exposed to market risk in the areas of interest rates and commodity prices.

Financial Market Risks

Our exposure to financial market risks includes changes to interest rates and credit risks related to marketable securities, interest rates related to our outstanding indebtedness and trade receivables.

The primary objective of our investment activities is to preserve principal while at the same time maximizing yields and prudently managing risk. To achieve this objective and limit interest rate exposure, we limit our investments to securities with a maturity of less than five years and an investment grade rating from Moody's or Standard and Poor's. See Note 3 (Marketable Securities) of the Notes to Consolidated Financial Statements.

Our current RLC has an outstanding balance of \$7,700,000. The interest rate on the RLC can either float at 1.50% over a selected LIBOR rate or can be fixed at 1.50% above LIBOR for a fixed term for a limited period of time and change only at maturity of the fixed rate portion. The floating rate and fixed rate options within our RLC help us manage our interest rate exposure on any outstanding balances.

We are exposed to interest rate risk on our long-term debt. Long-term debt consists of two term loans, one for \$69,439,000 that is tied to LIBOR plus a margin of 1.70%. The interest rate for the term of this loan has been fixed through the use of an interest rate swap that fixed the rate at 4.11%. The outstanding balance on the second term loan is \$3,961,000 and has a fixed rate of 4.25%. We believe it is prudent at times to limit the variability of floating-rate interest payments and have from time-to-time entered into interest rate swap arrangements to manage those fluctuations, as we did with the new loan.

Market risk related to our farming inventories ultimately depends on the value of almonds, grapes, and pistachios at the time of payment or sale. Credit risk related to our receivables depends upon the financial condition of our customers. Based on historical experience with our current customers and periodic credit evaluations of our customers' financial conditions, we believe our credit risk is minimal. Market risk related to our farming inventories is discussed below in the section pertaining to commodity price exposure.

The following tables provide information about our financial instruments that are sensitive to changes in interest rates. The tables present our debt obligations and marketable securities and their related weighted-average interest rates by expected maturity dates.

Interest Rate Sensitivity Financial Market Risks

Interest Rate Sensitivity Financial Market Risks

Principal Amount by Expected Maturity

At December 31, 2015

(In thousands except percentage data)

	2016	2017	2018	2019	2020	Thereafter	Total	Fair Value
Assets:								
Marketable securities	\$8,257	\$9,068	\$13,315	\$2,335	\$—	\$—	\$32,975	\$32,815
Weighted average interest rate	1.14 %	1.54 %	1.89 %	2.16 %	— %	— %	1.40 %	
Liabilities:								
Long-term debt (\$4.75M note)	\$255	\$266	\$277	\$289	\$302	\$2,826	\$4,215	\$4,215
Weighted average interest rate	4.25 %	4.25 %	4.25 %	4.25 %	4.25 %	4.25 %	4.25 %	
Long-term debt (\$70.0M note)	\$561	\$3,393	\$3,563	\$3,715	\$3,881	\$54,887	\$70,000	\$70,000
Weighted average interest rate	4.11 %	4.11 %	4.11 %	4.11 %	4.11 %	4.11 %	4.11 %	

Our risk with regard to fluctuations in interest rates has decreased slightly related to marketable securities since these balances have decreased compared to the prior year.

Commodity Price Exposure

As of December 31, 2016, we have exposure to adverse price fluctuations associated with certain inventories and accounts receivable. Farming inventories consist of farming cultural and processing costs related to 2016 and 2015 crop production. The farming costs inventoried are recorded at actual costs incurred. Historically, these costs have been recovered each year when that year's crop harvest has been sold.

With respect to accounts receivable, the amount at risk relates primarily to farm crops. These receivables are recorded as estimates of the prices that ultimately will be received for the crops. The final price is generally not known for several months following the close of our fiscal year. Of the \$8,740,000 of accounts receivable outstanding at December 31, 2016, \$6,000,000 or 69%, is at risk to changing prices. Of the amount at risk to changing prices, \$4,136,000 is attributable to pistachios, and \$1,864,000 is attributable to almonds.

The price estimated for recording accounts receivable for pistachios recorded at December 31, 2016 was \$2.03 per pound, as compared to \$2.88 per pound at December 31, 2015. For each \$0.01 change in the price of pistachios, our receivable for pistachios increases or decreases by \$20,406. Although the final price of pistachios (and therefore the extent of the risk) is not presently known, over the last three years prices have ranged from \$2.88 to \$4.25. With respect to almonds, the price estimated for recording the receivable was \$2.51 per pound, as compared to \$3.34 per pound at December 31, 2015. For each \$0.01 change in the price of almonds, our receivable for almonds increases or decreases by \$6,469. The range of final prices over the last three years for almonds has ranged from \$2.51 to \$3.97 per pound.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The response to this Item is submitted in a separate section of this Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

9. FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer and Controller, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that all information required in the reports we file or submit under the Exchange Act was accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure and was recorded, processed, summarized and reported within the time period required by the rules and regulations of the SEC.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

See Management's Report on Internal Control Over Financial Reporting and the Report of Independent Registered Public Accounting Firm On Internal Control over Financial Reporting following ITEM 15(a)(2) - FINANCIAL STATEMENT SCHEDULES of this Form 10-K.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information as to our Executive Officers is set forth in Part I, Item 1 of this Form 10-K under "Executive Officers of the Registrant." The other information required by this Item is incorporated by reference from the definitive proxy statement to be filed by us with the SEC with respect to our 2017 Annual Meeting of Stockholders and will be found under the captions "The Election of Directors," "Section 16(a) Beneficial Ownership Reporting Compliance," "Code of Business Conduct and Ethics and Corporate Governance Guidelines," and "Corporate Governance Matters."

ITEM 11. EXECUTIVE COMPENSATION

Information required by this Item is incorporated by reference from the definitive proxy statement to be filed by us with the SEC with respect to our 2017 Annual Meeting of Stockholders.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

(a) Security Ownership of Certain Beneficial Owners and Management.

Information required by this Item with respect to security ownership of certain beneficial owners and management is incorporated by reference from the definitive proxy statement to be filed by us with the SEC with respect to our 2017 Annual Meeting of Stockholders and will be found under the caption "Stock Ownership of Certain Beneficial Owners and Management."

(b) Securities Authorized for Issuance under Equity Compensation Plans.

The following table shows aggregated information as of December 31, 2016 with respect to all of our compensation plans under which our equity securities were authorized for issuance. At December 31, 2016, we had, and we presently have, no other compensation contracts or arrangements for the issuance of any such equity securities and there were then, and continue to be, no compensation plans, contracts or arrangements which were not approved by our stockholders. More detailed information with respect to our compensation plans is included in Note 11 (Stock Compensation - Restricted Stock and Performance Share Grants) of the Notes to Consolidated Financial Statements.

Equity compensation plans approved by security holders *	Number of securities to be issued upon exercise of outstanding grants	Weighted-average exercise price of outstanding grants	Number of securities remaining available for future issuance under equity compensation plans (excluding securities) reflected in column (a)
	(a)	(b)	(c)
Restricted stock grants and restricted stock units at target goal achievement	429,064	Final price determined at time of vesting	826,886

* The Company does not use equity compensation plans that have not been approved by the security holders.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by this Item is incorporated by reference from the definitive proxy statement to be filed by us with the SEC with respect to our 2017 Annual Meeting of Stockholders and will be found under the captions "Related Person Transactions" and "Corporate Governance Matters."

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information required by this Item is incorporated by reference from the definitive proxy statement to be filed by us with the SEC with respect to our 2017 Annual Meeting of Stockholders and will be found under the caption "Independent Registered Public Accounting Firm".

All schedules for which provision is made in the applicable accounting regulation of the Securities and Exchange Commission are not required under the related instructions or are inapplicable, and therefore have been omitted.

Management's Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined in Rule 13a-15(f) of the Exchange Act, internal control over financial reporting is a process designed by, or supervised by, the Company's principal executive and principal financial officers and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

The Company's internal control over financial reporting is supported by written policies and procedures, that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Company's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In connection with the preparation of the Company's annual financial statements, under the supervision and with the participation of the Company's management, including its Chief Executive Officer, Chief Financial Officer, and Chief Accounting Officer, management of the Company has undertaken an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2016 based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework), or COSO. Management's assessment included an evaluation of the design of the Company's internal control over financial reporting and testing of the operational effectiveness of the Company's internal control over financial reporting.

Based on this assessment, management did not identify any material weakness in the Company's internal control, and management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2016.

Ernst & Young LLP, the independent registered public accounting firm that audited the Company's financial statements included in this report, has issued a report on the effectiveness of internal control over financial reporting, a copy of which follows.

Report of Independent Registered Public Accounting Firm
On Internal Control over Financial Reporting

The Board of Directors and Stockholders of
Tejon Ranch Co. and Subsidiaries

We have audited Tejon Ranch Co. and Subsidiaries' internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) (the COSO criteria). Tejon Ranch Co. and Subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Tejon Ranch Co. and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Tejon Ranch Co. and Subsidiaries as of December 31, 2016 and 2015 and the related consolidated statements of operations, comprehensive income, equity and cash flows for each of the three years in the period ended December 31, 2016 of Tejon Ranch Co. and Subsidiaries and our report dated March 10, 2017 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP
Los Angeles, California
March 10, 2017

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders of
Tejon Ranch Co. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Tejon Ranch Co. and Subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2016. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Tejon Ranch Co. and Subsidiaries at December 31, 2016 and 2015, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Tejon Ranch Co. and Subsidiaries' internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) and our report dated March 10, 2017 expressed an unqualified opinion thereon.
